Report of the Authorised Corporate Director

Continued

The Authorised Corporate Director (the ACD) and abrdn Investment Management Limited are wholly owned subsidiaries of abrdn plc, and are accordingly associates. The Investment Adviser has appointed abrdn Inc and abrdn Asia Limited as sub-advisers. The Investment Advisers have the authority of the ACD to make decisions on its behalf in all aspects of the investment management of the investments and other property of the Company. The main terms of the agreement with each investment adviser are that it should have the authority of the ACD to make decisions on its behalf in all aspects of the investment management of the investments and other property of the Company, including the Company's powers to enter into hedging transactions relating to efficient portfolio management. The adviser's powers extend to all of the property of the Company except any part which the ACD excludes from the adviser's powers. The adviser is to report details of each transaction to the ACD and to confer with the ACD when required by it. The ACD will notify the adviser of additional cash available for investment.

The Authorised Corporate Director of the Company is abrdn Fund Managers Limited, a private company limited by shares which was incorporated in England and Wales on 7 November 1962. Its ultimate holding company is abrdn plc, which is incorporated in Scotland.

Financial details and Fund Managers' reviews of the individual funds for the period ended 29 February 2024 are given in the following pages of this report.

Each fund has an individual investment objective and policy and each differs in regard to the extent to which they concentrate on achieving income or capital growth. There may be funds added to the umbrella of abrdn OEIC II (with consent of the FCA and the Depositary) in the future.

The funds are valued on a mid-price basis and dealt at a single price regardless of whether a purchase or sale is being affected.

The daily price for each fund appears on the abrdn website at [abrdn.com](https://www.abrdn.com).

The funds are segregated portfolios of assets and, accordingly, the assets of a fund belong exclusively to that fund and shall not be used to discharge directly or indirectly the liabilities of, or claims against, any other person or body, including the Company, or any other fund, and shall not be available for any such purpose.

The shareholders are not liable for the debts of the Company.

All fees charged by the Investment Adviser will be borne by the ACD.

Global Emerging Markets Equity Unconstrained Fund is no longer open to investors, having redeemed all share on 14 January 2016. ASI UK Recovery Equity Fund is no longer open to investors, having redeemed all shares on 22 October 2020. abrdn UK Growth Equity Fund is no longer open to investors, having merged into abrdn UK Sustainable and Responsible Investment Equity Fund on 3 March 2023. abrdn UK High Alpha Equity Fund is no longer open to investors, having merged into abrdn UK Sustainable and Responsible Investment Equity Fund on 3 March 2023. abrdn Europe ex UK Growth Equity Fund is no longer open to investors, having merged into abrdn Europe ex UK Equity Fund on 3 March 2023. abrdn Asian Pacific Growth Equity Fund is no longer open to investors, having merged into abrdn Asia Pacific Equity Fund on 12 May 2023. abrdn Emerging Markets Opportunities Equity Fund is no longer open to investors, having merged into abrdn Emerging Markets Equity Fund on 12 May 2023. abrdn UK High Income Equity Fund is no longer open to investors, having merged into abrdn UK Income Equity Fund in abrdn OEIC I on 27 October 2023. Subsequent to the year end, the ACD closed the abrdn American Income Equity Fund on 14 May 2024.

It is the intention of the ACD to merge the abrdn Global Focused Equity Fund and abrdn Investment Grade Corporate Bond Fund in the second half of the year.

It is the intention of the ACD to terminate the funds at a later date once the residual assets and liabilities are settled. As a result the financial statements for these funds have not been prepared on a going concern basis.

The military offensive from Russia against Ukraine since February 2022 continues to pose widespread sanctions on Russian assets. Geopolitical events can adversely affect assets of funds and performance thereon. To ensure the fair treatment of investors, abrdn's Investor Protection Committee (IPC) undertakes regular reviews of market liquidity across each asset class and fund, making appropriate adjustments where necessary.

abrdn's Valuation and Pricing Committee (VPC) also continue to review the valuation of assets and the recoverability of income from those assets, making appropriate adjustments where necessary. The VPC is made up of a wide range of specialists across abrdn with a wide range of experience in asset pricing.

Developments and Prospectus Updates Since 1 March 2023

- On 3 March 2023, the abrdn UK Growth Equity Fund (OEIC II) and abrdn UK High Alpha Equity Fund (OEIC II) merged into the abrdn UK Sustainable and Responsible Investment Equity Fund (OEIC I).

Report of the Authorised Corporate Director

Continued

- On 3 March 2023, the abrdn Europe ex UK Growth Equity Fund (OEIC II) merged into the abrdn Europe ex UK Equity Fund (OEIC I).
- On 3 March 2023, the abrdn European High Yield Bond Fund (OEIC I) merged into the abrdn High Yield Bond Fund (OEIC II).
- On 3 March 2023, the abrdn High Yield Bond Fund Z Acc was launched.
- On 7 March 2023, Mr. Neil Machray was appointed as a director of abrdn Fund Managers Limited.
- On 28 March 2023, the abrdn Sterling Corporate Bond Fund Z Inc was launched.
- On 12 April 2023, the abrdn UK High Income Equity Fund Institutional A Inc was closed.
- On 12 May 2023, abrdn Asian Pacific Growth Equity Fund (OEIC II) and abrdn Asia Pacific and Japan Equity Fund (OEIC I) merged into abrdn Asia Pacific Equity Fund (OEIC I).
- On 12 May 2023, abrdn (AAM) Sterling Government Bond Fund (OEIC I) merged into abrdn UK Government Bond Fund (OEIC II).
- On 12 May 2023, abrdn Emerging Markets Opportunities Equity Fund (OEIC II) merged into abrdn Emerging Markets Equity Fund (OEIC I).
- On 12 May 2023, the abrdn UK Government Bond Fund Z Acc was launched.
- On 22 May 2023, the abrdn American Unconstrained Equity Fund (the "Fund") changed its investment objective and policy to better reflect the new investment strategy. Consequently, the fund has also changed its name to abrdn North American Small & Mid Cap Equity Fund, as well as its Benchmark and the Performance Target from S&P 500 Index plus 3% per annum over a rolling three-year period before charges to Russell 2500 Index plus 3% over a rolling five-year period before charges.
- On 22 May 2023, the abrdn Global Balanced Growth Fund (the "Fund") has replaced its Performance Target referencing the Investment Association's Mixed Investment 40-85% Shares Sector average return ("Existing Benchmark") to a Benchmark with a basket of indices representative of 70% global equities, 25% global bonds and 5% money markets, as detailed in the updated Investment Objective of the fund. The Existing Benchmark has been retained as a Performance Comparator. The change has been made to better reflect alignment with the fund's management process and reflect the global nature of the investment universe available to the Fund. In addition, the Investment Policy of the fund has also been updated to improve transparency around the types of assets the fund is permitted to hold.
- On 21 June 2023, the abrdn UK High Income Equity Fund Institutional S Acc and Institutional S Inc closed.
- On 23 June 2023, the abrdn UK Smaller Companies Fund Z Acc was launched.
- On 23 June 2023, the abrdn (AAM) UK Smaller Companies Fund (OEIC I) merged into the abrdn UK Smaller Companies Fund (OEIC II).
- On 31 July 2023, the abrdn Europe ex UK Smaller Companies Fund updated the Investment Objective and Policy ("IOP") to reflect a change in Performance benchmark from EMIX Smaller European Companies ex UK Index to MSCI Europe ex UK Small Cap Index.
- On 6 September 2023, the abrdn Global Income Equity Fund changed name to abrdn Global Infrastructure Equity Fund and changed its investment objective and policy to better reflect the new investment strategy. Consequently, the fund has also changed its Benchmark and the Performance Target from MSCI AC World Index over a rolling five year period (before charges) to S&P Global Infrastructure Net Total Return Index over a rolling five year period (after charges). All details were communicated to investors regarding the changes.
- On 6 September 2023, the Investment Manager of abrdn Global Infrastructure Equity Fund, appointed abrdn Inc as discretionary investment manager of such of the Funds' cash, securities, and other assets as it may place under abrdn Inc's management (the "Portfolios").
- On 13 September 2023, abrdn Investment Grade Corporate Bond Fund Inst S Acc shareclass closed.
- On 30 September 2023, Mr. Neil Machray resigned as a director of abrdn Fund Managers Limited.
- On 27 October 2023, the abrdn UK High Income Equity Fund (OEIC II) merged into abrdn UK Income Equity Fund (OEIC I).
- On 27 October 2023, abrdn Multi-Asset Fund (OEIC I) merged into abrdn Global Balanced Growth Fund (OEIC II).
- On 23 November 2023, Mrs. Denise Thomas resigned as a director of abrdn Fund Managers Limited.
- On 21 December 2023, the abrdn UK Ethical Equity Fund Institutional A Acc was closed.
- On 21 December 2023, the benchmarks for abrdn Sterling Corporate Bond Fund, abrdn Global Balanced Growth Fund, abrdn High Yield Bond Fund, abrdn Investment Grade Corporate Bond Fund and abrdn

Report of the Authorised Corporate Director

Continued

UK Smaller Companies Fund were updated to reflect a rebrand by the benchmark provider. These changes neither alter the constituents of the benchmark, nor do they impact the relevant fund's risk profile.

- On 21 December 2023, the Global exposure sum of notionals figure was updated.
- The list of funds managed by the ACD was updated, where appropriate.
- Performance and dilution figures were refreshed, where appropriate.
- The list of sub-custodians was refreshed, where appropriate.
- The list of eligible markets was refreshed, where appropriate.
- The list of sub-investment advisors to the funds was refreshed, where appropriate.
- The risk disclosures in relation to the funds were refreshed, where appropriate.

Assessment of Value (unaudited)

In 2017 the Financial Conduct Authority (FCA) published the final Asset Management Market Study. This introduced (among other reforms) new governance rules with the aim of enhancing duty of care and ensuring the industry acts in investors' best interests. The rules were outlined in the FCA policy statement PS18/8 and came into effect from 30 September 2019. As a result, abrdn Fund Managers Limited is required to perform a detailed annual

assessment, determining whether our funds are "providing value to investors". The resulting findings will be published on a composite basis throughout the year, and can be found on the 'Literature' pages of our website.

Climate-related Financial Disclosures (unaudited)

The recommendations by the Taskforce for Climate-related Financial Disclosures (TCFD) – initiated by the Financial Stability Board in 2015 and adopted in 2017 – provide organisations with a consistent framework for disclosing financial impacts of climate-related risks and opportunities. The disclosure in line with TCFD recommendations enables external stakeholders to gain a better understanding of the climate-related risks and opportunities (including how they are managed) that are likely to impact the organisation's future financial position as reflected in its income statement, cash flow statement, and balance sheet. The TCFD has developed 11 recommendations which are structured around four thematic areas, notably governance, strategy, risk management and metrics and target. In Policy Statement 21/24 the Financial Conduct Authority (FCA) have created a regulatory framework for asset managers, life insurers and FCA-regulated pension providers to make climate-related disclosures consistent with the recommendations of the TCFD. As a result of the disclosure requirements abrdn OEIC II is required to perform a detailed annual assessment, determining financial impacts of climate-related risks and opportunities. The resulting findings are published at [Fund literature | abrdn](#).

Cross Holding Table as at 29 February 2024

		Holding Fund					
		abrdn Emerging Markets Income Equity Fund		abrdn UK Government Bond Fund		abrdn Investment Grade Corporate Bond Fund	
		Number of Shares	Market Value £'000	Number of Shares	Market Value £'000	Number of Shares	Market Value £'000

No other such cross-holdings, between other funds in abrdn OEIC II, were held as at 29 February 2024.

Cross Holding Table as at 28 February 2023

There were no cross holdings between funds in abrdn OEIC II as at 28 February 2023.

Statement of the Authorised Corporate Director's Responsibilities

The Collective Investment Schemes sourcebook published by the FCA, ("the COLL Rules") require the Authorised Corporate Director ("ACD") to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company and of the net income and net capital gains or losses on the property of the Company for the period.

In preparing the financial statements the ACD is responsible for:

- selecting suitable accounting policies and then apply them consistently;
- making judgements and estimates that are reasonable and prudent;
- following UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland;
- complying with the disclosure requirements of the Statement of Recommended Practice for UK Authorised Funds issued by the Investment Management Association in May 2014;
- keeping proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements;
- assessing the Company and its funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern;
- using the going concern basis of accounting unless they either intend to liquidate the Company or its funds or to cease operations, or have no realistic alternative but to do so; for the reasons stated in the Report of the Authorised Corporate Director, the financial statements of abrdn Asian Pacific Growth Equity Fund, abrdn Emerging Markets Opportunities Equity Fund, abrdn Europe ex UK Growth Equity Fund, abrdn UK Growth Equity Fund, abrdn UK High Alpha Equity Fund, abrdn UK High Income Equity Fund, ASI UK Recovery Equity Fund and Global Emerging Markets Equity Unconstrained Fund have not been prepared on a going concern basis;
- such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
- taking reasonable steps for the prevention and detection of fraud and irregularities.

The ACD is responsible for the management of the Company in accordance with its Instrument of Incorporation, the Prospectus and the COLL Rules.

The ACD is responsible for the maintenance and integrity of the corporate and financial information included on its website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Authorised Corporate Director's Statement

In accordance with the requirements of the COLL Rules as issued and amended by the Financial Conduct Authority, we hereby certify the report on behalf of abrdn Fund Managers Limited, the Authorised Corporate Director.

Aron Mitchell

Statement of the Depositary's Responsibilities in Respect of the Scheme and Report of the Depositary to the Shareholders of abrdn OEIC II

The Depositary is responsible for the safekeeping of all the property of the Company (other than tangible moveable property) which is entrusted to it and ensuring proper registration of tangible moveable property, and for the collection of income arising from all such scheme property.

It is the duty of the Depositary to take reasonable care to ensure that the Company is managed and operated by the Authorised Corporate Director in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("the Sourcebook"), the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) (the OEIC Regulations), the Company's Instrument of Incorporation, and the Prospectus, as appropriate, concerning: the pricing of and dealing in Shares in the Company; the application of income of the Company; and the investment portfolio and borrowing activities of the Company.

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through the Authorised Corporate Director:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Sourcebook, and where applicable, the OEIC regulations, the Company's Instrument of Incorporation, and the Prospectus;
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company; and
- (iii) has, otherwise, ensured the proper operation of the Company.

Citibank UK Limited

24 June 2024

Independent Auditor's Report to the Shareholders of abrdn OEIC II ('the Company')

Opinion

We have audited the financial statements of the Company for the year ended 29 February 2024 which comprise the Statements of Total Return, the Statements of Change in Net Assets Attributable to Shareholders, the Balance Sheets, the Related Notes and Distribution Tables for each of the Company's sub-funds listed on page 2 and the accounting policies set out on pages 16 to 19.

In our opinion the financial statements:

- give a true and fair view, in accordance with UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland, of the financial position of each of the sub-funds as at 29 February 2024 and of the net revenue/net expense and the net capital gains/net capital losses on the property of each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with the Instrument of Incorporation, the Statement of Recommended Practice relating to Authorised Funds, and the COLL Rules.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the Company in accordance with, UK ethical requirements including the FRC Ethical Standard. We have received all the information and explanations which we consider necessary for the purposes of our audit and we believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

Emphasis of matter – non going concern basis of preparation

In respect of abrdn American Income Equity Fund, abrdn Asian Pacific Growth Equity Fund, abrdn Emerging Markets Opportunities Equity Fund, abrdn Europe ex UK Growth Equity Fund, abrdn Global Focused Equity Fund, abrdn Investment Grade Corporate Bond Fund, abrdn UK Growth Equity Fund, abrdn UK High Alpha Equity Fund, abrdn UK High Income Equity Fund, ASI UK Recovery Equity Fund and Global Emerging Markets Equity Unconstrained Fund, we draw attention to the disclosure made in accounting policy (a) "Basis of preparation" to the financial statements which explains that the financial statements of the sub-funds have not been prepared on going concern basis for the reason set out in that note. Our opinion is not modified in respect of this matter.

Going concern

The Authorised Corporate Director has prepared the financial statements on the going concern basis as they do not intend to liquidate the Company or its sub-funds or to cease their operations, and as they have concluded that the Company and its sub-funds' financial position means that this is realistic except for, abrdn American Income Equity Fund, abrdn Asian Pacific Growth Equity Fund, abrdn Emerging Markets Opportunities Equity Fund, abrdn Europe ex UK Growth Equity Fund, abrdn Global Focused Equity Fund, abrdn Investment Grade Corporate Bond Fund, abrdn UK Growth Equity Fund, abrdn UK High Alpha Equity Fund, abrdn UK High Income Equity Fund, ASI UK Recovery Equity Fund and Global Emerging Markets Equity Unconstrained Fund. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the Authorised Corporate Director's conclusions, we considered the inherent risks to the Company's and its sub-funds' business model and analysed how those risks might affect the Company's and its sub-funds' financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work:

- we consider that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate;
- we have not identified, and concur with the Authorised Corporate Director's assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the Company's and its sub-funds' ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the Company or its sub-funds will continue in operation.

Independent Auditor's Report to the Shareholders of abrdrn OEIC II ('the Company')

Continued

Fraud and breaches of laws and regulations – ability to detect

Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

- Enquiring of directors as to the Company's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud;
- Assessing the segregation of duties in place between the Authorised Corporate Director, the Depositary, the Administrator and the Investment Adviser.
- Reading Authorised Corporate Director board minutes.

As required by auditing standards, we perform procedures to address the risk of management override of controls, in particular the risk that management may be in a position to make inappropriate accounting entries. On this audit we do not believe there is a fraud risk related to revenue recognition because the revenue is principally non-judgemental and based on publicly available information, with limited opportunity for manipulation. We did not identify any additional fraud risks.

We evaluated the design and implementation of the controls over journal entries and other adjustments and made inquiries of the Administrator about inappropriate or unusual activity relating to the processing of journal entries and other adjustments. We identified and selected a sample of journal entries made at the end of the reporting period and tested those substantively including all material post-closing entries. Based on the results of our risk assessment procedures and understanding of the process, including the segregation of duties between the Directors and the Administrator, no further high-risk journal entries or other adjustments were identified.

Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the

Authorised Corporate Director and the Administrator (as required by auditing standards) and discussed with the Directors the policies and procedures regarding compliance with laws and regulations.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related authorised fund legislation maintained by the Financial Conduct Authority) and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: money laundering, data protection and bribery and corruption legislation recognising the Company's activities. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the Directors and the Administrator and inspection of regulatory and legal correspondence, if any.

Therefore if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

Independent Auditor's Report to the Shareholders of abrdrn OEIC II ('the Company')

Continued

Other information

The Authorised Corporate Director is responsible for the other information presented in the Annual Report together with the financial statements. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the other information; and
- in our opinion the information given in the Report of the Authorised Corporate Director is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where under the COLL Rules we are required to report to you if, in our opinion:

- proper accounting records for the Company have not been kept; or
- the financial statements are not in agreement with the accounting records.

Authorised Corporate Director's responsibilities

As explained more fully in the statement set out on page 7 the Authorised Corporate Director is responsible for: the preparation of financial statements that give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company and its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or its sub-funds or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the Company's shareholders, as a body, in accordance with Rule 4.5.12 of the Collective Investment Schemes sourcebook ('the COLL Rules') issued by the Financial Conduct Authority under the Open-Ended Investment Companies Regulations 2001. Our audit work has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Investment Report

1 March 2023 – 29 February 2024

Global Overview

Global stock markets rose strongly both in sterling and local currency terms despite a turbulent 12-month period. After major central banks raised interest rates faster and further than anticipated in 2023, inflationary pressures lessened in many countries over the course of the period. Meanwhile, global economic growth held up better than many investors had anticipated. While 2023 started with strong stock market gains, the collapse of two regional US banks and the forced sale of Credit Suisse to UBS in March that year evoked fears of a banking crisis. After more market volatility in April and May, equities performed strongly over June and July. Despite encouraging inflation data, hawkish rhetoric from central banks continued to weigh on bonds. Both equities and bonds generated negative returns in August, September and October on concerns that interest rates would stay higher for longer. However, equities and bonds then notably recovered towards the end of the 12-month period as reassuring inflation trends led investors to look ahead to the prospect of rate cuts in 2024.

The UK stock market, as represented by the FTSE All-Share Index, advanced in sterling terms over the period. The FTSE 100 Index, home to many so-called defensive multinational companies, lagged those of many overseas markets while slightly outperforming the domestically focused FTSE 250 Index. Although smaller UK companies were held back for much of 2023 by heightened economic uncertainty, they performed strongly towards the end of the period given an improving outlook for the domestic economy. The Bank of England (BoE) announced five more interest-rate increases through August 2023, taking its base rate from 3.50% at the start of 2023 to 5.25% by the end of it. As a result, UK annual consumer inflation continued to trend downwards over the period. However, it remained above the BoE's 2% target in part due to elevated food prices. UK annual core inflation in January 2024 stayed flat month on month, coming in at a lower-than-expected 5.1%. In the final quarter of 2023, UK gross domestic product (GDP) declined by 0.3% compared with the third quarter, when it fell by 0.1%. Meanwhile, the yield on 10-year Gilts declined from around 3.9% to around 3.6%.

US share prices, as measured by the broad S&P 500 Index, rose strongly in sterling terms and by even more in US dollar terms over the 12-month period, showing resilience despite the turmoil in the banking sector in March 2023. Technology stocks particularly enjoyed impressive gains fuelled by the continued growth of artificial intelligence (AI) and other innovative sectors. NVIDIA, Microsoft and Alphabet were among the stocks that enjoyed strong advances due to generative AI optimism. Investor

concerns that interest rates could stay higher for longer led to stocks notably weakening in August, September and October. However, equities rebounded towards the end of the period as these fears eased due to encouraging inflation trends. A sustained fall in annual inflation meant that the US Federal Reserve (Fed) only raised rates by 25 basis points (bps) at both its March and May meetings in 2023, ending the trend with a final 25 bps increase in July. This move took the target range for the fed funds rate to 5.25–5.50%, the highest level since 2001. The US labour market remained resilient, with the unemployment rate holding below 4% throughout the period. Meanwhile, the 10-year Treasury yield also remained relatively stable at around 4%.

Continental Europe's stock markets, as measured by the FTSE World Europe ex UK Index, rose over the 12-month period both in sterling and in euro terms. Following a period of surging inflation, higher interest rates and the continued effects of the Russia-Ukraine war through 2022 and early 2023, investor sentiment in the region improved at the start of the period due to declining annual inflation and an unexpectedly resilient European economy, with continued low unemployment. As a result, European equities performed well until the summer of 2023, then weakening over August, September and October on concerns about further monetary tightening and slowing economic growth. However, those fears then eased, leading to a notable rebound in equities towards the end of the period. Equities in Germany and France were particularly strong, hitting new highs in February 2024. Meanwhile, the European Central Bank (ECB) continued to raise interest rates over the course of 2023 against a benchmark inflation target rate of 2%. The ECB's 25 bps increase in September, the sixth hike of the year, took the base rate to 4.50%. Against this backdrop, annual inflation declined from 2.8% in January 2024 to 2.6% in February. Meanwhile, eurozone GDP remained flat in the fourth quarter of 2023. This was after a 0.1% fall in output in the previous quarter, meaning that a technical recession was narrowly avoided. Elsewhere, the yield on 10-year German Bunds ended the 12-month review period slightly above 2.0%.

