

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Premier Miton Defensive Growth Fund (the "Fund") – Class C Shares

A sub-fund of Premier Miton Funds (the "Company")

Class C Income Shares, ISIN no.GB00B832BD89 (representative share class) & Class C Accumulation Shares, ISIN no.GB00BTHH0518

Authorised Corporate Director ("ACD") - Premier Portfolio Managers Ltd.

Objectives and investment policy

The objective of the fund is to provide positive returns over rolling three year periods in all market conditions with less than a quarter of the volatility of the FTSE All World Index, which may result in the returns from the Fund being constrained.

Three years is also the minimum recommended period for holding shares in this Fund. This does not mean that the Fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

The Fund will be invested in a diversified portfolio of investment strategies and investment types with exposure to different asset classes, geographical regions and financial markets.

The different investment types will include investments in equities (company shares), fixed income (including bonds issued by governments and companies, which could either be investment grade (higher quality) or non-investment grade (lower quality) bonds), investment companies, property company shares, unquoted securities (but not actively), zero dividend preference shares (issued by investment companies), deposits, cash and near cash.

These will also include structured investments (which may use derivatives and may have specific criteria that need to be met to deliver a positive return) and other investments which may be derivatives based and which are considered by the fund manager to be lower risk investments themselves or which reduce the risk profile of the fund overall.

The fund may invest in derivatives, warrants and forward transactions for investment purposes as well as for the purposes of efficient portfolio management (including hedging). The use of derivatives in the Fund will be significant.

The Fund may also invest up to 10% in collective investment schemes (including those managed or operated by the Authorised Corporate Director (ACD) and its affiliates).

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms explained:

Accumulation shares: any income made by the Fund will be reinvested to grow the value of your investment.

Income shares: any income made by the Fund will be paid out to you.

Bonds: Issued by companies or governments and similar to a loan in nature, usually paying a fixed or variable interest rate.

Structured investments: are typically investments which are linked to the performance of one or more underlying instruments or assets such as securities, currencies and other financial instruments. They frequently provide an augmented fixed return in exchange for accepting a degree of risk, for instance to market falls or gains.

Zero dividend preference shares: issued by investment trusts, ZDPs have a maturity date. They do not pay an income but pay a set amount at maturity as long as certain conditions are met.

Derivatives: this is a financial contract whose value is related to the value of an underlying asset or index, often used with the aim of managing risk or enhancing returns.

Hedge: an investment which aims to reduce the risk of adverse price movements in an asset or group of assets.

Investment grade bonds: Bonds that are expected to have a lower risk of defaulting on interest payments or repayment of the issue value on maturity and receive higher ratings from credit rating agencies.

Efficient portfolio management: managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth.

Warrants: a type of derivative that gives the holder the right to buy or sell an underlying asset at a set price within a set period.

Forward transactions: a type of derivative between two parties to buy or sell an asset at a specified price and time in the future.

Unquoted securities: a security which is not listed, quoted, or dealt in on any stock exchange.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk

Typically higher rewards, higher risk

The Fund is ranked as 3 because it has experienced low to medium rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The Fund invests in a wide range of both standard and complex instruments with the aim of achieving low volatility and low directionality to main financial markets. The securities held or traded include but are not limited to derivatives on equity markets, closed ended funds, total return swaps on a range of asset classes, alternative vehicles in fixed income, structured investments which have defined income and return characteristics though there is no guarantee that these will be achieved. The underlying investments are spread across a range of asset classes globally in a manner consistent with low risk.

The Fund uses Derivatives extensively to both take on and reduce risk. These instruments can be highly sensitive to changes in the value of the assets on which they are based.

The indicator may not take fully into account the following risks of investing in this fund:

- **Interest rate risk:** the value of fixed rate bonds will be sensitive to an unexpected increase in interest rates.
- **Counterparty risk:** arising from securities which require a specific entity, usually a large bank, to honour its obligations to the fund.
- **Derivatives:** these instruments can be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in larger fluctuations in the value of the Fund.
- **Liquidity risk:** during difficult market conditions some securities, such as corporate bonds, off-exchange financial derivative instruments, money market or structured investments, may become more difficult to sell at a desired price.
- **Structured Investments:** these investments have an embedded Derivative and may, if certain criteria are met, experience a swift change in value.
- **Operational risk:** arising in particular from investments in non-standard securities such as derivatives, which require more complex systems, processes and controls.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.	
Charges taken from the Fund over a year	
Ongoing charges	0.88%
Charges taken from the Fund under specific conditions	
Performance fee	NONE

- Switching charge (for switching into the Fund from another fund) 0.00%.
- The ongoing charges figure ("OCF") is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are units/shares of another fund).
- For more information about charges, please refer to the Fund's prospectus.
- For the Ongoing Charge, the figure was calculated as at 31/05/2023.
