ANNUAL REPORT AND
AUDITED FINANCIAL
STATEMENTS

FOR THE FINANCIAL YEAR
ENDED 30 APRIL 2023

Our purpose is underpinned by three core values: Responsibility of Stewardship, Pursuit of Excellence and Value of Partnership.

REALISING PEOPLE'S PURPOSE

As responsible stewards of capital, we are committed to helping others achieve what matters most to them.

Responsibility of Stewardship

We take care of all that we are entrusted to protect and safeguard. Client relationships and assets, employees' careers and their wellbeing are at the heart of this.

We have a responsibility as a business to help achieve high social and environmental standards within our wider community.

Pursuit of Excellence

We strive to be extremely good or outstanding in all that we do.

We constantly challenge ourselves to learn, so we can improve what we do and adapt to the changing needs of our clients and staff.

Value of Partnership

We believe in an alignment of purpose with our clients and we work in partnership with them towards common objectives.

We share ownership of our company and we have a responsibility to each other and to our society.

EXECUTIVE DIRECTOR'S REPORT

Continued growth and resiliency

Against a very difficult market backdrop Waverton's funds have had another good year, with the majority outperforming their peer group, four in the top quartile of which two were top decile. This year came at the end of a very strong run of performance from the funds, which was recognised with success in several high-profile awards. At the end of 2022, over the past three years, all of the funds had outperformed the median of their peers, and 80% were in the top quartile.

We believe that our investment team and their investment process, are well positioned and suitably empowered to weather an economic downturn.

Through a combination of Net New Assets and performance growth the Assets Under Management of the Waverton umbrella grew by 47%, rising from £2.760bn at the end of April 2022 to £4.064bn one year later. During the year there was one personnel change, with Alena Isakova replacing Charles Jones as lead-manager of the Waverton Strategic Equity Fund.

The majority of this growth in fund AUM came from distribution via Waverton Investment Management, and the continued success of the Adviser Solutions team in the UK. There has also been growth elsewhere, with the Institutional Solutions team having helped place

the Waverton Real Assets Fund with a major financial provider, among other developments. There is also an increased holding of Waverton funds within Private Client portfolios.

Although the fund managers are the face of their funds, they will be the first to admit that it is a true team effort, not just relying on input from the wider Investment team, but the sales teams, and the wider support teams, both at Waverton Investment Management (Waverton's) and externally through service providers, that maintain the funds operationally.

As part of Waverton's strategic plans, and to increase capacity for future growth, the end of April 2023 saw a migration of some of the operational and technology functions and the dealers to SEI and Northern Trust, respectively. This has been a huge effort from the project team and the rest of the firm but allows greater resilience for Waverton in the long run.

Through the year there was continued development on stewardship. Early in the reporting year Waverton made their first submission to the FRC's Stewardship Code for the year 2021, and concurrently produced their first Stewardship Report which this can be found on the website. The submission was successful, and Waverton is proud to be a signatory to the code. We place great emphasis on the care that we take when managing assets for our clients, and our wider group of stakeholders, and becoming a signatory to the code is a great validation for the work that we do. In April 2023 we produced our latest Stewardship Report for the calendar year 2022, further information can be found on our website.

As announced in the Waverton Investment Management Annual Report and Accounts 2022, there are now plans to add a suite of new multi-asset funds to our offering. These will complement the Waverton Multi-Asset Growth Fund and offer a range of risk profiles (Balanced, Cautious and Defensive) running parallel

to those in the Waverton Managed Portfolio Service (MPS). This move is in response to demand from financial advisers who, in some cases, find a single fund a preferable solution. The funds will also be marketed to other institutions.

In other developments that may impact Waverton Investment Funds Plc, it was announced late last year that RBC have entered into a Memorandum of Understanding with CACEIS, wherein CACEIS will seek to acquire the European and Malaysian asset servicing activities of RBC Investor & Treasury Services ("I&TS"). Pending completion of the proposed transaction, RBC's Investor Services businesses in Europe, UK and the Channel Islands, along with its center of excellence in Malaysia, would be wholly owned by CACEIS. I am pleased to announce that CACEIS has completed the purchase of RBC Investor Services Bank S.A., its branches and subsidiaries. We continue to monitor developments and maintain regular communication with Senior Executives to ensure there is no disruption to the service.

Equally our third party Management Company (ManCo) MJ Hudson Group Limited was suspended from trading in December 2022 following accounting discrepancies in the reporting of its finances. This was both a surprising and unexpected challenge and in no way reflective of the operation for the Management of the ManCo with E&Y acknowledging their continued trust and confidence in the Board and the Executives of the Irish company. Following a difficult period I'm happy to confirm that Apex Group, a well-known and prominent group within the industry has committed itself to the acquisition of the Fund Management business and is subject to regulatory approval which they anticipate receiving in the summer. Once again, we continue to monitor developments and maintain regular communication with Senior Executives to ensure there is no disruption to the service.

EXECUTIVE DIRECTOR'S REPORT CONTINUED

Over the past 4 years Waverton has invested in its technology and infrastructure to provide a secure platform that protects client/investor data. The threat of security attacks ranging from opportunistic hackers using pre-built tools through to targeted, well-resourced, cyber activity continues to increase. The recent adoption of cloud computing in Microsoft Azure has improved both recovery point objectives and recovery time objectives. IT security is one of the most important elements of cloud architecture and client confidentiality and integrity are critical to Waverton Investment Management and is constantly reviewed, updated and managed with the appropriate level of care and responsibility our clients and investors have come to expect of a leading Investment Manager.

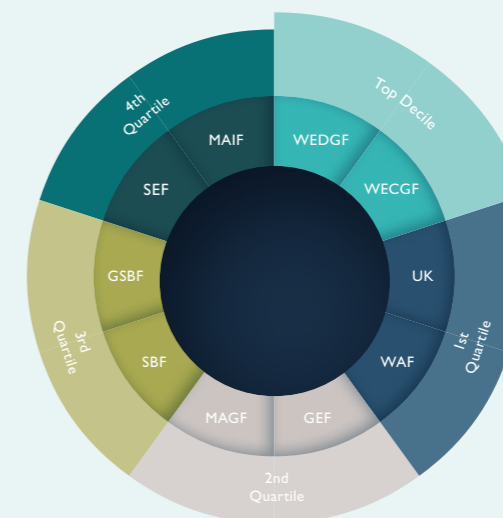

Cybersecurity is crucial because it safeguards all types of data against theft and loss.

Despite the difficult environment for investing that the reporting year has endured, there are growing concerns that we might see a recession in the near future. We believe that our Investment team and their investment process, are well positioned and suitably empowered to weather an economic downturn.

I was saddened at the sudden passing of Paul McNaughton, the Chairman of our Funds Board for over 15 years. Paul was a charismatic, influential leader who became a personal friend and someone who taught me so much and I will forever remain grateful for: Paul's invaluable contribution, stewardship and guidance will be sorely missed by the Board. Succession planning is underway and we anticipate restructuring the Funds Board before the end of 2023.

Marc Geduldt

CIO REPORT

Navigating troubled markets

Inflation dominated the story for much of the past year. With the global economy having been artificially suppressed to one degree or another for most of the previous two years, its reopening exposed various economic fault lines. Consequently, 2022 was the first year in at least a century and a half where both US 10-year Treasuries and the S&P 500 fell in value by more than 10% in dollar terms. Markets offered very few places to shelter. Broadly though, the most speculative investments were the hardest hit.

Markets had a weak start to the financial year, having fallen markedly in the first few months of 2022. In May the impacts of the Russian invasion of Ukraine were still evolving. Given Russia's position as a major energy exporter, prices in this sector began to rise quickly. Indeed, energy stocks were one of the few major asset classes to appreciate over the year. Although some of the market impacts have reversed over the year, there is still plenty of uncertainty about the longer-term impacts, particularly geopolitically.

The food and energy shock caused by Russia's actions, coupled with the after-effects of the pandemic's fiscal stimulus, loose monetary conditions, pent-up demand, and damaged supply chains, meant that inflation continued the upward trajectory that had begun in 2021. US inflation was already 7% at the start of 2022 but rose to peak at 9.1% in June – it has fallen back over the

months since, but every data release has been scrutinised as investors, and the public, feared that inflation might prove more long-lasting than expected. There are similar stories in most of the developed markets. Europe's reliance on Russian energy made their situation even more fraught.

Having made monetary policy markedly more accommodative during the pandemic, as they sought to buoy the economy, central banks were accused of being slow to react as inflation began to increase. Perhaps the most egregious example of policy maker's inaction was the ECB, who were still doing quantitative easing even as European inflation hit 8.6% in June.

Amid these complex market conditions, we believe that our investment process will allow us to participate during periods of market strength and provide protection during times of weakness.

When it became apparent that the central banks would need to act, the speed and severity of their hikes were a major factor in the damage to fixed income markets – the ICE BoA Gilt Index was down 25.1% in 2022, but yields have been largely rangebound and volatile during the period of this report. Waverton's Head of Fixed Income, Jeff Keen, and his team produced another strong year of relative performance against a torrid backdrop. Their hard work was rewarded with victory at the Fund Manager of the Year Awards in the Global Bond category.

As the financial year went on, the headline rate of inflation was falling and both survey and market data began anticipating a relatively swift return towards the 2% targets. This raised the questions of when the central banks, and the Federal Reserve in particular, might ease their tightening cycle. This raised

concerns that we might see a recession on the horizon as monetary tightening bites with its customary lag.

Equity markets were re-rated lower through the year as interest rates rose. After Growth stocks led during the rally of 2021, Value outperformed during 2022, and Quality has been the best performing factor in the first few months of 2023. This was not a uniform pattern however, and the Equity team, led by Head of Equities, Jennifer Fisher, performed well, winning "Best Group over 3 years, Equity Small Company" at the Refinitiv Lipper Fund Awards.

The UK endured a significant amount of political turmoil during the year. Prime Minister Liz Truss oversaw a very poorly received mini-budget, which shocked both the debt and currency markets. This caused the Bank of England to step in and calm the situation, in part to protect the pension industry.

The September mini-budget saw sterling fall to a record low against the US dollar, but the pound remained within its post-Brexit range against the euro. The dollar strengthened significantly through most of the year as investors sought safety, and thanks to the fact that the Federal Reserve implemented a more aggressive tightening cycle than other developed world central banks.

Given the potential economic risks in 2023, we maintain our belief in the benefits of alternative assets. These can offer a wider range of areas to seek investment opportunities, and a greater degree of diversification in a portfolio. Areas like infrastructure, commodities, and property are, in some cases, able to offer real returns with inflation-linked cashflows. Some, such as new energy technologies, benefit from secular demand tailwinds.

CIO REPORT CONTINUED

Led by Luke Hyde-Smith (Co-Head of Multi-Asset Strategies) our Real Assets Fund and Absolute Return Fund have continued to be an integral part of our offering, particularly within our MPS. Finally, our multi-asset funds, with lead-manager James Mee (Co-Head of Multi-Asset Strategies), also had a successful year. The Multi-Asset Income Fund was also a winner at the Fund Manager of the Year awards, this time in the Managed 20-60% Shares category.

Amid these complex market conditions, we believe that our investment process will allow us to participate during periods of market strength and provide protection during times of weakness. By being active, global, and direct investors, we have the ability to understand, monitor and buy into the assets that we believe will provide holders of our funds the best risk-adjusted outcomes.

William Dinning
CIO

OUR INVESTMENT PHILOSOPHY

Investment Philosophy

Waverton's funds are managed to clear risk and return objectives, principally focused on outperforming inflation over a full market cycle. To achieve this, we have always adopted a global, active, high conviction and predominantly direct investment approach, believing firmly in the benefits of active management both in terms of asset allocation and disciplined security selection. We attach great importance to investing in what we believe to be the best ideas worldwide, be that in equities, fixed income, third-party funds, or alternative asset classes. We aim to better protect capital in periods of drawdown and capture the upside as markets rebound, thereby compounding superior risk-adjusted returns over the long term.

While Waverton's investment philosophy has remained unchanged, our investment process has evolved over time, and our direct investment universe now incorporates a wider range of asset classes.

Fundamental research

Our bottom-up research is based on detailed fundamental analysis and the identification of clearly-defined selection criteria relevant to each asset class. We have strengthened our internal research capabilities over the last decade, adding dedicated resource across all asset classes to create a centralised Investment team. This recognises Waverton's ongoing commitment to global and direct investment in a world of ongoing digital disruption, ever growing ESG scrutiny and heightened geopolitical uncertainty.

Our investment process is rigorous, robust and repeatable, with proven results through market cycles and rotations.

The benefits of a combined approach

Waverton's investment process incorporates both bottom-up fundamental analysis and top-down macroeconomic research. Regular communication with companies has always been an integral part of our investment process, providing both a clearer understanding of individual businesses and industries, as well as important insights on real economic activity.

We blend this with analysis of global macroeconomic data to give us as much visibility as possible regarding the outlook from a macroeconomic, regional, industry and consumer perspective.

SUSTAINABILITY DISCLOSURES

We have chosen not to pursue alignment with Article 8 or 9 (for our Dublin-listed OEICs) and are instead focusing on our domestic regulatory environment and the UK Sustainability Disclosure Requirements (SDR) being introduced in 2023/2024. We believe this is a more relevant and important framework for our clients and have been working with our peers in the industry to help steer the UK SDR regulation.

Responsible Investment

We are thoughtful, long-term investors and responsible stewardship of our clients' capital is at the core of Waverton's business. We fully recognise our responsibility to help drive positive environmental and social change, but also acknowledge that meaningful change on a global scale will take time.

This necessitates a pragmatic approach, where we prefer to actively engage with companies in all sectors and focus on their direction of travel.

At the corporate level, we have chosen not to implement "blanket exclusions", and our potential investment universe includes not only companies with strong ESG credentials today, but also:

- those we believe can successfully mitigate ESG risks going forward, and
- those that may carry higher ESG risks today but also play a necessary part in the transition to a low carbon economy.

Excluding companies on the basis of what they do today or have done in the past, assumes that companies stand still. In reality, technology evolves and well-managed businesses will successfully adapt to the competitive dynamics of their industry and the changing demands of their customers and/or regulators. We aim, therefore, to identify businesses allocating capital in a responsible manner, ensuring resilience in their business model and long-term financial sustainability. For Waverton, the consideration of ESG factors is not a separate process but a natural part of good fundamental investment research.

ESG methodologies

Our ESG methodology is ESG integration via a proprietary materiality framework adapted from the Sustainability Accounting Standards Board's (SASB) ESG materiality framework.

Identifying, prioritising and assessing the issues that are material and relevant to companies within specific industries is a core part of the fundamental research process, as they ultimately impact a company's long-term financial sustainability and the creation of shareholder value. We also believe that focusing on material ESG issues when evaluating a company's performance with regard to ESG factors, is a far more effective way to assess real world outcomes. The framework helps to ensure key issues for individual industry groups are clearly identified and investigated in a more consistent manner across the investment team. This filters through our fundamental research, engagement and voting activity, and will facilitate more specific reflections

OUR INVESTMENT PHILOSOPHY *CONTINUED*

on our ESG engagements over time. This framework has been integrated into the investment process of our direct Equities, Fixed Income and Multi-asset Strategies teams, albeit some of the more complex Alternatives sub asset classes require a different approach.

