

Key investor information.

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Triodos Global Equities Impact Fund, a sub-fund of Triodos SICAV I.

GBP Class K retail-distribution - ISIN LU0785617266.

This fund is an undertaking for collective investment in transferable securities and is managed by Triodos Investment Management BV.

Objectives and investment policy.

Investment objective

Triodos Global Equities Impact Fund aims to increase the value of your investment over the long term, while seeking to maximise positive impact on society and the environment. The fund has sustainable investment as its objective as set out in article 9 SFDR.

Investment policy

The fund mainly invests in equities of companies in developed countries and whose products or services contribute to at least one of the following transitions (as defined by Triodos): resource transition, energy transition, food transition, societal transition or wellbeing transition. Issuers that do not meet the Triodos sustainability standards are excluded from investment. At least 67% of the fund's net assets are invested in shares of large cap companies and up to 33% of its net assets in shares of small and mid cap companies.

The fund is actively managed. It compares its returns with the MSCI World Index, which it does not aim to replicate or outperform. The fund may deviate from the benchmark because it only invests in companies that meet strict sustainability criteria.

Other information

- Investors may subscribe and redeem units on any valuation day.
- Distribution shares may pay a dividend to their holders whereas capitalisation shares capitalise their entire earnings.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile.

Lower risk ← Higher risk
Typically lower rewards Typically higher rewards

The risk and reward indicator is based on the volatility of the fund. Historical data may not be a reliable indicator of the future risk profile of the fund. The above risk and reward category is not fixed and may shift over time. The lowest category does not mean a risk-free investment.

Equity funds in general are more volatile than bond funds. Equity funds with a global focus on developed markets are well diversified over countries and sectors making them less sensitive to price movements within the equity fund range.

Other risks relevant to the investor

- Currency risk arises because investments by the fund may be denominated either in euros or in foreign currencies. In principle, the fund does not hedge the currency risk of these investments.
- The fund is subject to market risk, which is the risk caused by changes in the price of the investments. The fund mitigates this risk by means of careful selection and diversification of investments.

For a complete overview of all the risks attached to this fund, please refer to the section Risk Descriptions in the prospectus.
