Where the Fund has a short track record, the ratios shown may be based upon the historic data of the Fund as well as a representative fund or the ratio may be calculated over a shorter time period.

Charges

Initial charge	0.00%
Ongoing Charges Figure*	0.85%
Included within the OCF is the Annual Management Charge**	0.75%

*The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees and the ongoing costs of underlying investments including open and closed ended collective investment schemes. The OCF **excludes** portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term.

**These are the annual costs of running and managing the Fund.

Important information

Key Risks: We recommend this fund is held long term (minimum period of 5 years). We recommend that you hold this fund as part of a diversified portfolio of investments. Overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund. Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result. The creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay. This Fund may have a concentrated portfolio, i.e. hold a limited number of investments or have significant sector or factor exposures. If one of these investments or sectors / factors fall in value this can have a greater impact on the Fund's value than if it held a larger number of investments across a more diversified portfolio. The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings. The Fund will invest in smaller companies and may invest a small proportion (less than 10%) of the Fund in unlisted securities. There may be liquidity constraints in these securities from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares. Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. International banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash. Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails. The issue of units/shares in Liontrust Funds may be subject to an initial charge, which will have an impact on the realisable value of the investment, particularly in the short term. Investments should always be considered as long term.

Disclaimer: This document provides information about the Liontrust Balanced Fund ('the Fund') and Liontrust Fund Partners LLP ('the Manager'). This document is issued by Liontrust Investment Partners LLP (2 Savoy Court, London WC2R 0EZ), authorised and regulated in the UK by the Financial Conduct Authority (FRN 518552) to undertake regulated investment business. This document does not constitute or form part of, and should not be construed as, an invitation to buy or sell units and neither this document nor anything contained or referred to in it shall form the basis of, or be relied on in connection with, any offer or commitment whatsoever. The value of units and the income generated from them can fall as well as rise and are not guaranteed; investors may not get back the amount originally subscribed. Equity investments should always be considered as long term. Investors should not purchase the Fund referred to in this document except on the basis of information contained in the Fund's Prospectus. We recommend that investors who are not professional investors should contact their professional adviser.