Engagement and Voting

Mindful of limits on our time and resources, we aim to play to our strengths, focus on those aspects of engagement and voting where we can be most effective in encouraging better corporate behaviours and, importantly, that we provide investors with genuine positive outcomes.

Direct and regular dialogue with company management has always formed a critical part of our investment process and the Investment team undertakes 500+ meetings a year. As long-term investors, we aim to build constructive relationships that facilitate a deeper understanding of a company's business model and strategic direction.

We vote on our 100 largest direct equity positions across the firm, and all other holdings owned within our regional and global equity funds. We partner with Glass Lewis, a leading independent voting advisory service provider, using proxy voting where we feel there is an opportunity to enhance or protect shareholder value. An integral part of this relates to helping influence corporate behaviours in a way that will contribute to positive environmental, social and governance impacts.

The responsibility for voting decisions sits with the Investment team, an essential part of a genuinely integrated approach to ESG.

Effectiveness of our stewardship activities

The investment returns we generate for clients, quality of our client service and longevity of our client relationships are the clearest measure of the effectiveness of our stewardship activities, and we outline these fully in our Stewardship Report.

Jennifer Fisher
Head of Equities

OUR INVESTMENT PHILOSOPHY

GLOBAL

A global approach provides clients with the widest possible set of investment opportunities to grow their capital in real terms over the long term.

HIGH CONVICTION

A concentrated portfolio facilitates more detailed knowledge of each holding, and better management of risk.

ACTIVE

We strongly believe in the benefits of active management, both in terms of asset allocation and security selection. With greater flexibility to avoid areas at risk of capital loss, we aim to better protect capital in periods of drawdown and capture the upside as markets rebound.

ESG INTEGRATED

Consideration of ESG factors forms an integral part of our fundamental research, as these factors are intrinsically linked to the long-term financial sustainability and returns of an asset.

DIRECT

Direct investment provides greater control over portfolio construction, in turn providing clients with greater transparency around what they own.

FOCUS ON REAL RETURNS

We aim to compound superior risk-adjusted returns over a cycle.

PAUL McNAUGHTON – A TRIBUTE

The entire funds and asset management industry was deeply saddened to learn of the passing of Paul McNaughton on 6th November 2022.

Paul was one of the pioneers of the industry when it was in its infancy in Ireland and continued to make a significant contribution to its growth and development over four decades. Throughout a distinguished professional career, he established and led the Irish operations of Bank of Ireland Securities Services, Morgan Grenfell and Deutsche Bank, where he subsequently rose to lead their funds servicing business globally.

He was an entrepreneur, co-founding Bridge Consulting and was also a hugely respected independent non-executive director where he contributed both vast experience and the highest level of professionalism.

In addition, Paul gave generously of his time and talents to the wider industry, serving as the second chair of Irish Funds (then the Irish Association of Fund Administrators and Trustees, IAFAT) in 1993-1994 and always responded positively to support the industry in any way he could.

In his professional, charitable and sporting life he was a great believer in putting on the “green jersey” and our industry is a far better and stronger one for his contribution.

FUND MANAGERS REPORTS

1. Asia Pacific Fund Performance

The Waverton Asia Pacific Fund (the 'Fund') returned -2.1% (net of fees) for the Sterling A share class (net of fees) over the year ending 30 April 2023. This compares with -6% on the official benchmark, MSCI AC Asia ex Japan index.

Review

This past 12-month period has been defined by the de-synchronised nature of regional recoveries, and whilst the West had largely overcome Covid, Asia was still in the depths of Omicron. Chinese equities, which account for a third of the MSCI Asia ex-Japan benchmark, saw significant volatility throughout this period due to the challenges created by its draconian Covid restrictions, in place for almost three years and then unexpectedly lifted at the end of December. The strongest sector in the MSCI Asia ex-Japan benchmark during this period was Financials (+0.6%), driven by rising interest rates and with China's reopening improving the outlook for insurance companies. The Property names delivered the weakest returns (-11.2%), with the sector extremely sensitive to interest rates and also the target of more restrictive Chinese regulation, which resulted in several companies collapsing in this period. Semiconductor sector underperformance dragged on Korean (-9.5%) and Taiwanese (-8.4%) equities.

Stock selection (+3.2%) was the main driver of the fund's outperformance in this period. The largest contributors to performance in absolute terms came from Yum China (+2.7%) and Swire Pacific (+1.4%). Yum China was a beneficiary of the rapid Covid policy reversal, with these changes taking place just before Lunar New Year. Swire Pacific surprised the market by announcing a new share buyback program alongside improving profits and dividend growth. The biggest detractor to performance was Naver (-1.7%), which underperformed due to the weaker macro environment weighing on key segments (ecommerce, online advertising) and the announcement of the Poshmark acquisition which took the market by surprise. NetEase (-1.5%) also detracted as the performance of the gaming division normalised post-lockdowns. We have since exited the latter position in favour of more attractive opportunities.

Outlook

The outlook remains uncertain, with different economies in this region experiencing unique macroeconomic pressures and opportunities. With China's reopening having lagged expectations so far, we believe the focus in China will be on improving the economy with the potential for more stimulus and support. India, where the corporate sector is relatively underleveraged and ROEs are healthy, could also see a return

of private capital investment as the Modi government works to stimulate the manufacturing sector. Indonesia is about to enter a pre-election spending period and Thailand has just elected a pro-democratic government, both of which could reinvigorate investor sentiment despite an uncertain global backdrop.

We continue to believe that understanding the bottom-up drivers of our investments is key. When selecting companies, we favour names with strong business models that exhibit pricing power, where management teams have delivered value for shareholders, and where valuations are attractive given the long-term growth opportunity. We feel these names are well placed to navigate a volatile, uncertain macro environment and to create value for shareholders in the long term.

Alena Isakova
Fund Manager

References to benchmarks are for illustrative purposes only. There is no guarantee that the Fund will outperform its benchmark.

FUND MANAGERS REPORTS CONTINUED

2. Global Equity Fund Performance

The Waverton Global Equity Fund (the 'Fund') returned 3.2% (net of fees) for the Sterling A share class (net of fees) over the year ending 30 April 2023. This compares with 1.9% on the official benchmark, MSCI AC World Index.

Review

Equity markets continued to grapple with the implications of high inflation and the subsequent reaction of global central banks. In just one year, the US Federal Reserve lifted the overnight lending rate from 0.25% to 5% – the sharpest increase since World War Two. Though the overall move in equity markets was muted over the period, it masks several dynamics including a retrenchment of commodity prices, potential signs of improving global supply chains, as well as a de-synchronised global economic recovery as regions reopened from Covid restrictions at different times. Commodity prices fell but supply remains fundamentally tight and government bond yields rose sharply, particularly in the period from August to the start of November. Europe (+13.0%) and the UK (+8.5%) were the regional beneficiaries, as the former avoided a protracted energy crisis and reflecting high index weightings to cyclicals such as Energy (+12.1%) and Capital Goods (+12.3%). North America rose just +1.0% as its

larger weighting to longer duration equities became a headwind as discount rates rose.

The Fund's largest positive contributors to performance were Technip Energies (1.42%) and Industria de Diseño Textil "Inditex" (1.29%). Technip Energies is an engineering company with strong market positions in design and construction of large-scale LNG plants. The company is well positioned to benefit from rising energy investment and has leading positions in low carbon technologies including carbon capture and hydrogen. Inditex has recovered strongly having been given a wide berth by investors owing to its Russian exposure. The largest detractors from performance were Netease (0.76%) and Upstart (0.55%). Netease was caught up in the worsening sentiment towards China and its unpredictable political interference, so we decided to exit the position on lack of transparency. Upstart fell sharply as the validity of its business model came under pressure in a higher discount rate environment.

Outlook

As of mid-May 2023, corporate earnings for the first quarter of 2023 appear to be coming in better than expected, although aggregate expectations remain for profit growth in the full year to be barely above flat. The recent regional banking crisis in the US, which required a significant

liquidity injection to stabilise, has clearly highlighted pockets of economy that are feeling the lagged impact of tightening monetary conditions. Against this backdrop, markets currently believe that interest rates in the US have not just peaked but will also be cut later this year, reflecting the view that the economy will start to slow meaningfully. In our view, a lot appears to hinge on the health of the consumer where at present, household balance sheets remain strong, unemployment is low, and the labour market is tight. Notwithstanding the recent support for the banking sector, money supply is contracting meaningfully and as such a period of decelerating inflation and recession becomes increasingly likely.

We feel it is unlikely that the cost of capital will return to the ultra-low levels that have been seen over the last decade or so and in such an uncertain macroeconomic environment, our focus is on the resilience of free cash flow growth. We continue to seek out companies that meet our four key attributes of Durability, Opportunity, Alignment, and Valuation.

Tommy Faber
Fund Manager

References to benchmarks are for illustrative purposes only. There is no guarantee that the Fund will outperform its benchmark.

FUND MANAGERS REPORTS *CONTINUED*

3. UK Fund Performance

The Waverton UK Fund (the 'Fund') returned 8.4% (net of fees) for the Sterling A share class (net of fees) over the year ending 30 April 2023. This compares with 5.7% on the official benchmark, MSCI UK All Cap Index.

Review

The period was dominated by the effects of the Russian invasion of Ukraine and the remaining Covid-restrictions in China. Other than a humanitarian disaster, the war also led to significant shortages in energy, particularly gas for Europe, driving inflationary pressures. As central banks tried to contain these, interest rates increased along with recessionary risks. Poor UK government strategy contributed to a weakening of the pound versus the US dollar and liquidity challenges in the UK credit market. Rising interest rates caused Growth stocks to underperform Value stocks. The strong US dollar drove a significant outperformance from large UK companies compared to medium-size ones as the former derive more earnings from the US. From a sector perspective, energy, financials, and industrials outperformed and real estate, materials and communication services underperformed.

Two of the biggest positive relative contributors to the Fund's performance came from bids to buy the companies: industrial software company Aveva (-1.17%) was bought by their majority shareholder Schneider Electric and veterinary pharmaceutical company Dechra Pharmaceuticals (0.62%) announced discussions with private equity firm EQT. Moneysupermarket.com reported improving trends in their Money and Travel divisions as the UK credit and holiday markets recovered. Melrose and AB Foods announced strong recoveries following the Covid slowdown. On the negative side, National Express (-1.09%) was weighed down by driver shortages, high wage inflation, and high debt levels. Ocado (-0.93%) was weak as it saw declining UK sales, higher costs, and a slower ramp up in overseas facilities. Ongoing Covid-restrictions in China weighed on Intertek and Anglo American. Not owning HSBC weighed on the Fund's relative performance as they reported strong results, benefiting from higher interest rates as well as a recovery in Hong Kong.

Outlook

Whilst the war in the Ukraine is still on-going, energy prices in Europe are now back to pre-war levels. We hope that UK household energy bills will gradually decline during this summer, thus relieving some of the significant cost-of-living pressures. The latest

food price inflation continued to be very high, but hopefully this too will gradually come down. Global interest rates appear to be close to their peak, with the market focused on the financial and economic impact. Recent challenges at US regional banks could well continue. Even though the US Federal Reserve has made it clear customer deposits will be safe, that is not the case for shareholder equity. As economies slow and credit becomes more expensive, we expect the availability of financing to become more restricted.

The first quarter of earnings in 2023 was better than expected, showing no signs of recession, and mostly maintained full year guidance. Inflationary cost pressures are easing, but interest costs and tax payments are going up (UK corporate tax to 25% from 19%). We believe this is an environment where industry leaders gain share and we continue to favour profitable, resilient cash flow growers. With discount rates close to a peak, we are mindful of balancing growth with value stocks.

FUND MANAGERS REPORTS *CONTINUED*

4. Sterling Bond Fund Performance

The Waverton Sterling Bond Fund (the 'Fund') returned -8% (net of fees) for the Sterling A share class (net of fees) over the year ending 30 April 2023. This compares with -16.1% on the official benchmark, ICE BofA UK Gilt.

Review

Bond yields rose significantly over the period across global bond markets. In the UK, the ICE BofA UK Gilt index yield more than doubled, rising from 1.87% to 3.87%, having peaked at 4.62% on 10 October 2022, during the Truss budget episode. On a global basis, bond yields were affected by a significant rise in inflation expectations and the intervention by central bank policy makers in hiking interest rates above previous consensus expectations. In the UK, these trends were exacerbated by domestic politics, leading to the highest levels of volatility in the Gilt market for many decades.

The Fund significantly outperformed both UK Gilts and Sterling corporate bonds over the period, adding most value through its more conservative duration stance, its more diversified regional portfolio construction and strong credit selection. The Fund's exposure to the larger and more liquid US Dollar bond market (currency hedged) added significant relative value.

Outlook

We remain cautious on the outlook for the global economy, believing that financial markets are overly complacent about the lagged effects of significantly tighter monetary policy. The UK Base Rate moved from 0.75% to 4.25% during the year. Consequently, the Fund's positioning has moved significantly towards government bonds and away from credit. We believe that government bonds will perform strongly once the economic slowdown comes into focus, whilst credit is likely to be more volatile, impacted by a higher level of defaults.

Within our credit exposure (which is close to the lows of Q1 2020), we have allocated to issuers which we think are best placed to withstand more difficult credit conditions and in particular favour those businesses that have strong contracted cashflows, not closely related to the health of the economy. Despite the gloomy outlook we continue to find attractive opportunities within infrastructure and utilities and our long-standing legacy financials contributed strong gains at the end of the period. The Fund's credit exposure is of BBB quality and has a yield to maturity of 7.8%, which is attractive, despite the poor outlook.

Jeff Keen and James Carter Fund Managers

References to benchmarks are for illustrative purposes only. There is no guarantee that the Fund will outperform its benchmark.

FUND MANAGERS REPORTS *CONTINUED*

5. Strategic Equity Fund Performance

The Waverton Strategic Equity Fund (the 'Fund') returned -1.4% (net of fees) for the Sterling A share class (net of fees) over the year ending 30 April 2023. This compares with 11.8% on the official benchmark, UK CPI +4.5% index.

Review

Sentiment fluctuated through the year as investors attempted to decipher the risk of recession resulting from steep interest rate rises, the economic impacts of an ongoing war between Russia and Ukraine, and persistently high inflation. As we entered 2023, sentiment was optimistic on news of China's re-opening, but turned more cautious again as the collapse of Silicon Valley Bank made investors question the integrity of the financial sector and the cost and availability of credit going forward. The "Core" style factor (+0.2%) outperformed during this period as investors broadly moved positioning towards safe-haven names, and particularly away from the "High Growth" names (-7.2%) most impacted by rising discount rates. The market favoured Energy (+12.0%) names on higher oil and gas prices, with Industrials (+8.2%) also rebounding strongly on Chinese optimism and after Europe avoided an energy crisis over the winter months. Extremely sensitive to higher interest rates, Property (-15.4%) was the worst performer.