The Japanese stock market, as measured by the TOPIX Index, recorded a strong double-digit gain in yen terms over the 12-month period; it increased more modestly in sterling terms due to the depreciation of the yen. The rally in equities was broad-based as Japanese shares benefitted from improving corporate governance and shareholder returns. Annual core inflation declined, dropping from 3.1% in August to 2.6% in December, yet remaining above the Bank of Japan's (BoJ's) 2% target. Throughout the period, the BoJ maintained its key short-term interest rate at -0.1% and the 10-year government bond yield target at around 0%, with minor adjustments to

Investment Report

1 March 2023 – 29 February 2024 continued

its yield-curve control policy. Solid company results and an increased focus by Japanese companies on shareholder returns helped share prices climb higher over the period. However, the Japanese economy unexpectedly shrank by 0.1% in the fourth quarter of 2023, having contracted by 0.8% over the previous three months, meaning that there was a technical recession. This was due to weak domestic consumption, although there was a positive contribution from net trade.

Stock markets in the Asia Pacific (excluding Japan) region declined over the 12-month period in sterling terms but fell by less in local-currency terms. Share prices in China had risen sharply from the end of 2022 through to January 2023, helped by the reopening of the Chinese economy. However, from April onwards, Chinese share prices began to relinquish their post-reopening gains due to concerns over slowing economic growth, driven in particular by the highly-indebted property sector and a strong US dollar. Chinese equities continued to weaken, and fell sharply in January 2024, following disappointing fourth-quarter economic growth data and the central bank's decision to maintain key lending rates despite various stimulus measures aimed at boosting investor sentiment. Yet in February 2024, markets in China recovered, boosted by encouraging post-Lunar New Year spending and travel data, a cut to the mortgage-rate benchmark, and signs that China's state-backed funds were buying key A-share exchange-traded funds to support the equity market. Elsewhere in the region, the Taiwanese and South Korean stock markets both recorded strong gains over the 12-month period, helped by their relatively high weightings to the technology sector. Share prices of semiconductor giants like Taiwan Semiconductor Manufacturing Co (TSMC) in Taiwan and Samsung Electronics in South Korea were buoyed by strong global chip demand and optimism around AI. Meanwhile, Indian equities outperformed on the back of robust macroeconomic data, unchanged benchmark rates and growth initiatives outlined in the government's 2024-25 Interim Budget. In February 2024, Indian equities hit fresh new highs following robust corporate earnings, rise in domestic investor participation and inflows from foreign institutional investors, coupled more recently with moderating inflation levels.

In fixed income, global government bonds mostly recorded gains in local-currency terms, but performance was more mixed in sterling terms. After years of record-low interest rates, many central banks significantly raised rates in an effort to contain inflation. Initially, interest rate hikes caused yields to climb in the US, Germany, and Japan. Yet UK Gilts remained flat due to slowing growth and easing core inflation. Later in the period, central banks paused hikes as inflation subsided, but maintained a watchful stance due to persistently high core inflation. As a result, yields in the US, Germany, and the UK notably fell in the

latter part of the review period, while those in Japan saw minor declines. Corporate bonds had a solid performance over the 12-month period. Against a backdrop of sharply rising interest rates, they had a subdued start. But spreads tightened and later strengthened, especially in the US, as risk appetite improved and recession fears eased with reduced inflation. High-yield (HY) bonds outperformed on their income and improving issuer outlook, while investment-grade (IG) bonds benefited from longer durations. In aggregate, IG bonds underperformed riskier HY bonds.

Outlook

Global markets are currently navigating a complex landscape. Unpredictable economic factors, geopolitical tensions as well as mixed inflation and growth signals create a challenging environment for both equity and bond markets. Yet, there is optimism for a soft landing, meaning a slowdown in economic growth without a technical recession, particularly in the US, as the interest rate tightening cycle concludes.

Investors are increasingly focused on the potential for central bank interest rate cuts later this year. Stock markets worldwide are likely to remain volatile as we approach the end of the rate tightening cycle, with the full impact of higher borrowing costs still uncertain. We anticipate a shift towards rate cuts by developed market central banks in the second quarter of 2024, potentially leading to lower bond yields. As a result, our focus lies on capital preservation for equities and the value proposition of government bonds in anticipation of future interest rate cuts. In addition, careful sector and security selection remains crucial within the corporate bond market.

March 2024

Sustainability Standards Group Report (unaudited)

abrdn is responsible for managing several ethical funds. The funds are managed according to clearly defined investment mandates and the range of available investments is underpinned by established policies and independent research data on their ethical credentials.

Governance

Historically, the ethical criteria for the funds have been advised by the abrdn Ethical Funds Advisory Group, comprised of investors in the ethical funds and senior abrdn managers with involvement in managing and marketing the funds and their associated products.

In 2022, post an internal assessment and as a result of an evolution in abrdn’s sustainable fund governance processes, a decision was taken to wind-up the Ethical Funds Advisory Group. This assessment was conducted in consultation with the members of the Ethical Funds Advisory Group.

At the final meeting of the Ethical Funds Advisory Group it was agreed to move the oversight and application of the ethical criteria to abrdn’s recently formed Sustainability Standards Group. This Group oversees the criteria and

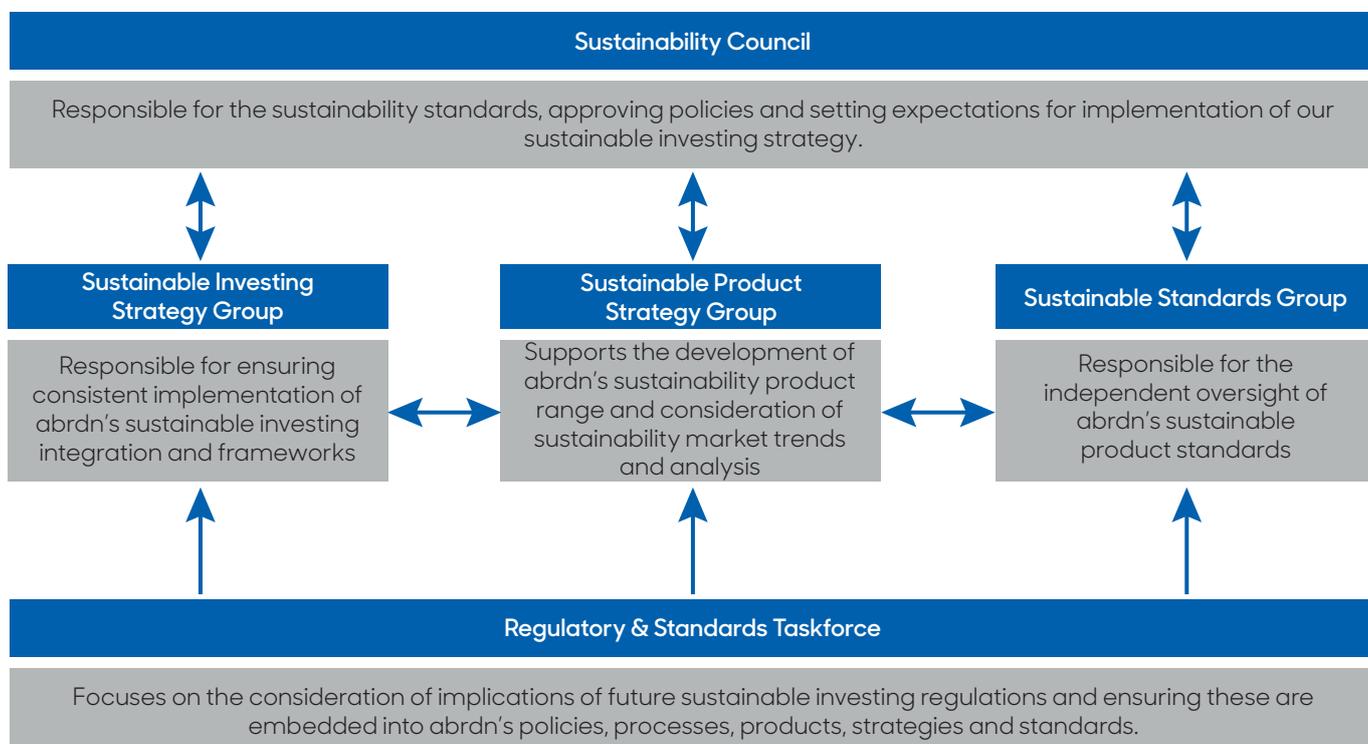

application of sustainability standards across all of abrdn’s sustainable and ethical products. This Group was deemed to be highly effective at guiding investment its policies and standards, and ensuring greater consistency across abrdn’s sustainable product range, to meet changing customer expectations and market standards.

The Sustainability Standards Group is chaired by the Head of Sustainable Investing and meets regularly to:

- provide independent oversight and controls surrounding abrdn’s sustainability funds
- review investment and marketing reports
- ensure that abrdn’s sustainable investment process for its sustainability funds is observed

Through this Group, and the Sustainable Investment Oversight model highlighted below, abrdn remains focussed on undertaking market and customer research on sustainability issues, as it has done for the Ethical Funds. abrdn is also committed to considering current sustainability and ethical issues and trends, the implications for its funds, and reviewing and addressing customer queries.

abrdn’s Sustainable Investment Oversight Model

Sustainability Standards Group Report (unaudited)

Continued

Ethical Investor Survey 2023

The overall objective of the 2023 survey was to update on client attitudes and perceptions to ethical investing to inform the development of the abrdn ethical investing approach. We asked for feedback on the importance of areas for consideration, as well as opinions on current issues that could affect the investment approach. The survey was sent to 6,813 investors* and received a 5.5% response rate.

Key Findings:

- Environmental factors continue to dominate in terms of investor importance.
- Environmental degradation, companies linked to deforestation, and companies that significantly contribute to climate change rated as the top three most important factors.
- Human rights' issues continue to rate highly for investors and rated joint third in importance from investors.
- Ethical issues for gaming companies received less interest than previous years but remains a concern for investors.

*Investors surveyed in 2023 are Phoenix (95%) and abrdn (5%) customers.

Funds' Criteria

No changes were made to the criteria of the funds during this period. The ethical funds are invested according to the negative and positive criteria set out in the ethical funds approach document. The funds do not invest in companies that fail the negative criteria and favour investment in companies that meet the positive criteria.

Voting Record - abrdn UK Ethical Equity Fund

abrdn votes on all holdings held in the funds except where for practical reasons, such as share-blocking, it is not appropriate to do so. For the annual period between 1 March 2023 to 29 February 2024, we voted at 63 company meetings and a total of 1,188 proposals on behalf of the abrdn UK Ethical Equity Fund.

We voted against the approval of the remuneration report at Instem as we were concerned by the large salary increases granted to the CEO and the CFO. The company did not disclose the STI or LTI maximum award limits, and the vesting of LTI awards is subject to continued employment rather than the achievement of performance hurdles.

We opposed RS Group's remuneration policy at the company's 2022 AGM as we were not supportive of the introduction of an additional LTI worth 750 percent of salary. As awards under this plan were granted after the AGM, a vote against the remuneration report in 2023 was considered appropriate.

Following a consultation in 2022 we voted against SSE's revised remuneration policy and Performance Share Plan. We were not supportive of the increase in PSP grant from 200 percent to 250 percent of salary. We were of the view that this was not appropriate in the context of the developing cost of living crisis. Awards were granted at the new maximum during the year, and as we remain of the view that awards should not have been increased, we voted against the remuneration report in 2023.

We also abstained on the approval of a Net Zero Transition Report at the SSE AGM. While we welcome the intention to increase climate-related transparency and accountability, we have reservations about the implications of Say on Climate votes. We are of the view that presenting climate strategy as a standalone voting item risks diminishing both the integration of climate in strategy and the direct responsibility and accountability of the board and individual directors. Should this resolution be approved, it may limit the scope for subsequent challenge. We believe that the most effective means for abrdn to encourage high-quality climate disclosure is through a combination of targeted engagement and voting on conventional resolutions, focussed on our highest financed emitters and companies we identify as climate laggards.

Further Information

If you would like to find out more about abrdn's Ethical Funds approach these can be found on our website www.abrdn.com, under **Fund Centre**.

For any additional information, please write to Dan Grandage, Head of Sustainable Investing, abrdn, 280 Bishopsgate, London EC2M 4AG.

Dan Grandage

Chair abrdn's Sustainability Standards Group
15th March 2024

Notes to the Financial Statements of abrdrn OEIC II

For the year ended 29 February 2024

1 Accounting Policies for all Funds

a. Basis of preparation

The financial statements for each of the funds have been prepared under the historical cost basis, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice (SORP) for Financial Statements of Authorised Funds issued by the Investment Management Association in May 2014 (IMA SORP 2014), Financial Reporting Standard (FRS) 102 and United Kingdom Generally Accepted Accounting Practice.

For all funds apart from abrdrn American Income Equity Fund, abrdrn Asian Pacific Growth Equity Fund, abrdrn Emerging Markets Opportunities Equity Fund, abrdrn Europe ex UK Growth Equity Fund, abrdrn Global Focused Equity Fund, abrdrn Investment Grade Corporate Bond Fund, abrdrn UK Growth Equity Fund, abrdrn UK High Alpha Equity Fund, abrdrn UK High Income Equity Fund, ASI UK Recovery Equity Fund and Global Emerging Markets Equity Unconstrained Fund, the ACD has undertaken a detailed assessment, and continues to monitor, each fund's ability to meet its liabilities as they fall due, including liquidity, declines in global capital markets and investor redemption levels. Based on this assessment, the funds continue to be open for trading and the ACD is satisfied the funds have adequate financial resources to continue in operation for at least the next 12 months after the financial statements are signed and accordingly it is appropriate to adopt the going concern basis in preparing the financial statements.

Global Emerging Markets Equity Unconstrained Fund is no longer open to investors, having redeemed all share on 14 January 2016. ASI UK Recovery Equity Fund is no longer open to investors, having redeemed all shares on 22 October 2020. abrdrn UK Growth Equity Fund is no longer open to investors, having merged into abrdrn UK Sustainable and Responsible Investment Equity Fund on 3 March 2023. abrdrn UK High Alpha Equity Fund is no longer open to investors, having merged into abrdrn UK Sustainable and Responsible Investment Equity Fund on 3 March 2023. abrdrn Europe ex UK Growth Equity Fund is no longer open to investors, having merged into abrdrn Europe ex UK Equity Fund on 3 March 2023. abrdrn Asian Pacific Growth Equity Fund is no longer open to investors, having merged into abrdrn Asia Pacific Equity Fund on 12 May 2023. abrdrn Emerging Markets Opportunities Equity Fund is no longer open to investors, having merged into abrdrn Emerging Markets Equity Fund on 12 May 2023. abrdrn UK High Income Equity Fund is no longer open to investors, having merged into abrdrn UK Income Equity Fund on 27 October 2023.

Subsequent to the year end, the ACD closed the abrdrn American Income Equity Fund on 14 May 2024. It is the intention of the ACD to merge the abrdrn Global Focused Equity Fund and abrdrn Investment Grade Corporate Bond Fund in the second half of the year.

It is the intention to terminate the funds at a later date once the residual assets and liabilities are settled. As a result, the financial statements for these funds have not been prepared on a going concern basis. Prior year financial statements for ASI UK Recovery Equity Fund, Global Emerging Markets Equity Unconstrained Fund were also not prepared on a going concern basis.

For the funds not prepared on a going concern basis, no adjustments were required to the financial statements to adjust assets or liabilities to their realisable values or to provide for liabilities arising from the decision to terminate the funds. No liabilities have been recorded for costs of the terminations as the intention is that the ACD will bear any such costs which may arise.

b. Valuation of investments

Investments have been valued at fair value as at the close of business on 29 February 2024. The SORP defines fair value as the market value of each security, in an active market, this is generally the quoted bid price.

Unlisted, unapproved, illiquid or suspended securities are valued at the Authorised Corporate Directors' best estimate of the amount that would be received from an immediate transfer at arm's length. The ACD has appointed a Fair Value Pricing committee to review valuations.

Collective Investment Schemes are valued by reference to their net asset value. Dual priced funds have been valued at the bid price. Single priced funds have been valued using the single price.

Any open positions in derivative contracts or forward foreign currency transactions at the year end are included in the Balance Sheet at their mark to market value.

Notes to the Financial Statements of abrdn OEIC II

For the year ended 29 February 2024 continued

c. Foreign Exchange

Assets and liabilities denominated in foreign currencies are translated into Sterling at the prevailing exchange rates as at the close of business on the reporting date.

Foreign currency transactions are translated at the rates of exchange ruling on the date of such transactions. Exchange differences on such transactions follow the same treatment as the principal amounts.

d. Dilution

In certain circumstances (as detailed in the Prospectus) the ACD may apply a dilution adjustment on the issue or cancellation of shares, which is applied to the capital of the fund on an accruals basis. The adjustment is intended to protect existing investors from the costs of buying or selling underlying investments as a result of large inflows or outflows from the fund.

e. Revenue

Dividends on equities and preference stocks are recognised when the securities are quoted ex-dividend, or in the case of unquoted securities when the dividend is declared.

Overseas dividends are grossed up at the appropriate rate of withholding tax and the tax consequences are shown within the tax charge.

Revenue from collective investment schemes is recognised when the investments are quoted ex dividend.

Accumulation distributions from shares held in collective investment schemes are reflected as revenue and form part of the distribution.

Equalisation received from distributions or accumulations on units or shares in underlying investments is treated as capital and deducted from the cost of the investment.

Revenue from offshore funds is recognised when income is reported by the offshore fund operator.

Interest on bank deposits is recognised on an accruals basis.

Interest from short-term deposits is recognised on an accruals basis.

Interest on debt securities is recognised on an accruals basis.

Interest from debt securities is recognised as revenue using the effective interest method. The purchase price of the asset, the yield expectation and scheduling of payments, are all part of this calculation. Callable bonds are calculated on a yield to worst expectation generally, which may not match other calculations.

Stock dividends are recognised as revenue when they are quoted ex dividend. In the case of enhanced stock dividends, the value of the enhancement is recognised as capital.

Special dividends may be treated as repayments of capital or as revenue dependent on the facts of the particular case. Where receipt of a special dividend results in a significant reduction in the capital value of the holding, then the special dividend will be recognised as capital so as to ensure that the matching principle is applied to gains and losses. Otherwise, the special dividends are recognised as revenue.

Underwriting commission is taken to revenue and recognised when the issue takes place, except where the fund is required to take up all or some of the shares underwritten in which case an appropriate proportion of the commission received is deducted from the cost of the relevant shares.

Distributions from Brazilian corporations may take the form of interest on capital as an alternative to making dividend distributions. Interest on capital distributions are recognised on an accruals basis.

Management fee rebates from collective investment schemes are recognised as revenue or capital on a consistent basis to how the underlying scheme accounts for the management fee. Where such rebates are revenue in nature, the income forms part of the distribution.

For dividends received from US Real Estate Investment Trusts ("REITs"), on receipt of the capital/revenue split from the REITs, the allocation of the dividend is adjusted within the financial statements.

Notes to the Financial Statements of abrdn OEIC II

For the year ended 29 February 2024 continued

f. Expenses

All expenses other than those relating to the purchase and sale of investments are charged against revenue on an accruals basis in the Statement of Total Return. Where a fund has an objective of maximising income returned to investors the expenses may be deducted from capital in line with the distribution policy. Details of any deduction from capital for distribution purposes would be disclosed in the distribution notes of the relevant fund.

Expenses relating to the purchases of investments are charged to the cost of investment and expenses relating to the sales of investments are deducted from the proceeds on sales.

g. Taxation

Provision is made for corporation tax at the current rate on the excess of taxable income over allowable expenses.

UK dividends are disclosed net of any related tax credit.

Overseas dividends are disclosed gross of any foreign tax suffered and the tax element is separately disclosed in the taxation note.

The tax accounting treatment follows that of the principal amount, with charges or reliefs allocated using the marginal basis regardless of any alternative treatment that may be permitted in determining the distribution.

Any windfall overseas tax reclaims received are netted off against irrecoverable overseas tax and therefore the irrecoverable overseas tax line in the taxation note may be negative.

The funds: abrdn Asian Pacific Growth Equity Fund, abrdn Europe ex UK Income Equity Fund, abrdn Europe ex UK Growth Equity Fund, abrdn Global Balanced Growth Fund and abrdn Global Focused Equity Fund are party to certain claims and proceedings to recover tax suffered in respect of overseas income. These claims and proceedings are considered to be contingent assets of the funds and have not been recognised in these Financial Statements as the outcome of the claims and the potential recoveries are not sufficiently certain.

Deferred taxation is provided on all timing differences that have originated but not reversed by the balance sheet date other than those differences regarded as permanent. Any liability to deferred tax is provided at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

Deferred tax assets are only recognised to the extent that it is regarded more likely than not that there will be taxable profits against which the reversal of underlying timing differences can be offset.

h. Distributions

All of the net revenue available for distribution at the year end will be distributed. Where a fund has accumulation shareholders, this will be reinvested. Where a fund has income shareholders, this will be paid.

Where the ACD has discretion about the extent to which revenue and expenses are recognised within the distributable income property of the fund, the approach adopted, at all times, will be governed by the aim of maximising the total return to shareholders through limiting avoidable taxation costs.

Where expenses are charged to capital, this will increase the distribution with a corresponding reduction to capital. For the purposes of calculating the distribution, on these classes, the effect of marginal tax relief between capital and revenue is not incorporated.

Further details with regards to the distribution policy and deductions from capital can be found in the fund distribution note where it applies.

Gains and losses on non-derivative investments and currencies, whether realised or unrealised, are taken to capital and are not available for distribution. Cash flows associated with derivative transactions are allocated between the revenue and capital property of the funds according to the motives and circumstances of the particular derivative strategy. The investment manager articulates the motives and circumstances underlying the derivative strategy and the ACD assesses these in association with financial reporting constraints enshrined within the SORP to allocate the cash flows accordingly.

Notes to the Financial Statements of abrdn OEIC II

For the year ended 29 February 2024 continued

i. Equalisation

Equalisation appears within the fund reports as part of the distribution. This represents the net revenue in the funds share price attached to the issue and cancellation of shares. It will form part of any distributions at the period end attributable to shareholders.

j. Derivatives

Funds with strategies that permit it, can make use of derivatives. Derivatives can be used to reduce risk or cost, or to generate additional capital or income consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management"). Some strategies may permit use of derivatives with a higher or lower frequency or for investment purposes. The accounting for each derivative is applied consistently in line with the derivative type; the valuation policy and market convention. Market convention for derivatives is often based on total return; however where a fund strategy or derivative type is defined with revenue in mind the accounting treatment can have a revenue element, forming part of the distribution, highlighted in the distribution policy. The Statement of Total Return captures all realised and unrealised gains regardless of nature. The Portfolio Statement will show the individual derivative contracts as net positions in line with the valuation policy.

There are three broad transaction types: derivatives create a future asset or liability recognised as unrealised profit or loss until the date of maturity where cash is exchanged; swaps realise amounts of profit or loss in line with an agreed schedule until maturity; options recognise a premium paid or received, with the right or obligation to buy "call" or sell "put" an asset, exercised when the option owner is in the money. These transaction types break into three broad strategies.

Funds with strategies spanning multiple currencies can make use of the following transactions in line with their policy: forward currency exchange contracts (a derivative of the exchange rate); cross currency swaps; currency options and other currency derivatives. These transactions relate to the future expectations of foreign exchange rates. The future expectation is based on the current interest rates projected to a forward date. Currency derivatives exchange one currency for another currency at a future date.

