

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF Absolute Return Bond Fund is a sub-fund of Liontrust Global Funds plc. The Management Company is Bridge Fund Management Limited. This document is based upon the B1 USD Accumulating share class (ISIN: IE00BD85PM41), which is the representative class for all share classes listed in this document.

Objective

- The Fund aims to generate a positive absolute return through a combination of capital growth and income over a rolling 12 month period, irrespective of market conditions.

Policy

- The Fund is actively managed without reference to any benchmark meaning that the Investment Adviser has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.
- The Fund aims to achieve its investment objective through investment in corporate and government fixed income markets worldwide, including developed and emerging markets.
- In achieving its objective, the Fund also aims to minimise volatility and reduce the possibility of a significant drawdown (i.e. a period where the Fund is worth less than the initial investment at the start of a 12 month period).
- The Fund invests in a wide range of bonds issued by companies and governments, from investment grade through to high yield.
- The Fund invests in developed and emerging markets, with a maximum of 20% of its net assets invested in emerging markets.
- Investments are made in US Dollar denominated assets or non-US Dollar denominated assets that are predominately hedged back into US Dollar.
- Up to 10% of the Fund's currency exposure may not be hedged (i.e. the Fund may be exposed to the risks of investing in another currency for up to 10% of its assets).
- The Fund may invest both directly, and through the use of derivatives. The use of derivatives may generate market leverage (i.e. where the Fund takes market exposure in excess of the value of its assets).
- The fund manager considers environmental, social and governance ("ESG") characteristics of issuers when selecting investments for the Fund.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11.59a.m. (Irish time) for execution at midday valuation point. Further details can be found at www.liontrust.co.uk.

Investment process

- The process is designed to take advantage of inefficiencies in fixed income markets through a thorough understanding of the economic environment and detailed bottom up stock analysis.
- The process uses the same framework to garner a thorough understanding of the economic environment and for bottom up stock analysis: fundamentals, valuations and technical (FVT).
- These three factors are examined regardless of whether the managers are considering a duration position or an investment in a speculative grade rated company. In judging whether a company is an attractive long-term investment, the managers analyse five factors which they call PRISM.
- Protections – operational and contractual, such as structure and covenants; Risks – credit, business and market; Interest cover – leverage and other key ratios; Sustainability – of cash flows and environmental, social and governance (ESG) factors; Motivations – of management and shareholders.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the higher of the actual historical annualised volatility and the translated annualised volatility of the Fund based upon the internal Value at Risk limit.
- The Fund invests in global corporate and government bonds from investment grade to high yield. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The fund manager considers environmental, social and governance ("ESG") characteristics of issuers when selecting investments for the Fund.
- The Fund is categorised 3 primarily for its exposure to a diversified portfolio of bonds along with a number of derivative positions.
- The SRRRI may not fully take into account the following risks:
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result;
 - the creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.
- The Fund uses derivative instruments that may result in higher cash levels. Outside of normal conditions, the Fund may choose to hold higher levels of cash. Cash may be deposited with several credit counterparties (e.g. international banks) or in shortdated bonds. A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- The Fund's volatility limits are calculated using the Value at Risk (VaR) methodology. In high interest rate environments the Fund's implied volatility limits may rise resulting in a higher risk indicator score. The higher score does not necessarily mean the Fund is more risky and is potentially a result of overall market conditions.
- The Fund may invest in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term.
- There is no guarantee that an absolute return will be generated over a one year time period or within another time period.

GF ABSOLUTE RETURN BOND FUND

- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- The Fund may encounter liquidity constraints from time to time. Participation rates on advertised volumes could fall reflecting the less liquid nature of the current market conditions.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year	
Ongoing charges	Classes A5 EUR Acc, A5 EUR Inc, B5 USD Acc, C5 GBP Acc, C5 GBP Inc: 0.37%
	Classes A10 EUR Acc, B10 USD Acc, C10 GBP Acc, C10 GBP Inc: 0.25%
	Classes A1 EUR Acc, B1 USD Acc: 1.07%

Charges taken from the Fund under certain specific circumstances	
Performance fee	None

- **The entry and exit charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.

- **The ongoing charges** figure is based on expenses as at 31 December 2023. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.

- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk or visit the costs and charges page on our website at www.liontrust.co.uk/cost-and-charges.

Past performance

- **Past performance does not predict future returns.** It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 26 June 2018.
- The B1 USD Acc share class launch date is 26 June 2018.
- The base currency of the Fund is US dollars.