In absolute terms, the largest contributor to performance was LVMH (+60bps), with operations resilient despite the weakening macro environment and investors anticipating potential upside from the recovery of Chinese tourism. Yum China (+54bps) was also a strong contributor into the early part of 2023 as a beneficiary of reopening in China, particularly into Chinese New Year. The Protection Strategy (-78bps) was the largest detractor from performance during the period as markets avoided a sharp sell-off. Molten Ventures (-50bps) was the second largest detractor as risk appetite towards high growth and private companies declined. Upstart (-41bps) also underperformed due to the higher risk premiums assigned to high growth names, as well as an unexpected business model drift which undermined our original investment thesis.

Outlook

The outlook continues to be challenging, with increasing focus on the timing of a potential recession which could lead to interest rate cuts. On the bright side, while costs are still high in absolute terms, the pace of inflation seems to be slowing which helps to stabilise margin pressures for businesses facing demand headwinds. Unemployment in the US continues to be low which, at least for now, means the US consumer has remained resilient. Lastly, while China's reopening has thus far lagged expectations, there

is still an opportunity for this region to offset weaker demand elsewhere in the world once activity rebounds to a more normalised level.

In an ever-changing macro environment, we continue to believe that understanding the bottom-up drivers of our investments is key. When selecting companies, we favour names with strong business models that exhibit pricing power, where management teams have delivered value for shareholders, and where valuations are attractive given the long-term growth opportunity. We feel these names are well placed to navigate a volatile, uncertain macro environment and to create value for shareholders in the long term.

Alena Isakova Fund Manager

FUND MANAGERS REPORTS *CONTINUED*

6. Global Strategic Bond Fund Performance

The Waverton Global Strategic Bond Fund (the 'Fund') returned -2.4% (net of fees) for the US Dollar A share class (net of fees) over the year ending 30 April 2023. This compares with 2.9% on the official benchmark, ICE USD SOFR 1 Month.

Review

Bond yields rose over the period across global bond markets. For example, in the US, the 10-year US Treasury yield rose from 2.94% to 3.43%, having peaked at 4.24% in October 2022. The main driver was higher and more persistent inflation expectations and the Federal Reserve's tighter monetary policy, mainly in the form of much higher interest rates. Having described inflation as 'transitory' in 2021, the Federal Reserve has spent the last year in catch-up mode.

Over this period of exceptional weakness in bond markets, the Fund managed to limit the downside, mainly due to its more conservative duration stance, use of derivatives and strong credit selection. Duration was extended into the weakness seen during September/October 2022 via the purchase of long-dated US Treasuries and US long bond futures options, which was a profitable strategy.

Outlook

We remain cautious on the outlook for the global economy, believing that financial markets are overly complacent about the lagged effects of significantly tighter monetary policy. The Fed Funds Rate (upper bund) moved from 0.5% to 5.0% during the year. Consequently, the Fund's positioning has moved significantly towards government bonds and away from credit. We believe that government bonds will perform strongly once the economic slowdown comes into focus, whilst credit is likely to be more volatile, impacted by a higher level of defaults.

Within our credit exposure (which at 50% is as low as it has been since inception in 2010), we have allocated in the main to issuers which we think are best placed to withstand more difficult credit conditions and, in particular, favour those businesses that have strong contracted cashflows, not closely related to the health of the economy. However, despite the gloomy outlook, we continue to find attractive opportunities within many sectors, including infrastructure and utilities. Also, our long-standing legacy financials contributed strong gains at the end of the period. The fund's credit exposure is of BBB- quality and has a yield to maturity of 7.7%.

FUND MANAGERS REPORTS *CONTINUED*

7. Absolute Return Fund Performance

The Waverton Absolute Return Fund (the 'Fund') returned 0.6% (net of fees) for the Sterling P share class (net of fees) over the year ending 30 April 2023. This compares with 3% on the official benchmark, ICE GBP SONIA 3 Month.

Review

Markets experienced a high degree of volatility throughout the period, with equities and growth rallying strongly during the summer months, but this shifted in mid-August following the "higher for longer" rate rhetoric from members of the US Federal Reserve. Risk assets rallied again in the final months of the year and early in the first quarter, with equities ending positively despite turbulence following the collapse of Silicon Valley Bank in March. Gilts saw a historic sell-off after the UK Budget in September, while yields outside the UK also faced upward pressure due to higher-than-expected core inflation during the summer.

Over the period, it was positive to see all three components (absolute return, structured opportunities, and specialist fixed income) contribute positively. The leading contribution to returns came from the structured opportunities (+0.8%), specifically the BNP Talisman Growth vs Value

dispersion note (+70.3%). We exited this position after its rapid increase in value and whilst this was a small position at under 0.5% given the volatility profile, it does go to highlight the attractive returns one can generate. The largest detractor from returns was the Protection Strategy (-36%), followed by the GS Vocus Total Return Strategy (-22%). This was particularly disappointing given these strategies are designed to perform in weak equity markets, however both struggled against the low volatility and orderly sell off. We subsequently sold the Vocus Strategy in June.

Outlook

As far as the outlook is concerned, we think it more likely than not that there will be a recession in the US later this year, which makes us nervous about company earnings. We are also concerned that the market is too sanguine about the prospects for interest rates – i.e. that inflation may not come down quickly enough to enable reduction in short rates by central banks any time soon. The recent banking crises in the US and Switzerland also give cause for concern as they will likely result in an additional tightening of credit which will be a headwind particularly for smaller companies in the US, which are the engine of GDP growth, employing around 50% of the workforce.

Against a backdrop of higher rates, the stable negative correlation that fixed income has offered is an accident of history and we could be reverting to the previous regime where equity bond correlation is unstable, and potentially positive for a sustained period of time. In this market environment, our Fund is well-positioned to deliver attractive returns with minimal beta or correlation to traditional asset classes.

Luke Hyde-Smith Fund Manager

References to benchmarks are for illustrative purposes only. There is no guarantee that the Fund will outperform its benchmark.

FUND MANAGERS REPORTS *CONTINUED*

8. Multi-Asset Income Fund Performance

The Waverton Multi-Asset Income Fund (the 'Fund') returned -4% for the Sterling P share class (net of fees) over the year ending 30 April 2023. This compares with 9.9% on the official benchmark, UK CPI + 2.5% per annum.

Review

The Fund was defensively positioned through 2022 and went into the summer with a relatively low weight to equities. This protected capital from loss in the short term but was a drag on relative performance during a roughly six-week rally in equity markets, as expectations of peak inflation and rates percolated. Central bankers put paid to this in the Jackson Hole meeting in August, making it clear that their goal was to bring inflation down, and if that meant slower or negative economic growth, so be it. The Fund performed relatively well in the following weeks, as markets weakened. However, a September UK budget from the then Chancellor Kwasi Kwarteng, saw UK rates and bond yields spike and UK assets face a material headwind; in particular, property and duration-sensitive assets. Our Real Asset names struggled in this environment.

Notwithstanding defensive positioning in aggregate, the equities we owned contributed positively (+1.4%), with strong performance from European holdings such as Inditex (+67.5%) and LVMH (+49%), both benefitting from the reopening of the global economy following the pandemic. Fixed Income and Alternatives both fell (-1.1% and -2.2% respectively), with the largest detractors concentrated in the Real Assets space, Supermarket Income REIT (-26.7%) and Urban Logistics (-21.4%). The Protection Strategy also struggled against the orderly market sell off (-35.5%).

Outlook

We think it more likely than not that there will be a recession in the US (and likely elsewhere) later this year. This usually acts as a headwind to company earnings, which tend to decline around 20% in periods of negative GDP growth. We also believe the market is too sanguine about the prospects for interest rates – that is, the market expects cuts from September 2023 (in the US); we think rates will remain higher for longer. The recent banking crises in the US and Switzerland also give cause for concern as they will likely result in an additional tightening of credit which will be a headwind particularly for smaller companies in the US.

In spite of the challenges presented by higher interest rates, tightening credit conditions and high commodity prices, with are alive to the possibility that growth beats expectations. Employment in the US remains strong and consumers still have savings made during the pandemic to draw on. Close to home, it looks like the much-forecast recession in the UK is not materialising. Therefore, from a 'top-down' basis we are inclined to be cautious; however, by being highly selective at the security selection level, we believe can generate positive real returns on a medium-term time horizon.

James Mee Fund Manager

References to benchmarks are for illustrative purposes only. There is no guarantee that the Fund will outperform its benchmark.

FUND MANAGERS REPORTS *CONTINUED*

9. Real Assets Fund Performance

The Waverton Real Assets Fund (the 'Fund') returned -13.3% (net of fees) for the Sterling P share class (net of fees) over the year ending 30 April 2023. This compares with 11.3% on the official benchmark, UK CPI + 4%.

Review

Following a positive start to the year, the first major headwind arose in June, when recessionary fears mounted and inflationary concerns grew, resulting in UK REITS suffered from rising rates, slowing economic growth and poor UK market sentiment, while discounts across the investment company sector widened as equity markets declined. This reversed across July and August as markets rebounded and the Fund returned to positive performance. The main event however occurred in September, following the mini budget statement. An unprecedented rise in gilts yields, a precipitous decline in Sterling, aggressive market selling and some forced liquidation of assets by pension funds, cumulated in an emergency Bank of England intervention to stabilise the UK government bond market. This was not an environment that was conducive to positive performance from the UK REIT market, or indeed many UK assets, with the REIT index falling 17.4% over September alone, unfortunately contributing to the

majority of the Fund's decline over the period. Despite the challenges, holdings have maintained strong underlying dynamics, and with yields stabilising and indications of peak inflation, it is encouraging to see recent returns improving.

Top performers over the period were Shell (+17%) and EDP (+21.8%). In aggregate, our cyclical specialist lending exposure performed well (+1.8%), the majority of this coming from Oaktree Specialist Lending Corporation (+1.8%) which has benefited from the ongoing rise in rates through increase in income received and thus payable. Detractors were mostly in the REIT space, as expected (Supermarket Income REIT -26.7%, Target Healthcare REIT -26.2%, Tritax Big Box REIT -34.2%).

Outlook

Despite this tough period, there are grounds for optimism, particularly within the hard-hit property sector. We saw this recently with the announced bid for portfolio holding Industrials REIT at a 42.4% premium to the closing share price by Blackstone. In aggregate our property exposure is focused on parts of the market with low gearing, fixed rate debt, with little short-term refinancing risk coupled with top line revenue growth from undersupplied areas of the real estate market and structural tailwinds to the investment case.

We remain optimistic and believe the fund will deliver inflation-beating capital returns over the long term. The Fund is well positioned with a range of core inflation-linked assets across property and infrastructure, mainly floating rate exposure across the specialist lending names, attractive asset finance holdings and commodity exposure, expressed through energy and green metals.

Luke Hyde-Smith Fund Manager

FUND MANAGERS REPORTS *CONTINUED*

10. European Capital Growth Fund Performance

The Waverton European Capital Growth Fund (the 'Fund') returned 11.3% (net of fees) for the Euro I (Institutional) share class (net of fees) over the year ending 30 April 2023. This compares with 8.1% on the official benchmark, MSCI Europe ex UK Index.

Review

The review period fell into two halves. From 1 May 2022 to the end of September 2022 the market declined on fears that higher interest rates were needed to reduce wage-driven service sector price rises. Returning inflation to target would necessitate unemployment to rise – something unlikely to be compatible with corporate earnings growth. However, after September the US reported better than expected headline inflation numbers combined with remarkably robust consumer spending, boosted in Europe by a collapse in gas prices. This led to rally in shares.

The Fund outperformed strongly over the review period, led by Energy and Industrials. Contributions came from an eclectic mix of Technip Energies, (+80%), Inditex (61%) and Munich Re (49%). Konecranes and Siemens also performed well. Our worst stock was LivaNova (-26%) that was sold as a

result of a thesis break. We continue to hold Philips and Thule despite them detracting from performance in the time being reported.

Outlook

The outlook remains remarkably unclear. Heineken, the Dutch brewing giant, summed it up recently by hosting a special unplanned conference call after their first quarter 2023 results given the unprecedented volatility in their regional sales performances. The debate continues on the effects of ongoing steadily rising interest rates and may result in the economy surprising more on the downside rather than upside.

Given the euro area's low historical GDP rate there has been very low confidence, especially amongst British and to a lesser extent US investors, to put money into the euro area. We detect a change for a number of reasons. Possibly the most important is that Europe has a broad offering of companies to invest in. In the race to decarbonise, stakeholders want to see net-zero strategies in place. To achieve this technical skill sets will be vital and are often in short supply. This would help Europe with its deep skill set. It will be an investment-led cycle benefitting sectors that make 'stuff' – tangible outputs such as energy, materials, capital equipment, and industrial technologies; all sectors heavily overweight in the Fund.

Elsewhere we continue to have a big underweight in banks and be sceptical towards the most popular overweights: Novo Nordisk, LVMH, ASML. These are stocks that are widely held (and we too held Novo up to 2023). They trade at very high PE multiples relative to the market and we believe there is better value elsewhere.

Christopher Garsten Fund Manager

References to benchmarks are for illustrative purposes only. There is no guarantee that the Fund will outperform its benchmark.

FUND MANAGERS REPORTS *CONTINUED*

11. European Dividend Growth Fund

Performance

The Waverton European Dividend Growth Fund (the 'Fund') returned 18.2% (net of fees) for the Sterling A share class (net of fees) over the year ending 30 April 2023. This compares with 13% on the official benchmark, MSCI Europe ex UK Index.

Review

The review period was initially characterized by a continued gloomy backdrop of high inflation from energy shortages feeding through into rising interest rates and falling economic growth prospects. However, this seems to have hit the US market hard as interest rates in Europe rose less than in the US. From September onward, the European market started to rise strongly buoyed by cheap companies producing strong results.

The best individual stocks in the Fund, ranked by declining contribution, were mainly industrial companies led by Technip Energies (energy, 2.31%), Munich Re (financial, 1.17%) and Inditex (1.28%) (owner of retail brand Zara). The worst were Philips (-0.69%), Dutch insurer NIN Group (-0.51%) and consumer discretionary stock Husqvarna (-0.49%), the worst detracting 0.7% to performance.

Outlook

We are still positive about the outlook thanks to relatively low European valuations and a weak euro. The kicker will be the next cycle, which we believe will be driven by climate change mitigation efforts and energy saving initiatives. It will be an investment led cycle benefitting sectors that make 'stuff' – tangible outputs: energy, materials, capital equipment, industrial technology.

And commodity prices are falling. Natural gas having peaked at above €300 per MW hour in August, is down now at around €30. These alone should feed into falling inflation which, in due course, will reduce the need for future rises.

The Fund's biggest over-weights remains Materials +7%, relative to a benchmark or neutral position of 7% and +6% for Industrials (benchmark 16%). Thus, we have 36% in the two sectors. This may look as though the Fund is strongly cyclical or economically sensitive. We disagree and argue that the companies we own offer, for various reasons, secular growth and do not need a strong economy to do well. Elsewhere we continue to have a big underweight in banks and be sceptical towards the most popular over-weights: namely Novo Nordisk, LVMH, ASML. These are stocks that are widely held (and we too held Novo up to 2023). They trade at

very high PE multiples relative to the market and we believe there is better value elsewhere.

Charles Glasse
Fund Manager

References to benchmarks are for illustrative purposes only. There is no guarantee that the Fund will outperform its benchmark.