Funds with strategies in debt instruments (bonds) can make use of the following transactions in line with their policy: bond future contracts (a derivative of the bond market or asset); credit default swaps; interest rate swaps; overnight index swaps; inflation swaps; interest rate options; swaptions; total return bond swaps and other bond related derivatives. These transactions relate to the future expectations on debt assets. The future expectations can be based on an individual asset or a market. Bond derivatives can relate to the future credit expectations; interest rate expectations; inflation expectations or a combination of these.

Funds with strategies in equity instruments (shares) can make use of the following transactions in line with their policy: equity future contracts (a derivative of the equity market or asset); variance swaps (differences in volatility between two assets); equity options; total return equity swaps and other equity related derivatives. These transactions relate to the future expectations on equity assets. The future expectations can be based on an individual asset or a market. Equity derivatives relate to the future expectations in equity markets. Equity markets are subject to the variables found in bond markets, however there is not an explicit relationship to derive a price.

k. Collateral and margin

Funds undertaking derivative transactions, exchange investment assets based on legal agreements. In line with collective investment scheme rules and abrdn policy collateral or margin must be exchanged to limit the exposure to investors should an agreement fail. Collateral is exchanged at an agreement level on a net basis following abrdn policy at a counterparty level within a fund. Collateral is monitored and where required exchanged daily, Collateral is bilateral in nature exchanged between the two counterparties in a transaction. Margin is similar to collateral limiting the risk for investors. The main difference is the exchange of initial margin, required before a contract is opened. Once opened the exchange of variation margin is monitored and where required exchanged daily. Both collateral and margin do not affect the valuation of the asset they are protecting or the fund unless re-hypothecated (used to buy) into another investment asset. All funds do not re-hypothecate but may use liquidity collective investments to manage cash effectively.

Notes to the Financial Statements of abrdrn OEIC II

For the year ended 29 February 2024 continued

2 Risk management policies

Generic risks that the abrdrn range are exposed to and the risk management techniques employed are disclosed below. Numerical disclosures and specific risks, where relevant, are disclosed within the financial statements.

The Financial Conduct Authority (FCA) Collective Investment Schemes Sourcebook (COLL) and FCA Funds Sourcebook (FUND) rules require the Management Company to establish, implement and maintain an adequate and documented Risk Management Process (RMP) for identifying the risks they manage, or might be, exposed to. The RMP must comprise of such procedures as are necessary to enable abrdrn to assess the exposure of each fund it manages to market risk, liquidity risk, counterparty risk, operational risk and all other risks that might be material.

abrdrn functionally and hierarchically separates the functions of risk management from the operating units and portfolio management functions, to ensure independence and avoid any potential or actual conflicts of interest. The risk management function has the necessary authority, access to all relevant information, staff and regular contact with senior management and the Board of Directors of the Company. The management of investment risk within abrdrn is organised across distinct functions, aligned to the well-established 'three lines of defence' model.

1. Risk ownership, management and control.
2. Oversight of risk, compliance and conduct frameworks.
3. Independent assurance, challenge and advice.

The risk management process involves monitoring funds on a regular and systematic basis to identify, measure and monitor risk and where necessary escalate appropriately, including to the relevant Board, any concerns and proposed mitigating actions.

The risk team, in line with client expectations and the investment process, develops the risk profiles for the funds in order to set appropriate risk limits. Regulatory limits as well as those agreed, are strictly enforced to ensure that abrdrn does not inadvertently (or deliberately) breach them and add additional risk exposure. In addition, there is an early warnings system of potential changes in the portfolio risk monitoring triggers. Where possible, these are coded into the front office dealing system, in a pre-trade capacity, preventing exposures or breaching limits before the trade is actually executed.

Risk Definitions & Risk Management Processes

i) **Market Risk** is the risk that economic, market or idiosyncratic events cause a change in the market value of Client assets. Market Risk can be broadly separated into two types:

- (1) Systematic risk stems from any factor that causes a change in the valuation of groups of assets. These factors may emerge from a number of sources, including but not limited to economic conditions, political events or actions, the actions of central banks or policy makers, industry events or, indeed, investor behaviour and risk appetite.
- (2) Specific or Idiosyncratic Risk, which is the part of risk directly associated with a particular asset, outside the realms of, and not captured by Systematic Risk. In other words, it is the component of risk that is peculiar to a specific asset, and may manifest itself in various guises, for example: corporate actions, fraud or bankruptcy.

Portfolios are subject to many sub-categories of market risk. Many of these risks are interlinked and not mutually exclusive. Examples of these types of investment risk include: Country risk; Sector risk; Asset-class risk; Inflation/deflation risk; Interest rate risk; Currency risk; Derivatives risk; Concentration risk; and Default risk. Factors that cause changes in market risks include: future perceived prospects (i.e. changes in perception regarding the future economic position of countries, companies, sectors, etc.); shifts in demand and supply of products and services; political turmoil, changes in interest rate/inflation/taxation policies; major natural disasters; recessions; and terrorist attacks.

There are several ways in which to review and measure investment risk. The risk team recognises that each method is different and has its own unique insights and limits, and applies the following measurements for each fund, where relevant:

- **Leverage:** has the effect of gearing a fund's expected performance by allowing it to gain greater exposure to underlying investment opportunities (gains and losses). The higher the leverage the greater the risk (potential loss).

Notes to the Financial Statements of abrdn OEIC II

For the year ended 29 February 2024 continued

- **Value-at-Risk (VaR) and Conditional VaR (CVaR):** VaR measures with a degree of confidence the maximum the fund could expect to lose in any given time frame. Assuming a normal (Gaussian) distribution, this is a function of the volatility of the fund's returns. The higher the volatility, the higher the VaR, the greater the risk. CVaR calculates the expected tail loss, under the assumption that the VaR has been reached.
- **Volatility, Tracking Error (TE):** Volatility measures the size of variation in returns that a fund is likely to expect. The higher the volatility the higher the risk. TE measures the expected magnitude of divergence of returns between the fund and benchmark over a given time.
- **Risk Decomposition:** Volatility, tracking error and VaR may be broken down to show contribution from market related factors ("Systematic" Risk) and instrument specific (Idiosyncratic Risk). This is not a different measure as such, but is intended to highlight the sources of volatility and VaR.
- **Concentration Risk:** By grouping the portfolio into various different exposures (e.g. country, sector, issuer, asset, etc.), we are able to see where, if any, concentration risk exists.
- **Stress Tests and Scenario Analysis:** This captures how much the current portfolio will make or lose if certain market conditions occur.
- **Back Testing:** This process helps to assess the adequacy of the VaR model and is carried out in line with UCITS regulatory requirements (FCA COLL 6.12). Excessive levels of overshoots and the reasons behind them are reported to the Board.

To generate these risk analytics the risk team relies on third party calculation engines, such as APT, Bloomberg PORT+, RiskMetrics and Axioma. Once the data has been processed, it is analysed by the risk team, generally reviewing absolute and relative risks, change on month and internal peer analysis. Any issues or concerns that are raised through the analysis prompt further investigation and escalation if required. Breaches of hard limits are also escalated immediately. All client mandated and regulatory risk limits are monitored on a daily basis.

Stress tests are intended to highlight those areas in which a portfolio would be exposed to risk if the current economic conditions were likely to change. An economic event may be a simple change in the direction of interest rates or return expectations, or may take the form of a more extreme market event such as one caused through military conflict. The stress test itself is intended to highlight any weakness in the current portfolio construction that might deliver unnecessary systematic exposure if the market were to move abruptly.

Stress testing is performed on a regular basis using relevant historical and hypothetical scenarios.

- ii) **Liquidity risk** is defined as the risk that a portfolio may need to raise cash or reduce derivative positions on a timely basis either in reaction to market events or to meet client redemption requests and may be obliged to sell long term assets at a price lower than their market value. Liquidity is also an important consideration in the management of portfolios: Portfolio Managers need to pay attention to market liquidity when sizing, entering and exiting trading positions.

Measuring liquidity risk is subject to three main dimensions:

- Asset Liquidity Risk – how quickly can assets be sold.
- Liability Risk – managing redemptions as well as all other obligations arising from the liabilities side of the balance sheet.
- Contingency Arrangements or Liquidity Buffers – utilising credit facilities etc.

Liquidity Risk Management Framework

abrdn has a liquidity risk management framework in place applicable to the funds and set out in accordance with its overall Risk Management Process, relative to the size, scope and complexity of the funds. Liquidity assessment and liquidity stress testing is typically performed monthly, monitoring both the asset and liability sides. Asset side stressed scenarios are considered based on the nature of different asset classes and their liquidity risks to demonstrate the effects of a market stress on the ability to sell-down a fund. Liability side analysis includes stress scenarios on the investor profile as well as liabilities on the balance sheet. Any particular concerns noted or liquidity risk limit breaches are escalated to the relevant Committees and Boards, if material.

Notes to the Financial Statements of abrdn OEIC II

For the year ended 29 February 2024 continued

iii) **Counterparty credit risk** is the risk of loss resulting from the fact that the counterparty to a transaction may default on its obligations prior to the final settlement of the transaction's cash flow. Credit risk falls into both market risk and specific risk categories. Credit risk is the risk that an underlying issuer may be unable (or unwilling) to make a payment or to fulfil their contractual obligations. This may materialise as an actual default or, or to a lesser extent, by a weakening in a counterparty's credit quality. The actual default will result in an immediate loss whereas, the lower credit quality will more likely lead to mark-to-market adjustment.

Transactions involving derivatives are only entered into with counterparties having an appropriate internal credit rating that has been validated by the credit research team and approved by the relevant credit committee.

Appropriate counterparty exposure limits will be set and agreed by these committees and the existing credit exposures will be assessed against these limits.

iv) **Operational Risk**

Operational risk can be defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk also includes the breakdown of processes to comply with laws, regulations or directives.

Operational Risk Management

An Operational Risk Management Framework is in place to identify, manage and monitor appropriate operational risks, including professional liability risks, to which the Management Company and the Funds are or could be reasonably exposed. The operational risk management activities are performed independently as part of one of the functions of the Risk Division.

abrdn plc (the "Group") Risk Management Framework is based upon the Basel II definition of operational risk which is "the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events".

The Group's management of operational risk is therefore aimed at identifying risks in existing processes and improving existing controls to reduce their likelihood of failure and the impact of losses. The Group has developed a framework that embodies continuous improvement to internal controls and ensures that the management of risk is embedded in the culture of the Group.

The identification, management, monitoring and resolution of events, risks and controls are facilitated via the Group's risk management system, Shield. The system is designed to facilitate the convergence of governance, risk and compliance programmes and automate a comprehensive review and assessment of operational risks.

abrdn AAA Bond Fund

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in Sterling-denominated bonds with a high degree of creditworthiness.

Performance Target: To achieve the return of the Markit iBoxx Sterling Non Gilts AAA plus 0.65% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 60% in Sterling denominated bonds, such as government and corporate bonds (including asset backed and mortgage backed).
- The fund may invest in bonds issued anywhere in the world by governments and corporations, such as sub-sovereigns, inflation-linked, convertible, asset backed and mortgage backed bonds. The fund will employ techniques to reduce (hedge) risk related to currency movements on non-Sterling bonds.
- At the point of investment, bonds shall have a credit rating of "AAA-" or higher from at least one major rating agency such as Standard & Poor's, Moody's or Fitch, with the exception of any UK Government bond held by the fund (up to a 20% limit).
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to identify bonds and derivatives based on analysis of global economic and market conditions (for example, interest rates and inflation) and analysis of a company's prospects and creditworthiness compared to that of the market.
- In seeking to achieve the Performance Target, the Markit iBoxx Sterling Non Gilts AAA is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 3%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the Markit iBoxx Sterling Non Gilts AAA over the long term.

Please note: The fund's ability to buy and sell bonds and the associated costs can be affected during periods of market stress which could include periods where interest rates move sharply.

Derivatives and Techniques

- The fund will routinely use derivatives to reduce risk, reduce cost, and/or generate extra income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives can be used to generate growth, consistent with the fund's risk profile, if market prices are expected to rise ("long positions") or fall ("short positions"). These positions can be used in overseas markets.
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or credit worthiness of corporations or governments.

Performance Review

Over the period under review, the fund returned 3.69%. (Source: FactSet, Institutional Accumulation, net of fees). This compared to a return of 4.37% for our performance target. (Source: FactSet, the Markit iBoxx Sterling Non Gilts AAA Index +0.65%).

**abrdn means the relevant member of abrdn group, being abrdn plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund's interest-rate positioning and, to a lesser extent, credit decisions positively contributed to relative performance. Sector allocation was beneficial; the main positives were consumer cyclical and collateralised bonds, whereas consumer non-cyclical and other financials

lagged. Security selection had a neutral effect; the largest positives were consumer non-cyclical and government-related bonds, with consumer cyclical and collateralised bonds lagging. By credit rating, AAA-rated bonds positively contributed, but there was a minor negative effect from AA-rated bonds. By issuer, the largest contributors were Wellcome Trust, European Investment Bank, Johnson & Johnson and British Land. The main detractors were the Government of Canada, BPCE, the Federal National Mortgage Association and the Government of Sweden.

Market Review

Corporate bonds had a solid performance over the 12-month period.

Turbulence in the global banking sector in March 2023 caused credit spreads – the yield premium received by investors in return for the typically greater risk of lending to companies rather than governments – to widen to levels last seen in the autumn of 2022. This was largely driven by the collapse of Credit Suisse and concerns around regional banks in the US. However, the negative effect of wider credit spreads was offset by lower government bond yields amid a flight to safety. Nonetheless, a backdrop of sharply rising interest rates, stubbornly high annual inflation and a worsening economic outlook meant that challenging market conditions persisted over April and May.

Calm then returned to corporate bond markets over the next few months. Spreads tightened on growing expectations that global inflation pressures may be peaking. This fuelled investors' hopes that the current cycle of interest-rate rises could be nearing its end and helped corporate bonds to perform better as investors' appetite for riskier assets started to return. As a result, corporate bond markets exhibited strong performance towards the end of the period, with spreads ending significantly lower than where they were before the volatility seen in March 2023. Underlying UK government bond yields also fell, and this, coupled with tightening credit spreads, produced strong total returns from the asset class.

The Bank of England (BoE) announced a further four interest-rate increases over the period, taking its base rate from 3.50% at the start of 2023 to 5.25% by the end of it. Following the 50-basis-point (bp) hike in February, the BoE increased its base rate by a further 25 bps in both March and May, by 50 bps in June and then by 25 bps in August. As a result, UK annual consumer inflation continued to trend downwards over the period. However, it has still remained above the BoE's 2% target, as well as the rates recorded in both the US and eurozone, in part due to elevated food prices. UK annual core inflation in January 2024 stayed flat month on month, coming in at a lower-than-expected 5.1%.

Portfolio Activity and Review

We continued switching out of AAA-rated corporates into supranationals, such as the European Investment Bank and KfW. In the primary market, we bought attractive new supranational bonds, including the 2025 bonds of CPP Investments, the Asian Development Bank and the 2031 bonds of KfW. The fund deployed cash balances which had built up into attractive new deals from US issuers Ford Motors and MetLife, as well as topping up bank exposure via senior non-preferred issues from Société Générale and Crédit Agricole. We closed our position in Sweden's Kommuninvest. In addition, the fund took profits in holdings which had performed well, including FirstGroup 2024s, CaixaBank Additional Tier-1 bonds and BPCE Tier 2 bonds.

Portfolio Outlook and Strategy

While the fundamental backdrop for 2024 remains uncertain, investment-grade credit continues to attract interest. Credit spreads are approaching tight levels on a historic basis. However, at this stage of the cycle, where we are close to renewed economic growth and lower interest rates, that is normal. We expect policy rates to fall in the UK this year, providing comfort to bond buyers. For the time being, the two worst potential scenarios for bonds – reflation (and no rate cuts) or a hard landing (which would be bad for credit markets) – appear to be off the table. We expect heightened yield volatility as we transition to a lower inflation environment and subsequent rate cuts. Sector and security selection remain key at current valuations.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator. The risk and reward indicator changed from 3 to 4 on 6 October 2023.

Typically lower rewards, lower risk			Typically higher rewards, higher risk				
←				→			
1	2	3	4	5	6	7	

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- ABS/MBS Risk - Asset and mortgage backed securities are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks and may lead to substantial loss and increased volatility in adverse market conditions. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Lowest share price	68.43	66.83	76.85

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £14,700 (2023: £13,500).
* Subsidised fees are paid by the ACD.

Notes to the Financial Statements

Continued

4 Interest Payable and Similar Charges

	2024 £'000	2023 £'000
Derivative expense	415	90
Interest payable	5	2
Total interest payable & similar charges	420	92

5 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Total taxation (note 5b)	-	-

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	3,122	2,798
Corporation tax at 20% (2023: 20%)	624	560
Effects of:		
Distributions treated as tax deductible	(624)	(560)
Total tax charge for year (note 5a)	-	-

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

6 Distributions

	2024 £'000	2023 £'000
First interim distribution	833	738
Second interim distribution	830	753
Third interim distribution	620	637
Final distribution	612	658
	2,895	2,786
Add: Income deducted on cancellation of shares	297	53
Deduct: Income received on issue of shares	(70)	(41)
Total distributions for the year	3,122	2,798

Details of the distribution per share are set out in this fund's distribution tables.

Notes to the Financial Statements

Continued

7 Debtors

	2024 £'000	2023 £'000
Accrued revenue	1,352	2,378
Amounts receivable from the ACD for the issue of shares	1	133
Expenses reimbursement receivable from the ACD	3	3
Sales awaiting settlement	716	-
Total debtors	2,072	2,514

8 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	5	2
Cash at broker	1,195	2,726
	1,200	2,728
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	1,096	4,994
Net liquidity	2,296	7,722

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	62	59
Accrued expenses payable to the Depositary or associates of the Depositary	3	4
Amounts payable to the ACD for cancellation of shares	381	326
Other accrued expenses	-	6
Purchases awaiting settlement	700	3,758
Total creditors	1,146	4,153

10 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdrn Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 9.

Notes to the Financial Statements

Continued

Amounts payable to abrdn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 9.

Amounts receivable from abrdn Fund Managers Limited in respect of subsidised fees are disclosed in note 3 and any amounts due at the year end in note 9.

11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Trades in the year				
Bonds	21,574	41,928	76,150	34,158
Trades in the year before transaction costs	21,574	41,928	76,150	34,158
Total net trades in the year after transaction costs	21,574	41,928	76,150	34,158

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.28% (2023: 0.34%), this is representative of the average spread on the assets held during the year.

12 Shares in Issue Reconciliation

	Opening shares 2023	Creations during the year	Cancellations during the year	Conversions during the year	Closing shares 2024

13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3

Fair value of investment liabilities						
Derivatives	(38)	(209)	-	(52)	(2,524)	-
Total investment liabilities	(38)	(209)	-	(52)	(2,524)	-

14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

Notes to the Financial Statements

Continued

The interest rate risk profile of the fund's investments at the year end consists of:

2024	Floating rate financial assets/ (liabilities) £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
Currency				
UK Sterling	2,110	87,469	5,903	95,482
Canadian Dollar	-	-	(3)	(3)
Euro	-	2,283	(2,278)	5
US Dollar	(4)	3,124	(3,111)	9
Total	2,106	92,876	511	95,493

2023	Floating rate financial assets/ (liabilities) £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
Currency				
UK Sterling	6,461	138,374	6,724	151,559
Australian Dollar	(136)	-	122	(14)
Canadian Dollar	-	-	(8)	(8)
Euro	(49)	2,285	(2,196)	40
Swedish Krona	-	1,338	(1,366)	(28)
US Dollar	-	5,253	(5,356)	(103)
Total	6,276	147,250	(2,080)	151,446

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

Notes to the Financial Statements

Continued

VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	3.09%	3.95%	3.48%

2023	Minimum	Maximum	Average
VaR 99% 1 Month	2.13%	4.11%	3.16%

At the year end date, there was a 1% chance of the portfolio value falling (or rising) more than 3.23%, £3,029,000 (2023: 4.08%, £6,150,000) in a one month period.

This calculation is generally determined by the use of an industry recognised medium term risk model, typically based on 3–5 year history. The method assumes normal market conditions and that the portfolio remains unchanged.

Counterparty risk

Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value of £'000	Percentage of total net assets %
Investment grade securities	92,876	97.26
Below investment grade securities	-	-
Unrated securities	-	-
Total value of securities	92,876	97.26

2023	Market value of £'000	Percentage of total net assets %
Investment grade securities	147,860	97.63
Below investment grade securities	-	-
Unrated securities	-	-
Total value of securities	147,860	97.63

Investment grade information used in the above table is based on credit ratings issued by market vendors.

Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

Notes to the Financial Statements

Continued

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
Leveraged instruments				
Forward currency contracts	5,711	(19)	10,082	27
Futures	9,477	33	45,460	62
Swaps	16,334	(190)	71,304	(2,056)
Total market exposure	31,522	(176)	126,846	(1,967)

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Broker or exchange exposure					
Goldman Sachs	(157)	1,195	-	1,038	1.09
	(157)	1,195	-	1,038	1.09

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Broker or exchange exposure					
Goldman Sachs	(1,994)	2,726	3,058	3,790	2.50
	(1,994)	2,726	3,058	3,790	2.50

Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

At the balance sheet date the fund had the following positions.

2024	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock £'000	
Counterparties				
BNP Paribas	(4)	-	-	(4)
NatWest Markets	(15)	-	-	(15)
Total	(19)	-	-	(19)

The Prospectus outlines allowable collateral. There have been no changes in the year.

Group 1	0.5661	-	0.5661	0.3841
Group 2	0.5661	-	0.5661	0.3841

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn American Income Equity Fund

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in US equities (company shares).

Performance Target: To deliver a yield greater than that of the S&P 500 Index over a rolling five year period (before charges) and achieve a return in excess of the S&P 500 Index over a rolling five year period (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in the US or companies that derive a significant proportion of their revenues or profits from US operations or have a significant proportion of their assets there.
- The fund may also invest up to 20% in companies listed, incorporated or domiciled in Canada or Latin America.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. Given the fund's income objective, the management team place particular emphasis on understanding business fundamentals and dynamics and the impact this has on cash flow generation and the company's ability to allocate cash effectively.
- In seeking to achieve the Performance Target, the S&P 500 Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 9%. Due to the income nature of the management process, the fund's performance profile may deviate significantly from that of the S&P 500 Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned 13.46%. (Source: FactSet, Institutional Accumulation Shares). This compared with a return of 24.85% for our performance target (Source: FactSet, S&P 500 Index). Meanwhile, the Institutional Income share class yield was 2.05% over the period, versus the target yield of 1.40% (the S&P 500 Index).

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdn**. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. To the extent permitted by applicable law, none of the Owner, abrdn** or any other third party (including any third party involved in providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

**abrdn means the relevant member of abrdn group, being abrdn plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund gained but underperformed the market over the review period largely due to stock selection. Sector wise, the communication services and healthcare sectors were key detractors from relative performance. Conversely, the industrials and consumer staples sectors were favourable.

At the stock level, our lack of exposure to tech companies (NVIDIA, Alphabet, Meta), whose share prices surged, hurt performance. The fund does not hold these companies as they offer low or no dividends. Alphabet does not

abrdrn American Income Equity Fund

Continued

pay dividends while NVIDIA's dividends have remained negligible. Meanwhile, Meta did not pay any dividends until its recent announcement in February 2024. Similarly, Amazon, another company the fund does not hold due to the lack of dividends, also detracted for the fund. Its shares performed strongly as investors focused on the company's cost-cutting upside and the momentum in Amazon Web Services.

