BlackRock ESG Strategic Growth Fund

A sub-fund of BlackRock Investment Funds

Class D Accumulating GBP

ISIN: GB00BFBFWY68

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The aim of the Fund is to provide, over a period of 7 years, a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) of 4.5% per year on a gross basis (i.e. before deduction of Ongoing Charges) over the Bank of England's Base Interest Rate (as set by the Monetary Policy Committee) in a manner consistent with the principles of environmental, social and governance (ESG)-focused investing.
- ▶ In addition, the Fund aims to manage its portfolio of investments with a view to having a volatility of return (i.e. the degree of fluctuation of the Fund's returns) that is lower than the volatility of the monthly returns (converted into an annual rate) of the MSCI All Country World Index (GBP) over a 7 year period. The MSCI All Country World Index (GBP) measures the performance of large and mid-capitalisation developed and emerging market equities in Pound Sterling terms. The components of the index are weighted by market capitalisation. Market capitalisation, in this case, is the share price of the company multiplied by the number of shares readily available in the market.
- ▶ Although the Fund aims to achieve its investment objective, there is no guarantee that this will be achieved and the Fund may experience loss and/or higher or lower volatility of return. The Fund's capital is at risk, meaning that the Fund could suffer a decrease in value and the value of your investment would decrease as a result. The investment manager (IM) will typically determine the Fund's portfolio based on its long-term (5-7 year) outlook.
- ▶ The Fund invests on a global basis directly, or indirectly through derivatives and funds, in fixed income securities (such as bonds), money-market instruments (i.e. debt securities with short term maturities), equity securities (e.g. shares), derivatives (i.e. investments the prices of which are based on one or more underlying assets), funds, deposits and cash.
- ▶ The fixed income securities and money-market instruments will be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may include investments with a relatively low credit rating or which are unrated.
- ▶ The IM will also take into account ESG characteristics when selecting the Fund's investments. The IA intends to exclude direct investment in issuers which have certain levels of exposure to, or ties with, sectors including controversial weapons, nuclear weapons, civilian firearms, tar sands, thermal coal, tobacco and issuers that are deemed to have breached one or more of the UN Global Compact Principles. For further details regarding these ESG characteristics (and the applicable levels) please refer to the Fund's prospectus and the BlackRock website at <https://www.blackrock.com/corporate/literature/publication/blackrock-baseline-screens-in-europe-middleeast-and-africa.pdf> The IM will also seek to exclude direct investment in issuers which have certain levels of exposure to, or ties with, other sectors including conventional weapons, alcohol, gambling, adult entertainment, predatory lending or have an ESG rating below BBB (as defined by MSCI), as summarised in the Fund's prospectus. When investing indirectly via other funds, the Fund will also seek to invest in funds that themselves take into account ESG and/or socially responsible investment (SRI)-related considerations, but only to the extent such funds are available and appropriate for the Fund. The Fund's asset allocation will not solely be driven by the above, rather such considerations will be utilised by the IM in determining whether an investment may be appropriate for the Fund. The Fund may also have indirect exposure (through, including but not limited to, FDIs and other funds) to issuers with exposures that are inconsistent with the IM's ESG analysis.
- ▶ The investment manager will use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective. These may be used to gain indirect exposure to commodities (such as precious metals and agricultural produce) and to property. A significant proportion of the Fund's portfolio may consist of derivatives on a daily basis. The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The Fund is actively managed and the investment manager has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Bank of England Base Interest Rate plus 4.5% should be used by unitholders to compare the performance of the Fund.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Changes to interest rates, credit risk and/or issuer defaults will have a significant impact on the performance of fixed income securities. Non-investment grade fixed income securities can be more sensitive to changes in these risks than higher rated fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2023. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