FUND MANAGERS REPORTS *CONTINUED*

12. Multi-Asset Growth Fund

Performance

The Waverton Multi-Asset Growth Fund (the 'Fund') returned -8% (net of fees) for the Sterling P share class (net of fees) over the year ending 30 April 2023. This compares with +10.9% on the official benchmark, UK CPI _3.5%.

Review

As far as performance attribution is concerned, comparing with an equity-based index is more helpful than comparing with CPI+ 3.5%: otherwise, any asset which has produced less than 10.9% over the last year has 'underperformed' – especially difficult when global equities were up just 2.0% in sterling terms, gilts were down 16% and almost every asset was adversely affected by the sharp rise in interest rates seen around the world over the last year.

Top contributors to the fund's performance in the year included Inditex (0.87%) (which benefited from the opening up of the economy after Covid), Siemens (0.32%) (as European industrials recovered) and Shell (as oil prices rose following the Russian invasion of Ukraine). Top detractors included the Protection Strategy (which turned out to be quite a costly hedge against a market crash), Supermarket Income REIT (-0.60%) and Urban Logistics REIT (both affected, along with most property companies around the world, by rising interest rates). In bond space, our stock selection (chiefly in being short duration

as yields rose) protected us from the worst of the downside from that asset class; alternatives were more difficult given what happened to REITS.

The biggest change we have made during the year in terms of asset allocation was the decision to increase bond weightings. On 3 April last year we had less than 15% of the fund in fixed interest; by 15 April this year it was just above 15%. Most of this change took place last autumn as bond yields became increasingly attractive following the collapse in bond prices as central banks increased short rates to combat inflation. The increase in fixed interest was funded by taking some money out of Alternatives through a decrease in cash.

Last spring and summer we introduced three new holdings into the portfolio: T-Mobile US, United Overseas Bank and Canadian Pacific. Pepsico, Syncona and Union Pacific were sold. This year, DuPont de Nemours and United Health Group have come into the portfolio. The former is an industrial which looks undervalued given the self-help measures being implemented by new management, and the latter should be able to grow despite challenging economic conditions given its very strong market position in health insurance and healthcare administration.

Outlook

As far as the outlook is concerned, we think it more likely than not that there will be a recession in the US later this year, which makes us nervous

about company earnings. We are also concerned that the market is too sanguine about the prospects for interest rates i.e. that inflation may not come down quickly enough to enable reduction in short rates by central banks any time soon. The recent banking crises in the US and Switzerland also give cause for concern as they will likely result in an additional tightening of credit. For those reasons, we are underweight equities and have been adding to our bond exposure. However, the extent of our equity underweight is modest because sentiment is already very depressed and companies generally seem to be producing surprisingly resilient earnings figures (and slightly ahead of expectations).

In spite of the challenges presented by higher interest rates, tightening credit conditions and high commodity prices, employment in the US remains full and consumers still have savings made during the pandemic to draw on. Close to home, it looks like the much-forecast recession in the UK is not materialising. Therefore, on a 'top-down' basis we are inclined to caution; however, by being highly selective at the security selection level, we believe can generate returns on any medium-term time horizon.

BACKGROUND OF THE COMPANY

Waverton Investment Funds Plc (the "Company") is an open-ended investment company with variable capital, incorporated on 25 March 2004 in Ireland as a public limited company pursuant to the Companies Act 2014 and authorised by the Central Bank of Ireland (the "Central Bank") as an investment company pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, (as amended) and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations").

Except where the context otherwise requires, defined terms shall bear the meaning given to them in the prospectus dated 22 February 2023, which may be amended from time to time (the "Prospectus").

The Company is an umbrella type open-ended investment company with segregated liability between sub-funds. As at 30 April 2023, the Company has twelve active sub-funds as follows (individually a "Fund", collectively the "Funds"):

FUNDS	LAUNCHED OPERATIONS
Waverton Asia Pacific Fund ("Asia Pacific Fund")	1 November 2005
Waverton Global Equity Fund ("Global Equity Fund")	1 April 2007
Waverton UK Fund ("UK Fund")	1 April 2007
Waverton Sterling Bond Fund ("Sterling Bond Fund")	12 January 2010
Waverton Strategic Equity Fund ("Strategic Equity Fund")	12 January 2010
Waverton Global Strategic Bond Fund ("Global Strategic Bond Fund")	12 January 2010
Waverton Absolute Return Fund ("Absolute Return Fund")	9 March 2014
Waverton Multi-Asset Income Fund ("Multi-Asset Income Fund")	6 October 2014
Waverton Real Assets Fund ("Real Assets Fund")	3 December 2018
Waverton European Capital Growth Fund ("European Capital Growth Fund")	22 February 2019
Waverton European Dividend Growth Fund ("European Dividend Growth Fund")	22 February 2019
Waverton Multi-Asset Growth Fund ("Multi-Asset Growth Fund")	15 February 2021

As at 30 April 2023, the following classes of shares are available in respect of the Funds: Class A Euro, Class A US\$, Class A Stg£, Class B Euro, Class B US\$, Class B US\$ Acc, Class B Stg£, Class B Stg£ Acc, Class F Euro, Class F Stg£, Class F Stg£ Hedged, Class F US\$, Class P US\$ Hedged, Class P Stg£, Class P Stg£ Acc, Class PI Stg£, Class I CA\$, Class I Euro, Class I Euro Acc, Class I US\$, Class I Stg£, Class I US\$ Acc, Class I US\$ Hedged, Class I Stg£ Hedged, Class L Euro, Class L Stg£, Class M Euro, Class M Stg£, Class M US\$, Class R Stg£ and Class S Stg£ in accordance with Schedule IV of the Prospectus and with the supplemental Prospectus. Further classes of shares may be issued in accordance with the requirements of the Central Bank.

RBC Investor Services Ireland Limited (currently CACEIS Investor Services Ireland Limited from July 3, 2023), the "Administrator" determines the net asset value per share of each class of each Fund on each Dealing Day. The valuation point is 12 noon (Irish time) on each dealing day (except for

the last dealing day of each calendar quarter when assets are valued at the close of the regular trading session of the London Stock Exchange and securities traded on the London Stock Exchange will be valued using post-auction prices, or such other time as the directors of the Company may decide and notify to its shareholders).

The most recent Prospectus of the Company is dated 22 February 2023.

Other information

The annual report and audited financial statements and the condensed interim financial statements will be made available to Shareholders by placing a copy of such document on the website of the Company (or alternatively by sending to the Shareholder by post, by electronic mail or any other means of electronic communication on request).

ANNUAL REPORT AND AUDITED FINANCIAL STATEMENTS

Financial statements

DIRECTORS' REPORT

The Directors submit this report together with the audited financial statements for the financial year ended 30 April 2023.

Directors' responsibilities

Irish company law requires the Directors to prepare financial statements for each financial year. The financial statements are prepared in accordance with the financial reporting standards issued by the Financial Reporting Council and promulgated by the Chartered Accountants Ireland including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland".

Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company as at the financial year end date and of the result of the Company for the financial year and otherwise comply with the Companies Act 2014.

In preparing those financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with the applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the company or to cease the operations, or have no realistic alternative but to do so.

The Directors are responsible for ensuring that the Company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and result of the Company to be determined with reasonable accuracy, ensure that the financial statements and Directors' Report comply with the Companies Act 2014 and with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (together the "UCITS Regulations") and enable the financial statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Accounting records

To ensure that adequate accounting records are kept in accordance with Section 281 to 285 of the Companies Act 2014, the Directors of the Company have employed a service provider, RBC Investor Services Ireland Limited. The books of account are located at the offices of the Administrator at 4th Floor, One George's Quay Plaza, George's Quay, Dublin 2.

Principal activities

The Company is organised as an investment company with variable capital under the laws of Ireland as a public limited company pursuant to the Companies Act 2014, and the UCITS Regulations. The Company is organised in the form of an umbrella fund with segregated liability between the Funds.

Statement of audit information

The Directors confirm that during the financial year ended 30 April 2023:

- a) So far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditors are unaware, and
- b) The Directors have taken all steps that ought to have been taken by the Directors in order to make himself/herself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

Significant events during the financial year

Please see Note 18.

Significant events post financial year end

Please see Note 19.

Review of the business and future developments

The business of the Company is reviewed in detail in the Investment Manager's reports. The Company is to continue to act as an investment vehicle as set out in its Prospectus.

Principal risks and uncertainties

The Directors are responsible for management of risk. The Company has a Risk Management Policy which defines the Board's approach to risk appetite, risk tolerance and culture. The Risk Management Policy identifies the major risks to the Company and the Sub Funds. The Company, having identified the major risks, makes informed decisions on how to respond, mitigate, monitor and control these risks. The risk management and compliance units within the Investment Manager, which are independent of the portfolio managers, monitor and report on the risks identified to each board meeting. A detailed analysis of the financial risks

DIRECTORS' REPORT CONTINUED

of the Company and how these are managed are set out in Note 11 to the financial statements.

Results and dividends

The results for the financial year are stated on pages 112 to 126 of the financial statements. Particulars relating to the issue and redemption of units of redeemable Shares are set out in Note 2, "Share Capital" of the financial statements. Distributions are set out in Note 16 "Distributions".

Manager

The Management Company is responsible for monitoring the below managerial functions:

- Operational Risk Management - Monitoring of delegates so that there are appropriate and effective operational risk procedures in place at the delegates.
- Fund Risk Management - Monitoring through the delegates that the Funds risks are identified and managed.
- Investment Management - Monitoring that the Investment Manager is in compliance with the approved investment approach and on an ongoing basis monitoring the investment process and performance.
- Capital and Financial Management - Monitors that relevant accounting records are properly maintained and that the assets and liabilities of the Funds are valued appropriately. The Management Company also ensures it is appropriately capitalised at all times.
- Regulatory Compliance - Monitors that the Funds are in compliance with regulatory obligations.
- Distribution - Monitors the approved distribution.

Directors

The names of the Directors of the Company during the financial year are set out below (* Independent):

Mr. John McClintock*
Mr. Eanna McHugh*
Mr. Marc Geduldt
Mr. Michael Allen
Mr. Paul McNaughton
(Ceased to be director on 6th November 2022.)

Directors' & related parties' interests

Details of Directors' and related parties' interests as at 30 April 2023 and 30 April 2022 are listed in Note 17 of the financial statements.

Connected persons

The Manager is satisfied that: (i) there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in the Central Bank's UCITS Regulations 43 (i) are applied to all transactions with connected persons; and (ii) transactions with connected persons entered into during the financial year complied with the obligations set out in the Central Bank's UCITS Regulations 43 (2).

Any transactions carried out with a Fund by connected persons will be carried out as if effected on normal commercial terms conducted at arm's length. Transactions must be in the best interests of the relevant Shareholder.

The Manager confirms they have complied with the above requirements during the financial year.

Auditors

So far as each person who was a director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the auditor is unaware. Having made inquiries of fellow directors and the

Company's auditor, each director has taken all the steps that he obliged to take as a director in order to make himself aware of any relevant audit information and to establish that the auditor is aware of that information in accordance with section 332 of the Companies Act 2014.

The auditors, Grant Thornton, have indicated their willingness to continue in office in accordance with section 383(2) of the Companies Act 2014.

Corporate governance code

The Directors have assessed the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes and Management Companies published by Irish Funds ("IF") in December 2011 (the "Code"). The Directors adopted all corporate governance practices and procedures in the Code.

Directors compliance statement

Each of the persons who are Directors at the time when this Directors' Report is approved acknowledge that they are responsible for securing the Company's compliance with its relevant obligations.

To ensure that the Company has achieved material compliance with its relevant obligations, the Directors confirm that they have:

- a. Drawn up a compliance policy statement that sets out the Company's policies respecting compliance by the Company with its relevant obligations;
- b. Put in place appropriate arrangements or structures that are designed to secure material compliance with the Company's relevant obligations; and
- c. Conducted an annual review during the financial year of any arrangements or structures referred to in (b) that have been put into place.

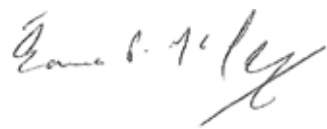

Financial statements

DIRECTORS' REPORT *CONTINUED*

Audit committee

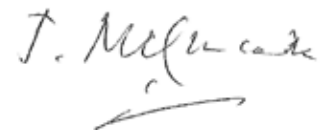

The Company has not established an audit committee within the meaning of Section 167 of the Companies Act 2014. Given the internal organisation of the Company, the nature, scope and complexity of the Company's activities and the existing processes and procedures adopted by the Company (including, without limitation, the establishment of a committee responsible for supporting the Board in relation to the review of financial statements and cooperation with the external auditors of the Company), the Board does not consider that an audit committee within the meaning of Section 167 of the Companies Act 2014 is required.

Signed on behalf of the Board
of Directors:

Eanna McHugh
Director

Date: 23 August 2023

John McClintock
Director

Date: 23 August 2023

**Report of the Depositary to the Shareholders
For the year ended 30 April 2023**

As required by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) ("the Regulations") and solely within the context of our oversight duties as depositary, we are pleased to present our report as follows.

In our opinion, Waverton Investment Funds plc (the "Company") has been managed for the year ended 30 April 2023:

- (i) In accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and the Regulations; and
- (ii) Otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Regulations.

Independent Auditor's Report to the Members of Waverton Investment Funds Plc

Opinion

We have audited the financial statements of Waverton Investment Funds Plc ("the Company"), which comprise the Statement of Financial Position and the Portfolio of Investments as at 30 April 2023 and the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Shares for the financial year ended 30 April 2023, and the related notes to the financial statements, including the summary of significant accounting policies.

The financial reporting framework that has been applied in the preparation of the financial statements is Irish law and FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (Generally Accepted Accounting Practice in Ireland).

In our opinion, the Company's financial statements:

- give a true and fair view in accordance with Generally Accepted Accounting Practice in Ireland of the assets, liabilities and financial position of the Company as at 30 April 2023 and of financial performance for the financial year then ended; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law. Our responsibilities under those standards are further described in the 'Responsibilities of the auditor for the audit of the financial statements' section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard for Auditors (Ireland) issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and the ethical pronouncements established by Chartered Accountants Ireland, applied as determined to be appropriate in the circumstances for the entity. We have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Board of Directors (or the "Directors") use of going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Other information

Other information comprises information included in the annual report, other than the financial statements and the auditor's report thereon, including the Background of the Company, Directors' report, Report of the Depositary to the Shareholders of Waverton Investment Funds Plc, Investment Objectives, Investment Manager's Reports, Top 5 Investments and Portfolio Analysis, Directors and Other Information, Statements of Changes in Composition of Portfolio and the appendices.

Independent Auditor's Report to the Members of Waverton Investment Funds Plc (continued)

Other information (continued)

The Directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies in the financial statements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Matters on which we are required to report by the Companies Act 2014

- We have obtained all the information and explanations, which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the Directors' report is consistent with the financial statements. Based solely on the work undertaken in the course of our audit, in our opinion, the Directors' report has been prepared in accordance with the requirements of the Companies Act 2014.

Matters on which we are required to report by exception

Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Directors' report.