Conversely, Broadcom contributed to relative performance following strong quarterly results year to date. Furthermore, its management stated that the company's semiconductor products may benefit from the growth in artificial intelligence (AI)-related spending. Meanwhile, Microsoft Corporation performed well as investors continued to gain more confidence in its ability to monetise developments in AI across a wide range of its products. The fund's lack of exposure to Tesla, which was weak during the period, was also favourable.

Market Review

US equities, as measured by the S&P 500, recorded strong gains over the 12 months to 29 February 2024 in sterling terms.

Growth-focused stocks, such as technology companies, performed particularly well. These stocks were more sensitive to the prospect of monetary tightening coming to an end, and then reversing, because of the favourable effect on their future discounted earnings.

Markets experienced turmoil early in the review period along with increasing interest rates and following the banking sector collapses which led to fears of a recession. However, authorities' actions to stabilise the financial sector restored confidence. Meanwhile, the compromise agreement to suspend the US debt ceiling until January 2025, signed into law in June, removed the risk of a default and boosted investor confidence.

Faced with a relatively robust economy, the US Federal Reserve (Fed) continued to tighten monetary policy in to mid 2023. As a result, the target range for the fed funds rate reached 5.25-5.50%, a 22-year high, in July 2023. Subsequently, the Fed maintained this rate for the rest of the period. The possibility of interest rates remaining elevated for a longer period weighed on markets during August to October. Additionally, the outbreak of war in the Middle East added to the uncertainty around inflation. Despite a dovish tone in late 2023, the Fed's messaging turned cautious in early 2024 and its Chairman Jerome Powell added that a rate reduction in March 2024 seemed unlikely. Nonetheless, given the sustained fall in the Fed's

targeted inflation measure, three rate cuts – as forecast by the Fed's committee members in December's 'dot plot' – could still be possible in 2024. Against this backdrop, US stocks performed well later in the review period.

Portfolio Activity and Review

We initiated and exited the following companies solely due to the fund's proposed conversion into a value benchmark and higher dividend focus. In this regard, we initiated agricultural sciences company FMC Corporation, real estate investment trust Gaming and Leisure Properties, medical device provider Medtronic, Restaurant Brands International and beverage company Keurig Dr Pepper and automotive and industrial replacement parts distributor Genuine Parts. We also initiated leading industrial company Honeywell International and our preferred waste company Waste Management while exiting its less-preferred peer Waste Connections. Within utilities we introduced renewables operator NextEra Energy and diversified utility Essential Utilities. Meanwhile, in financials, we bought Royal Bank of Canada and derivatives exchange operator CME Group. Elsewhere, we initiated semiconductor manufacturer Texas Instruments.

Conversely, the fund sold Home Depot due to the risks in a recessionary environment, especially given the high interest-rate backdrop. We also sold Tetra Tech due to lower dividend payments. We believe there are high yielding value opportunities elsewhere. In communication services, the fund disposed of Verizon Communications in favour of our preferred connectivity holding Comcast, and because of the former's weaker balance sheet and a lower return on invested capital. We also offloaded Activision Blizzard after the company was sold to Microsoft. In healthcare, we sold Johnson & Johnson due to higher conviction in its pharmaceutical peers such as Merck & Co, AbbVie and Bristol-Myers Squibb Company. We also disposed of Royalty Pharma due to future risks to pharmaceutical pricing and the company's ability to finance future deals. Meanwhile, we sold LPL Financial given our higher conviction in its wealth management peers such as Charles Schwab and Goldman Sachs, and due to LPL's low dividends as well. We also disposed of Centerpoint Energy in favour of holding its utility peer CMS Energy Corporation. Elsewhere, we offloaded FMC Corporation in favour of other preferred companies. Lastly, we sold Marvell Technology due to higher conviction in Broadcom given its overlapping AI exposure, higher cash flows and moats in different business segments.

abrdn American Income Equity Fund

Continued

Portfolio Outlook and Strategy

US economic growth has been resilient, benefiting from several factors such as unwinding supply-chain pressures, falling energy prices, and higher productivity growth. Despite tighter credit conditions and greatly reduced household savings, the chances of a soft landing versus a mild recession are becoming more balanced as inflation subsides.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk			
←					→		
1	2	3	4	5	6	7	

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Concentration Risk** – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Lowest share price	112.9	107.6	91.24

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

Notes to the Financial Statements

1 Net Capital Gains

	2024 £'000	2023 £'000
Non-derivative securities	22,335	2,719
Other losses	(163)	(236)
Transaction charges	(7)	(10)
Net capital gains	22,165	2,473

2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	276	90
Overseas dividends	4,652	3,852
Overseas REIT	213	59
Stocklending revenue	2	-
Total revenue	5,143	4,001

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	1,466	1,345
Dealing charge	5	1
General administration charge	155	142
	1,626	1,488
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fee	8	7
	8	7
Total expenses	1,634	1,495

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £11,100 (2023: £10,200).

Notes to the Financial Statements

Continued

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	672	531
Total taxation (note 4b)	672	531

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: greater than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	3,509	2,506
Corporation tax at 20% (2023: 20%)	702	501
Effects of:		
Revenue not subject to taxation	(930)	(770)
Overseas taxes	672	531
Overseas tax expensed	(7)	(2)
Excess allowable expenses	235	271
Total tax charge for year (note 4a)	672	531

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £1,307,000 (2023: £1,072,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
First interim distribution	746	501
Second interim distribution	562	413
Third interim distribution	724	634
Final distribution	662	522
	2,694	2,070
Add: Income deducted on cancellation of shares	210	54
Deduct: Income received on issue of shares	(53)	(133)
Total distributions for the year	2,851	1,991

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
Movement between net revenue and distributions		
Net revenue after taxation	2,837	1,975
Expenses charged to capital	14	16
Total distributions for the year	2,851	1,991

Expenses taken to capital include the ACD, Registration, Dealing expenses and the General administration charge. This policy only applies to the income classes.

Where deductions are made from capital these may limit the growth in value of the relevant fund. However, more income is generally available to distribute to shareholders.

Details of the distribution per share are set out in this fund's distribution tables.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	289	317
Amounts receivable from the ACD for the issue of shares	25	184
Overseas withholding tax recoverable	1	1
Sales awaiting settlement	255	-
Total debtors	570	502

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	28	26
	28	26
abrdrn Liquidity Fund (Lux) – Sterling Fund Z1 Inc*	5,689	5,989
Net liquidity	5,717	6,015

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	143	139
Accrued expenses payable to the Depositary or associates of the Depositary	1	1
Amounts payable to the ACD for cancellation of shares	671	2
Other accrued expenses	-	5
Total creditors	815	147

Notes to the Financial Statements

ZA income	5,674,925	6,008,855	(1,607,156)	10,076,624

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Canadian Dollar	5,946	5,066
US Dollar	159,103	207,156
Total	165,049	212,222

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £8,252,000 (2023: £10,611,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £8,510,000 (2023: £10,894,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Bilateral agreements

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £2,000 (2023: £Nil) and expenses paid to the lending agent, Citibank, are £Nil (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £885,000 (2023: £180,000).

14 Subsequent Event

The ACD closed the abrdn American Income Equity Fund on 14 May 2024.

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Emerging Markets Income Equity Fund

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in emerging market equities (company shares).

Performance Target: To deliver a yield greater than that of the MSCI Emerging Markets Index over a rolling five year period (before charges) and achieve a return in excess of the MSCI Emerging Markets Index over a rolling five year period (before charges).

The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in emerging market countries, or companies that derive a significant proportion of their revenues or profits from emerging market operations or have a significant proportion of their assets there.
- Emerging markets include Asian, Eastern European, Middle Eastern, African or Latin American countries.
- The fund may also invest up to 10% in bonds (loans to companies).
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. Given the fund's income objective, the management team place particular emphasis on understanding business fundamentals and dynamics and the impact this has on cash flow generation and the company's ability to allocate cash effectively.
- In seeking to achieve the Performance Target, the MSCI Emerging Markets Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 9%. Due to the

income nature of the management process, the fund's performance profile may deviate significantly from that of the MSCI Emerging Markets Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund rose by 6.29% (Source: Morningstar Direct, Institutional Accumulation). This compared to a return of 4.49% in the MSCI Emerging Markets Index (Source: FactSet). Meanwhile, the Institutional Income's yield was 4.10% over the period, versus a yield of 2.70% in the MSCI Emerging Markets Index.

Source: MSCI. The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. None of the MSCI information is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund outperformed its benchmark over the period, driven by strong stock selection. High dividend stocks Power Grid Corporation of India and Bank of Georgia were the top contributors to relative gains. The former benefitted from the broader push for infrastructure development in India, while the latter rallied on the back of robust results. Investors also reacted positively to Bank of Georgia's acquisition of Armenian lender Ameriabank towards the period-end, which is expected to give an immediate uplift to returns and earnings, while providing greater optionality for future growth.

abrdn Emerging Markets Income Equity Fund

Continued

From a country perspective, stock selection in Taiwan proved rewarding as our semiconductor and technology hardware holdings were buoyed by an artificial intelligence-driven tech rally, alongside expectations of a broader technology recovery as the year progressed, particularly in the memory sector. High dividend company MediaTek fared well, as did Taiwan Union Technology, which we sold following its strong performance. Dividend growth stock Taiwan Semiconductor Manufacturing Co also outperformed.

Our investments in Brazil added further to relative returns. Sentiment towards state-owned oil firm Petrobras, a high dividend name, improved amid higher energy prices and a lack of government intervention on capital allocation, fuel pricing and dividend policy. High dividend company Telefonica Brasil was underpinned by better pricing power and cash flow generation.

Stock picks in China, including the off-benchmark position in Hong Kong, hampered relative gains. Our domestic consumption-focused names sold off despite solid fundamentals, due to a slower-than-expected pace of economic recovery in China following the post-Covid reopening and as investors rotated into large state-owned enterprises and value names. Sports apparel company Li Ning, liquor maker Wuliangye Yibin and luxury car dealer Zhongsheng Group, all dividend growth stocks, trailed the broader market. Healthcare services firm Hangzhou Tigermed, another dividend growth company, was weighed down by slowing domestic outsourcing research and development demand. Our Hong Kong-listed holdings were not spared from the sell-off, as weak investor sentiment carried over to the H-share market.

Market Review

Emerging market equities rose over the 12 months under review, though they lagged developed markets. Sentiment was driven largely by interest rate expectations and China's economic outlook.

Successive interest rate hikes from the US Federal Reserve (Fed) to tame inflation and the prospect of higher-for-longer rates had initially dampened the outlook for the asset class. As the period progressed, markets turned hopeful that interest rates might be nearing a peak, and that the US economy was on track for a soft landing. However, expectations around US monetary policy easing were tempered in the new year as the Fed held rates steady.

Meanwhile, concerns over China's outlook persisted as economic data missed the market's high expectations. Authorities rolled out proactive policies to help the economy, particularly the troubled property sector. Green shoots for a prolonged economic recovery emerged as the measures filtered through, but investors remained on the side lines, waiting for a more sustainable and meaningful rebound.

Portfolio Activity and Review

In key portfolio activity, we initiated positions in companies where we see good prospects for yield growth, as well as those that we felt could maintain a high dividend yield for shareholders. In China, we introduced funeral services provider Fu Shou Yuan, e-commerce company JD.com, Shenzhen Mindray Bio-Medical Electronics and electric scooter manufacturer Yadea Group. We also added Indian lender ICICI Bank and Container Corporation of India, alongside Taiwanese equipment testing firm Sporton International. Purchases in South-East Asia included Singapore-based AEM Holdings and CapitaLand India Trust as well as Malaysia Airports and Bank Negara Indonesia. Furthermore, we participated in the initial public offering of Air Astana, a low-cost, efficient airline operating with a dominant market share in Kazakhstan and a high share in the Central Asia region.

Five new positions were established in Latin America. These included Mexican airport operator Grupo Aeroportuario del Sureste, together with Brazilian financial services company Itau Unibanco, dental service provider Odontoprev, health services provider Rede D'Or Sao Luiz and agricultural producer SLC Agricola.

In the Middle East and Africa, we bought South African mining company Anglo American Platinum and Tabreed, a utility company based in the United Arab Emirates.

Apart from the sale of Taiwan Union Technology, we also exited AIA Group, Alchip Technologies, Amoy Diagnostics, Banco Bradesco, China Construction Bank, CIMB Group, Cisarua Mountain Dairy, Fomento Economico Mexicano, GlobalWafers, Impala Platinum, InPost, ITC, KMC Kuei Meng, Larsen & Toubro, Meituan, Pacific Basin Shipping, Reliance Industries, Saudi Arabian Oil Co, Terrafina, United Tractors and Yinson Holdings to fund more attractive opportunities elsewhere.

Separately, our holding in Indian housing finance provider HDFC was converted to HDFC Bank shares after the two entities merged.

Portfolio Outlook and Strategy

The outlook for emerging markets remains encouraging. With inflation near target levels in many parts of emerging markets, we are at the early stages of a monetary easing cycle – ahead of the US, where the rate cycle has peaked.

More recently, economic data around the world has started to look more positive. The US economy appears increasingly likely to avoid a significant slowdown. Elsewhere, India remains underpinned by a robust domestic economy. The incumbent government is expected to retain power in the upcoming general parliamentary elections, ensuring policy continuity. We are also monitoring China's stimulus progress carefully as Beijing deals with the country's economic challenges.

Broadly, emerging market valuations remain undemanding, both relative to history and versus the US.

We expect the fund's balanced exposure to high dividend and dividend growth businesses to support performance both in periods of market dislocation and greater optimism. The portfolio remains focused on firms with sustainable free cash flow generation, pricing power and comfortably manageable debt levels.

Our companies are, on the whole, delivering results, which we believe will be rewarded by the market. Furthermore, we are continuing to identify companies with attractive valuations, where we hold strong fundamental insights regarding their future income potential. Over the medium and longer term, we believe the microeconomic developments captured by our stock-specific insights are sufficiently material to have a profoundly positive impact on the portfolio.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator. The risk and reward indicator changed from 5 to 6 on 14 April 2023.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Emerging Markets Risk** – The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect / Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- **Credit Risk** – The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- **Interest Rate Risk** – The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	3,043	3,203
Overseas capital gains tax in capital	2,147	325
Total current tax	5,190	3,528
Deferred tax (note 4c)	604	1,011
Total taxation (note 4b)	5,794	4,539

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	34,079	38,025
Corporation tax at 20% (2023: 20%)	6,816	7,605
Effects of:		
Revenue not subject to taxation	(7,000)	(7,846)
Overseas taxes	3,043	3,203
Overseas tax expensed	(66)	(60)
Excess allowable expenses	250	301
Overseas capital gains tax	2,147	325
Deferred tax	604	1,011
Total tax charge for year (note 4a)	5,794	4,539

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Deferred tax

Deferred tax charge at the start of the year	2,575	1,564
Deferred tax charge in statement of total return for year (note 4a)	604	1,011
Provision at the end of the year	3,179	2,575

(d) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £2,252,000 (2023: £2,002,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

Notes to the Financial Statements

Continued

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
First interim distribution	11,469	10,499
Second interim distribution	12,893	16,298
Third interim distribution	4,001	5,002
Final distribution	2,281	3,205
	30,644	35,004
Add: Income deducted on cancellation of shares	833	378
Deduct: Income received on issue of shares	(142)	(265)
Total distributions for the year	31,335	35,117
Movement between net revenue and distributions		
Net revenue after taxation	28,285	33,486
Expenses charged to capital	299	295
Overseas capital gains tax on realised gains	2,147	325
Overseas deferred capital gains tax on unrealised gains	604	1,010
Undistributed revenue brought forward	-	1
Total distributions for the year	31,335	35,117

Expenses taken to capital include the ACD, Registration, Dealing expenses and the General administration charge. This policy only applies to the income classes.

Where deductions are made from capital these may limit the growth in value of the relevant fund. However, more income is generally available to distribute to shareholders.

Details of the distribution per share are set out in this fund's distribution tables.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	1,899	2,276
Amounts receivable from the ACD for the issue of shares	407	223
Overseas withholding tax recoverable	1,053	818
Sales awaiting settlement	4,972	1,383
Total debtors	8,331	4,700

Notes to the Financial Statements

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	1,162	7,048
	1,162	7,048
Bank overdrafts		
Overdraft at bank	-	(975)
	-	(975)
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	5	5
Net liquidity	1,167	6,078

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

8 Provisions for Liabilities

	2024 £'000	2023 £'000
The provisions for liabilities comprise:		
Overseas capital gains tax	3,179	2,574
Total provisions for liabilities	3,179	2,574

9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	356	259
Accrued expenses payable to the Depositary or associates of the Depositary	37	65
Amounts payable to the ACD for cancellation of shares	414	93
Capital gains tax payable	226	-
Other accrued expenses	-	5
Purchases awaiting settlement	2,016	4,835
Total creditors	3,049	5,257

Notes to the Financial Statements

13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3*	Level 1	Level 2	Level 3*
Equities	666,617	-	-	822,520	-	-
Collective Investment Schemes	-	5	-	-	5	-
Total investment assets	666,617	5	-	822,520	5	-

* Level 3 includes assets valued at nil by the abrdn VPC, as detailed in the portfolio statement. These assets have been valued at nil due to current market conditions.

14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Brazilian Real	40,315	34,346
China Renminbi	36,442	57,815
Euro	-	3,637
Hong Kong Dollar	140,595	196,256
Hungarian Forint	-	1
Indian Rupee	91,350	103,054
Indonesian Rupiah	36,538	39,263
Malaysian Ringgit	10,178	18,487
Mexican Peso	48,715	54,445
Nigeria Naira	(58)	(34)
Philippines Peso	4,527	3,619
Russian Ruble	1	-
Saudi Riyal	3,097	10,812
Singapore Dollar	6,430	-
South Africa Rand	11,480	19,919
South Korean Won	83,253	96,347
Taiwan Dollar	104,618	125,018
Thai Baht	3,236	7,062
UAE Dirham	4,863	3,109
US Dollar	31,986	35,134
Total	657,566	808,290

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £32,878,000 (2023: £40,414,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Notes to the Financial Statements

Continued

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £33,331,000 (2023: £41,126,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Bilateral agreements

All stock lending is conducted by the stock lending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Stock on loan £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock* £'000	
UBS	1,932	-	(2,147)	(215)
Total	1,932	-	(2,147)	(215)

* contains the required disclosures for Concentration Data within Securities Financing Transaction Regulation (SFTR) Disclosures.

The prospectus outlines allowable collateral.

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital.

Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Europe ex UK Income Equity Fund

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in European equities (company shares).

Performance Target: To deliver a yield greater than that of the FTSE World Europe ex UK Index over a rolling five year period (before charges) and achieve a return in excess of the FTSE World Europe ex UK Index over a rolling five year period (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated, or domiciled in European countries, or companies that derive a significant proportion of their revenues or profits from European operations or have a significant proportion of their assets there.
- European countries include the emerging markets of Europe, but excludes the UK.
- The fund may also invest up to 15% in bonds (loans to companies).
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. Given the fund's income objective, the management team place particular emphasis on understanding business fundamentals and dynamics and the impact this has on cash flow generation and the company's ability to allocate cash effectively.
- In seeking to achieve the Performance Target, the FTSE World Europe ex UK Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 9%. Due to the

income nature of the management process, the fund's performance profile may deviate significantly from that of the FTSE World Europe ex UK Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned 9.65% (Source: FactSet, Institutional Accumulation, net of fees). This compared to a return of 10.74% for our performance target (Source: FactSet, FTSE World Europe ex UK Index). From an income perspective, the Institutional share class yield stood at 3.52% at the year end versus the index yield target of 2.83%.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

Our holdings in the technology sector made a strong contribution to performance over the period, mainly due to stock selection. BE Semiconductor was among the top performers as it benefited from optimism about an improvement in the semiconductor cycle and AI along with evidence of a broadening in customer adoption of hybrid-bonding products. SAP also made strong gains thanks to healthy revenue growth and increased market confidence about the company's business positioning in areas such as the cloud. Elsewhere, Swedish property platform Hemnet Group added to returns following an impressive trading update that increased confidence in the company's earnings recovery and transaction volumes.

abrdn Europe ex UK Income Equity Fund

Continued

Novo Nordisk's stock benefited from news that trial results showed a substantial cardiovascular risk benefit from weight loss induced by the firm's GLP-1 medication. This news led to greater confidence in the long-term opportunity for its obesity franchise, alongside continued strong earnings momentum driven by its GLP1 franchise. Evidence of improving growth momentum in the second quarter of 2023 gave a boost to shares in Universal Music Group, and Schneider Electric performed well after the company issued results that demonstrated organic growth levels ahead of expectations, as well as increasing confidence in its outlook given rising demand for electrification.

By contrast, our holdings in the financials sectors were the largest detractors from performance, again mainly due to stock selection. Shares in Bank of Ireland fell partly on read-across from weakness in UK banks given lower-than-expected net interest margin delivery. Nordea Bank and FincoBank were also weak in the period. In the utilities sector, RWE underperformed as rising bond yields put pressure on renewables developers and other long-duration assets. Weakness in the gas and power market resulted in the company guiding towards the bottom end of 2023 net income expectations, despite a strong finish to the year.

Payment service provider Edenred fell back on concerns about potential regulatory intervention in France and an investigation into its Italian business relating to a 2019 tender. However, the potential financial penalties related to the latter are likely to be immaterial, and the company continued to see very strong top-line momentum at its two main business units. Fears about the potentially damaging impact of AI weighed on Teleperformance's shares and Nestlé's share price reacted negatively to news that Sweden, one of its most important markets, planned to cut its biofuel mandate for diesel from 2024.

Market Review

Continental Europe's stock markets, as measured by the FTSE World Europe ex UK Index, rose over the 12-month period in sterling terms as inflation continued to fall and hopes grew that central banks would soon start to cut interest rates. They underperformed the markets in the US and Japan, but did better than emerging markets, especially China. Early in the period, the collapse of US-based Silicon Valley Bank led to some volatility as investors questioned the health of the global banking system. In Europe, contagion culminated in the takeover of Credit Suisse by UBS, but markets subsequently recovered much of their prior losses as confidence was restored.

In the second half of 2023 the mood turned more positive despite ongoing macroeconomic concerns.

Share prices were bolstered by hopes that the global economy could achieve a 'soft landing' following the period of monetary tightening, although the outbreak of conflict between Palestine and Israel in October led to increases in commodity prices as well as disruption of vital international shipping routes in the Red Sea. The prospect of cuts to interest rates in 2024 as well as advances in artificial intelligence (AI) boosted share prices across the technology sector, while gains in European markets were also supported by strength in financial stocks as a result of rising rates.

In economic news, the rate of inflation in the eurozone fell consistently throughout the period and stood at 2.6% in February 2024. The European Central Bank (ECB) raised interest rates on six occasions between February and September, moving the deposit rate to 4.5%, a multi-decade high. Investors expected the ECB to begin to reduce rates in the first half of 2024, although ECB president Christine Lagarde warned that rates would only be cut once inflation was clearly under control. Growth in the euro area was sluggish over the period, with weakness in the German economy in particular.

