## Company Investment Objectives and Policy

The Company's investment objective is to invest in mid cap equities with the aim of providing a total return in excess of the FTSE 250 (ex Investment Companies) Index.

Above is the Investment Objective of the fund. For details on the fund's Investment Policy please see the KID.

The latest Annual Report includes the investment policy which you should read in conjunction with the KID before investing, these are available on our Schroders website. Relevant risks associated with an investment in this Company are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

### 10 year return of GBP 10,000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are based on the share price. Share price performance figures are calculated on a mid-market basis in GBP with income reinvested on the ex-dividend date.

### Risk considerations

The Company may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the company, both up or down, which may adversely impact the performance of the company. As a result of fees being charged to capital, the distributable income of the company may be higher but there is the potential that performance or capital value may be eroded. The Company may borrow money to invest in further investments, this is known as gearing. Gearing will increase returns if the value of the investments purchased increase in value by more than the cost of borrowing, or reduce returns if they fail to do so. **Gearing risk:** - The company may borrow money to make further investments, this is known as gearing. Gearing will increase returns if the value of the investments purchased increase by more than the cost of borrowing, or reduce returns if they fail to do so. In falling markets, the whole of the value in that investment could be lost, which would result in losses to the fund.