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of Directors' remuneration and transactions specified by sections 305 to 312 of the Act have not been made. We have no exceptions to report arising from this responsibility.

Responsibilities of those charged with governance for the financial statements

As explained more fully in the Directors' report, the Directors are responsible for the preparation of the financial statements which give a true and fair view in accordance with Generally Accepted Accounting Practice in Ireland, including FRS 102, and for such internal control as they determine necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Responsibilities of the auditor for the audit of the financial statements

The auditor's objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes their opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists.

Independent Auditor's Report to the Members of Waverton Investment Funds Plc (continued)

Responsibilities of the auditor for the audit of the financial statements (continued)

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs (Ireland), the auditor will exercise professional judgment and maintain professional scepticism throughout the audit. The auditor will also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for their opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If they conclude that a material uncertainty exists, they are required to draw attention in the auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify their opinion. Their conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.

The auditor communicates with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that may be identified during the audit.

The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

NOTES TO THE FINANCIAL STATEMENTS

I. Accounting policies

The significant accounting policies and estimation techniques adopted by the Company are as follows:

Basis of presentation of financial statements

The financial statements are prepared in accordance with Financial Reporting Standard 102 ("FRS 102") applicable in the UK and Republic of Ireland and Irish Statute comprising the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (together the "UCITS Regulations").

The format and certain wordings of the financial statements have been adapted from those contained in the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

Under FRS 102 Section 7.1A 'Statement of Cash Flows', the Company has availed of the exemption available to open-ended investment funds and not prepared a cash flow statement as it meets the following criteria;

- (i) substantially all of the Company's investments are highly liquid;
- (ii) substantially all of the Company's investments are carried at fair value; and
- (iii) the Company provides a statement of changes in net assets.

The financial statements have been prepared on a going concern basis.

Historical cost convention

The financial statements are prepared under the historical cost convention as modified to include investments at fair value through profit or loss.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss as current assets are stated at mid-market price at 12 noon (Irish time) on each Dealing Day except for the last Dealing Day of each calendar quarter in the Statement of Financial Position. This is in accordance with the Prospectus where the mid-market price at 12 noon (Irish time) on each Dealing Day except for the last Dealing Day of each calendar quarter, are incorporated into the Dealing NAV. Unrealised gains and losses arising from the financial statements valuation are recorded in the Statement of

Comprehensive Income and represent the difference between Fair Value and the cost of the investments. A reconciliation between the net asset value as per the Financial Statements and the published net asset value can be seen in Note 12 "Net Asset Comparison".

Each security, which is listed or traded on a regulated market, is valued on the regulated market, which is normally the principal market for such security. For the ongoing valuations (i.e. valuations for the purpose of the calculation of the net asset value of the relevant Fund), the valuation is carried out by reference to the closing mid-market quotation on that regulated market. In the event that any investment is not listed or traded on any regulated market, such security is valued at the probable realisation value determined with care and in good faith by a competent person (which may be the Investment Manager) approved by RBC Investor Services Bank S.A. (Dublin Branch) (the "Depositary") as a competent person for such purpose in consultation with the Investment Manager. Such probable realisation value is determined: (i) by using the original purchase price; (ii) where there have been subsequent trades with substantial volumes, by using the latest trade price provided that the Administrator, in consultation with the Investment Manager, considers such trades to be at arm's length; (iii) where the Investment Manager believes the investment has suffered a diminution in value, by using the original purchase price that shall be discounted to reflect such a diminution; or (iv) if the Administrator in consultation with the Investment Manager believes a mid-quotation from brokers reliable, by using such mid quotation or, if unavailable, a bid quotation. Alternatively, the Administrator in consultation with the Investment Manager may use such probable realisation value estimated with care and in good faith as may be recommended by a competent professional (which may be the Investment Manager) approved for that purpose by the Depositary in consultation with the Investment Manager. Due to the nature of such unquoted securities and the difficulty in obtaining a valuation from other sources, such competent professional may be related to the Investment Manager.

Valuations of unquoted securities in the Asia Pacific Fund amounted to USD Nil at 30 April 2023 (30 April 2022: USD Nil), Multi-Asset Income Fund amounted to GBP 482,704 at 30 April 2023 (30 April 2022: GBP Nil) and Real Assets Fund amounted to GBP 3,012,071 (30 April 2022: GBP Nil). There were no other unquoted investments across the other funds.

Financial statements

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

I. Accounting policies (continued)

Financial assets at fair value through profit or loss (continued)

Investments in an investment fund are valued on the basis of the latest available net asset value relevant to the investment fund. Certain Funds may invest in one or more investment funds. As a shareholder of another investment fund, a Fund would bear, along with other shareholders, its pro rata portion of the expenses of other investment funds, including management and/or other fees. These fees would be in addition to the management fees and other expenses which a Fund bears directly in connection with its own operations.

Exchange-traded derivative instruments, including futures, are valued as at close of the regular trading session of the London Stock Exchange on the Dealing Day at the settlement price for such instruments on the relevant exchange. If the settlement price of an exchange-traded derivative instrument is not available, the value of such instrument shall be the probable realisation value estimated with care and in good faith by a competent professional (which may be the Investment Manager) appointed by the Directors approved for that purpose by the Depositary in consultation with the Investment Manager. No such valuations were required at 30 April 2023 or 30 April 2022. Over-the-counter derivative instruments are valued as at 12.00 noon (Irish Time) of the regular trading session of the London Stock Exchange on the Dealing Day at the settlement price provided by the counterparty to such transactions daily. Details of options and futures held as at 30 April 2023 are included in the Portfolios of Investments.

Forward foreign exchange contracts are valued at the Valuation Point by reference to the prevailing market quotations, namely the price at which a new forward contract of the same size and maturity could be undertaken, or, if unavailable, at the settlement price as provided by the counterparty daily. The valuations of those securities which are valued at settlement price are verified at least weekly by an independent person approved for that purpose by the Depositary, who may be the Investment Manager.

The unrealised appreciation or depreciation on open forward foreign exchange contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realised gains or losses include net gains on contracts, which have been settled or offset by other contracts. As at 30 April 2023, the Company held forward currency contracts for all the Funds. As at 30 April 2022, the Company held forward currency contracts for the Asia Pacific Fund, Sterling Bond Fund, Strategic Equity Fund, Global Strategic Bond Fund, Multi-Asset Income Fund, Real Assets Fund and the European Capital Growth Fund.

For open futures contracts, changes in the fair value of the contract are recognised as unrealised appreciation or depreciation by "marking-to-market" the value of the contract at the Statement of Financial Position date. When the contract

is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded as a realised gain or loss. Futures contracts are held at fair value through profit or loss. Gains and losses arising from changes in the fair value of the futures contracts are included in the Statement of Comprehensive Income in the financial year in which they arise. As at 30 April 2023, the Company held futures for the Sterling Bond Fund, Global Strategic Bond Fund, Absolute Return Fund and Multi-Asset Income Fund. As at 30 April 2022, there were no futures held by the Company.

Options, held at fair value through profit or loss, are fair valued daily based upon the quotation provided by counterparty on the principal exchange on which the option is traded. Realised and unrealised gains and losses arising from option contracts are included in the Statement of Comprehensive Income in the financial year in which they arise. As at 30 April 2023, the Company held options for the Sterling Bond Fund, Global Strategic Bond Fund and Multi-Asset Income Fund. As at 30 April 2022, the Company held options for the Sterling Bond Fund and Global Strategic Bond Fund.

Measurement and recognition

The Company has elected to apply the recognition and measurement provisions of IFRS 9 Financial Instruments ("IFRS 9").

Financial instruments categorised at fair value through profit or loss are measured initially at fair value, with transaction costs for such instruments being expensed immediately in the Statement of Comprehensive Income.

Financial assets and liabilities not at fair value through profit or loss are recognised initially at fair value plus transaction costs that are directly attributable to their acquisition or issue.

Classification

The Company classifies its investment based on the Company's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets, in accordance with IFRS 9. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions.

Equity, bond and derivative instruments are measured at fair value through profit or loss unless, for equity and bond instruments not held for trading, an irrevocable option is taken to measure at fair value through other comprehensive income.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

Subsequent measurement

After initial measurement, the Company measures financial instruments, which are classified as at fair value through profit or loss, at their fair values.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from a reputable broker/counterparty in the case of non-exchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced at the mid-market price at 12 noon (Irish time) on each Dealing Day except for the last Dealing Day of each calendar quarter value for financial statements purposes.

If a quoted market price is not available on a recognised stock exchange or from broker/counterparty, the fair value of the financial instruments may be estimated by a competent person using valuation techniques, including use of recent arm's length market transactions and reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Subsequent changes in the fair value of financial instruments at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

All investments in the Company's portfolios as at 30 April 2023 and 30 April 2022 were recorded at the fair value.

Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or the Company has transferred substantially all the risk and rewards of ownership and the transfer qualifies for derecognition in accordance with IFRS 9. The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

Offsetting

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. There were no netting arrangements in place for the year ended 30 April 2023.

Cash and other liquid assets

Cash and other liquid assets are valued at their face value with interest accrued (if any) as at the valuation point.

Cash and cash equivalents include cash on hand, cash held as margin, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. In the statement of financial position, bank overdrafts are shown within current liabilities. Details sets out in note 11.

Investment transactions

Investment transactions are accounted for as of the date they are purchased or sold. During the financial years ended 30 April 2023 and 30 April 2022, realised gains and losses on the sale of investments are calculated using the weighted average cost method. Realised gains and losses on investment transactions are recorded in the Statement of Comprehensive Income. Bond interest income is accrued daily on an effective yield basis.

Investment income

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Bank interest income is accounted for on an accrued interest basis. Bond interest income is accrued daily on an effective yield basis. Income is shown gross of non-recoverable withholding tax, which is disclosed separately in the Statement of Comprehensive Income. The Company may benefit from a reduction in the rate of withholding tax by virtue of the double taxation agreements in operation between Ireland and other countries. Consequently, the Company may be able to reclaim withholding tax suffered by it in particular countries. Withholding tax reclaims are accounted for on a cash receipts basis in the Statement of Comprehensive Income.

Distribution policy

Bi-annual distributions will be declared and distributed in respect of each Fund in each financial year from net income (excluding capital gains) on 30 April and 31 October except for the Sterling Bond Fund, the Global Strategic Bond Fund, the Multi-Asset Income Fund, the Real Assets Fund, the European Capital Growth Fund and the European Dividend Growth Fund. The Company will declare dividends quarterly in respect of the Global Strategic Bond Fund, the Sterling Bond Fund, the Multi-Asset Income Fund and the Real Assets Fund on 31 January, 30 April, 31 July and 31 October in each financial year; semi-annually in respect of the European Dividend Growth Fund on 30 June and 31 December in each financial year and annually in respect of the European Capital Growth Fund on 30 April in each financial year. It is proposed that dividends will not be declared in respect of the Class B US\$ Acc Shares and Class B Stg£ Acc Shares of

Financial statements

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

I. Accounting policies (continued)

Distribution policy (continued)

the Global Equity Fund, Class I Euro Acc Shares of the Global Strategic Bond Fund, Class P Stg£ Acc of the Multi-Asset Income Fund, Class P Stg£ Acc of the Multi-Asset Growth Fund, Class P Stg£ Acc of the Real Assets Fund, Class I US\$ Acc of the European Capital Growth Fund. Instead, any net investment income and realised and unrealised capital gains net of realised and unrealised capital losses attributable to each of these classes will be accumulated in net asset value per share of the relevant class and will be invested in accordance with the investment objective and policies of the relevant Fund. Shareholders should note that, in the case of Funds for which a performance fee may be charged as follows: (1) any performance fee is charged to capital of the relevant Fund; and (2) for those Classes of Shares identified in the column of the table in Schedule IV of the Prospectus headed "Fees and Expenses to Capital" as "Yes", 100% of the management fees, Administration fees, Depositary fees, operational expenses and borrowing expenses, where applicable is charged to capital of the relevant Fund. Details of distributions made are included in Note 16.

Foreign exchange translation

Functional and presentation currency

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which each Fund operates (the "Functional Currency"). The Functional Currency is: Sterling ("GBP") for the Global Equity Fund, the UK Fund, the Sterling Bond Fund, the Strategic Equity Fund (formerly Tactical Equity Fund), the Absolute Return Fund, the Multi-Asset Income Fund, the Multi-Asset Growth Fund, the Real Assets Fund and the European Dividend Growth Fund; U.S. Dollar ("USD") for the Asia Pacific Fund, the Global Strategic Bond Fund and the Global Core Equity Fund (*On 8 November 2021, the Waverton Global Core Equity Fund merged into the Waverton Strategic Equity Fund); Euro ("EUR") for the European Capital Growth Fund. The presentation currency for financial statement purposes of each Fund is their Functional Currency. The Company has adopted EUR as its Functional Currency for the Company as a whole.

Transactions and balances

Assets and liabilities denominated in foreign currencies are translated into the Functional Currency of each Fund at the exchange rates ruling at the Statements of Financial Position date. Transactions in foreign currencies are translated into the Functional Currency of each Fund at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the financial year. The Company's results and financial position are translated from the Funds' Functional Currency to EUR as follows: Assets and Liabilities, including Net Assets Attributable

to Holders of Redeemable Shares are translated at the closing rate at each Statement of Financial Position date. Income and expenses for each Statement of Comprehensive Income are translated at the average exchange rate for the financial year. Notional Exchange gains or losses due to the presentation of these financial statements in EUR are included in the Statements of Changes in Net Assets Attributable to Holders of Redeemable Shares.

Transaction costs

Transaction costs are accounted for as of the date securities are purchased or sold and are included in the Statement of Comprehensive Income as required by FRS 102.

Transaction costs include fees and commissions paid to agents (including employees acting as selling agents), advisers, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative costs. For trades on bonds, the commissions are wrapped up in the price so we are unable to split out the transaction costs.

Operating expenses

The Company pays out of the assets of each of the Funds all normal operating expenses including depositary fees, administration fees, Investment Manager fees, Manager fees, Directors' remuneration, NAV publication and circulation fees, audit and other professional fees and stamp duties and charges incurred on the acquisition and realisation of investments. Performance fees are being paid out of the assets of designated Funds. Such costs are expensed in the financial year to which they relate.

All operating expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

Income equalisation

It is intended that all Funds will operate income equalisation. Income equalisation prevents the dilution of current shareholders' earnings by applying a portion of the proceeds from Shares issued or redeemed to undistributed income. When Shares are purchased or redeemed the price may include an element of income. Equalisation is this element of income paid out to shareholders who have purchased or redeemed during this period.

Receivables from investments sold and payables for investments purchased

Receivables from investments sold represent receivables for securities sold that have been contracted for but not yet settled or delivered on the reporting date. These amounts are recognised at cost and include all transaction costs and commissions due in relation to the trade. Payables for

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

investments purchased represent payables for securities purchased that have been contracted for but not yet settled or delivered at the reporting date. These amounts are recognised at cost and include all transaction costs and commissions due in relation to the trade.

Receivables from subscriptions due and payables for redemptions due

Receivables from subscriptions due represent the amounts due from investors for subscriptions that have been contracted for but not yet received and therefore are shown as a receivable at the financial year end. Payables for redemptions due represent amounts due to investors for redemptions that have been contracted for but not yet paid and therefore are shown as a payable at the financial year end.

