

FTGF ClearBridge Infrastructure Value Fund

Class X GBP DIS (Q) • ISIN IE00BDBBPZ26

A subfund of: Franklin Templeton Global Funds plc (the "Company")

Managed by: Franklin Templeton International Services S.à.r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The Fund's investment objective is to achieve long-term stable growth comprised of regular and consistent income from dividends and interest, plus capital growth, from a portfolio of global infrastructure securities.

Investment Policy

- The Fund will invest at least 80% of its net asset value in infrastructure companies via equity and equity-related securities listed or traded on regulated markets in the United States, United Kingdom, Japan, Germany, France, Italy and Canada, and equity and equity-related securities listed or traded on regulated markets of other developed countries and emerging market countries, including India ("OECD G7"). The Fund invests in a number of infrastructure sectors such as utilities, transport, community and social infrastructure and communications.
- The Fund will typically be invested in 30 to 60 companies.
- The Fund may also invest in certain eligible China A-Shares via the Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect.
- The Fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

- This is an Article 8 fund under the EU Sustainable Finance Disclosure Regulation.

- **Benchmark:** OECD G7 Inflation Index +5.5%

- **Manager's Discretion:** The Fund is actively managed. The investment manager uses the benchmark as its target return for the fund – over the long term the investment manager seeks to provide an average annual return of the OECD G7 Inflation Index (which return will vary over time) plus 5.5%. There is no guarantee that the investment manager will meet its target, and the target does not take into account the fees charged, which will reduce the fund's return. The benchmark does not constrain the investment manager's management of the fund.

Fund's Base Currency: EUR
Share Class Currency: GBP

- **Transaction Costs:** The Fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 1,000.

Treatment of Income: For this share class all, or some portion of, net income is declared and paid quarterly to shareholders.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund invests mainly in shares of infrastructure companies from various countries and sectors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Hedging: The fund may use derivatives to reduce the risk of movements in exchange rates between the currency of the investments held by the fund and base currency of the fund itself (hedging). However, hedging transactions can also expose the fund to additional risks, such as the risk that the counterparty to the transaction may not be able to make its payments, which may result in loss to the fund.

Investment in China: The fund invests in China and is subject to the risk of significant change in political, social or economic policy in China, which may negatively affect the value of such investments.

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investment in infrastructure: The fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the company's shares.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over a year

Ongoing charge	1.05%
-----------------------	-------

Charges taken from the Fund under certain specific conditions

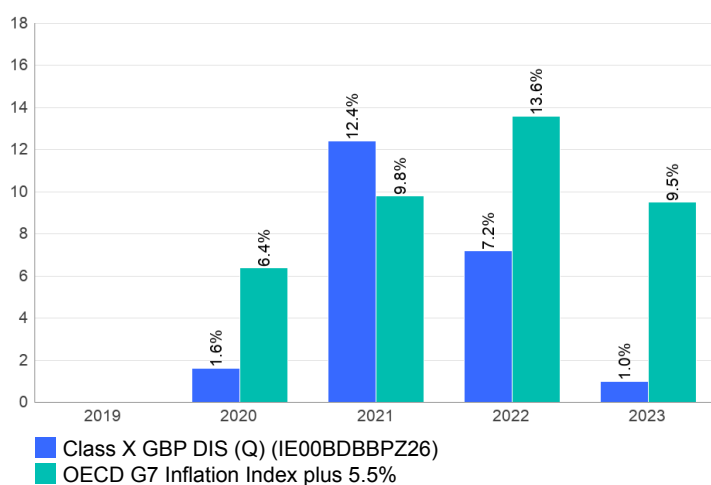

Performance fee	none
------------------------	------

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2023. This figure may vary over time.

For more information about charges, please see the "Fees and Expenses" sections of the base prospectus and fund supplement.
