QEP Global ESG

a sub-fund of Schroder International Selection Fund SICAV

Class C Accumulation GBP (LU1775314054)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth and income in excess of the MSCI AC World (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of companies worldwide which meet the investment manager's sustainability criteria.

Investment policy

The fund is actively managed and invests at least two-thirds of its assets in a diversified portfolio of equities of companies worldwide.

The fund focuses on companies that have certain "Value" and/or "Quality" characteristics. Value is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the investment manager believes have been undervalued by the market. Quality is assessed by looking at indicators such as a company's profitability, stability, financial strength and governance.

The fund may invest directly in China B-Shares and China H-Shares and may invest less than 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the Science Technology and Innovation (STAR) Board and the ChiNext.

The fund maintains a higher overall sustainability score than MSCI AC World (Net TR) index, based on the investment manager's rating system. The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the fund's webpage, <https://www.schroders.com/en/lu/private-investor/gfc>. The fund invests in companies that have good governance practices, as determined by the investment manager's rating criteria. The investment manager may also engage with companies held by the fund to challenge

identified areas of weakness on sustainability issues. More details on the investment manager's approach to sustainability are available on the webpage <https://www.schroders.com/en/lu/private-investor/strategic-capabilities/sustainability/disclosures>

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash.(subject to the restrictions provided in the prospectus).

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI AC World (Net TR) Index and compared against the MSCI World (Net TR) index. The fund's investment universe is expected to overlap materially with the components of the target and comparator benchmarks. The comparator benchmark is only included for performance comparison purposes and does not determine how the investment manager invests the fund's assets. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target or comparator benchmarks. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

The category also reflects that this share class is in a different currency than the fund currency.

Risk factors

Sustainability risk: The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the

beliefs and values of any particular investor.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Stock Connect risk: The fund may be investing in China "A" shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Charges