Portfolio Activity and Review

We introduced five new holdings to the portfolio in the period. KPN is a well-run telecoms company operating in the Netherlands in a relatively stable three-player market. The firm has a solid management team and balance sheet, and its free cash flow is set to inflect positively on a multi-year view as capital expenditure declines. In Danone, the French consumer-staples company, we see reasons to be optimistic about the turnaround of the business. Success in the US offers a playbook for driving growth in the European dairy business and we believe there is potential for the company to generate more attractive earnings and dividend growth.

The fund also bought a new position in clothing company Inditex due to the strength of its adaptable business model and its value proposition. The firm's return to modest store growth raises the prospect of improving revenue growth and there is the possibility of extra cash returns to shareholders. We initiated a holding in pharmaceutical businesses Novartis, where management continue to implement corporate restructuring that has the potential to lead to improved margins and returns. Income credentials appeared to be attractive given the combination of dividend yield and share buyback plans. Pernod Ricard was another purchase thanks to its attractive valuation given the firm's strong franchise and compounding business, while the dividend yield was at a high in historical terms.

abrdn Europe ex UK Income Equity Fund

Continued

On the other hand, we sold our holding in Sandoz, a business which span out of Novartis and did not appear to be a particularly attractive asset. We also exited DSM-Firmenich as a result of further earnings downgrade risk from its vitamin business, and Roche, a position we had been reducing in favour of other pharmaceutical exposures, along with our holdings in Teleperformance and Partners Group.

Portfolio Outlook and Strategy

We are cautiously optimistic on the outlook for corporate profitability moving further into 2024, but enthusiasm is tempered to some degree by the scale of the recent rally and the extent to which improving economic data may suggest the need for higher interest rates for longer. Even if the trajectory of interest rates has proved less steep than some were expecting, it remains the case that higher rates are raising financing costs and increasing return hurdles, which will weigh on corporate profitability. Similarly, a higher discount rate is unlikely to be positive for equity valuations. We therefore think the environment will remain more challenging for corporates resulting in period of higher equity-price volatility.

Over the past decade, equity investing could have been characterised as focused almost exclusively on growth, with little attention paid to valuations. We think that following the Covid-19 pandemic and the war in Ukraine, markets will be much more interested in companies that are resilient to this tougher backdrop. The good news is that this is exactly the kind of businesses we invest in.

Our strategy is well suited to this new environment because we seek to identify companies with attractive income-paying attributes. This means the companies we invest in should be relatively more resilient, while our focus on generating a premium dividend yield makes us naturally more valuation sensitive. We believe income will represent a greater share of equity returns going forward and we take the view that our balanced approach should offer an attractive combination of upside capture and downside protection.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk			
←					→		
1	2	3	4	5	6	7	

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- Interest Rate Risk – The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Prices			
Highest share price	193.5	179.5	176.1
Lowest share price	168.2	139.3	146.7

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

Other gains/(losses)	171	(359)
Transaction charges	(23)	(19)
Net capital gains	21,885	41,617

2 Revenue

	2024	2023
	£'000	£'000
Bank and margin interest	236	107
Overseas dividends	13,561	18,387
Total revenue	13,797	18,494

3 Expenses

	2024	2023
	£'000	£'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	2,510	3,587
Dealing charge	32	32
General administration charge	261	371
	2,803	3,990
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fee	30	45
	30	45
Total expenses	2,833	4,035

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £11,100 (2023: £10,200).

Notes to the Financial Statements

Continued

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	690	2,318
Total taxation (note 4b)	690	2,318

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	10,958	14,426
Corporation tax at 20% (2023: 20%)	2,192	2,885
Effects of:		
Revenue not subject to taxation	(2,712)	(3,677)
Overseas taxes	690	2,318
Excess allowable expenses	520	792
Total tax charge for year (note 4a)	690	2,318

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £11,903,000 (2023: £11,383,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
First interim distribution	8,139	11,177
Second interim distribution	1,579	405
Third interim distribution	1,183	757
Final distribution	737	938
	11,638	13,277
Add: Income deducted on cancellation of shares	325	771
Deduct: Income received on issue of shares	(174)	(139)
Total distributions for the year	11,789	13,909

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
Movement between net revenue and distributions		
Net revenue after taxation	10,268	12,108
Expenses charged to capital	1,519	1,791
Shortfall transfer from capital to revenue	2	10
Total distributions for the year	11,789	13,909

Expenses taken to capital include the ACD, Registration, Dealing expenses and the General administration charge. This policy only applies to the income classes.

Where deductions are made from capital these may limit the growth in value of the relevant fund. However, more income is generally available to distribute to shareholders.

Details of the distribution per share are set out in this fund's distribution tables.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	11	9
Amounts receivable from the ACD for the issue of shares	80	182
Overseas withholding tax recoverable	3,492	4,335
Total debtors	3,583	4,526

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	2	205
	2	205
abrdrn Liquidity Fund (Lux) – Euro Fund Z3 Inc*	1,647	4,382
abrdrn Liquidity Fund (Lux) – Sterling Fund Z1 Inc*	1,334	449
Net liquidity	2,983	5,036

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

Notes to the Financial Statements

Continued

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	298	259
Accrued expenses payable to the Depositary or associates of the Depositary	9	14
Amounts payable to the ACD for cancellation of shares	422	1,209
Other accrued expenses	-	5
Total creditors	729	1,487

9 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrtn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrtn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

10 Portfolio Transaction Costs

	Purchases		Sales

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Equities	365,281	-	-	367,790	-	-
Collective Investment Schemes	-	2,981	-	-	4,831	-
Total investment assets	365,281	2,981	-	367,790	4,831	-

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024	2023
	£'000	£'000
Danish Krone	28,542	22,738
Euro	287,466	286,880
Norwegian Krone	4,339	4,057
Swedish Krona	15,115	12,855
Swiss Franc	34,963	50,188
Total	370,425	376,718

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £18,521,000 (2023: £18,836,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Notes to the Financial Statements

Continued

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £18,413,000 (2023: £18,631,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £1,265,000 (2023: £2,223,000).

Distribution Tables

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Europe ex UK Smaller Companies Fund

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in European smaller capitalisation equities (company shares).

Performance Target: To achieve the return of the MSCI Europe ex UK Small Cap Index, plus 3% per annum over rolling five year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of small-capitalisation companies listed, incorporated or domiciled in European countries, or companies that derive a significant proportion of their revenues or profits from European operations or have a significant proportion of their assets there.
- European countries includes the emerging markets of Europe, but excludes the UK.
- Smaller capitalisation companies are defined as any stock included in the MSCI Europe ex UK Small Cap Index or, if not included within the index any stock having a market capitalisation smaller than that of the stock with the largest market capitalisation in such index.
- The fund may also invest in mid and larger capitalisation companies listed, incorporated or domiciled in European countries.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and stock level.
- Their primary focus is on stock selection using the management team's quality, growth and momentum approach. It aims to identify companies that exhibit a range of high quality characteristics, operate in growing markets and display positive business momentum.
- In seeking to achieve the Performance Target, the MSCI Europe ex UK Small Cap Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking

error") between the returns of the fund and the index is not ordinarily expected to exceed 9%. Due to the active nature of the investment process, the fund's performance profile may deviate significantly from that of the MSCI Europe ex UK Small Cap Index.

Please note: The fund's ability to buy and sell small and mid-capitalisation shares and the associated costs can be affected during periods of market stress. In certain circumstances investors in the fund may not be able to sell their investment when they want to.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned -1.61% (Source: FactSet, Institutional Accumulation, net of fees). This compared with a return of 2.48% for our performance target (Source: FactSet, the EMIX Smaller European Companies ex UK Index).

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdn**. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. To the extent permitted by applicable law, none of the Owner, abrdn** or any other third party (including any third party involved in providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

**abrdn means the relevant member of abrdn group, being abrdn plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

abrdn Europe ex UK Smaller Companies Fund

Continued

The fund underperformed the performance target over the period. From a stock-specific perspective, the main detractors included Switzerland-listed industrial company Komax which dropped back after a discouraging trading update and margin guidance for the year which disappointed some analysts. We still believe the long-term structural growth story remains intact, but we reduced our holding in the stock. France's Teleperformance was hit by a combination of concerns including weaker revenue growth guidance, the threat posed by artificial intelligence technology and the announcement of the significant acquisition of customer experience management firm Majorel. We subsequently sold the fund's position. Our holding in Italian banking platform, Fineco, was affected by the negative sentiment towards the banking sector early in the period although it later recovered some of the lost ground after releasing interim results that were ahead of expectations. Corbion, the Netherlands-listed producer of bio-based inputs and ingredients, also detracted as it faced several challenges, including cost headwinds and a slower-than-expected recovery in certain areas. We subsequently sold our holding.

On the plus side, the holding in French LNG membrane technology company, GTT, was the top performer over the period following a positive set of results which were ahead of expectations and a major new contract. Italian luxury brand Brunello Cucinelli was also relatively strong thanks to better-than-expected results and reassuring guidance. Denmark-listed financial services business, Simcorp, was another among the top contributors after it received a takeover bid from Deutsche Boerse at a 39% premium and Germany-listed software group Nemetschek made gains following the news that the company's move from a license to a subscription-based model had gone better than expected. Shares in Swedish industrial compounder Addtech performed well after its third quarter results highlighted strong margin and top-line performance in a difficult market environment.

Market Review

Continental Europe's stock markets, as measured by the FTSE World Europe ex UK Index, rose over the 12-month period in sterling terms as inflation continued to fall and hopes grew that central banks would soon start to cut interest rates. They underperformed the markets in the US and Japan, but did better than emerging markets, especially China. Early in the period, the collapse of US-based Silicon Valley Bank led to some volatility as investors questioned the health of the global banking system. In Europe, contagion culminated in the takeover of Credit Suisse by UBS, but markets subsequently recovered much of their prior losses as confidence was restored.

In the second half of 2023 the mood turned more positive despite ongoing macroeconomic concerns. Share prices were bolstered by hopes that the global economy could achieve a 'soft landing' following the period of monetary tightening, although the outbreak of conflict between Palestine and Israel in October led to increases in commodity prices as well as disruption of vital international shipping routes in the Red Sea. The prospect of cuts to interest rates in 2024 as well as advances in artificial intelligence (AI) boosted shares prices across the technology sector, while gains in European markets were also supported by strength in financial stocks as a result of rising rates.

In economic news, the rate of inflation in the eurozone fell consistently throughout the period and stood at 2.6% in February 2024. The European Central Bank (ECB) raised interest rates on six occasions between February and September, moving the deposit rate to 4.5%, a multi-decade high. Investors expected the ECB to begin to reduce rates in the first half of 2024, although ECB president Christine Lagarde warned that rates would only be cut once inflation was clearly under control. Growth in the euro area was sluggish over the period, with weakness in the German economy in particular.

Portfolio Activity and Review

We established a new position in Swedish outdoor accessories business Thule. It is the global leader in the manufacture of bike carriers for vehicles and associated items. The group boasts an excellent history of growth and innovation and has a strong roster of new products ready to launch.

We also topped up some of our existing holdings, including that in Nemetschek due to our increased confidence in its progress as it transitions from a license-based business model to a subscription-based model. We increased our holding in German oven manufacturer, Rational, following a positive company meeting that highlighted the launch of a new product. This has the potential to be a material driver of growth and would broaden out the addressable customer base significantly.

On the other hand, we reduced the holding in Komax, as mentioned above, and fully exited our positions in Danish software provider, Simcorp, following the takeover by Deutsche Boerse. We also exited our holdings in both Teleperformance and Corbion, as mentioned above.

Portfolio Outlook and Strategy

There is increasing evidence that previous interest rate increases are resulting in a slowdown in economies and, with that, a fall in inflation. This is encouraging investors to discount the fact that we are near the end of the rate hiking cycle, which is positive for risk assets such as equities. We expect quality and growth to do relatively well in this environment as the market starts to differentiate more between companies with strong balance-sheets and those weaker companies that will need to either refinance at higher rates or ask shareholders for more equity.

We believe that the market will continue to move to more of a 'micro' focus, which should favour bottom-up stock picking that is focused on quality names. We strongly favour the small-cap asset class, which has been shown to outperform in periods of market recovery.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	116	143
Total taxation (note 4b)	116	143

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: greater than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	689	679
Corporation tax at 20% (2023: 20%)	138	136
Effects of:		
Revenue not subject to taxation	(206)	(219)
Overseas taxes	116	143
Excess allowable expenses	68	83
Total tax charge for year (note 4a)	116	143

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £734,000 (2023: £666,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	550	594
Final distribution	2	2
	552	596
Add: Income deducted on cancellation of shares	61	39
Deduct: Income received on issue of shares	(9)	(28)
Total distributions for the year	604	607
Movement between net revenue and distributions		
Net revenue after taxation	573	536
Shortfall transfer from capital to revenue	31	71
Total distributions for the year	604	607

Details of the distribution per share are set out in this fund's distribution tables.

Notes to the Financial Statements

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	1	5
Overseas withholding tax recoverable	162	147
Total debtors	163	152

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	5	2
	5	2
abrdrn Liquidity Fund (Lux) – Euro Fund Z3 Inc*	68	1,967
abrdrn Liquidity Fund (Lux) – Sterling Fund Z1 Inc*	121	635
Net liquidity	194	2,604

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	33	37
Accrued expenses payable to the Depositary or associates of the Depositary	1	3
Amounts payable to the ACD for cancellation of shares	76	118
Other accrued expenses	-	5
Total creditors	110	163

9 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdrn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdrn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

Notes to the Financial Statements

Continued

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Danish Krone	8	832
Euro	29,598	41,668
Norwegian Krone	1,241	1,269
Swedish Krona	3,803	4,836
Swiss Franc	2,953	5,158
Total	37,603	53,763

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £1,880,000 (2023: £2,688,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £1,878,000 (2023: £2,712,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £110,000 (2023: £163,000).

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Global Balanced Growth Fund

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in a diversified portfolio of assets.

Performance Target: To exceed the return of the following basket of assets per annum over rolling five year periods (after charges). This basket of assets represents the fund's long term strategic asset allocation. This basket is composed of global equities (70%) and global bonds (25%) and money markets (5%) ("basket of assets"). The underlying indices are the following: 20% FTSE All-Share Index, 26% S&P 500, 9% MSCI Europe ex UK, 8% MSCI Japan, 4% MSCI AC Asia Pacific Ex Japan, 3% MSCI Global Emerging Markets, 6% JP Morgan GBI Global Index, 4% FTSE Actuaries UK Conventional Gilts All Stocks, 6% Markit iBoxx Sterling Collateralized & Corporates Index, 5% Bloomberg Global High Yield Corporate Index 2% Issuer Cap, 4% JP Morgan EMBI Global Diversified Index, 5% SONIA.

The performance target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the performance target.

Performance Comparator: IA Mixed Investment 40%-85% Shares sector average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the indices/sector.

Investment Policy

Portfolio Securities:

- The fund will invest at least 70% in global equities, corporate investment grade bonds and government bonds issued anywhere in the world (including in emerging markets) either directly or indirectly.
- The fund may hold other securities (e.g. investment trusts, sub-investment grade (high yield) bonds, supranational and other types of bonds, commodities and listed real estate) issued anywhere in the world (including in emerging markets) either directly or indirectly.
- The fund may invest up to 85% of its assets in global equities.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process:

- The management team use their discretion (active management) to select individual holdings depending on their growth prospects and/or creditworthiness relative to market expectations, given future economic and business conditions.
- Asset allocation is informed by reference to the basket of assets aligned to the fund's objective and considered representative of the expected risk profile of typical funds in the sector. In addition, short term proportions ("tactical asset allocations") in each asset class may be adjusted at any time relative to the basket of assets with the aim of improving returns.
- The fund will be subject to constraints which are intended to manage risk captured within the portfolio securities. The constraints may vary over time, and due to the active nature of the management process the fund's performance profile may deviate significantly from that of the average fund of the IA's Mixed Investment 40%-85% Shares sector average.

Derivatives and Techniques:

- The fund will make routine use of derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to express short term views reflecting expected changes in interest rates, companies share prices, inflation, currencies or creditworthiness of corporations or governments.
- The fund may also invest in other funds which may use derivatives extensively although these investments shall be in line with fund's overall risk profile.

Performance Review

Over the 12-month period under review, the fund returned 6.73% (Source: Morningstar Direct, Institutional Accumulation shares). This compared to a return of 6.26% for our performance target (Source: Morningstar Direct, IA Mixed Investment 40-85% Shares Sector Average).

Source: FactSet, Basis: total return, published NAV to NAV, net of annual charges, UK net income reinvested, GBP.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

Equity portfolios

Within the equity portfolio, in the UK, having an underweight exposure to British American Tobacco was the largest contributor to performance after the stock lagged on weak US combustibles prompting an eye-watering £27 billion write-down of the carrying value of the division. Holding Relx also aided relative performance after the information technology company reported continued momentum in revenues and profits, with a further boost as a perceived beneficiary of artificial intelligence (AI) that helped push its valuation multiple higher. In addition, Intermediate Capital performed strongly on the back of a more benign macro-economic outlook and continued success at raising fresh assets to manage.

Conversely, in the UK, not owning Rolls-Royce was costly as its share performed well after a long period in the doldrums. The company reported significant growth in revenue, profit, and cash-flow generation, and raised its medium-term targets. Watches of Switzerland also lagged after reporting a profit warning attributed to a slowdown in UK consumer demand for luxury watches and jewellery. Finally, Prudential saw its share price give back the significant price rally that occurred just prior to the start of this period. The company reported encouraging results, including a pick-up in new business activity in Hong Kong, one of its key markets, but this was overshadowed by investor appetite souring on China exposure.

Moving on to the US, the top contributor was Amazon. The company benefitted from the reacceleration of growth in the cloud computing business (AWS), in addition to surprising positively on the extent of margin improvement in its US retail operations. Similarly, Microsoft also helped the fund's relative return as the stock benefitted from investor confidence that the cloud computing business (Azure) is now re-accelerating after a period of slower growth at the start of 2023. Holding Marvell was a positive

as well. Despite a near term slowdown in some of its chips for telecoms and datacenter applications, the company benefitted from the growth in its products associated with AI deployment (i.e., mainly chips for handling the large data flows needed for AI computing).

On the other hand, within US equities, the largest negative contribution from the fund's holdings was SVB Financial, whose shares were suspended after a failed capital raising and subsequent run deposits in the following 24 hours. Air Products and Chemicals: also detracted from relative returns. The market reacted negatively to announcements of cost over-runs on some of the large hydrogen production projects by the company. Finally, Charles Schwab stock suffered amid investor concern that declining deposits would put pressure on net interest margin (NIM).

In Europe, Novo Nordisk was the leading equity contributor. The company raised its guidance multiple times during 2023 driven by continued strength in its GLP-1 franchise for treating diabetes and obesity, and issued 2024 guidance for 21-29% operating profit growth – particularly impressive given Novo Nordisk is Europe's largest company. We have owned Novo Nordisk since 2009 as one of our consistently largest active bets. Holding ASML was also beneficial as its shares rallied hard in the last few months following the company reporting extremely strong orders which further underpinned the company's 2025 guidance, leading to earnings upgrades for the world's dominant provider of EUV tools, a technology crucial to delivering further progress in the semiconductor industry. ASML has been one of the fund's top holdings for the past 5 years and the exposure proved again beneficial. In addition, shares of Partners Group were boosted by investor views that we have reached peak US interest rates.

In contrast, the leading detractor from relative returns was Pernod Ricard. The company's shares weakened after said it announced that it expected a more challenging near term environment in its key markets, US and China. In the US, there is ongoing retailer inventory destocking owing to higher than usual inventory levels due to previous supply constraints, and in China, there is a softening of consumer sentiment driven by a more uncertain monetary environment. However, we believe these issues to be shorter term, and do not think that the company's attractive medium-term prospects are being fully reflected in the share price. Another leading detractor was Ørsted as the company issued an impairment on several US offshore wind projects planned for completion in 2025-26, due to a combination of higher assumed costs, lower assumed tax credits, and higher interest rates which all feed to a lower appraised asset value. Shares underperformed as the market questioned Ørsted's

abrdn Global Balanced Growth Fund

Continued

credibility in the US, and the wider value of its development franchise; however, we believe that the reaction has been overdone and the valuation is attractive, only pricing in current assets in operation and not ascribing any value either to assets under construction or to future pipeline projects, and more reflects the current negative market sentiment towards the offshore wind industry and long duration assets. In addition, holding Edenred was a negative in relative terms as an investigation into their Italian business relating to a 2019 tender caused the shares to underperform. However, the potential financial penalties related to the probe are likely immaterial with the company also continuing to see very strong top line momentum from its two main business units and we remain long-term holders.

Government bond portfolio

Given the volatility in early 2023, the fund started March 2023 with a flexible approach to duration management. Positive strategies included a US curve steepener – long 2s vs 10s – where the fund held the trade at the beginning of the period and took profits in March, and then entered the trade again in June. The other strategy that contributed to relative returns was the long cross-market Australia position, while Australia continued to be our favoured long. We held the position versus the UK at the start of the period and then re-entered versus the US at the end of the period.

On the other hand, the long UK Gilts versus German Bunds strategy detracted from returns. The surprise stickiness of UK inflation in May and June saw UK Gilts materially underperform in cross-market pairing.

A further contributor of performance came from the cross market positioning. In the early months of the period, the fund was long Australia versus US and this strategy worked well, while the fund took profits in September and October. Later in December, the fund started to oppose the under-performance of 30-year UK Gilts versus German Bunds, a strategy that worked well into year end, but acted as a small drag on performance in January.

Portfolio Activity and Review

Equity portfolios

In the UK, the portfolio activity key changes included introducing new positions in Serco and Balfour Beatty, and increasing the exposure to Sirius Real Estate. Outsourcing business Serco is a turnaround story some years in the making, where we see it as now well placed to return to growth at higher margins and where the improved opportunity is not reflected in the share price. Balfour Beatty is a construction firm with exposure to favourable end markets including power, utility, and transport

infrastructure, where the multi-year opportunity is not recognised at the current valuation. Lastly, we took advantage of an equity raise to increase the position in Sirius Real Estate. An operator and owner of industrial, storage, and office assets in the UK and Germany, its direct-to-consumer marketing and operating capability allied with scale allows it to generate an attractive return on capital, and even allowing for recently increased interest rates.

Funding for these transactions came from a mix of sales including the exits of Dechra, Auto Trader, and British American Tobacco. Veterinary pharmaceuticals business Dechra agreed to a £4.5 billion buyout of the business by private equity. Auto Trader, an owner of an online marketplace to support the sale of cars, was sold after a strong run in both earnings and valuation left the risk-reward opportunity more evenly balanced, so we recycled the position into new opportunities. Lastly, we exited the position in British American Tobacco due to concerns over the sustainability of its cash-flows.

Turning to the US, the fund purchased Eli Lilly as we believe that the growth prospects for GLP-1 anti-obesity drugs are better than the market expects. We also entered Procter and Gamble as we see the company continuing to benefit from its investment in new products and improved marketing made since the pandemic. Finally, the fund purchased American Express as we believe that the company will be able to continue to grow new customers and fee revenues as it rolls out new credit and charge card products.

Conversely, we exited Bank of America since we became concerned that investors will likely take a more negative view on the outlook for NIM as US interest rates peak. Another exit was Emerson Electric. We see risks to top line growth in a weaker economic environment, and have questions marks over management's approach to capital allocation. Finally, we also sold Horizon Therapeutics after the company was bid for over the review period.

