

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

BlackRock Market Advantage Fund

Class D Accumulating GBP

ISIN: GB00BS7K6668

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) which exceeds 3 month Sterling Overnight Index Average Rate (SONIA) compounded in arrears by 3.5 % per annum (gross of fees) over the medium to long term (3 to 5 consecutive years). Compounding in arrears is a methodology that compounds daily values of the overnight rate throughout the relevant term period (i.e.3 Months).
- ▶ The Fund will invest on a global basis in any or all of the following asset classes: equity securities (e.g. shares), fixed income securities (e.g. bonds), permitted money-market instruments (e.g. debt instruments with short-term maturities), permitted deposits, cash, other funds and derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The above-mentioned asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the investment adviser's (IA) discretion.
- ▶ The fixed income securities and money market instruments may be issued by governments, government agencies, companies and supranationals (e.g. The International Bank for Reconstruction and Development). The Fund may invest in a full range of fixed income securities and money market instruments which may include investments with a relatively low credit rating or which are unrated.
- ▶ The Fund may invest up to 100% of its net asset value in other funds to help achieve its investment objective.
- ▶ The IA may use derivatives to help achieve the Fund's investment objective. Derivatives may be used to gain indirect exposure to commodities (such as precious metals and agricultural produce) and property.
- ▶ The Fund may, via the use of derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ At any one time, a substantial amount of the Fund's assets may be held as cash to provide cover for the exposure created by the use of derivatives or to assist in achieving its investment objective.
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. 3 month SONIA compounded in arrears (plus 3.5% per annum (gross of fees) should be used by unitholders to compare the performance of the Fund.
- ▶ The Fund also has a comparator benchmark of 30% MSCI All Country World Index with Developed Markets (100% Hedged to GBP) / 70% Bloomberg Global Aggregate Index (GBP Hedged) which can be used by unitholders as an alternative performance measure to assess performance in the Fund, which the IA considers better reflects the market risk embedded in the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 30 April 2024. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.44%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2015. The unit class was launched in 2015.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†13 Month SONIA Compounded in Arrears + 3.5% (gross of fees) (GBP)

Prior to 13.12.2021, the Fund used a different benchmark which is reflected in the benchmark data.

Historic performance to 31 December 2023

During this period performance was achieved under circumstances that no longer apply.

Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Fund. These documents are available free of charge in English.
