Investment Policy

The fund invests in the shares of a range of companies based in, or with significant business activities in China.

Essential features of the fund:

- The fund directly invests at least 80% of its net assets in equity securities (China A Shares) of Mainland China-listed companies with a market capitalization typically in excess of US\$500 million at the time of initial investment.
- The fund may invest in China A shares and may do so through the Shanghai-Hong Kong Stock Connect scheme or the Shenzhen-Hong Kong Stock Connect scheme (together, the "Stock Connect scheme").
- The equity or equity related securities in which the fund may invest include common stocks, preferred stocks, securities convertible into common stocks, rights and warrants. The fund will not invest in Russia/Russian securities.
- Environmental, social and governance (ESG) criteria are one of the components of the Investment Manager's decision making process. The fund promotes environmental and/or social characteristics as defined under Article 8 of the Sustainable Finance Disclosure Regulation (SFDR).
- The fund is actively managed with reference to MSCI China A Onshore Net Total Return Index ("the Benchmark"), which is broadly representative of the companies in which it may invest. However, the fund is actively managed and the Benchmark is not used to define the portfolio composition of the fund and the fund may be wholly invested in securities which are not constituents of the Benchmark.
- Under normal market conditions the fund intends to invest in at least 20 stocks.
- You may sell your investment on any working day in Ireland, the UK and Hong Kong.
- Any income the fund receives will be reinvested to grow the value of your investment.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 6 because its volatility has been measured as above average to high.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Please note that even funds with the lowest rank may lose you money.
- In addition to the level of risk shown by the indicator, there are other risks associated with this fund, as detailed below:
- The fund invests mainly in shares, and the value of these may fall or rise due to a number of factors, including the performance of the company and general stock market and exchange rate fluctuations. The value of your investment may rise or fall and you could get back less than you invest.
- Sustainability Risk - The fund may be subject to sustainability risk, meaning an environmental, social or governance ("ESG") event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.
- Attention is also drawn to risks associated with portfolio concentration, risks associated with investment in China and risks associated with the Stock Connect Scheme.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.
