

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**BlueBay Funds - BlueBay Investment Grade Global Government Bond Fund
Q - GBP ISIN:LU2393768192,
a class of a sub-fund of BlueBay Funds,
managed by BlueBay Funds Management Company S.A.**

Objectives and investment policy

The fund aims to make a return for you through a mixture of generating income and growing the amount you originally invested. It mainly invests in bonds that pay a fixed interest.

The fund is actively managed and targets better returns than its benchmark, the Bloomberg Global Treasury Total Return Index, USD hedged, while taking into account Environmental, Social and Governance ("ESG") considerations. There are no restrictions on the extent to which the fund's portfolio and performance may deviate from the ones of the benchmark. As part of the investment process, the Investment Manager has full discretion over the composition of the fund's portfolio and may take exposure to companies, countries or sectors not included in the benchmark. At least two-thirds the fund's investments will be in fixed income bonds rated investment grade issued by governments globally (including Emerging Market Issuers) with a sovereign investment grade rating. Up to 15% of the fund's assets may be invested in fixed income bonds rated below investment grade, provided that such bonds are not rated below B-/B3 or an equivalent rating by a credit rating agency. The fund meets the conditions set out in Article 8 of the Sustainable Finance Disclosure Regulation as it promotes environmental/social characteristics through binding requirements as a key feature. ESG approaches applied include the exclusion of issuers which do not meet certain ESG considerations based on their economic activity or conduct. Furthermore, the fund restricts investment in issuers depending on the outcome of the ESG evaluation where an issuer is deemed to have very high ESG risks. The fund shall also implement enhanced ESG

engagement as part of its stewardship commitment. Full details of ESG screening applied by the fund are available online at www.rbcbluebay.com/en-lu/institutional/what-we-do/responsible-investment/our-approach/. The ESG evaluation carried out by the fund is part of the wider credit analysis. Input from external ESG information providers may define the specific issuers excluded as part of the ESG screening applied. However, with respect to the ESG evaluation of issuers, data from external ESG information providers is only used as an input and it does not define the ESG risk rating. The fund aims to only invest in fixed income securities which contribute to the attainment of the ESG characteristics promoted by the fund. The fund may use derivatives (such as futures, options and swaps, which are linked to the rise and fall of other assets) to obtain, increase or reduce exposure to underlying assets and may thus create gearing which may result in greater fluctuations of the value of the fund. The manager of the fund will ensure that the use of derivatives does not materially alter the overall profile of the fund.

For full details of the investment objective and policy of the fund, please refer to the prospectus.

If you hold shares in a class that pays dividends we expect that any income generated by the fund will be paid out to you on a regular basis. For other share classes, any income the fund makes will be reinvested to grow your investment.

You can buy and sell shares every day which is a business day in London and Luxembourg, subject to the terms in the General Information section of the prospectus.

The fund may not be appropriate for investors who plan to invest for less than three years.

Risk and reward profile

The Risk and Reward Indicator table shows where the class ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The table uses a standard calculation method that is used by all companies who offer such funds within the European Union.

The Risk and Reward Indicator does not take into account the following:

- At times, the market for investment grade bonds may dry up, which could make it difficult to sell these bonds, or the fund may only be

able to sell them at a discount

- There may be cases where an organisation with which we trade assets or derivatives (usually a financial institution such as a bank) may be unable to fulfil its obligations, which could cause losses to the fund
- Investing in emerging market bonds offers you the chance to gain higher returns through growing your capital and generating income. Nevertheless, there is a greater risk that the organisation which issued the bond will fail, which would result in a loss of income to the fund along with its initial investment
- BlueBay's ESG analysis can rely on input from external providers. Such data may be inaccurate or incomplete or unavailable and BlueBay could assess the ESG risks of securities held incorrectly
- BlueBay could suffer from a failure of its processes, systems and controls – or from such a failure at an organisation on which we rely in order to deliver our services – which could lead to losses for the fund

Charges

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.36%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The charges you pay are used to pay the costs of running the class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on fixed expenses. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking

For more information about charges, please see section 9 and Appendix 2 of the prospectus.

Past performance

- Past performance is not a reliable guide to future performance
- The past performance shown takes account of all ongoing charges and performance fees with exception of the entry charge
- Past performance has been calculated in GBP
- The fund was launched in 2022. The class was launched in 2023

Practical information

- The fund's Depositary is Brown Brothers Harriman (Luxembourg) S.C.A.
- Copies of the prospectus and the last annual and semi-annual reports of BlueBay Funds in English, German, French, Italian, Spanish and Norwegian as well as other practical information such as the latest price for the shares are available free of charge at the Registered Office of BlueBay Funds, 80, route d'Esch, L-1470 Luxembourg and on our website at www.rbcbluebay.com
- Prospective investors should inform themselves as to the tax consequences within the countries of their residence and domicile for the purchase, holding or sale of shares in BlueBay Funds. The Luxembourg tax legislation may have an impact on the personal tax position of the investor
