

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

VanEck Morningstar US SMID Moat UCITS ETF (the "Fund")

a sub-fund of VanEck UCITS ETFs plc (the "Company")

Share Class: USD A ISIN: IE000SBU19F7

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The Fund's investment objective is to track, before fees and expenses, the price and yield performance of the Morningstar® US Small-Mid Cap Moat Focus Index™ (the "Index"). In order to seek to achieve its investment objective, the Manager will normally use a replication strategy by investing directly in the underlying equity securities of the Index being the equity stocks, American depository receipts (ADRs), and global depository receipts (GDRs) that consists of the component securities of the Index.

The Fund may also (or alternatively) invest in financial derivative instruments (FDIs) which relate to the Index or constituents of the Index. The FDIs which the Fund may use are futures, options (puts and calls), swaps (including equity swaps and swaps on the Index), currency forwards and non-deliverable forwards (a forward contract that does not require settlement on maturity) (NDFs).

The Fund may also invest in ancillary liquid assets and money market instruments which may include bank deposits, depository receipts, certificates of deposit, fixed or floating rate instruments (treasury bills), commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix II of the Prospectus.

The Fund may not invest more than 10% of its Net Asset Value in open-ended

collective investment schemes.

Furthermore, the Fund may not invest less than 51% of its Net Asset Value in equity securities which constitute "equity participation" within the meaning of section 2, Article 8 of the German Investment Tax Act.

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Investment Manager will regularly monitor the Fund's tracking accuracy.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

• Fund's base currency: U.S. Dollar

• Distribution policy: Income accumulated

The shares are admitted for trading on various stock exchanges and can be traded on the secondary market. The price of the shares offered on the secondary market may deviate from the net asset value of the shares. The return of the Fund is directly related to the return of the underlying assets minus the costs associated with the Fund. If the performance of the underlying assets decreases, the performance of the Fund will also decrease. There is no capital protection against Market Risk.

Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 7 because funds of this type have experienced very high rises and falls in value in the past.

The following risks can be materially relevant but are not necessarily adequately

captured by the synthetic risk indicator and may cause additional loss:

- **Equity Market Risk:** The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.
- **Risk of investing in smaller companies:** The securities of smaller companies may be more volatile and less liquid than the securities of large companies. Smaller companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities.

For more information on risks, please see the "Risk Factors" section of the Fund's prospectus, available on www.vaneck.com.