Swing pricing

Swing pricing operates in a manner that ensures that when, on any particular Dealing Day, the net dealing position exceeds a certain threshold (the "Swing Threshold"), the Company will have the discretion to adjust the price for the relevant Fund's Shares on that day so as to include a provision for the relevant costs incurred when buying or selling portfolio assets in order to satisfy or give effect to the dealing requests received. In this way, on any Dealing Day on which such an adjustment is applied (the "Swing Adjustment"), investors dealing in a Fund's Shares on that day, rather than the Fund itself (i.e. not the then existing or continuing Shareholders of that Fund), will bear the costs incurred.

The Swing Adjustment is a percentage factor determined by the Company from time to time at its sole discretion. The Swing Adjustment, where applied to a Fund, shall at no time exceed 0.5% of the relevant Net Asset Value per Share.

Where a Fund is in a net subscription position on any particular Dealing Day (i.e. where total purchases of the Fund's Shares exceeds total redemptions) and that net position exceeds a certain threshold determined by the Company at its discretion, the Net Asset Value per Share may be increased by an appropriate percentage factor (not exceeding 0.5% of the Net Asset Value per Share) to account for duties and charges and spreads. Investors subscribing and/or redeeming Shares of a Class in the Fund on that particular Dealing Day will deal at this single price.

Where the Fund is in a net redemption position on a particular Dealing Day (i.e. where total redemptions of the Fund's Shares exceeds total subscriptions), and that net position exceeds a certain threshold determined by the Company at its discretion, the Net Asset Value per Share may be decreased by an appropriate percentage factor (not exceeding 0.5% of the Net Asset Value per Share) to account for duties, charges and spreads. Investors subscribing and/or redeeming Shares of a

Class in the Fund on that particular Dealing Day will deal at this single price.

As of 30 April 2023, there were no Net Asset Value adjustments for swing pricing.

2. Share capital Authorised

The Company is authorised to issue up to 500 billion Shares of no par value.

Subscriber shares

The Company has issued two Subscriber Shares, which are held by Waverton Investment Management Limited and BNL

Investments UK Limited. The Subscriber Shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only.

Each of the Shares entitles the holder to attend and vote at meetings of the Company and of the Fund represented by those Shares. No Class of Shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other Class of Shares or any voting rights in relation to matters relating solely to any other Class of Shares.

Any resolution to alter the Class rights of the Shares requires the approval of three quarters of the holders of the Shares represented or present and voting at a general meeting duly convened in accordance with the Articles of Association.

The Articles of Association of the Company empower the Directors to issue fractional Shares in the Company. Fractional Shares may be issued and shall not carry any voting rights at general meetings of the Company or of any Fund or Class and the net asset value of any fractional Share is the net asset value per Share adjusted in proportion to the fraction.

The Subscriber Shares entitle the Shareholders holding them to attend and vote at all meetings of the Company, but do not entitle the holders to participate in the dividends or net assets of any Fund or of the Company.

The Company issues redeemable shares, which can be put back to the Company at any time for cash equal to a proportionate share of the net asset value per share of the relevant Fund. This redeemable share is carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the share back to the Company at that date.

3. Significant agreements and related party transactions

Investment management fees

The Company and Bridge Fund Management Limited (appointed as the "Manager" to the Company on 18 February 2022) has entered into an investment management agreement with Waverton Investment Management Limited (the "Investment Manager"), pursuant to which the Investment Manager manages the Company's investments on a discretionary basis. The Investment Manager is a company incorporated under the laws of England and Wales and regulated by the Financial Conduct Authority ("FCA"). The Investment Manager is entitled to receive an investment management fee from the Company.

This fee is calculated and accrued on each Dealing Day and paid quarterly in arrears from the Net asset value of each Class of the respective Funds at the following rates. There are no investment management fees applicable for the Class A US\$ (on the Strategic Equity Fund) or Class M share classes in any of the Funds.

Under the Investment Management Agreement, the Company will pay to the Investment Manager a fee at the aggregate annual rate by each Fund as follows:

* On 29 July 2021, the Waverton Tactical Equity Fund changed its name to Waverton Strategic Equity Fund.

** On 8 November 2021, the Waverton Global Core Equity Fund merged into the Waverton Strategic Equity Fund.

In addition, the Investment Manager is entitled to be reimbursed its reasonable vouched out-of-pocket expenses. Each Fund bears pro rata its share of such out-of-pocket expenses.

Details of fees payable to the Investment Manager as at 30 April 2023 and 30 April 2022 are included in the Statement of Financial Position and fees charged by the Investment Manager during the financial year ended 30 April 2023 and 30 April 2022 are included in the Statement of Comprehensive Income.

Expense Cap European Capital Growth Fund and Multi-Asset Growth Fund

The Investment Manager has voluntarily agreed to cap the total annual fees and expenses in respect of the Class S Shares of Waverton European Capital Growth Fund up to 0.65% of their Net Asset Value, and the Class S Shares of Waverton Multi-Asset Growth Fund up to 0.95% of their Net Asset Value. The Investment Manager may modify or terminate this arrangement at any time upon notice to Shareholders.

This expense cap covers all costs and expenses connected with the operating activities of the Funds, including administration, registration, transfer agency, depositary and trustee fees, and other operating expenses.

The expense cap does not cover: the Investment Management Fee for the Classes as noted above; such non-recurring and extraordinary or exceptional costs and expenses (if any) as may arise from time to time; withholding taxes that may be deducted from interest; stamp duties or other documentary transfer taxes, or similar duties; and investment expenses arising with respect to the purchase or sale of securities by the Funds. The Investment Manager will absorb (directly or by way of a refund to the Funds) any difference that may arise between the actual cost of operations of the Funds and the relevant expense cap.

Details of amounts receivable from the Investment Manager and amounts payable to the Investment Manager as at 30 April 2023 and 30 April 2022 are included in the Statement of Financial Position. The Investment Manager subsidy amounts during the financial year ended 30 April 2023 and 30 April 2022 are shown in the Statement of Comprehensive Income.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

Management fees

The Company's manager, Bridge Fund Management Limited (the "Manager") will receive a management fee out of the assets of the Fund of either up to 2 basis points per annum of the Net Asset Value of the Fund or an annual minimum fee of €60,000 per annum, whichever is higher. The Management Fee shall accrue on each Dealing Day and is payable monthly in arrears. The Management Fee may be waived or reduced by the Manager. The Manager shall be entitled to be reimbursed by the Company for all reasonable out of pocket expenses properly incurred.

Details of fees payable to the Manager as at 30 April 2023 and 30 April 2022 are included in the Statement of Financial Position and fees charged by the Manager during the financial year ended 30 April 2023 and 30 April 2022 are included in the Statement of Comprehensive Income.

Performance fee

The Investment Manager may receive a performance fee based on its investment management performance during a performance period ("Performance Period"). A Performance Period shall: (i) in the case of the first Performance Period, commence upon the close of the Initial Offer Period and end on the next following 31 December; and (ii) thereafter shall commence on the day immediately following the end of the prior Performance Period and shall end on the next following 31 December.

In the case of the Class A Stg£, Class A US\$ and Class B US\$ in Waverton Global Strategic Bond Fund, a performance fee shall be payable to the Investment Manager when: (i) the increase in the Net Asset Value per Share of the relevant Class of a Fund (as denominated in the Base Currency of the Fund to which the Class relates) over a Performance Period is greater than the increase in the Benchmark for that Fund over the same Performance Period; or (ii) when the decrease in the Net Asset Value per Share of the relevant Class of a Fund (as denominated in the Base Currency of the Fund to which the Class relates) over a Performance Period is less than the decrease in the Benchmark for that Fund over the same Performance Period. The performance fee shall be 10 per cent. in respect of Waverton Global Strategic Bond Fund of the amount by which the Net Asset Value per Share before the deduction of performance fees exceeds the Benchmark as aforesaid as at the end of a Performance Period, multiplied by the number of Shares in issue in that Class at the end of the period. The calculation of the performance fee payable shall be based upon a daily average of the number of Shares in issue in the relevant Class during the Performance Period rather than the number of Shares in issue in the relevant Class at the end of the period. For the purpose of calculating the

performance fee at the end of a Performance Period, the Net Asset Value per Share shall be calculated at the relevant Valuation Point. In the case of the first Performance Period, the Initial Offer Price per Share in a Class shall be the base price for the purpose of calculating the performance over the Performance Period.

The performance fee shall always be calculated by measuring the increase or decrease of the Net Asset Value per Share as denominated in the Base Currency of the relevant Fund against the performance of the relevant Benchmark. The Benchmark shall always be denominated in the Base Currency of the relevant Fund. Because the Sterling denominated Class A of Waverton Global Strategic Bond Fund is intended to be fully hedged, the performance fee for this Class will be calculated using the Net Asset Value per Share in Sterling.

The performance fee shall be calculated and accrued on each Dealing Day and paid annually in arrears at the end of a Performance Period. When calculating the performance fee payable, the Net Asset Value will be adjusted, as appropriate, for subscriptions, redemptions, dividends paid and any accruals of performance fee and by the amount, if any, by which the Net Asset Value underperformed the Benchmark in any preceding Performance Period. Any dividends which are to be added back in order to determine the performance fee will be added back as a per Share amount based on the number of Shares in issue when the dividends were paid.

Where a performance fee is payable it will be based on the Net Asset Value of a Class as at the end of each Performance Period. As a result, a performance fee may be paid in respect of unrealised gains, which may subsequently never be realised. Furthermore, because the performance fee is payable on the performance of a Fund relative to a Benchmark (outperformance), a performance fee may be payable in circumstances where the Net Asset Value of a Fund has declined. On the other hand, a prior relative underperformance must be recouped before a performance fee shall again be payable.

The performance fee calculation will be verified by the Depositary. Performance fee worked examples are available from the Administrator and the Investment Manager upon request.

The performance fee applicable to each Fund is set out in that Fund's Prospectus.

Currently, the Global Strategic Bond Fund is the only Fund that is entitled to a performance fee. No performance fee was charged during the financial year ended 30 April 2023 (30 April 2022: USD 53,800). No performance fee was payable as at 30 April 2023 (30 April 2022: USD Nil).

3. Significant agreements and related party transactions (continued)

Administration fees

RBC Investor Services Ireland Limited (the "Administrator"), is entitled to a fee payable out of the assets of each Fund in relation to the provision of its services as fund accountant, administrator and transfer agent, accruing daily and payable monthly in arrears at the end of each calendar month at a rate of up to 2 basis points of the net asset value of each of the Funds, subject to a minimum annual fee for each Fund, exclusive of out-of-pocket expenses, of EUR 34,500 (which is based on two share classes) per Fund. The Funds shall also be subject to transaction charges, which shall not exceed normal commercial rates. The Administrator shall also be entitled to certain other fees for registrar and transfer agency subject to a minimum annual fee of EUR 24,000 per umbrella, annual financial statements production and other services and to reimbursement of all reasonable out-of-pocket expenses incurred out of the assets of the Fund in respect of which such expenses were incurred.

Administration and fund accounting services fees payable to the Administrator as at 30 April 2023 and 30 April 2022 and expenses incurred during the financial year ended 30 April 2023 and 30 April 2022 are shown on the Statement of Financial Position and Statement of Comprehensive Income, respectively.

Depositary and trustee fees

RBC Investor Services Bank S.A., Dublin Branch (the "Depositary") is entitled to a trustee fee payable out of the assets of each Fund accruing daily and payable monthly in arrears at the end of each calendar month at an annual rate of up to 0.023% of the Net Asset Value of each Fund, subject to a minimum annual fee for each Fund, exclusive of transaction charges and out-of-pocket expenses, of EUR 9,200. The Depositary shall also be entitled to: (a) a depositary cash flow monitoring and reconciliation fee of EUR 4,000 payable by the Company, and reallocated to each Fund on a pro rata basis; and (b) an additional fee of 0.005% of the Net Asset Value of each Fund which has assets invested in Emerging Market Countries.

Safekeeping fees based on the market value of the assets of each Fund may also be charged which shall vary from 0.005% to 0.72% depending on the country in which the security is traded and held. The average safekeeping fee rate for the financial year ended 30 April 2022 was 0.015% of the total net assets of the Company. Each Fund shall also be subject to transaction charges, which shall not exceed normal commercial rates. The Depositary shall also be entitled to reimbursement of properly vouched out-of-pocket expenses incurred by the Depositary, or any sub-custodian, out of the assets of the Fund in respect of which such expenses were incurred.

Depositary fees payable to the Depositary as at 30 April 2023 and 30 April 2022 and expenses incurred during the financial year ended 30 April 2023 and 30 April 2022 are shown on the Statement of Financial Position and Statement of Comprehensive Income, respectively.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

4. Directors' remuneration

The total Director Remuneration in any one financial year shall not exceed EUR 135,000. In addition, all of the Directors are entitled to be reimbursed by the Company for reasonable out of pocket expenses. Fees payable to the Directors as at 30 April 2023 and 30 April 2022 and fees charged during the financial year ended 30 April 2023 and 30 April 2022 are shown on the Statement of Financial Position and Statement of Comprehensive Income, respectively. Marc Geduldt and Michael Allen were not paid fees for the financial year ended 30 April 2023 and 30 April 2022.

5. Audit fee

Fees and expenses paid to our statutory auditors, Grant Thornton, in respect of the financial year are as follows:

	30 APRIL 2023 EUR	30 APRIL 2022 EUR
Audit	92,575	88,030
	92,575	88,030

6. Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a chargeable event.

A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight-year period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

7. Soft commission arrangements

The Investment Manager does not receive or enter into soft commissions arrangements in respect of the Sub-Funds.

Under MiFID II changes implemented in 2018, the Investment Manager ensures all research received is fully accounted for or any costs associated with research received is transparent and disclosed to clients.

Research received under COBS 2.3B (Inducements and research) is paid in full by the Investment Manager. Costs associated with research are not passed onto clients.

8. Cash & cash held as margin

Cash balances are held with RBC Investor Services Bank S.A., Dublin Branch.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

10. Financial derivative instruments and efficient portfolio management

A Fund may employ financial derivative instruments for protection against exchange risks (including foreign exchange transactions, which alter the currency characteristics of transferable securities held by the relevant Fund) and to alter the currency exposure characteristics of transferable securities in accordance with the conditions and limits set down by the Central Bank of Ireland. Forward currency contracts may, at the Company's sole discretion, be used to hedge some or all of the exchange risk/currency exposure arising as a result of the fluctuation between the currency in which the net asset value per share is computed, and the currencies in which a Fund's investments are denominated.

In addition, each Fund may also purchase foreign currency forwards or other contracts in order to switch the underlying currency exposure of assets within the Fund's portfolio into alternative currencies, whereby the characteristics of the assets are tailored to seek to provide the desired balance between risk and return in keeping with the strategy pursued by the relevant Fund. Accordingly, the Fund may take material positions in currencies other than currencies of denomination of the underlying assets of the Fund.

Details of open forward currency contracts, options and futures held as at 30 April 2023 are shown in the Portfolio of Investments.