In Europe, we topped up Adyen, reacting to negative share price moves which suggested that growth fades extremely aggressively and that the business was structurally less profitable. We believed that these fears were overdone and were now more than priced in the shares. In addition, we took advantage of an attractive valuation to introduce DSM-Firmenich, an improving quality ingredients company where deal synergies from their merger with prestige fine fragrances leader Firmenich, combined with self-help within their vitamins business, were not yet being priced in by the market.

Conversely, we exited our lowest conviction holding Prosus due to incremental concerns about capital allocation and lack of management alignment.

abrdn Global Balanced Growth Fund

Continued

Government bond portfolio

UK forward-looking data started to turn as the aggressive monetary policy tightening enacted by the Bank of England (BoE) since December 2021 was finally having an impact. The difficulty for the BoE was that the more backward-looking data was still looking uncomfortably high. The key data sets watched by the BoE are private sector wages and services inflation. For the BoE to stop hiking they would need to see these two data sets start to recede. As a result of this development, the fund went long UK duration. Gilts underperformed dramatically over the summer months due to the narrative that UK inflation was out of control. We believed that narrative was incorrect and were therefore happy to hold UK duration.

As the fund headed into the third quarter, the two key positions for the fund were long duration and steeper curves. The fund went into the period holding a long duration bias, and this worked against it initially. As yields continued to rise in October, we felt the move was overdone and therefore started to increase position sizing. The fund held long positions across Germany, US and UK in both the 5 and 10-year part of the curve. In November, the fund added a very front-end position in the UK by buying December 2025 Sonia futures. As yields went higher in November and December, the fund started to take profits and ended the calendar year neutral. In January, the fund added a short duration position, on the view that markets had gone too far and early January supply would weigh on yields. Yields indeed went higher and the fund then took profits. Finally, the fund finished the period by adding back a long duration position in US treasuries.

The other key theme for the fund over the period was curve steepening. In August and September, the fund held US and UK 2 vs 10s steepeners. We then took profits on the UK and US curve position. The fund went back into US curve steepeners in November, subsequently taking profits in early January.

As we headed into the new calendar year, we felt that global yields had moved too far and we therefore moved tactically short. Meanwhile, yields moved higher and the fund took profits. We now feel that yields are largely rangebound, and where we believe value lies is in the divergence between Europe and UK versus the US. We are therefore positioned long UK and Europe versus the US.

Finally, the fund continued to be active in Gilt relative strategies.

Portfolio Outlook and Strategy

Global markets are currently navigating a complex landscape. Unpredictable economic factors, geopolitical tensions as well as mixed inflation and growth signals create a challenging environment for both equity and bond markets. Yet, there is optimism for a soft landing, meaning a slowdown in economic growth without a technical recession, particularly in the US, as the interest rate tightening cycle concludes. In global equities, we expect that markets will pay attention to the second-quarter reporting season to see if earnings are holding up despite cost pressures and economic uncertainties as global growth potentially slows. Meanwhile, central banks in developed markets are expected to start decreasing interest rates. Therefore, we will continue to exercise due diligence to manage volatility.

Within fixed income, recent conditions have been frustrating for investment managers. Economic data continues to surprise to the upside and economic forecasts have seen significant revision. Accordingly, holding any longer-term strategic trades has proven difficult. Prices in government bond markets have been particularly volatile. There have been many false dawns, for both bond bulls and bears. It is now a question of when – not if – the BoE cuts rates. Elsewhere, the first major political event of the year was the budget, which took place on 6 March 2024. On the political front, the UK will go to the polls this year – Prime Minister Sunak was eager to talk down the chances of a Spring election. With the widening chasm between Labour and the Tories in the polls, Sunak will need as much time as possible if he is to salvage a (very unlikely) win. Beyond domestic factors, several global events could significantly impact government bond markets. Geopolitical tensions, particularly those that disrupt energy supplies or global trade, can trigger risk aversion and flight-to-safety behaviour. This could potentially lead investors to seek the relative stability of government bonds, driving prices up and yields down. Conversely, a global economic slowdown could dampen inflation expectations, causing bond yields to decline. Additionally, policy decisions by major central banks around the world, especially the US Federal Reserve, can influence global interest rates and, by extension, impact the demand for UK Gilts.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk			
←					→		
1	2	3	4	5	6	7	

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Emerging Markets Risk** – The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect / Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- **Credit Risk** – The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- **Interest Rate Risk** – The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- **High Yield Credit Risk** – The fund invests in high yield bonds which typically carry a greater risk of default than those with lower yields.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks and may lead to substantial loss and increased volatility in adverse market conditions. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	5,067	5,100
Dealing charge	10	10
General administration charge	50	39
	5,127	5,149
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Depositary's fees	-	(4)
Safe custody fees	23	24
	23	20
Other:		
Professional fees	-	3
Subsidised fees*	(46)	(53)
	(46)	(50)
Total expenses	5,104	5,119

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £14,700 (2023: £13,500).

* Subsidised fees are paid by the ACD.

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	263	341
Total taxation (note 4b)	263	341

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	10,675	7,821
Corporation tax at 20% (2023: 20%)	2,135	1,564
Effects of:		
Revenue not subject to taxation	(1,739)	(1,827)
Overseas taxes	263	341

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
Overseas tax expensed	(3)	(2)
Excess allowable expenses	(393)	263
Total tax charge for year (note 4a)	263	341

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £6,551,000 (2023: £6,944,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions

	2024 £'000	2023 £'000
Interim distribution	6,710	4,191
Final distribution	3,694	3,186
	10,404	7,377
Add: Income deducted on cancellation of shares	245	132
Deduct: Income received on issue of shares	(237)	(29)
Total distributions for the year	10,412	7,480

Details of the distribution per share are set out in this fund's distribution tables.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	1,416	1,296
Amounts receivable from the ACD for the issue of shares	19	3
Expenses reimbursement receivable from the ACD	46	53
Overseas withholding tax recoverable	372	421
Sales awaiting settlement	-	1,154
United Kingdom income tax recoverable	3	-
Total debtors	1,856	2,927

Notes to the Financial Statements

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	10	56
Cash at broker	82	7,911
Deposits with original maturity of less than 3 months	14,185	55,205
	14,277	63,172
Bank overdrafts		
Collateral cash pledged by counterparties [^]	-	(11)
	-	(11)
Net liquidity	14,277	63,161

[^] This reflects cash the fund has taken receipt of to support in the money derivative positions and mitigate counterparty risk to the fund.

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	480	392
Accrued expenses payable to the Depositary or associates of the Depositary	7	12
Amounts payable to the ACD for cancellation of shares	956	589
Other accrued expenses	-	6
Purchases awaiting settlement	917	1,288
Total creditors	2,360	2,287

9 Related Party Transactions

abrdn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

Amounts receivable from abrdn Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 6 and 8.

The management fee rebate received by the fund is from investments in other funds managed by abrdn plc. During the year £347,000 (2023: £494,000) has been recognised and is included in the total rebate amounts in notes 1 and 2. The balance due to the fund at the year end in respect of this amounted to £Nil (2023: £Nil) and is included in the Management fee rebate receivable amount disclosed in note 6.

Notes to the Financial Statements

Continued

10 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds, collective investment schemes and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000 Level 1	2024 £'000 Level 2	2024 £'000 Level 3*	2023 £'000 Level 1	2023 £'000 Level 2	2023 £'000 Level 3*

* Savannah Energy PLC which is part of the fund's investment portfolio is considered as level 3 investment. The security was suspended on 13 December 2022 due to challenges to complete the acquisition of an energy business in South Sudan, the ACD continues to value the investment based on the last trading price without any adjustment and as such there is estimation uncertainty involved in the valuation of the security. Given the performance of the underlying business and the general performance of oil and gas sector, the ACD consider valuation basis as appropriate, however continues to monitor the valuation including underlying performance of the Company.

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign	Net foreign
	currency	currency
	exposure	exposure
	2024	2023
	£'000	£'000
Australian Dollar	-	(38)
Canadian Dollar	(1)	960
Danish Krone	5,581	7,401
Euro	35,099	47,341
Japanese Yen	-	15,221
Norwegian Krone	1,272	2,909
Swedish Krona	1,709	5,495
Swiss Franc	6,114	1,247
US Dollar	280,767	127,116
Total	330,541	207,652

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £16,527,000 (2023: £10,383,000).

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

Notes to the Financial Statements

Continued

The interest rate risk profile of the fund's investments at the year end consists of:

2024	Floating rate financial assets/ (liabilities) £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
Currency				
UK Sterling	14,281	49,109	228,901	292,291
Canadian Dollar	-	-	(1)	(1)

US Dollar	163	448	280,156	280,767
Total	14,435	49,905	558,492	622,832

2023	Floating rate financial assets/ (liabilities) £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
Currency				
UK Sterling	63,263	57,146	189,919	310,326
Australian Dollar	(1)	-	(37)	(38)
Canadian Dollar	-	-	960	960
Danish Krone	-	-	7,401	7,401
Euro	-	177	47,164	47,341
Japanese Yen	-	-	15,221	15,221
Norwegian Krone	-	-	2,909	2,909
Swedish Krona	-	-	5,495	5,495
Swiss Franc	-	-	1,247	1,247
US Dollar	129	624	126,363	127,116
Total	63,391	57,947	396,640	517,978

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

Notes to the Financial Statements

Continued

VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	4.98%	6.70%	6.26%
2023	Minimum	Maximum	Average
VaR 99% 1 Month	6.53%	8.02%	7.03%

At the year end date, there was a 1% chance of the portfolio value falling (or rising) more than 6.39%, £38,946,000 (2023: 6.76%, £30,705,000) in a one month period.

This calculation is generally determined by the use of an industry recognised medium term risk model, typically based on 3–5 year history. The method assumes normal market conditions and that the portfolio remains unchanged.

Counterparty risk

Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value £'000	Percentage of total net assets %
Investment grade securities	49,234	7.89
Below investment grade securities	829	0.15
Unrated securities	-	-
Total value of securities	50,063	8.04
2023	Market value £'000	Percentage of total net assets %
Investment grade securities	57,217	11.03
Below investment grade securities	877	0.17
Unrated securities	83	0.02
Total value of securities	58,177	11.22

Investment grade information used in the above table is based on credit ratings issued by market vendors.

Notes to the Financial Statements

Continued

Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
Leveraged instruments				
Forward currency contracts	4	3,145	16,289	(789)
Futures	163	8,579	156,631	(1,268)
Total market exposure	167	11,724	172,920	(2,057)

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Broker or exchange exposure					
Goldman Sachs	163	82	-	245	0.04
	163	82	-	245	0.04

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Broker or exchange exposure					
Goldman Sachs	(1,268)	7,910	-	6,642	1.28
	(1,268)	7,910	-	6,642	1.28

Notes to the Financial Statements

Continued

Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock £'000	
UBS	4	-	-	4
Total	4	-	-	4

The Prospectus outlines allowable collateral. There have been no changes in the year.

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £1,000 (2023: £Nil) and expenses paid to the lending agent, Citibank, are £Nil (2023: £Nil).

2023 Counterparties	Swaps £'000	Forwards £'000	Collateral (held)/pledged		Net exposure £'000
			Cash £'000	Stock* £'000	
Bank of America Merrill Lynch	-	(796)	-	805	9
BNP Paribas	-	4	-	-	4
Citigroup	-	(1)	-	-	(1)
Morgan Stanley	-	(1)	(10)	-	(11)
Societe Generale	-	5	-	-	5
Total	-	(789)	(10)	805	6

* contains the required disclosures for Concentration Data within Securities Financing Transaction Regulation (SFTR) Disclosures.

Collateral positions for Swaps is aggregated, not at individual trade level.

Issuers 2023	Type	Collateral Stock £'000
United Kingdom (Gov't of)	Bond	805
		805

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £2,477,000 (2023: £4,987,000).

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital.

Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Global Focused Equity Fund

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in global equities (company shares).

Performance Target: To achieve the return of the MSCI AC World Index plus 3% per annum over rolling five year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: The IA's Global Equity sector.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed on global stock exchanges.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a concentrated asset mix at country, sector and stock level.
- The fund looks to deliver a concentrated portfolio of the highest conviction investment ideas of the management team in companies of all sizes.
- In seeking to achieve the Performance Target, the MSCI AC World Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 10%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the MSCI AC World Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned 19.77% (Source: Morningstar Direct, Institutional Accumulation, net of fees). This compared to a return of 21.50% for our performance target (Source: FactSet, MSCI AC World Net Total Return Index +3%).

Source: MSCI. The MSCI information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. None of the MSCI information is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Historical data and analysis should not be taken as an indication or guarantee of any future performance analysis forecast or prediction. The MSCI information is provided on an 'as is' basis and the user of this information assumes the entire risk of any use made of this information. MSCI, each of its affiliates and each other person involved in or related to compiling, computing or creating any MSCI information (collectively, the 'MSCI Parties') expressly disclaims all warranties (including without limitation, any warranties of originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose) with respect to this information. Without limiting any of the foregoing, in no event shall any MSCI Party have any liability for any direct, indirect, special, incidental, punitive, consequential (including, without limitation, lost profits) or any other damages (www.msci.com).

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

From a stock-specific perspective, not owning NVIDIA weighed on relative returns as its shares performed well. The company is seeing increased data centre sales, while Google has chosen to use NVIDIA's L4 inference chips for running its artificial intelligence (AI) models. Charles Schwab's share price fell significantly in the aftermath of Silicon Valley Bank's failure. The banking industry experienced an indiscriminate sell-off in March 2023, and Charles Schwab came under pressure due to the debate around its balance sheet financing. Tencent Holdings' shares saw a significant sell-off in December on the release of a draft gaming regulation paper, which, among other measures, proposed a cap on in-game charges that may raise uncertainties around the company's monetisation abilities going forward. Diageo shares fell as the company issued a profit warning after a steep slowdown in its Latin America & Caribbean division.

By contrast, Vertiv Holdings, a supplier of components for datacentres, added to relative returns as the adoption of AI could provide a tailwind for its thermal offering, increasing investor confidence in the company's growth prospects. Amazon.com shares performed well as investors focused on the company's cost-cutting upside and the momentum in Amazon Web Services. Microsoft outperformed the market as it announced strong results that showed strength in AI and robust growth from the other major segments of the company. Emerson Electric reported good results and upgraded guidance as the energy sector tailwind continued to support near-term earnings.

abrdn Global Focused Equity Fund

Continued

Market Review

Global stock markets rose strongly in sterling terms and even more notably in local-currency terms over the 12 months. The prospect of monetary tightening coming to an end, with potential rate cuts ahead in 2024, supported global equity markets as investor risk appetite improved.

After central banks in Western economies had raised interest rates faster and much further than previously anticipated to counter multi-decade-high inflation, inflationary pressures lessened in many countries over the course of the period. Meanwhile, global economic growth held up better than many investors expected, defying fears of a recession triggered by higher rates.

As US and eurozone inflation continued to trend down, investor hopes rose that an end to interest-rate rises could be in sight. However, the collapse of two regional US banks and the forced sale of Credit Suisse to rival UBS in March evoked fears of a banking crisis. Despite an initial sell-off, stock markets recovered. After more market volatility in April and May, equities performed strongly over June and July due to news of a compromise agreement on the US debt ceiling and further encouraging inflation data. However, rhetoric from central banks continued to be hawkish. Equities generated negative returns in August, September and October on concerns that interest rates would stay higher for longer. However, equities then notably recovered towards the end of the period as reassuring inflation trends led to investors looking ahead to the prospect of rate cuts in 2024.

Portfolio Activity and Review

We sold our position in BAWAG Group as we reduced our exposure to smaller, less liquid names on the back of several prominent bank failures in March 2023.

We divested our small position in Meituan, which we received after Tencent spun off its stake in the company.

We also disposed of our holding in RingCentral, the US-listed software company. With the shares having underperformed over the past two years, we lost confidence in management's ability to jump-start growth. This was after yet another disappointing earnings release, with revenue guidance for 2024 coming in below consensus expectations.

Portfolio Outlook and Strategy

Macroeconomic factors remain as unpredictable as ever, with investors scrutinising the latest data and trying to predict when a pause or pivot in the direction of interest rates might occur. Geopolitical pressures remain elevated throughout the world. Recessionary and inflationary concerns persist as global growth slows. However, investors seem to be pricing in the likelihood of a soft landing for the US economy as the tightening cycle nears its end. Our main focus remains at the stock level, ensuring the portfolio is well diversified on both a regional and sectoral basis, and robust enough to preserve capital in periods of market weakness. We aim to have exposure to higher-quality businesses with the financial strength to withstand volatility and that are exposed to strong structural drivers for long-term growth.

DM Sustainable and Thematic Equity Team

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator. The risk and reward indicator changed from 5 to 6 on 14 April 2023.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Concentration Risk** – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Emerging Markets Risk** – The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect/Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Prices			
Highest share price	188.2	165.7	177.7
Lowest share price	151.1	137.6	145.9

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

1 Net Capital Gains

	2024 £'000	2023 £'000
Non-derivative securities	10,278	2,313
Other gains	121	59
Transaction charges	(4)	(4)
Net capital gains	10,395	2,368

2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	49	34
Overseas dividends	870	1,253
UK dividends	108	114
Total revenue	1,027	1,401

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	456	605
Dealing charge	9	9
General administration charge	40	61
	505	675
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fees	4	6
	4	6
Other:		
Professional fees	-	3
	-	3
Total expenses	509	684

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £11,100 (2023: £10,200).

Notes to the Financial Statements

Continued

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	114	167
Total taxation (note 4b)	114	167

(b) Factors affecting total tax charge for the year

The tax assessed for the year is greater than (2023: greater than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	518	714
Corporation tax at 20% (2023: 20%)	103	143
Effects of:		
Revenue not subject to taxation	(195)	(273)
Overseas taxes	114	167
Excess allowable expenses	92	130
Total tax charge for year (note 4a)	114	167

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £2,596,000 (2023: £2,504,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Distribution	168	513
Add: Income deducted on cancellation of shares	253	51
Deduct: Income received on issue of shares	(17)	(14)
Total distributions for the year	404	550
Movement between net revenue and distributions		
Net revenue after taxation	404	547
Shortfall transfer from capital to revenue	-	3
Total distributions for the year	404	550

Details of the distribution per share are set out in this fund's distribution table.

Notes to the Financial Statements

Continued

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	59	109
Amounts receivable from the ACD for the issue of shares	4	20
Overseas withholding tax recoverable	103	74
Total debtors	166	203

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	7	28
	7	28
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	1,892	1,513
Net liquidity	1,899	1,541

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	40	50
Accrued expenses payable to the Depositary or associates of the Depositary	1	2
Amounts payable to the ACD for cancellation of shares	58	77
Other accrued expenses	-	5
Total creditors	99	134

9 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdrn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdrn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Danish Krone	-	15
Euro	7,742	18,130
Hong Kong Dollar	1,017	2,852
Japanese Yen	1,599	3,375
Taiwan Dollar	992	1,698
US Dollar	29,160	52,480
Total	40,510	78,550

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £2,026,000 (2023: £3,927,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £2,248,000 (2023: £4,318,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £99,000 (2023: £134,000).

Distribution Table

For the year ended 29 February 2024 (in pence per share)

Final dividend distribution

Group 1 – shares purchased prior to 1 March 2023

Group 2 – shares purchased between 1 March 2023 and 29 February 2024

	Revenue	Equalisation	Distribution paid 30/04/24	Distribution paid 28/04/23
Retail accumulation				
Group 1	0.0809	-	0.0809	-
Group 2	-	0.0809	0.0809	-
Retail income				
Group 1	0.0377	-	0.0377	-

Institutional accumulation				
Group 1	0.9976	-	0.9976	0.8419
Group 2	0.3689	0.6287	0.9976	0.8419
Institutional regulated accumulation				
Group 1	1.6180	-	1.6180	1.4049
Group 2	0.6844	0.9336	1.6180	1.4049
Institutional S accumulation				
Group 1	0.4890	-	0.4890	0.4154
Group 2	0.4890	-	0.4890	0.4154
Platform 1 accumulation				
Group 1	0.5806	-	0.5806	0.4814
Group 2	0.1046	0.4760	0.5806	0.4814
ZC accumulation				
Group 1	2.2817	-	2.2817	1.9973
Group 2	1.2145	1.0672	2.2817	1.9973

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Global Infrastructure Equity Fund (formerly abrdn Global Income Equity Fund)

For the year ended 29 February 2024

Investment Objective

To generate growth and income over the long term (5 years or more) by investing in infrastructure related equities (company shares).

Performance Target: To achieve a return in excess of the S&P Global Infrastructure Net Total Return Index over a rolling five year period (after charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 80% in equities and equity related securities of companies listed on global stock exchanges in infrastructure related sectors or listed companies that have a significant proportion of infrastructure assets or derive a significant proportion of their revenues or profits from infrastructure assets.
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix of infrastructure assets at country, sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on finding high quality companies at attractive valuations that can be held for the long term.
- In seeking to achieve the Performance Target, the S&P Global Infrastructure Net Total Return Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 9%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

The fund returned 2.98% over the review period (source: FactSet, Institutional Accumulation, net of fees). This compares with a target benchmark return of 2.59% (Source: FactSet, S&P Global Infrastructure Net Index). On 6 September 2023, the fund's mandate was changed, and it switched from the abrdn Global Income Equity Fund to the abrdn Global Infrastructure Equity Fund. In line with the switch from a dividend-focused fund to one with a thematic focus on infrastructure stocks, we made numerous changes to the portfolio's composition.

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdn**. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. To the extent permitted by applicable law, none of the Owner, abrdn** or any other third party (including any third party involved in providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

**abrdn means the relevant member of abrdn group, being abrdn plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund's mandate change took place on 6 September 2023, which was six days after the interim report. Therefore, for the purpose of this performance section,

abrdn Global Infrastructure Equity Fund (formerly abrdn Global Income Equity Fund)

Continued

we have focused on the top contributors and detractors from 6 September 2023. If you wish to review the companies that contributed or detracted from the fund's performance during its prior income mandate, please refer back to the interim report.

In terms of individual stock contributors, Vistra Corp. was the fund's top contributing name. The US independent power producer posted strong second-quarter earnings that were ahead of consensus expectations as power prices and output continued to be strong. Management also expressed confidence in achieving the initial guidance laid out for 2024 and 2025 as the company builds out its hedge book. International Container Terminal Services, a global port operator based in the Philippines, outperformed as data points from some of its key ports, such as Melbourne, Manila and Mexico, showed continued market-share gains. Ferrovial, the Spanish infrastructure company, was a new addition to the fund in line with its new mandate, and this proved beneficial to the fund's returns. Ferrovial has the longest concession duration of all its peers, so it sees an outsized impact from falling interest rates on its underlying asset valuations. Also, the company announced the sale of its Heathrow stake (for £2.4 billion) and an increase in tolls on the 407 Electronic Toll Route outside Toronto for the first time since COVID-19. Vinci, a Europe-based owner of infrastructure concessions and a construction company, reported strong earnings during the period. Traffic at its airports continues to improve as economies reopen post COVID-19 lockdowns. In addition, the company's construction order book is at a record high.

