Global Natural Resources Equity Fund

a sub-fund of T. Rowe Price Funds OEIC
Class C Acc 9 (ISIN: GB00BF0S8Z92)
Authorised Corporate Director: T. Rowe Price UK Limited

Objectives and Investment Policy

Objective To increase the value of its shares through growth in the value of its investments.

Portfolio securities The fund is actively managed and invests mainly in a widely diversified portfolio of shares of natural resources or commodities-related companies. The companies may be anywhere in the world, including emerging markets.

The fund may use derivatives for hedging and efficient portfolio management.

Investment process The investment manager's approach is to:

- Focus on well-managed companies with attractive long-term supply-demand fundamentals.
- Invest in companies that operate "downstream" from these resources, such as refining, paper manufacturing, steel fabrication and petrochemicals.
- Assess resource/commodity cycles, industry valuations and company fundamentals.
- Broadly diversify holdings to manage portfolio risk profile relative to highly concentrated exposure to a single commodity.
- Assess environmental, social and governance ("ESG") factors to identify those considered most likely to have a material impact on the performance of the holdings or potential holdings in the fund's portfolio. These ESG factors, which are incorporated into the investment process alongside financials, valuation, macroeconomics and other factors, are components of the investment decision. Consequently, ESG factors are not the sole driver of an investment decision but are instead one of several important inputs considered during investment analysis.

Designed for Investors who typically plan to invest for five years or more.

Fund reference currency GBP

Benchmark MSCI World Select Natural Resources Index Net.

Benchmark Use Investors may use the benchmark to compare the fund's performance. The benchmark has been selected because it is similar to the investment universe used by the investment manager and therefore acts as an appropriate comparator.

The investment manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark and has complete freedom to invest in securities that do not form part of the benchmark.

Other Information:

Income generated by the fund is reinvested and included in the value of its shares.

Orders to buy, switch and redeem shares are ordinarily processed any day that is a full bank business day in England and Wales except on days when markets, in which a substantial amount of the portfolio is traded, are closed or the day before. Please consult the following link <https://www.troweprice.com/literature/public/country/gb/language/en/literature-type/trading-calendar-sub-type/oeic>, for dealing calendar and any applicable exceptions.

Orders received and accepted by 12:00 noon on a business day will generally be processed that day.

Risk and Reward Profile

| | | | | | | |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|

The value of an investment in the fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the fund's share price over five years) but is not a reliable indicator of future risk reward profile.

The lowest category does not mean a risk-free investment.

The fund is in the category shown because it invests in a segment of the market where volatility is moderately high.

The fund's risk level reflects the following:

- As a class, stocks carry higher risks than money market securities and bonds.

MAIN RISKS TYPICALLY ASSOCIATED WITH ORDINARY MARKET CONDITIONS

The fund's main risks are at least partially reflected in the risk/reward number. The most important of these risks are:

ESG Risks could have a material negative impact on the value of an investment and performance of the fund.

Investment Fund involves certain risks an investor would not face if investing in markets directly.

MAIN RISKS TYPICALLY ASSOCIATED WITH UNUSUAL MARKET CONDITIONS

Unusual market conditions or large unpredictable events can amplify the fund's main risks. They can also trigger other risks, such as:

Country risk China Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market.

Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.

A more detailed description of the risks that apply to the fund is set out in the section "Risk Descriptions" in the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest | |
|--|-------|
| Entry charge | None |
| Exit charge | None |
| This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out. | |
| Charges taken from the fund over a year | |
| Ongoing charges | 0.69% |
| Charges taken from the fund under certain specific conditions | |
| Performance fee | None |

The **entry** and **exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your distributor or financial adviser.

The **ongoing charges** figure is based on expenses as at 31st December 2023. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units/shares in another collective investment undertaking.

For more information about charges, please see the fund's prospectus, which is available at [troweprice.com](https://www.troweprice.com).

Past Performance

The past performance indicated is not a reliable indicator of future performance.

The past performance calculation includes all ongoing charges, but excludes any entry charge applied.

The fund and class started to issue shares in 2017.

Past performance has been calculated in GBP.

When a share class is hedged to a different currency, a hedged version of the benchmark (where available) will be used by the Authorised Corporate Director for the performance comparison.
