# Multi Asset Growth V

The Fund aims to achieve capital appreciation over the long term. Capital invested in the Fund is at risk and there is no guarantee that that the investment objective will be met. The Fund may invest up to 100% of the scheme property in riskier assets providing potential for more aggressive growth, such as equities, indirect exposure to listed real estate, listed infrastructure and commodities. The Fund may use currency hedging techniques to reduce exposure to currencies other than Sterling. The fund utilises both active management and passive strategies in its implementation.

Portfolio Manager  
*Alain Zeitouni*

Russell Investment's Multi-Asset Strategies Team comprises over 50 experienced professionals, including portfolio managers, researchers, portfolio analysts, and strategists in Russell Investments offices around the globe. This team focuses on total client outcomes, including all major asset classes in their solutions. They identify areas of the market offering attractive valuations and growth potential with a reasonable level of risk and research strategies and managers to exploit these pockets of value.

## The Multi Asset Growth Funds Range

## What happened this month

The Fund delivered a positive return in May. Falling US inflation, renewed optimism over potential rate cuts by major central banks, and positive economic data from the UK and Europe, boosted both equity and fixed income markets. As such, the performance of our large exposure to equities was additive as risk appetite improved. Within equities, our bias away from the US was unhelpful as equities in the region reached a new high on news of falling inflation. Our tilt towards the UK was additive, while the tilt towards emerging market equities detracted. Our active management within equities was rewarded, driven by positive excess returns from the UK Equity Fund and Continental European Equity Fund. Our convertible bonds exposure was also helpful due to their sensitivity to equities. However, our mostly unhedged equity exposure was unhelpful as the US dollar fell against the British pound. Our small allocation to listed real estate and broader commodities was favourable given the decline in yields, and higher gold prices, respectively.

## Performance Review

Fund Name	1 Month	6 Months	1 Year	2 Years	3 Years	Since Inception (PA)	31/05/24-31/05/23	31/05/23-31/05/22	31/05/22-31/05/21	31/05/21-31/05/20	31/05/20-31/05/19
Multi Asset Growth V (C Acc)	1.5	11.3	15.8	15.6	17.8	6.5	15.8	-0.2	1.9	25.0	-1.7

The Fund does not have a benchmark. The Fund has a flexible allocation between equity and fixed income investments, meaning that there is no index or sector that would be an appropriate comparator. The Fund is risk-rated by a risk-rating service provided by Synaptic Software Limited ("Synaptic Risk Ratings"). For further details please see: <https://www.synaptic.co.uk/research-tools/synaptic-risk> Synaptic Risk Ratings associates a fund's returns with a particular level of risk and enables comparison between funds which are managed on a similar basis. The risk profile allocated to a fund by Synaptic Risk Ratings will depend on the allocation of the fund's assets to riskier assets. The higher the fund's allocation to riskier assets the more risky the fund. This Fund may invest up to 100% of the scheme property in riskier assets.

The fund is priced at market open (7am) so Fund prices have been moved a day later with benchmarks which price at market close (7pm).