Notional exchange gains or losses due to the presentation of these financial statements in EUR are included in the Statements of Changes in Net Assets Attributable to Holders of Redeemable Shares.

Subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland, and except as otherwise stated in the investment objective and policies of a Fund, the Investment Manager may employ, for certain Funds, investment techniques and instruments such as futures, options, forward foreign currency contracts and other derivatives for investment and/or efficient portfolio management ("EPM") purposes. Furthermore, new techniques and instruments may be developed which may be suitable for use by a Fund in the future, and a Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank of Ireland.

UCITS Regulations permits Funds to invest in financial derivative instruments ("FDI") both for investment purposes and for efficient portfolio management/hedging purposes, in each case subject to the conditions and within the limits laid down by the Central Bank of Ireland and the Company's investment policies. The Investment Manager of the Funds has identified all financial derivative instruments, which are forward

currency contracts, options and futures. The counterparties for the FDIs are disclosed in Note 11 under Credit Risk.

During the financial year, futures, options and forward foreign currency transactions were entered into for the purpose of efficient portfolio management in order to hedge currency and market exposure and/or for investment purposes. The notional amounts are detailed in the Portfolio of Investments. The realised and unrealised gains or losses arising from the use of FDIs are shown in Note 13.

The relevant Funds may have entered into currency forwards and other foreign currency derivative transactions for the purposes of limiting the foreign currency exposure arising out of the non-functional currency denomination of the investments of the Fund or the currency exposure arising between the Functional Currency and the currency of denomination of each Class of shares. In addition, certain Funds may also have purchased foreign currency forwards or other contracts in order to switch the underlying currency exposure of assets within the relevant Fund's portfolio into alternative currencies, whereby the characteristics of the assets are tailored to seek to provide the desired balance between risk and return in keeping with the strategy pursued by the relevant Fund.

The relevant Funds may have entered into futures contracts to take long or short positions in, or to increase or reduce the relevant Fund's exposure to, an underlying security, currency, market or index. For example, purchased futures may serve as a long hedge of the investments of the relevant Funds and sold futures may have served as limited short hedge equities of the investments of the relevant Funds. Futures may also be used, for example, to equitise cash balances, both pending investment of a cash flow and with respect to fixed cash targets.

The relevant Funds may have purchased and sold put and call options. Call options may be purchased by certain Funds: (i) to provide exposure to increases in the market (e.g. with respect to temporary cash positions); and (ii) to hedge against an increase in the price of securities or other investments that a Fund intends to purchase. Put options may have been purchased by the relevant Funds to (i) hedge against a decrease in the market generally; and (ii) hedge against the price of securities or other investments held by certain Funds. The purpose behind a Fund writing covered call options is typically to seek enhanced returns and when in the opinion of the Investment Manager the exercise price together with the option premium received (unless the written calls are repurchased) would represent an acceptable sale price for some or all of the holding. Put options, covered by cash, may be written when in the opinion of the Investment Manager the exercise price less the option premium received (unless the written puts are repurchased) would represent an acceptable purchase price for a holding.

Financial statements

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

10. Financial derivative instruments and efficient portfolio management (continued)

The Funds did not engage in the efficient portfolio management techniques of repurchase, reverse repurchase and stock lending arrangements. Details of all open transactions at the financial year end are disclosed in the Portfolio of Investments.

11. Financial instruments disclosure

In accordance with FRS 102 ("Financial Instruments: Disclosure"), this note details the way in which the Company identifies and manages risks associated with the use of financial instruments.

The Company's activities involve identification, analysis, evaluation and acceptance of risk or a combination of risks. The most significant types of risk to the Funds are market risk, currency risk, credit risk and liquidity risk. The Company's risk management policies are designed to identify and analyse these risks, set risk limits and controls and to monitor these continuously by means of a reliable and up to date risk monitoring system.

Based on the nature and magnitude of the risks that are being entered into, rules are established for the type and frequency of ongoing risk monitoring. Monitoring of the ex-ante risk of a Fund is conducted in accordance to the Fund's risk assessment, which details the Fund's strategy and objectives.

Market risk

FRS 102 identifies that this risk comprises of three types of risk; market price risk, currency risk and interest rate risk. The risk monitoring system and stress testing are used to monitor these risks.

The Investment Manager is responsible on a day-to-day basis for measuring and monitoring market risk arising from all sources, including derivatives, counterparties, and general market movements. This control is documented in a daily risk report, which incorporates VaR among other measures. This report is distributed to the Fund manager, the Portfolio Risk Review Committee and the compliance team of the Investment Manager. The Investment Manager is responsible for managing that risk.

The Manager, as part of their risk management and monitoring obligations receives and relies on both regular and exception based risk reporting provided by the Investment Manager and the Administrator of the Funds ("Delegates"). The Investment Manager and the Administrator will provide reporting to the Manager and should an issue be noted in the reporting, the Manager will in the first instance liaise with the delegate responsible to try to establish a method for resolution of the issue and assist them where necessary. Any significant risk items which cannot be easily resolved may be required to be escalated to senior management of the delegate and further explanations from the delegate will be required to be provided to the Manager and the Board.

Market price risk

This is the potential for change in the market value of instruments due to adverse movements in equity, bond, commodity, currency and other market prices, indices or rates or changes in the anticipated or calculated volatility of these movements. Also pricing/valuation risk has been identified as the risk that the valuation/price of a specific transaction may not be accurate. The majority of the Funds' financial assets at fair value through profit and loss consist of listed investments.

Each portfolio manager of a Fund is responsible for the investment decisions relating to his Fund and uses appropriate investment experience, research and the risk reports to assist in the decision making process. The composition of each Fund is reviewed by the Board of Directors on a quarterly basis.

By way of a quarterly Portfolio Risk Review Committee, the committee formally reviews the risk of each of the Funds against the firm's risk parameters and internally set limits. On a periodic basis, each Fund is reviewed in detail with appropriate feedback being provided to the respective Fund manager. The chairman of the Portfolio Risk Review Committee reports into the firm's overall Risk Committee and provides regular updates to the Board of Directors.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

Global exposure

Global exposure is calculated using Value at Risk ("VaR"). The Funds apply a VaR methodology to assess the market risk positions held and to estimate the potential economic loss based upon a number of parameters and assumptions for various changes in market conditions. VaR is a method used in measuring financial risk by estimating the potential negative change in a Fund not to be exceeded given a certain confidence level and over a specified time horizon.

The Funds use a Monte Carlo simulation to calculate VaR, creating 5,000 scenarios for all model factors based on the joint distribution of the factor returns that is described by the covariance matrix. Under each simulated scenario, every security is repriced and a portfolio return is calculated. VaR is calculated as 1 day and then scaled to a 1 month VaR.

Objectives and limitations of the VaR Methodology

The Funds use simulation models to assess possible changes in the market value of each Fund. The default time horizon for the simulation model is 570 days, although this can be amended to 1 year if deemed appropriate. The VaR models are designed to measure market risk in a normal market environment. The models assume that any changes occurring in the risk factors affecting the normal market environment will follow a lognormal distribution. The distribution is calculated by using exponentially weighted historical data. The use of VaR has limitations because it is based on historical correlations and volatilities in market prices and assumes that future price movements will follow a statistical distribution.

Due to the fact that VaR relies significantly on historical data to provide information and may not clearly predict the future changes and modifications of the risk factors, the probability of large market moves may be underestimated if changes in risk factors fail to align with the normal distribution assumption. VaR may also be under or overestimated due to assumptions placed on risk factors and the relationship between such factors for specific instruments. Even though positions may change throughout the day, the VaR only represents the risk of a Fund at the close of each business day and it does not account for any losses that may occur beyond the 99% confidence level.

In practice, the actual trading results will differ from the VaR calculation and, in particular, the calculation does not provide a meaningful indication of profits and losses in stressed market conditions. Stress tests are carried out on a number of predefined scenarios that form part of a separate calculation. To determine the reliability of the VaR model, actual outcomes are monitored regularly to test validity of the assumptions and the parameters used in the VaR calculation.

Average level of leverage is calculated as the sum of the notional of the derivatives used.

* On 29 July 2021, the Waverton Tactical Equity Fund changed its name to Waverton Strategic Equity Fund.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

VaR assumptions

The VaR that the Funds measure is an estimate, using a confidence level of 99%, of the potential loss that is not expected to be exceeded if the current market risk positions were to be held unchanged for one day and two weeks. The use of a 99% confidence level means that, within a one day horizon, losses exceeding the VaR figure should occur on average, not more than once every hundred days.

Other price risk

Other price risk is managed by monitoring the schedule of investments and the Investment Manager's legal and compliance team monitoring program, which incorporates a review of the investment restrictions.

Currency risk

Currency risk is defined by FRS 102 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk arises on financial instruments that are denominated in a currency other than the Functional Currency in which they are measured. The Funds have exposures to currencies other than their Functional Currency and their main investment area. This risk is considered to be normal market exposure and consistent with the benchmark which is set for each Fund.

The Investment Manager has the ability within their investment powers to hedge any significant exposure to one particular currency that may result from the bottom-up stock selection process. This was exercised on the Sterling Bond Fund, the Global Strategic Bond Fund, the Absolute Return Fund and Real Assets Fund during the financial year ended 30 April 2023.

The Global Strategic Bond Fund also utilises share class hedging to reduce the exposure of the GBP share class to fluctuations in the Functional Currency of the Fund, which is USD. The European Capital Growth Fund also utilises share class hedging to reduce the exposure of the GBP share class to fluctuations in the Functional Currency of the Fund, which is EUR. Forward currency contracts held as at 30 April 2023 are included in the Portfolios of Investments.

The ongoing risk relating to FX rate fluctuations is reviewed by the Investment Manager's Legal and Compliance Committee, in line with the underlying investments.

The following table sets out the total exposure to foreign currency risk for each Fund, possible currency movement and the impact on the Net Assets Attributable to Holders of Redeemable Shares of each Fund of these possible currency movements. This exposure can result in an equal increase or decrease in Net Assets. The forward contracts in the following tables do not include share class hedging.

Limitations of sensitivity analysis on foreign currency risk

The above analysis is included for the purposes of FRS 102 only and is not used by management in managing risk. This currency risk sensitivity analysis is based on an estimate of the impact on the Net Assets Attributable to Holders of Redeemable Shares of each Fund, assuming a hypothetical 5% movement in exchange rates. Actual trading results could differ from the above sensitivity analysis, and the difference could be material.

Interest rate risk

This risk is defined as the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The value of investments in interest bearing securities may be subject to price volatility

due to changes in interest rates. An increase in interest rates will generally reduce the value of debt securities that are issued and outstanding, while a decline in interest rates will generally increase the value of debt securities that are issued and outstanding.

The magnitude of these price fluctuations will be greater when the maturity of the outstanding securities is longer. Changes in the value of securities held by a Fund due to interest rate changes may cause the net asset value per Share of the Fund to go up or down because of the effect of changing interest rates on the value of the Fund's portfolio of debt securities. The Investment Manager monitors the exposure within the Funds on an ongoing basis whilst observing the investments objectives of the Funds.

FUND	30 APRIL 2023 DURATION	30 APRIL 2022 DURATION
Sterling Bond Fund	8.00 years	7.10 years
Global Strategic Bond Fund	6.00 years	4.30 years
Absolute Return Fund	0.70 years	0.80 years
Multi-Asset Income Fund	7.20 years	7.40 years
Multi-Asset Growth Fund	8.40 years	7.20 years

Duration is a measure of the sensitivity of the price of a fixed-income investment to a change in interest rates and is expressed in financial years. Funds with higher duration have a greater interest rate risk. Generally, the value of debt securities will tend to decrease in value when interest rates rise and vice versa. Shorter term securities are less sensitive to interest rates changes than longer term securities, but they also usually offer lower yield.

The interest rate profile of the Funds' financial assets as at 30 April 2023 is as follows:

AS AT 30 APRIL 2023	FLOATING RATE FINANCIAL ASSETS	FIXED RATE FINANCIAL ASSETS	FINANCIAL ASSETS ON WHICH NO INTEREST IS PAID	TOTAL
Sterling Bond Fund	89,912,216	711,033,896	28,604,249	829,550,361

Multi-Asset Growth Fund	-	1,469,332	91,663,470	93,132,802

Credit risk

This is the risk of loss arising if a counterparty fails to perform its obligations subsequent to the provision of credit facilities (either on or off balance sheet). The Company will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default. The Company seeks to minimise concentrations of credit risk by undertaking transactions with a large number of counterparties on recognised and reputable exchanges. The Investment Manager monitors the credit risk of the issuing of shares in the Funds. All brokers used are approved for trading purposes by the Investment Manager's Legal and Compliance Committee.

The Sterling Bond Fund and the Global Strategic Bond Fund hold a number of options, which are held with RBC Europe Limited. Forwards are held with RBC Investor Services Bank S.A.. The counterparties are approved for trading purposes by the Investment Manager's Legal and Compliance Committee.

As at 30 April 2023 and 30 April 2022 cash balances were held with RBC Investor Services Bank S.A., Dublin Branch and RBC Europe Limited.

Cash management

Cash is held on a segregated basis with the Depositary. Bankruptcy or insolvency of the Depositary may cause the Funds' rights with respect to securities and cash held by the Depositary to be delayed or limited. Details of credit rating of counterparties as at financial year end are as follow:

CASH		30 APRIL 2023	30 APRIL 2022

Liquidity risk

The assets of the Funds comprise of mainly readily realisable securities, which can generally be sold within 1 week. Liquidity is assessed by taking the weighted average number of trading days of each position in each Fund, assuming that each position has at least 20% participation rate of the trading volume. The main liability of the Funds tends to be outstanding payables on the purchase of investments and the redemption of any Shares that investors wish to sell. All financial liabilities are due to mature within one financial year. The Investment Manager monitors the volume and turnover of the portfolio for liquidity purposes.

The table below analyses the liquidity of the Funds' liabilities as at 30 April 2023 and 30 April 2022:

Associated risk for derivative instruments

The Company may use derivative instruments traded on an organised exchange and/or on over-the-counter markets for investment purposes and/or efficient portfolio management in accordance with the investment objective and the policy of the Fund. The use of these strategies involves certain special risks, including but not limited to: (i) dependence on the ability to predict movements in the prices of securities being hedged and movement in interest rates; (ii) imperfect correlation between the hedging instruments and the securities or market sectors being hedged; (iii) the possible absence of a liquid market for any particular instrument; (iv) possible impediments to effective portfolio management or the ability to meet repurchase requests or other short-term obligations because of the percentage of a Fund's assets segregated to cover its obligations; (v) the risk of counterparty default delaying or impeding the recovery of a Fund's assets; (vi) the fact that skills needed to use these instruments are different from those needed to select the Fund's securities; and (vii) the potential loss arising from the use of FDI or EPM may not be predictable and may even exceed the margin or other collateral paid. A Fund's ability to use these strategies may be limited by market conditions, regulatory limits and tax considerations and these strategies may be used only in accordance with the investment objectives of the Fund.

Derivative instruments are only utilised within the Company for the purposes of reducing risk either by hedging exposure or reducing volatility. Derivative exposures are monitored on a daily basis by the Investment Manager's Legal and Compliance Committee. Details of derivative contracts held by the Company as at 30 April 2023 are included in the Portfolio of Investments.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

Fair value estimation

The Funds utilise various methods to value investments measured at fair value on a recurring and non-recurring basis.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement (lowest being level 3).

Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Company's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The determination of what constitutes "observable" requires significant judgment by the Company. The Company considers observable data to be that market data, which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Company's perceived risk of that instrument.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

The three levels of inputs are defined as follows:

Level 1 - The unadjusted quoted price in active markets for identical assets or liabilities that the entity can access at the measurement date (level 1);

Level 2 - Inputs other than quoted prices included within level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly (level 2); and

Level 3 - Inputs that are unobservable (i.e. for which market data is unavailable) for the asset or liability.

There were no significant transfers between level 1 and level 2 for investments held during the financial year ended 30 April 2023 or the year ended 30 April 2022.

On 7 September 2022, the Listing Committee of the Stock Exchange decided that Sound Global Ltd failed to fulfil the necessary requirements to meet the resumption of trading conditions by the 31st July deadline, meaning the company will be delisted from the exchange under Rule 6.01A. The last day of listing was the 9th September and the listing of the shares was cancelled on 13th September. All share certificates will remain valid and the company will be registering the shares in the names of beneficial owners or other nominees.

The latest announcement dated 1 June 2023, noted that there were no material updates on the outstanding issues, including but

not limited to, Mr Wen's appeal, listing status and ascertaining the number of shareholders. There was also no update on the possible offer and no proposal has been submitted to the Executive (as defined under the Takeovers Code).

Further announcements will be made by the Company as and when appropriate or required in accordance with the Takeovers Code.

Waverton Investment Management will continue to price the shares at HKD 0 per share due to the Company's view that a positive resolution of this situation is extremely unlikely.

The following table presents the movement for Home REIT in level 3 for the financial year ended 30 April 2023 by class of financial instrument.

MULTI-ASSET INCOME FUND	UNQUOTED SECURITIES AT FAIR VALUE THROUGH PROFIT OR LOSS 30 APRIL 2023	UNQUOTED SECURITIES AT FAIR VALUE THROUGH PROFIT OR LOSS 30 APRIL 2022
	GBP	GBP
Opening balance	-	-

Sales	-	-
Transfers into or out of level 3	3,356,463	-
Closing balance	3,012,071	-

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

On 3 January 2023, an announcement was made by Home REIT Plc announcing a temporary suspension to the listing of the Company's ordinary shares. The company failed to publish its annual financial report within four months after the end of its financial year, in the case of the Company this date being 31 December 2022.

On 23 May 2023, an announcement was made to confirm the appointment of AEW as Property Adviser and Investment Manager. AEW in conjunction with board of Home REIT is expected to be in a position to publish more detailed underlying portfolio information from the end August onwards. The appointment of an experienced real estate advisor, clarification on the view on Alvarium from Alvarez and Marsal and confirmation that AEW are appointing new third party advisors, to work towards the publication of accounts, provide scope for the shares to start trading later this year.

Waverton Investment Management will continue to price the shares at GBP 38.05 per share due to the Company's analysis to date. However, Waverton Investment Management will continue to monitor the situation and will take steps to adjust the valuation should new information be made available.

12. Net asset comparison

In accordance with the provisions of the Prospectus, financial assets at fair value through profit or loss are valued at the latest mid-market quotation on its regulated market as at the Valuation Point for the purpose of calculating the net asset value.

As at 30 April 2023

* Waverton Multi-Asset Growth Fund was launched on 15 February 2021.

14. Cross portfolio investment

When a Fund holds an investment in another Fund within the Company, this must be eliminated from the combined Company totals. This does not affect the NAV per share of any of the individual Funds. As at 30 April 2023, two Funds had

invested in another fund of the company and the fair value was EUR 53,357,706 (30 April 2022: EUR 19,957,605).

Below outlined the percentage of its NAV invested in another Funds:

	30 APRIL 2023 % NET ASSETS	30 APRIL 2022 % NET ASSETS
MULTI-ASSET INCOME FUND		
Sterling Bond Fund	5.21%	4.65%
MULTI-ASSET GROWTH FUND		
Global Strategic Bond Fund	5.02%	3.41%
Asia Pacific Fund	1.60%	1.93%
European Dividend Growth Fund	1.95%	1.85%
Sterling Bond Fund	6.95%	4.86%

15. Umbrella structure of the company and cross-liability risk

Each Fund will be responsible for paying its fees and expenses regardless of the level of its profitability. The Company is an umbrella Fund with segregated liability between Funds. The adoption of segregated liability ensures that the liabilities incurred on behalf of a Fund will generally be discharged

solely out of the assets of that Fund and there can generally be no recourse to the other Funds to satisfy those liabilities, notwithstanding the foregoing, there can be no assurance that, should an action be brought against the Company in the courts of another jurisdiction that the segregated nature of the Funds would necessarily be upheld.

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

17. Directors' & related parties interests

In the opinion of the Directors, the Manager and the Investment Manager are related parties under FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland". Fees payable to the Manager and the Investment Manager as at 30 April 2023 and 30 April 2022 and expenses incurred during the financial year ended 30 April 2023 and 30 April 2022 are shown on the Statement of Financial Position and the Statement of Comprehensive Income, respectively.

Amounts receivable from the Investment Manager, are detailed in the Statement of Financial Position on pages 112 to 116 and the amounts earned by the Investment Manager during the financial year ended 30 April 2023 and 30 April 2022 are shown on pages 117 to 121 respectively.

The Investment Manager holds one Subscriber Share in the Company as outlined in Note 2 of these financial statements.

Paul McNaughton was also a director of the Manager, who provide management services to the Company. Details of fees payable to the Manager as at 30 April 2023 and 30 April 2022 are included in the Statement of Financial Position and fees charged by the Manager during the financial year ended 30 April 2023 and 30 April 2022 are included in the Statement of Comprehensive Income. Paul McNaughton ceased to be director of the Manager on 6 November 2022.

Marc Geduldt is Head of Operations at the Investment Manager.

Michael Allen is Chief Operating Officer at the Investment Manager.

18. Significant events during the financial year

The prospectus was updated on 25 May 2022, to include:

- (i) Appointment of manager Bridge Fund Management Limited.
- (ii) The performance benchmark against which Waverton Sterling Bond Fund's performance is measured has been changed from the iBoxx Sterling Gilts Index to the ICE BofA UK Gilt Index. The purpose of this change is to transition away from LIBOR, and it was determined that the ICA BofA UK Gilt Index is the most appropriate performance benchmark for this Fund;
- (iii) Updates to the relative VaR reference portfolios in respect of Waverton Multi-Asset Income Fund, Waverton Multi-Asset Growth Fund and Waverton Strategic Equity Fund;
- (iv) Updates to performance fee disclosures to reflect recent guidance from ESMA and the Central Bank; and

- (v) Other miscellaneous amendments, including non-material updates to performance fee disclosures and the Directors' biographies.

Following share classes were launched during the financial period - Global Equity Fund Class P Stg£ Shares launched on 31 May 2022 and Real Assets Fund Class P US\$ Hedged Shares launched on 5 October 2022.

It is with sadness that we inform you of the death of our esteemed colleague and Chairman, Paul McNaughton, on 6 November 2022 following a short illness. He served the Company as Chairman from its inception with skill and diligence. He will be greatly missed.

Updated Supplement to the Prospectus was issued on 10 August 2022. The purpose of this Supplemental Prospectus is to reflect the creation of a new share class in Waverton Real Assets Fund (the "Fund").

The prospectus was updated on 13 January 2023, to include:

- (i) Amendments to recommended holding period.
- (ii) Dilution Adjustment (Swing pricing) disclosures have been included and subsequently, the Anti-Dilution levy language for the Real Assets Fund was removed.
- (iii) General language added around Investment Techniques and Instruments amended.
- (iv) Asia Pacific Fund amended the Concentration disclosure.
- (v) The asset allocation wording for the Multi-Asset Income Fund has been updated in the investment policy.
- (vi) Real Assets Fund added P USD Hedged Share Class.
- (vii) Sterling Bond Fund changed VaR methodology from absolute to relative.
- (viii) PI Share classes were added to Strategic Equity Fund, Multi-Asset Growth Fund, Multi-Asset Income Fund, Real Assets Fund, Absolute Return Fund, and Sterling Bond Fund.
- (ix) The Quarter end NAV will use the close of the regular trading session of the New York Stock Exchange for Asia Pacific Fund, Multi-Asset Growth Fund, Multi-Asset Income Fund, Real Assets Fund, Absolute Return Fund, Sterling Bond Fund, Global Strategic Bond Fund, Global Equity Fund, and Strategic Equity Fund.

Financial statements

NOTES TO THE FINANCIAL STATEMENTS *CONTINUED*

18. Significant events during the financial year (continued)

The prospectus was updated on 22 February 2023, to include:

- (i) The following sentence changed from "Each investment will be listed, traded or dealt predominantly on European Regulated Markets." To "Investments will predominantly be listed, traded or dealt on European Regulated Markets."

Home REIT was suspended on 3 January 2023. Please see Note 11.

There were no other significant events that occurred during the financial year.

19. Significant events post financial year end

On 3 July 2023, RBC Investor Services Bank S.A was acquired by CACEIS Investor Services Bank S.A.

In October 2022, CACEIS and Royal Bank of Canada (RBC) announced they had signed a memorandum of understanding for the intended acquisition by CACEIS of the European asset servicing business of RBC. As part of this acquisition, CACEIS would acquire the entire issued share capital of RBC Investor Services Bank S.A. (IS Bank).

Completion of the sale of IS Bank occurred 1 July 2023, following regulatory approval. As a result RBC Investor Services Ireland Limited has become CACEIS Investor Services Ireland Limited and RBC Investor Services Bank S.A., Dublin Branch has become CACEIS Investor Services Bank S.A., Dublin Branch.

APPENDIX 2

REMUNERATION POLICY (UNAUDITED)

The Company has adopted a remuneration policy as required by the UCITS Regulations (the "Remuneration Policy"). The Remuneration Policy seeks: (a) to be consistent with, and promote, sound and effective risk management; (b) to be in line with the business strategy, objectives, values and interests of the Company; (c) not to encourage excessive risk-taking as compared to the investment policy of the relevant sub-funds of the Company (each, a "Fund"); (d) to provide a framework for remuneration to attract, motivate and retain staff (including directors) to which the policy applies in order to achieve the objectives of the Company; and (e) to ensure that any relevant conflicts of interest can be managed appropriately at all times. The Remuneration Policy applies to those categories of staff of the Company whose professional activities have a material impact on the risk profile of the Company or the Funds ("Identified Staff"). As at the date of the most recent Prospectus, the Identified Staff comprise the Directors and Manager (see Manager Remuneration policy). While certain Directors are paid a fixed annual fee for their services to the Company, Directors that are employees of the Investment Manager or an affiliate are not paid any fees for their services as Director.

Due to the size and internal organisation of the Company and the nature, scope and complexity of its activities, it is not considered appropriate for the Company to establish a remuneration committee.

Please see Note 3, 4 and 17 for details of the total remuneration for the financial year paid by the Company to the Directors and Manager. For further information on the current remuneration policy of the Company, please contact the Investment Manager. A paper copy of this information is available free of charge upon request from the Investment Manager.

In accordance with Regulation 89(3A) (e) of the UCITS Regulations, it is confirmed that no material changes have been made to the Remuneration Policy since its adoption. On 2 February 2017, the Company adopted an updated remuneration policy to reflect the provisions of ESMA's Guidelines on Sound Remuneration Policies under the UCITS Regulations and other general non-material updates.

The Company has delegated investment management (including risk management) to the Investment Manager. No remuneration has been paid to the staff of the Investment Manager by the Company. The Investment Manager pays remuneration to its staff in accordance with its own remuneration policy. The Company has requested, and the Investment Manager has provided, confirmation that, being subject to the remuneration rules under the Capital Requirements Directive (Directive 2013/36/EU), the Investment Manager has a remuneration policy in place that is consistent with the ESMA guidelines on sound remuneration policies under the UCITS Regulations, and which is equally as effective as the requirements under the UCITS Regulations. The disclosure relating to the Investment Manager's remuneration policy can be viewed at https://www.waverton.co.uk/assets/legal_&_regulatory/pillar_iii/pillar_iii_disclosures_ye_30_9_18.pdf.

APPENDIX 2

REMUNERATION POLICY (UNAUDITED) CONTINUED

UCITS V Remuneration Disclosure - Manager

The below disclosure is made in respect of the remuneration policies of Bridge Fund Management Limited ("Manager") in accordance with the European Union Directive 2014/91/EU as implemented in Ireland by European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016. This requires UCITS management companies to establish and apply remuneration policies and practices that promote sound and effective risk management, and do not encourage risk taking which is inconsistent with the risk profile of the UCITS.

The Manager has designated the following persons as Identified Staff:

1. Executive and Non-Executive members of the management body of the Manager e.g. CEO, Directors, Executive and Non-Executive partners
2. Senior management
3. Risk takers – staff who can exert material influence on the Manager or on the UCITS or AIFs it manages
4. Those in control functions: Operations, HR, Compliance, Finance where applicable
5. Staff whose total remuneration takes them into the bracket of senior management and risk takers, whose professional activities have a material impact on the Manager's risk position or those of the UCITS and/or AIFs it manages and
6. Categories of staff of the entities to which portfolio management or risk management activities have been delegated whose professional activities have a material impact on the Manager's risk position or those of the UCITS and/or AIFs it manages.

The Remuneration Policy is designed to discourage risk taking that is inconsistent with the risk profile of the UCITS and the Manager is not incentivised or rewarded for taking excessive risk.

The Manager is required under UCITS regulations to make quantitative disclosures of remuneration. Disclosures are provided in relation to Identified Staff who are employed directly by the Manager and Identified Staff who have the ability to materially impact the risk profile of the UCITS including individuals who, although not directly employed by the Manager, are assigned by their employer to carry out services directly by the Manager.

All remuneration paid to Identified Staff can be divided into:

- Fixed remuneration (payments or benefits without consideration of any performance criteria); and
- Variable remuneration (additional payments or benefits depending on performance or, in certain cases, other contractual criteria) which is not based on the performance of the UCITS.

Remuneration details for the Manager are disclosed below:

DESCRIPTION	NUMBER OF BENEFICIARIES	TOTAL REMUNERATION PAID	FIXED REMUNERATION PAID	VARIABLE REMUNERATION PAID
Total Staff Remuneration	45	€3,339,320	€2,927,820	€411,500
Senior Management (including executives), risk takers and other identified staff	8	€1,208,015	€946,015	€262,000

Details of the Remuneration Policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits is available at the following website: <https://bridgefunds.com/disclosures/>

Financial statements

APPENDIX 3

SFDR DISCLOSURE (UNAUDITED)

All the Sub-funds have been classified as Article 6 Funds under the Sustainable Finance Disclosure Regulation (SFDR). The Investment Manager has integrated sustainability risks, as a sub-set of risks generally that could cause an actual or potential material negative impact on the value of an investment, as part of its investment decision-making process for the Sub-funds.

For the purposes of Article 7 of the Taxonomy Regulation, the investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
