

Federated Hermes US SMID Equity Fund (the “Fund”)
a sub-fund of Federated Hermes Investment Funds plc (the “Company”)
Class F2 Stg£ Dist. Shares (ISIN: IE00B8493D29)
Hermes Fund Managers Ireland Limited (the “Manager”)

Objectives and investment policy

The Fund aims to increase the value of your investment over a rolling period of any five years.

However, there is no guarantee that this will be achieved and your capital is at risk.

The Fund is actively managed, and will invest at least 80% in shares of companies that are located in or earn substantial revenue from the United States and, on occasion, Canada. This includes companies listed in the Russell 2500 Index. The companies may be small or mid-sized based on the market value of their shares (i.e. ‘SMID cap’).

On occasion it may also invest in other financial instruments, for example other funds and rated or unrated Bonds and Derivatives.

The Investment Manager will consider how well companies manage ESG factors. The companies will either have strong or improving ESG characteristics. The percentage of ESG-analysed issuers in the fund will always be between 90%-100%.

The Fund may borrow on a limited basis (up to a maximum of 10% of the value of the Fund). Leverage is not part of the investment strategy of the Fund.

The Fund’s base currency is USD but its investments may be priced in other currencies. Derivatives may be used to convert the value of

those investments into USD.

The benchmark, for performance comparison purposes only, is the Russell 2500 Index.

You may buy or sell Shares in the Fund each Business Day (except bank holidays in the UK and Ireland).

This Share Class distributes semi annually. Your portion of any income received by the Fund will be paid to you.

Useful definitions

- **Bonds:** A fixed income debt investment (also known as ‘Credit’), who is then obliged to pay a specified amount back to the purchaser of the bond on a given future date. The amount to be repaid usually includes the original amount (the principal) plus interest (coupons).
- **Derivatives:** Investments whose value is linked to one or more underlying assets.
- **Leverage:** Use of various instruments or borrowed money that increases the exposure of the Fund to its investments – this has the potential to increase both the gain and loss of an investment.
- **ESG:** An acronym for ‘Environmental, Social and Governance’ characteristics. A company will be assessed on its management of these considerations.

Risk and reward profile

Narrative explanation of the indicator and its main limitations:

The value of investments and income from them may go down as well as up and you may not get back the original amount invested.

- Historical data may not be a reliable indication for the future.
- Risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean ‘risk free’.
- This reflects volatility of the Fund based on historic movements of underlying investments.

Particular risks not adequately captured by this indicator include:

- **Equity Risk:** The Fund invests in shares of companies whose value can go up or down. Factors that affect share prices may include political and economic news, company profits and significant events at the company.
- **Currency Risk:** Where the currency of the share class you have invested in is different to the base currency of the Fund,

movements in the currencies may have a negative effect on the value of your investment.

- **Small and Mid-Cap Companies Risk:** Shares of small and medium-sized companies may be difficult to buy and sell and their share prices are likely to rise and fall by a larger amount than those of larger companies.
- **Counterparty Risk:** The Fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the Fund.
- **Leverage Risk:** The use of leverage may amplify either gains or losses. Which could have an effect on the value of the Fund.
- **Concentration Risk:** For this Fund investment risk is concentrated in a specific area (E.g. country, industry or companies). This will mean that those areas could have an increased effect on the value of the Fund.
- **Liquidity Risk:** In difficult market conditions, certain Fund investments may be harder to sell at the current market price.
- **Sustainability Risk:** The Fund considers sustainability as part of the investment selection process so may perform differently to funds that do not consider sustainability criteria.
- **Operational Risk:** Operational issues, for example arising from errors in transactions, valuation, accounting, and financial reporting, may affect the value of the Fund.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of distributing it. These charges reduce the potential growth of your investment.