By contrast, NextEra Energy Partners, the US renewables operator, detracted as it announced that it would cut dividend growth guidance from 12-15% to 5-8% as a result of the higher cost of capital that has reduced its ability to acquire new renewable assets. Elsewhere, EDP Renováveis also lagged as the Portuguese renewable-energy company joined the rest of the green-energy companies in Europe that underperformed over the period, despite posting decent earnings. IHS Holding, the African tower operator, also underperformed. Sentiment continues to be negatively affected by the Nigerian currency devaluation and the disagreement that the company is having with MTN (its largest customer and shareholder). Algonquin Power & Utilities Corp., the US energy utility, sold off over the period as investors grew more negative about renewable returns and valuations, primarily driven by higher interest rates. Algonquin is in the process of selling off its renewable business, which is roughly 50% of the company, so the share price could be sensitive to any changes in the valuation that investors ascribe to renewables overall.

Market Review

Global stock markets rose strongly in sterling terms and even more notably in local-currency terms over the 12 months. The prospect of monetary tightening coming to an end, with potential rate cuts ahead in 2024, supported global equity markets as investor risk appetite improved.

After central banks in Western economies had raised interest rates faster and much further than previously anticipated to counter multi-decade-high inflation, inflationary pressures lessened in many countries over the period. Meanwhile, global economic growth held up better than many investors expected, defying fears of a recession triggered by higher rates.

As US and eurozone inflation continued to trend down, investor hopes rose that an end to interest-rate rises could be in sight. However, the collapse of two regional US banks and the forced sale of Credit Suisse to rival UBS in March evoked fears of a banking crisis. Despite an initial sell-off, stock markets recovered. After more market volatility in April and May, equities performed strongly over June and July due to news of a compromise agreement on the US debt ceiling and further encouraging inflation data. However, rhetoric from central banks continued to be hawkish. Equities generated negative returns in August, September and October on concerns that interest rates would stay higher for longer. However, equities then notably recovered towards the end of the period as reassuring inflation trends led to investors looking ahead to the prospect of rate cuts in 2024.

Portfolio Activity and Review

The portfolio trades highlighted in the previous interim report reflected trading decisions taken with the fund's income-focused mandate in mind. Subsequently, from 6 September 2023, when the fund adopted an infrastructure mandate, we sold numerous holdings that no longer aligned with the fund's thematic focus. Instead, we initiated many new holdings to align with the new mandate.

Since the transition, the main addition to the portfolio has been a holding in Japan Airport Terminal (JAT). The operational model in Japan is different from that of most other major airports: the government owns the runway, while JAT operates the terminals at Haneda, located just outside Tokyo. In general, we like the airport business due to passenger growth above GDP levels and the captive audience for retail and food, with modern airports increasingly resembling high-end shopping malls. Specifically for JAT, with international passenger volumes only recovering to 73% of pre-COVID-19 levels

abrdn Global Infrastructure Equity Fund (formerly abrdn Global Income Equity Fund)

Continued

(adjusted for the new slots issued in 2020) and a promising schedule of new flights – particularly from China – we see good momentum in passenger numbers and revenue growth. This is because international passengers are typically more valuable, as they tend to spend more. The shares have been weak over the past few months as investors have lost some patience with the China recovery story. However, the company continues to perform well operationally, despite the muted recovery in China passenger numbers.

Portfolio Outlook and Strategy

Macroeconomic factors remain as unpredictable as ever, with investors scrutinising the latest data and trying to predict when a pause or pivot in the direction of interest rates might occur. Geopolitical pressures remain elevated throughout the world. Recessionary and inflationary concerns persist as global growth slows. However, investors seem to be pricing in the likelihood of a soft landing for the US economy as the tightening cycle nears its end. Our main focus remains at the stock level, ensuring the portfolio is well diversified on both a regional and sectoral basis, and robust enough to preserve capital in periods of market weakness. We aim to have exposure to higher-quality businesses with the financial strength to withstand volatility and that are exposed to strong structural drivers for long-term growth.

Looking back on 2023, the overarching driver of the infrastructure group was the direction of interest rates and the impact this will have on returns within the energy transition. With inflation concerns abating and expectations of no further rate rises by the major central banks, we saw a relief rally of sorts across most infrastructure sectors into year end. The expectations from here are that we see a recovery in momentum for renewal projects, as well as a volume recovery across the industrial-focused transportation sectors, such as rail. With all this focus on more near-term trends, it's important not to lose sight of the long-term structural drivers that we see in infrastructure, namely the energy transition, digital acceleration and increasing urbanisation. One thing to watch in the second half of the year is the US election and what that means for government-sponsored initiatives like the Inflation Reduction Act.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Concentration Risk** – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Emerging Markets Risk** – The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect/Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Prices			
Highest share price	428.7	417.7	406.8
Lowest share price	370.7	366.3	341.7

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

	10	9
Other:		
Professional fees	-	5
	-	5
Total expenses	1,042	1,181

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £11,100 (2023: £10,200).

Notes to the Financial Statements

Continued

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	311	408
Total taxation (note 4b)	311	408

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: equal to) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	2,322	2,039
Corporation tax at 20% (2023: 20%)	464	408
Effects of:		
Revenue not subject to taxation	(624)	(625)
Overseas taxes	311	408
Overseas tax expensed	(6)	(2)
Excess allowable expenses	166	219
Total tax charge for year (note 4a)	311	408

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £3,152,000 (2023: £2,986,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
First interim distribution	1,086	868
Second interim distribution	245	258
Third interim distribution	392	269
Final distribution	300	263
	2,023	1,658
Add: Income deducted on cancellation of shares	32	26
Deduct: Income received on issue of shares	(3)	(9)
Total distributions for the year	2,052	1,675

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
Movement between net revenue and distributions		
Net revenue after taxation	2,011	1,631
Expenses charged to capital	41	44
Total distributions for the year	2,052	1,675

Expenses taken to capital include the ACD, Registration, Dealing expenses and the General administration charge. This policy only applies to the income classes.

Where deductions are made from capital these may limit the growth in value of the relevant fund. However, more income is generally available to distribute to shareholders.

Details of the distribution per share are set out in this fund's distribution tables.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	189	200
Amounts receivable from the ACD for the issue of shares	47	13
Overseas withholding tax recoverable	311	278
Sales awaiting settlement	-	3
Total debtors	547	494

7 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	81	91
Accrued expenses payable to the Depositary or associates of the Depositary	2	3
Amounts payable to the ACD for cancellation of shares	78	239
Other accrued expenses	-	5
Total creditors	161	338

8 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 7.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 7.

11 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Equities	99,132	-	-	115,444	-	-
Total investment assets	99,132	-	-	115,444	-	-

12 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Notes to the Financial Statements

Continued

Currency	Net foreign currency exposure	Net foreign currency
	2024 £'000	2023 £'000
Australian Dollar	1,211	-
Brazilian Real	4,763	-
Canadian Dollar	4,097	1,127
Danish Krone	40	2,373
Euro	29,052	18,137
Hong Kong Dollar	1,198	1,970
Indonesian Rupiah	750	-
Japanese Yen	1,030	5,256
Malaysian Ringgit	2,136	-
Mexican Peso	3,270	-
Norwegian Krone	16	2,461
Philippines Peso	2,413	-
Singapore Dollar	-	22
South Korean Won	-	3,319
Swedish Krona	-	4,133
Swiss Franc	-	4,840
Taiwan Dollar	-	3,287
US Dollar	42,689	60,080
Total	92,665	107,005

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £4,633,000 (2023: £5,350,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £4,957,000 (2023: £5,772,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Notes to the Financial Statements

Continued

Bilateral agreements

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £5,000 (2023: £Nil) and expenses paid to the lending agent, Citibank, are £1,000 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £185,000 (2023: £359,000).

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Global Smaller Companies Fund

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in Global small-capitalisation equities (company shares).

Performance Target: To achieve the return of the MSCI AC World Small Cap Index, plus 3% per annum (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA Global Equity Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in small-capitalisation equities and equity related securities of companies listed on global stock exchanges.
- Small capitalisation companies are defined as any stock included in the MSCI AC World Small Cap Index or, if not included within the index, any stock having a market capitalisation smaller than that of the stock with the largest market capitalisation in such index.
- The fund may also invest in mid and larger capitalisation companies listed on global stock exchanges.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and stock level.
- Their primary focus is on stock selection using the management team's quality, growth and momentum approach. It aims to identify companies that exhibit a range of high quality characteristics, operate in growing markets and display positive business momentum.
- In seeking to achieve the Performance Target, the MSCI AC World Small Cap Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 10%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the MSCI AC World Small Cap Index.

Please note: The fund's ability to buy and sell small and mid-capitalisation shares and the associated costs can be affected during periods of market stress. In certain circumstances investors in the fund may not be able to sell their investment when they want to.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned 3.83% (Source: FactSet, Institutional Accumulation, net of fees). This compared to a return of 6.07% for the benchmark MSCI AC World Small Cap Index, while our performance target returned 8.97% (Source: FactSet, MSCI AC World Small Cap Index +3%).

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

In terms of individual stock detractors, Keywords Studios was negatively affected by weaker industry sentiment as game developers' earnings results were mixed. The shares have been caught in the web of artificial intelligence (AI)-related losers as investors see the company as an outsourcer of labour rather than a technology company. In response, management held an investor briefing to explain how the company is using new technologies to its advantage. Insulin pump provider Insulet's shares fell sharply after the publication of Novo

abrdn Global Smaller Companies Fund

Continued

Nordisk's weight loss drug (GLP) trial. Investors feared that the use of such drugs would drastically reduce Insulet's addressable market. Fox Factory Holding's shares fell after management announced a surprise acquisition. The shortfall in operations, although greater than expected, largely had been reflected in the share price. The shares are now close to their pandemic lows. Lattice Semiconductor Corporation's third-quarter results were in line with investor expectations. However, management cut fourth-quarter guidance on the back of weaker demand for industrial and automotive applications. The company, which supplies Field-Programmable Gate Array semiconductors, had been relatively immune to softer macroeconomic conditions. Therefore, the reduced guidance came as a surprise to investors.

On the positive side, Deckers Outdoor Corporation reported a stellar set of results as both of the company's core brands, UGG and HOKA, displayed strong sales momentum. Management upgraded guidance and pointed to new product releases in Spring 2024. Investors responded well to Asics Corporation's results and share buyback announcement. January sales grew 13% year on year, starting 2024 on a positive note for the company. Management continued to execute well on its strategy to expand sales in core product categories and improve margins. Thailand-listed Fabrinet continued to enjoy robust demand for its optical components, which feed into AI-enabled data centres. The requirements for optical interconnects in AI-enabled data centres far exceed those needed in traditional data centres and offer higher value-added content. Axon Enterprise continued its run of beating expectations and raising guidance, helped by an expanding addressable market. New product take-up was robust, as was demand for Axon's software suite. Demand for the company's core products is relatively insensitive to the wider economic environment.

Market Review

Global stock markets rose strongly in sterling terms and even more notably in local-currency terms over the 12 months. The prospect of monetary tightening coming to an end, with potential rate cuts ahead in 2024, supported global equity markets as investor risk appetite improved.

After central banks in Western economies had raised interest rates faster and much further than previously anticipated to counter multi-decade-high inflation, inflationary pressures lessened in many countries over the course of the period. Meanwhile, global economic growth held up better than many investors expected, defying fears of a recession triggered by higher rates.

As US and eurozone inflation continued to trend down, investor hopes rose that an end to interest-rate rises could be in sight. However, the collapse of two regional US banks and the forced sale of Credit Suisse to rival UBS in March evoked fears of a banking crisis. Despite an initial sell-off, stock markets recovered. After more market volatility in April and May, equities performed strongly over June and July due to news of a compromise agreement on the US debt ceiling and further encouraging inflation data. However, rhetoric from central banks continued to be hawkish. Equities generated negative returns in August, September and October on concerns that interest rates would stay higher for longer. However, equities then notably recovered towards the end of the period as reassuring inflation trends led to investors looking ahead to the prospect of rate cuts in 2024.

Portfolio Activity and Review

We initiated positions in several companies over the period.

MSA Safety manufactures and sells safety products globally across three core markets: Firefighter Safety, Gas Detection and Industrial PPE. In each of its product categories, MSA is either the market leader or the number two thanks to its product strength and continuous innovation. Demand tends to be non-discretionary and is often mandated by regulation, which is becoming increasingly stringent.

Another new holding was US-listed Napco Security Technologies, a provider of security hardware products, which has benefited from the mandated replacement of copper-based landlines with fibre optic-based cellular networks. The company has a similarly strong competitive offering in the school security segment. We have recently seen an uptick in funding for access control systems, alarms and video surveillance, which Napco provides.

In addition, we introduced a holding in Mexico-listed Regional, which boasts one of the highest and most consistent return profiles of all the banks in the small-cap universe. The current macroeconomic and political backdrop in Mexico is supportive for the stock, as interest rates are expected to decline and the political environment remains neutral. Regional continues to execute on its growth strategy, most notably with the push into new geographies and customer segments through the build-out of its 'Hey Banco' platform.

We also initiated a holding in Makalot Industrial. The company is one of the largest listed garment manufacturers globally. Over the last 18 months,

abrdn Global Smaller Companies Fund

Continued

the industry has been negatively affected by a destocking cycle. However, management believes that this is now coming to an end. In the medium to long term, Makalot should continue to benefit from favourable industry tailwinds, such as growth in end-market demand and ongoing supplier consolidation. In addition, management-led growth initiatives such as new client wins, capacity expansion and an improving product mix further support the company's positive outlook.

Meanwhile, we introduced a position in Medpace Holdings, a leading contract research organisation in the US. The company offers a 'one stop shop' solution to its small- and medium-sized biotechnology and pharmaceutical customers.

Lastly, we initiated a position in Azimut Holding, an Italy-listed independent asset management company. In recent years, the company has diversified its operations geographically, notably in emerging markets, and by product. Indeed, the group has grown through organic product innovation and acquisition. Given the nature of its products, customers tend to be sticky. The company recently confirmed its guidance for this year and next year.

In terms of sales, we sold our holdings in Watches of Switzerland Group (WOSG) and Teleperformance. Rolex, which accounts for around 50% of WOSG's sales, announced the surprise acquisition of Bucherer, one of the largest watch retailers globally. This deal threw into question WOSG's future watch supply. Teleperformance's share price came under pressure as the company faced ESG concerns relating to content moderation procedures, as well as question marks over its opportunistic acquisition of Majorel.

We also divested FinecoBank after it experienced deposit outflows. In response to customers' search for yield, the company selectively started to pay for deposits. This marked a change in policy for FinecoBank. In addition to our operational concerns, the bank is off benchmark.

In addition, we disposed of our position in Envista Holdings, the US dental supply business. The company reported weaker-than-expected third-quarter results and downgraded guidance on the back of rising headwinds in the North American market. Management cited slowing end-demand, a trade-down effect, increased competitive pressure, and distribution disruption as negative factors.

Meanwhile, we sold our holding in Darling Ingredients. The company faced pressure regarding falling renewable diesel margins and fears of overcapacity in the industry. These concerns had been exacerbated by Darling's higher debt position, lower-than-expected operational efficiency and integration challenges on its new acquisitions.

We also divested our holding in Kainos Group due to a pause in earnings momentum.

Lastly, we sold our holding in US speciality vehicle manufacturer The Shyft Group as it continued to face challenges in its supply chain, specifically with regard to chassis supply and electric-vehicle batteries.

Portfolio Outlook and Strategy

At the macroeconomic level, we continue to monitor central bank activity and political developments. While we are seeing regional variances in economic data, interest-rate cuts have, to date, remained on hold. Noise on the political front is starting to heat up. As we enter the second half of the year, investors should be alert to potential policy changes in key markets, which may influence stock moves.

For the moment, markets continue to be driven by company-specific news, which is supportive for quality growth stock-pickers, such as ourselves. Earnings season has generally been positive for the stocks in the fund. The long-term structural growth themes underpinning a number of companies that we own, as well as company-specific initiatives, are leading to outperformance.

Along with fundamental improvement, corporate activity – in the form of corporate reform and mergers and acquisitions (M&A) – is picking up. This is especially evident in Japan, where the corporate reform agenda is now forcing change in the small-cap benchmark, and the UK, where M&A activity is highlighting the undervaluation of many small-cap companies.

In a challenging macroeconomic environment, we would expect quality companies with the ability to grow independently of the market to show greater resilience.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- **Equity Risk** - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Smaller and Mid Cap Risk** - The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.
- **ESG Investment Risk** - Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in assets which similar funds do not (and thus perform differently) and which may not align with the personal views of any individual investor.
- **Derivatives Risk** - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Comparative Tables

Retail accumulation	2024 pence per share	2023 pence per share	2022 pence per share
Change in net assets per share			
Opening net asset value per share	162.74	176.47	183.12

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	1,077	837
Overseas capital gains tax	617	(25)
Total current tax	1,694	812
Deferred tax (note 4c)	926	-
Total taxation (note 4b)	2,620	812

(b) Factors affecting total tax charge for the year

The tax assessed for the year is greater than (2023: greater than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	5,414	2,727
Corporation tax at 20% (2023: 20%)	1,083	545
Effects of:		
Revenue not subject to taxation	(2,456)	(2,526)
Overseas taxes	1,077	837
Excess allowable expenses	1,373	1,981
Overseas capital gains tax	1,543	(25)
Total tax charge for year (note 4a)	2,620	812

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Deferred tax

Deferred tax charge in statement of total return for year (note 4a)	926	-
Provision at the end of the year	926	-

(d) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £16,917,000 (2023: £15,544,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

Notes to the Financial Statements

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Distribution	4,112	2,804
Add: Income deducted on cancellation of shares	582	292
Deduct: Income received on issue of shares	(114)	(279)
Total distributions for the year	4,580	2,817
Movement between net revenue and distributions		
Net revenue after taxation	2,794	1,915
Overseas capital gains tax on realised gains	617	(25)
Shortfall transfer from capital to revenue	242	928
Overseas deferred capital gains tax on unrealised gains	926	-
Undistributed revenue brought forward	1	-
Undistributed revenue carried forward	-	(1)
Total distributions for the year	4,580	2,817

Details of the distribution per share are set out in this fund's distribution table.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	596	1,073
Amounts receivable from the ACD for the issue of shares	237	2,729
Overseas withholding tax recoverable	1,191	1,133
Sales awaiting settlement	4,154	2,422
Total debtors	6,178	7,357

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	19	45
	19	45
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	14,225	38,217
Net liquidity	14,244	38,262

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3

Collective Investment Schemes	-	14,225	-	-	38,217	-
Total investment assets	969,985	14,225	-	1,114,286	38,217	-

14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Notes to the Financial Statements

Continued

Currency	Net foreign currency exposure	Net foreign currency
	2024 £'000	2023 £'000
Australian Dollar	61,217	74,228
Euro	146,955	236,167
Indian Rupee	15,902	13,279
Japanese Yen	75,501	70,326
Mexican Peso	24,005	-
Polish Zloty	15,921	17,068
Swedish Krona	24,962	26,328
Taiwan Dollar	50,870	64,200
US Dollar	504,741	520,526
Total	920,074	1,022,122

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £46,004,000 (2023: £51,106,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £49,211,000 (2023: £57,625,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £3,923,000 (2023: £7,426,000).

Distribution Table

For the year ended 29 February 2024 (in pence per share)

Final dividend distribution

Group 1 – shares purchased prior to 1 March 2023

Group 2 – shares purchased between 1 March 2023 and 29 February 2024

	Revenue	Equalisation	Distribution paid 30/04/24	Distribution paid 28/04/23
Retail accumulation				
Group 1	-	-	-	-
Group 2	-	-	-	-
Institutional accumulation				
Group 1	0.4799	-	0.4799	0.0792
Group 2	0.0752	0.4047	0.4799	0.0792
Institutional S accumulation				
Group 1	0.5662	-	0.5662	0.2991
Group 2	0.2603	0.3059	0.5662	0.2991
Platform 1 accumulation				
Group 1	0.2978	-	0.2978	-
Group 2	-	0.2978	0.2978	-
ZC accumulation				
Group 1	2.0955	-	2.0955	1.7085
Group 2	0.9693	1.1262	2.0955	1.7085

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn High Yield Bond Fund

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in Sterling and Euro denominated sub-investment grade (high yield) corporate bonds.

Performance Target: To achieve the return of the ICE BofA GBP/Euro Fixed & Floating High Yield Non Financial 3% Constrained Index (Hedged to GBP) plus 0.8% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in Sterling and Euro denominated sub-investment grade corporate bonds.
- The fund may also invest in bonds issued anywhere in the world by governments and corporations, including sub-sovereigns and the following types: investment grade, inflation-linked, convertible, asset backed and mortgage backed.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to identify bonds and derivatives based on analysis of global economic and market conditions (for example, interest rates and inflation) and analysis of a company's prospects and creditworthiness compared to that of the market.
- In seeking to achieve the Performance Target, ICE BofA GBP/Euro Fixed & Floating High Yield Non Financial 3% Constrained (Hedged to GBP) Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the ICE BofA GBP/Euro Fixed & Floating High Yield Non Financial 3% Constrained (Hedged to GBP) Index over the longer term.

Please note: The fund's ability to buy and sell bonds and the associated costs can be affected during periods of market stress which could include periods where interest rates move sharply.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations or governments.

Performance Review

Over the period under review, the fund returned 10.74% (Source: Factset, Institutional Accumulation Shares) compared with the return of 12.56% for the fund's target (Source: Factset, ICE BofAML GBP/Euro Fixed & Floating High Yield Non-Financial 3% Constrained Index (Hedged to GBP) +0.8%).

**abrdn means the relevant member of abrdn group, being abrdn plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The biggest individual detractor to the fund's performance was an overweight position in Thames Water subordinated bonds. Thames Water's structure came under pressure in June 2023 after CEO Sarah Bentley stepped down on speculation that the UK government was considering putting the company into special administration. The

abrdn High Yield Bond Fund

Continued

subordinated bonds dropped from the mid-80s to the 50s on the news and potential write-down risk, and we took the painful decision to exit at that level. Altice International bonds also detracted over the period due to an isolated incident of fraud. Our off-benchmark holdings in long-dated US Treasuries also contributed negatively. We believed that with the hiking cycle near its end, the risk/reward on long-duration sovereign bonds was attractive and preferable to long-dated corporate bonds. However, we have now sold these holdings, as we no longer see value.

On the other hand, the top contributor over the period was our large overweight position in United Group, the Eastern European telecommunications company. The payment-in-kind bonds experienced a dramatic jump in price after the successful sale of United Group's cellular tower assets at a much greater valuation than the market had expected (€1.2 billion). A lack of exposure to Atento, which provides customer relationship management software, was also beneficial to the fund's performance. Finally, a lack of exposure to Casino, the poorly performing and debt-ridden French supermarket group, contributed positively to the fund's performance. Casino's bonds collapsed in the first quarter of 2023 after a disappointing set of earnings. Casino also announced merger talks with rival retailer Teract – a deal that we believed could weaken the collateral package for existing Casino bondholders. We exited our underweight position in Casino bonds in the 50s during the first quarter of 2023. The bonds subsequently fell into the 20s during the second quarter.

Market Review

Early in the review period, banking fears were sparked by the collapse of Silicon Valley Bank (SVB) in the US. This triggered a run on deposits at various US regional banks and, indirectly, the failure of Credit Suisse (CS) in Europe. Financial authorities moved quickly to calm the storm: SVB was taken over by the State of California before entering bankruptcy and the Federal Deposit Insurance Corporation covered all depositors. Swiss peer UBS ultimately acquired CS. In addition to cauterising the problematic banks, authorities in the US and Europe were at pains to stress the idiosyncratic nature of the problems at SVB and CS and that the banking system was otherwise well-capitalised and resilient.

