Risks

WS Guinness Global Equity Income Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund should be viewed as a medium to long-term investment only. As the portfolio is concentrated, this has the potential to increase the volatility of performance. Details on the risk factors are included in the Fund's documentation, available on the website www.waystone.com. If you are in any doubt about the suitability of investing in this Fund, please consult your investment or other professional adviser.

Source: FE fundinfo to 31.05.24. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF for the share class used for the fund performance returns is 0.79%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return.

Historic yield reflects the distributions declared over the past 12 months expressed as a percentage of the mid-market price, as at the latest month end. It does not include any preliminary charges. Investors may be subject to tax on the distribution.

Fund Profile

Aim

Income and long-term capital growth

Investment Case

Provides global exposure to dividend paying companies. Dividend payers outperform in the long term, dividend growers even more so. Dividend paying companies can protect against inflation over the long term

Process

Starting point is quality, not yield. Focus on profitable companies generating persistently high return on capital over the last decade.

Portfolio

Concentrated, typically equally-weighted portfolio of 35 stocks, which reduces stock-specific risk and instils a strong sell discipline. Low turnover; minimum \$1bn market cap; no benchmark-driven constraints on sector and regional weightings.

Investment Objective

An equity fund investing primarily in global equities which provide a yield above the yield of the benchmark (MSCI World Index).

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free. The fund has been classed as 5 because its volatility has been measured as above average.
