Fund objectives and investment policy

The Fund aims to provide capital growth in excess of the MSCI World (Net Total Return) Index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of companies worldwide which are considered to be undervalued relative to their long term earnings potential.

Above is the Investment Objective of the fund. For details on the full fund's Investment Policy please see the KIID.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

Please note that the fund's objective and benchmarks were changed on 31 March 2021. The past performance in the above table is based on the fund's objective and benchmarks (No target benchmark. Comparator benchmarks: MSCI World (Net Total Return) Index and the Investment Association Global Equity Income sector average return) in place prior to this date. Going forward, this table will show past performance from this date based on the new objective and benchmarks (Target benchmark: MSCI World (Net Total Return) Index. Comparator benchmarks: MSCI World Value (Net Total Return) Index and the Investment Association Global sector average return).

Benchmarks: (If applicable)

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.
