RISK FACTORS

- All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.
- The Fund may be subject to the risks associated with companies operating in the food and agriculture technology sectors including rapidly changing technologies and obsolescence of existing products, fierce international competition, the loss of patent, copyright and trademark protections and evolving industry standards. Companies will also be subject to external risk factors impacting the broader food and agriculture markets related to changing and unpredictable weather conditions (including drought and flooding) and fluctuating commodity prices.
- FOOD also invests in small publicly-traded companies which may be less mature and therefore more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies, the food & agriculture sector as a whole or the stock market as a whole.
- Individual companies are subject to intense competition that may negatively impact their revenues and market values and therefore FOOD's value.
- FOOD invests in global equity securities. As such, there is a risk of loss arising from exchange rate fluctuations or exchange control regulations.
- Other: (1) Third-party service providers (such as the ICAV's depository) may go bankrupt and fail to pay money due to FOOD or return property belonging to FOOD. (2) If the Index provider stops calculating the Index or if FOOD's license to replicate the Index is terminated, FOOD may have to be closed. (3) It may not always be possible to buy and sell FOOD's Shares on a stock exchange or at prices closely reflecting the Net Asset Value. (4) There is no capital guarantee or protection on the value of FOOD and investors can lose all the capital invested in FOOD. (5) Please refer to the "Risk Factors" section of the ICAV's Prospectus and the Fund Supplement.
