Performance

The table compares the fund performance with the ARC Private Client Indices (PCI) benchmark, a measure of a peer group of similar investment managers using similar asset allocations. The comparator benchmark is an indicator of similar investment strategies and does not show future returns or investor expectations. ARC monthly data is estimated and may vary from actual performance. ARC data is then confirmed at the end of each quarter, which could change monthly returns.

Past performance is not a guide to future performance

Monthly Market Commentary - June 2024

Global equities continued their positive momentum through June, returning 3.0% in sterling terms. US equities reached fresh all-time highs, which were supported by decelerating price growth from the latest inflation measures. Additionally, this relief in inflation supported the global aggregate bond market, which rose by 0.9%. Once again, the strongest performing developed equity region was US technology large-cap stocks, returning 6.8%. The resilience of US tech corporate earnings remains to be tested amidst the broader macroeconomic uncertainty. The excitement over Artificial Intelligence (AI) is being met by tech firms delivering on, and beating, high earnings expectations with their profit margins leading the market. As local elections have broadly concluded in Emerging Markets, volatility has stabilised and the region reversed the losses seen in May, returning 4.7% in June. Foreign investors are seeking a new catalyst in Chinese equities, which fell 1.6% in June, amid fading enthusiasm over the government's rescue package for the struggling property sector. A tougher backdrop is starting to develop in Europe and the UK Large Caps, which both fell 1.7% and 1.1% respectively. Investor sentiment for both regions has started to subdue heading into the UK general and French parliamentary elections. Beyond equity and bond markets, Brent crude oil rose 5.6%, buoyed by growing expectations of a Fed easing cycle. The broader commodity index returned 2.2% for June, with the elevated price of specific livestock supporting the broader index. Global Real Estate rose 1.9% in June, with investors anticipating looser monetary policy, driving the demand for interest-bearing assets.

Fund Objective

The main objective of this fund is to maximise potential return for a given level of risk.

Investment Strategy - Balanced

To achieve the fund objective the Manager will use investments in collective investment schemes such as unit trusts, OEICs and other UCITS funds and closed ended schemes. Where appropriate the Manager may also invest in individual stocks, bonds, and derivatives ensuring the fund has a diversified portfolio of assets.

Some of these investments will be denominated in foreign currencies which may or may not be hedged back to Pounds Sterling to help reduce currency risk. The proportion of the fund invested in riskier assets such as equities (company shares) is consistent with the funds' Investment Objective.

Generally, 60% of this fund is invested in equities but this figure may change by a maximum of $\pm 12.5\%$ in the short term depending on variations in the stock markets, or in the longer term to keep the fund within its' risk boundaries.

Who is this fund for?

This fund may be suitable for: An investor who is comfortable with holding a significant proportion of their fund in higher risk investments in order to have the opportunity for a greater investment return. An investor who is prepared to accept investment losses in the short-term in order to achieve potentially greater investment returns over the longer-term. The fund will be subject to fluctuations in value.

Fund Important Note

Please be aware that adjustments to previously reported data can occur. The value of investments and the income from them can fluctuate and it is possible that investors may not get back the amount invested.

Data Definitions - Funds

Inception: The date at which the fund was first managed. This can be found at the top left corner of the investment growth graph.

Benchmark: ARC Private Client Indices – The performance comparator provided in the cumulative return chart and the performance table below. The comparator benchmark(s) shown are representative of the risk/return of the Tatton fund.

Ongoing Charges to the Funds (OCF) is made up of the Annual Management Charge and additional expenses. Additional expenses may be deducted from some funds. These may include, third party administration, trustee, registrar, auditor and regulator fees. As the additional expenses relate to the expenses incurred during the fund management process, they will regularly increase and decrease as a percentage of the fund.

Transaction Cost is the estimated charge for the fund that may be incurred as a result of the acquisition and disposal of investments. The charge is forward looking and used for pre sale reporting.

12 Month Yield: Is the sum of a fund's total trailing 12-month interest and dividend payments divided by the last month's ending share price (NAV) plus any capital gains distributed over the same period.
