**iShares Developed World Fossil Fuel
Screened Equity Index Fund (UK)**

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00BFK3MT6 1

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return (gross of charges) on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the MSCI World Select Fossil Fuel Screened Index (the "Index").
- ▶ The Fund invests in equity securities (e.g. shares) of companies that make up the Index. There may be occasions where direct investment in equity securities is not possible or in investors' best interests, however it is expected that the usage of indirect investment (e.g. through financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) and other funds) by the Fund will be limited.
- ▶ The Index measures the performance of a subset of equity securities within the MSCI World Index (the Parent Index) which comply with the Index provider's environmental, social and governance (ESG) screens. The Parent Index measures the performance of large and mid-capitalisation stocks across developed markets globally.
- ▶ The Index seeks to limit and/or exclude companies from the Parent Index which have exposure to, or other ties with, certain business lines/activities including but not limited to (i) thermal coal, (ii) oil sands, (iii) oil and gas (excluding certain issuers that derive at least half of their revenue from renewable energy and alternative fuels), (iv) fossil fuel reserves, (v) controversial and nuclear weapons, (vi) civilian firearms or small arms ammunition, and (vii) tobacco. The Index also intends to exclude companies which have failed to comply with the UN Global Compact Principles (which covers human rights, labour standards, the environment and anti-corruption).
- ▶ The Fund will take into account ESG screens only when selecting the securities to be held directly by the Fund. The Fund may obtain indirect exposure (e.g. through financial derivative instruments and other funds) to securities considered not to satisfy these ESG screens.
- ▶ The Index is a free float-adjusted market capitalisation weighted Index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the Index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so will take into consideration the Index.
- ▶ The Fund intends to replicate the Index by holding the equity securities, which make up the Index, in similar proportions to the Index.
- ▶ The Fund's investments will, at the time of purchase, comply with the ESG screens of the Index. Where the securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the index and it is practicable to sell them. The Fund may also engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Investors should therefore make a personal ethical assessment of the benchmark index's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.12%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2020. The unit class was launched in 2020.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