As we moved into July, evidence showed that pricing pressures were receding more rapidly than most had expected. Consumer and producer price inflation figures across Europe, Asia and the US generally came in below expectations. There were several remarks from central bank officials in August that added to hopes that central banks might be done with rate hikes. With that backdrop, and as banking crisis fears receded, high-yield markets

performed strongly as hopes of a 'soft landing' for developed market economies grew.

In December, high-yield markets latched on to an apparently dovish pivot by the US Federal Reserve (Fed), with the Fed's dot plot signalling 75 basis points of cuts in 2024 and Chairman Powell confirming a 'preliminary' discussion around potential rate cuts. The 10-year US Treasury yield dropped back below 4% by year end, having touched 5% in mid-October, as optimism grew that inflation could be normalised without much damage to the real economy. Inflation data came in below expectations for October and November. US consumer price inflation (CPI) dropped to 3.1%, eurozone CPI fell to 2.4% and UK CPI was down to 3.9% from 6.7% in September. Against a backdrop of falling inflation expectations and government bond yields, high-yield bonds outperformed. In January, the European Central Bank held rates at 4.25% and the Fed held rates at 5.25%–5.50%. In February, the Bank of England held rates at 5.25%. Markets are now eager to speculate on how early the first rate cut will arrive.

Portfolio Activity and Review

It began as a busy period for new issuance in the European high-yield market, and the fund participated in a variety of deals. These included a rare sterling issue from Ford, which printed at a discount to its US dollar and euro curve, and a new deal from IHO Verwaltungs, which is a holding company that owns stakes in the automotive businesses Schaeffler and Continental. We added Benteler (a German family-owned automotive parts supplier) and Playtech (a gaming software business) in the second quarter of 2023. We also took advantage of the wide pricing of bank new issuance, adding A-rated Swedbank and the B1-rated Novo Banco. We also rolled exposure in new issues from Sazka (gaming), CABB (chemicals), Owens Illinois (packaging) and Lottomatica (gaming). In the third quarter of 2023, we bought bonds issued by TV and film production business Banijay, as we believed its content would remain in demand, and sterling bonds issued by Worldpay, as they were priced attractively for the credit profile of the business (BB/Ba3) and relative to the US dollar bonds issued in parallel. European high-yield issuance slowed in the fourth quarter of 2023, with new issuance mainly for refinancing purposes. We bought the Ineos Styrolution deal, as we felt it was priced attractively for a BB-rated issuer well-known to the market. The bonds performed strongly on the break and closed the year at 106 just six weeks after being issued at 100. We bought the new issue from Synlab, a lab diagnostics operator that returned to the market after being taken private by CVC. We have owned Synlab in a previous guise before its public listing and we felt the new issue was good value given its lower leverage relative to peers.

abrdn High Yield Bond Fund

Continued

In terms of secondary trading, it was a very active period with too many trades to mention. Early in the period, we continued to trim outperforming credits and de-risk any cyclical exposures. To that end, we sold Autostrade, Grifols, Profine, True Potential and Nets bonds following strong performance. We exited Dufry (a duty-free retailer) and Klöckner Pentaplast (a troubled packaging business with elevated leverage). We also further reduced our exposure to the debt purchasing sector by selling Lowell and Intrum. We topped up high-quality issues in defensive sectors, such as BME (online retail), Banijay (TV production), Masmovil (telecommunications) and Ziggo (telecommunications). In the second quarter of 2023, we topped up holdings in the pharmaceuticals businesses Teva and Cheplapharm and added car park operator Empark and French frozen food producer Picard. We took profits on Nets, Banijay and Techem. We trimmed our Telecom Italia bonds after outperformance. We executed several relative-value switch trades, such as a swap from our Altice France euro-denominated secured bonds to the same maturity US dollar issue at a significant pickup in yield. The bonds are pari passu, meaning they carry equivalent rights and protection within the Altice France capital structure. We extended our exposure to automotive parts supplier Schaeffler from the 2027 maturity to the 2028 maturity at the widest spread differential this relationship has ever traded.

In the third quarter of 2023, we further reduced our exposure to consumer financials, particularly debt collectors. The European debt collection industry has received a lot of funding from the European high-yield bond market at low rates and much of this debt is now approaching maturity. We believed businesses might struggle to earn their cost of capital at market-implied interest rates. Other sales included the UK telecommunications wholesaler TalkTalk, where we took advantage of a jump in the bond price. We also sold our exposure to the UK-listed Victoria PLC after their auditor flagged possible accounting irregularities. We switched our euro-secured bonds for a shorter-dated US dollar subordinated bond issued by the Swiss telecommunications company UPC at a spread pickup. We also partially switched from a vendor financing note to a US dollar unsecured bond issued by the Dutch operator Ziggo. We sold holdings such as Matterhorn and Iliad on outperformance and rotated into higher-yielding bonds such as production company Banijay and theme park operator Merlin. We are also looking at ways of selectively covering our real estate underweight and took a starter position in the 2025 bonds issued by the Austrian operator Alstria. We believe that despite Alstria bonds falling in sympathy with the wider real estate universe, its 2025 bonds should be covered by existing liquidity or asset sales without having access to the market. The 10% yield on

offer at a cash price in the low 80s looks attractive. After the big move in government bond yields, we sold our holdings in long-dated US Treasuries and our 2061 Gilt. We had sought to increase the duration of the fund via the purchases but no longer see value. We have lowered our overall fund duration to be in line with the market at around three years.

Finally, it is worth noting that we increased the size of the credit derivative hedge late in August to protect against downside risk in the event of spread widening. This was a short-term tactical position, rather than a long-term structural view.

Portfolio Outlook and Strategy

In our previous outlook, we were bullish on government bonds, as we expected central banks to cut interest rates faster than the market was projecting. This would underpin returns for most fixed income asset classes, where any spread widening because of a slowing economic backdrop would be offset by a decline in underlying yields. We expected 12-month returns of close to 8% given our muted default rate expectations for Europe in 2024. However, the scale and speed of the move higher in bond markets, high-yield bonds included, has forced us to recalibrate our outlook. At these levels, government bonds look over-extended to us in the short term (though we still think they offer some value for longer-term investors). Yields increased in the first two trading sessions of January, and the rapid move tighter in credit spreads leaves the asset class more exposed to a sell-off, while the all-in yield no longer offers downside protection. We now anticipate mid-single-digit returns over the next 12 months (from here) and expect investors to get the opportunity to buy the asset class at 7%+ in the next few months (from 6.3% at the end of December 2023). At those valuations, we will be banging the drum for investors to buy high-yield bonds again.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk				
←				→			
1	2	3	4	5	6	7	

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- High Yield Credit Risk - The fund invests in high yield bonds which typically carry a greater risk of default than those with lower yields.
- ABS/MBS Risk - Asset and mortgage backed securities are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- Convertible Securities Risk - These investments can be changed into another form upon certain triggers as such they can exhibit risks typically associated with both bonds and equities. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks and may lead to substantial loss and increased volatility in adverse market conditions. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Direct transaction costs	-	-	-
Prices			
Highest share price	171.5	160.8	166.0
Lowest share price	151.8	140.6	159.4

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

Notes to the Financial Statements

1 Net Capital Gains/(Losses)

	2024 £'000	2023 £'000
Non-derivative securities	5,744	(13,606)
Derivative contracts	(1,678)	(52)
Forward currency contracts	6,324	(5,310)
Other losses	(46)	(1,118)
Transaction charges	(16)	(16)
Net capital gains/(losses)	10,328	(20,102)

2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	532	173
Interest on debt securities	13,793	12,022
Total revenue	14,325	12,195

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	1,602	1,574
Dealing charge	30	26
General administration charge	112	96
	1,744	1,696
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fee	15	14
	15	14
Total expenses	1,759	1,710

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £14,700 (2023: £13,500).

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Corporation tax	-	3
Double taxation relief	-	(3)
Overseas taxes	-	13
Total taxation (note 4b)	-	13

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

	2024 £'000	2023 £'000
Net revenue before taxation	12,537	10,456
Corporation tax at 20% (2023: 20%)	2,507	2,091
Effects of:		
Overseas taxes	-	13
Double taxation relief	-	(3)
Distributions treated as tax deductible	(2,507)	(2,088)
Total tax charge for year (note 4a)	-	13

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

5 Distributions

	2024 £'000	2023 £'000
First interim distribution	3,045	2,538
Second interim distribution	3,115	2,490
Third interim distribution	3,128	2,517
Final distribution	3,086	2,311
	12,374	9,856
Add: Income deducted on cancellation of shares	270	648
Deduct: Income received on issue of shares	(107)	(61)
Total distributions for the year	12,537	10,443

Details of the distribution per share are set out in this fund's distribution tables.

Notes to the Financial Statements

Continued

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	2,604	2,363
Amounts receivable from the ACD for the issue of shares	53	11
Total debtors	2,657	2,374

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	31	36
Cash at broker	2,437	774
Collateral cash pledged to counterparties [~]	310	-
Deposits with original maturity of less than 3 months	-	4,799
	2,778	5,609
Bank overdrafts		
Collateral cash pledged by counterparties [^]	(120)	-
Overdraft at bank	-	(8)
	(120)	(8)
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	8,567	10,173
abrdrn Short Dated Enhanced Income Fund SICAV I Z Acc Hdg+	1,125	-
Net liquidity	12,350	15,774

[~] This reflects cash the fund retains beneficial ownership of however which is currently being used to manage bilateral counterparty exposure on out of the money derivative positions. While included as part of the net liquidity disclosure, this cash is therefore restricted until the related derivative contract expires.

[^] This reflects cash the fund has taken receipt of to support in the money derivative positions and mitigate counterparty risk to the fund.

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	180	137
Accrued expenses payable to the Depositary or associates of the Depositary	5	8
Amounts payable to the ACD for cancellation of shares	241	282
Other accrued expenses	-	6
Purchases awaiting settlement	1,079	1,331
Total creditors	1,505	1,764

Notes to the Financial Statements

9 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrtn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrtn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

10 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds, collective investment schemes and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Collective investments operate within the terms of the offer document or prospectus. Typically we do not invest into funds that require an initial charge to be made. The underlying price may contain an estimation of cost known as a dilution levy which is applied from time to time.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

Trades in the year	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Bonds	104,467	68,436	111,311	158,278
Collective investment schemes	1,100	-	-	-
Inspecie transactions	27,990	-	-	-
Trades in the year before transaction costs	133,557	68,436	111,311	158,278
Total net trades in the year after transaction costs	133,557	68,436	111,311	158,278

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.96% (2023: 1.22%), this is representative of the average spread on the assets held during the year.

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

2024	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
Currency				
UK Sterling	12,342	40,124	174,960	227,426

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	3.01%	4.22%	3.59%

2023	Minimum	Maximum	Average
VaR 99% 1 Month	4.16%	5.18%	4.64%

At the year end date, there was a 1% chance of the portfolio value falling (or rising) more than 3.02%, £6,694,000 (2023: 4.16%, £8,152,000) in a one month period.

This calculation is generally determined by the use of an industry recognised medium term risk model, typically based on 3–5 year history. The method assumes normal market conditions and that the portfolio remains unchanged.

Counterparty risk

Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

	Market value £'000	Percentage of total net assets %
2024		
Investment grade securities	10,082	4.50
Below investment grade securities	200,681	89.36
Unrated securities	3,916	1.74
Total value of securities	214,679	95.60

	Market value £'000	Percentage of total net assets %
2023		
Investment grade securities	8,985	4.47
Below investment grade securities	173,097	86.05
Unrated securities	3,405	1.69
Total value of securities	185,487	92.21

Investment grade information used in the above table is based on credit ratings issued by market vendors.

Notes to the Financial Statements

Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
Leveraged instruments				
Forward currency contracts	180,738	(288)	153,341	860
Swaps	20,258	(2,225)	17,520	(754)
Total market exposure	200,996	(2,513)	170,861	106

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Bank of America Merrill Lynch	(937)	-	-	(937)	(0.42)
Goldman Sachs	(1,288)	2,437	394	1,543	0.69
	(2,225)	2,437	394	606	0.27

2023 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Goldman Sachs	(754)	774	1,944	1,964	0.98
	(754)	774	1,944	1,964	0.98

Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

At the balance sheet date the fund had the following positions.

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Investment Grade Corporate Bond Fund

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in Sterling-denominated investment grade corporate bonds.

Performance Target: To achieve the return of the Markit iBoxx Sterling Collateralized & Corporates Index plus 0.8% per annum (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 60% in Sterling denominated investment grade corporate bonds.
- The fund may invest in investment grade bonds issued anywhere in the world by governments and corporations, including sub-sovereigns inflation-linked, convertible, asset backed and mortgage backed bonds. The fund will employ techniques to reduce (hedge) risk related to currency movements on non-Sterling bonds.
- At the point of investment all bonds shall be investment grade with a credit rating of "BBB-" or higher from at least one major rating agency such as Standard & Poor's, Moody's or Fitch.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to identify bonds and derivatives based on analysis of global economic and market conditions (for example, interest rates and inflation) and analysis of a company's prospects and creditworthiness compared to that of the market.
- In seeking to achieve the Performance Target, the Markit iBoxx Sterling Collateralized & Corporates is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 2.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the Markit iBoxx Sterling Collateralized &

Corporates over the longer term.

Please note: The fund's ability to buy and sell bonds and the associated costs can be affected during periods of market stress which could include periods where interest rates move sharply.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations or governments.

Performance Review

Over the period under review, the fund returned 6.12%. (Source: FactSet, Institutional Accumulation, net of fees). This compared to a return of 7.08% for our performance target. (Source: FactSet, the iBoxx Sterling Collateralized & Corporates Index +0.8%).

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdn**. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. To the extent permitted by applicable law, none of the Owner, abrdn** or any other third party (including any third party involved in providing and/or compiling Third Party Data) shall have any liability for Third Party Data or for any use made of Third Party Data. Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

**abrdn means the relevant member of abrdn group, being abrdn plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund's credit decisions positively contributed to performance, while there was a neutral effect from interest-rate positioning. Security selection was beneficial, particularly in banks and collateralised bonds, but marginally detracted in government-related bonds and consumer non-cyclical. Sector allocation slightly

abrdn Investment Grade Corporate Bond Fund

Continued

detracted; it was most negative in government-related bonds and collateralised bonds, with the main positives being basic materials/industrials and consumer non-cyclical. By credit rating, BBB and A-rated bonds were the leaders, while AA-rated and high yield bonds lagged. By issuer, the largest contributors were WMB Holdings (Metrocentre), ANZ Group, Westpac Banking and Électricité de France. The main detractors were the off-benchmark holdings in Gilts, as well as positions in Thames Water, Prudential and BNP Paribas.

Market Review

Corporate bonds had a solid performance over the 12-month period.

Turbulence in the global banking sector in March 2023 caused credit spreads – the yield premium received by investors in return for the typically greater risk of lending to companies rather than governments – to widen to levels last seen in the autumn of 2022. This was largely driven by the collapse of Credit Suisse and concerns around regional banks in the US. However, the negative effect of wider credit spreads was offset by lower government bond yields amid a flight to safety. Nonetheless, a backdrop of sharply rising interest rates, stubbornly high annual inflation and a worsening economic outlook meant that challenging market conditions persisted over April and May.

Calm then returned to corporate bond markets over the next few months. Spreads tightened on growing expectations that global inflation pressures may be peaking. This fuelled investors' hopes that the current cycle of interest-rate rises could be nearing its end and helped corporate bonds to perform better as investors' appetite for riskier assets started to return. As a result, corporate bond markets exhibited strong performance towards the end of the period, with spreads ending significantly lower than where they were before the volatility seen in March 2023. Underlying UK government bond yields also fell, and this, coupled with tightening credit spreads, produced strong total returns from the asset class.

The Bank of England (BoE) announced a further four interest-rate increases over the period, taking its base rate from 3.50% at the start of 2023 to 5.25% by the end of it. Following the 50-basis-point (bp) hike in February, the BoE increased its base rate by a further 25 bps in both March and May, by 50 bps in June and then by 25 bps in August. As a result, UK annual consumer inflation continued to trend downwards over the period. However, it has still remained above the BoE's 2% target, as well as the rates recorded in both the US and eurozone, in part due to elevated food prices. UK annual core inflation in January 2024 stayed flat month on month, coming in at a lower-than-expected 5.1%.

Portfolio Activity and Review

In the primary market, we bought attractive new issue utilities bonds, including the 2036 bonds of United Utilities and the 2039 bonds of Anglican Water. We also bought Société Générale's 2033 issue and a new senior deal from BNP Paribas. We participated in new senior deals from Barclays and Coventry Building Society, and a UK Power Networks deal in sterling. The fund deployed cash balances that had built up into attractive new deals from US issuers Ford Motors and MetLife, as well as topping up bank exposure via senior non-preferred issues from Société Générale and Crédit Agricole. In the secondary market, we bought Wells Fargo and Santander. We added some Eon and Ørsted bonds on spread widening and lower-risk Additional Tier 1 dollar-denominated bonds from Westpac and Lloyds. We added to UK property specialist Grainger and Lloyds Tier 2 bonds. We used the tightening in spreads to trim risk and higher beta positions. Examples included trimming risk in Hammerson, Workspace, AT&T, Deutsche Bank, Virgin Money and UBS senior. In addition, the fund took profits in holdings that had performed well, including FirstGroup 2024s, CaixaBank Additional Tier-1 bonds and BPCE Tier 2 bonds. We also reduced long-term overweight positions in Gatwick and Heathrow to neutral. The discount built into airport spreads from Covid-19 has now completely gone. We also reduced Volkswagen and Yorkshire Housing. We disposed of NewRiver Real Estate Investment Trust and Royal Bank of Canada senior bonds.

Portfolio Outlook and Strategy

While the fundamental backdrop for 2024 remains uncertain, investment-grade credit continues to attract interest. Credit spreads are approaching tight levels on a historic basis. However, at this stage of the cycle, where we are close to renewed economic growth and lower interest rates, that is normal. We expect policy rates to fall in the UK this year, providing comfort to bond buyers. For the time being, the two worst potential scenarios for bonds – reflation (and no rate cuts) or a hard landing (which would be bad for credit markets) – appear to be off the table. We expect heightened yield volatility as we transition to a lower inflation environment and subsequent rate cuts. Sector and security selection remain key at current valuations.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk				
←				→			
1	2	3	4	5	6	7	

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- ABS/MBS Risk - Asset and mortgage backed securities are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks and may lead to substantial loss and increased volatility in adverse market conditions. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Total taxation (note 4b)	-	-

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	9,992	8,863
Corporation tax at 20% (2023: 20%)	1,998	1,773
Effects of:		
Distributions treated as tax deductible	(1,998)	(1,773)
Total tax charge for year (note 4a)	-	-

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

5 Distributions

	2024 £'000	2023 £'000
First interim distribution	2,304	2,107
Second interim distribution	2,534	2,131
Third interim distribution	2,434	2,327
Final distribution	2,442	2,346
	9,714	8,911
Add: Income deducted on cancellation of shares	370	184
Deduct: Income received on issue of shares	(92)	(232)
Total distributions for the year	9,992	8,863

Details of the distribution per share are set out in this fund's distribution tables.

Notes to the Financial Statements

Continued

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	4,022	4,359
Amounts receivable from the ACD for the issue of shares	42	34
Sales awaiting settlement	148	257
Total debtors	4,212	4,650

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	4	2
Cash at broker	209	339
	213	341
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	1,495	2,805
Net liquidity	1,708	3,146

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	171	148
Accrued expenses payable to the Depositary or associates of the Depositary	3	7
Amounts payable to the ACD for cancellation of shares	419	1,107
Other accrued expenses	-	6
Purchases awaiting settlement	-	1,148
Total creditors	593	2,416

9 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdrn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdrn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

Notes to the Financial Statements

Continued

10 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Trades in the year				
Bonds	67,029	107,076	100,797	77,939
Trades in the year before transaction costs	67,029	107,076	100,797	77,939
Total net trades in the year after transaction costs	67,029	107,076	100,797	77,939

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.64% (2023: 0.80%), this is representative of the average spread on the assets held during the year.

11 Shares in Issue Reconciliation

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Bonds	9,908	227,857	-	4,890	259,899	-

Fair value of investment liabilities						
Derivatives	-	(171)	-	(31)	(1)	-
Total investment liabilities	-	(171)	-	(31)	(1)	-

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

Notes to the Financial Statements

Continued

The interest rate risk profile of the fund's investments at the year end consists of:

2024	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
Currency				
UK Sterling	4,362	230,002	8,206	242,570
Euro	755	2,733	(3,653)	(165)
US Dollar	779	886	(1,646)	19
Total	5,896	233,621	2,907	242,424

2023	Floating rate financial assets/ (liabilities) £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
Currency				
UK Sterling	6,369	253,942	9,287	269,598
Euro	1	1,580	(1,616)	(35)
US Dollar	1,858	4,185	(6,044)	(1)
Total	8,228	259,707	1,627	269,562

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	5.72%	6.81%	6.21%
2023	Minimum	Maximum	Average
VaR 99% 1 Month	4.31%	7.29%	5.74%

At the year end date, there was a 1% chance of the portfolio value falling (or rising) more than 5.72%, £13,668,000 (2023: 6.81%, £18,223,000) in a one month period.

Notes to the Financial Statements

Continued

This calculation is generally determined by the use of an industry recognised medium term risk model, typically based on 3–5 year history. The method assumes normal market conditions and that the portfolio remains unchanged.

Counterparty risk

Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

	Market value £'000	Percentage of total net assets %
2024		
Investment grade securities	228,969	94.45
Below investment grade securities	6,838	2.81
Unrated securities	1,958	0.81
Total value of securities	237,765	98.07
2023		
Investment grade securities	254,042	94.24
Below investment grade securities	9,435	3.50
Unrated securities	1,312	0.49
Total value of securities	264,789	98.23

Investment grade information used in the above table is based on credit ratings issued by market vendors.

Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
Leveraged instruments				
Forward currency contracts	5,203	(21)	8,000	37
Futures	5,885	44	7,778	(31)
Swaps	6,844	(150)	-	-
Total market exposure	17,932	(127)	15,778	6

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

Notes to the Financial Statements

Continued

Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Goldman Sachs	44	209	-	253	0.10
	44	209	-	253	0.10

2023 Broker or exchange exposure	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Goldman Sachs	(31)	339	-	308	0.11
	(31)	339	-	308	0.11

Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Collateral (held)/pledged				Net exposure £'000
	Swaps £'000	Forwards £'000	Cash £'000	Stock £'000

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn North American Small & Mid-Cap Equity Fund (formerly abrdn American Unconstrained Equity Fund)

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in US and Canadian small and mid-capitalisation equities (company shares).

Performance Target: To achieve the return of the Russell 2500 Index plus 3% per annum over rolling five year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of small and mid-capitalisation companies listed, incorporated or domiciled in the United States of America (US) and Canada or companies that derive a significant proportion of their revenues or profits from US or Canadian operations or have a significant proportion of their assets there.
- For all investments, small and mid-capitalisation companies are defined as any stock having a market capitalisation less than the 20th percentile stock of the Russell 3000 Index (which is used as a representation of the overall US market).
- The fund may also invest in larger capitalisation companies listed, incorporated, or domiciled in the US and Canada.
- Investment in companies listed, incorporated or domiciled in or having a significant proportion of their assets in Canada or deriving a significant proportion of their revenue or profits from Canadian operations is not expected to exceed 20% of the fund's assets.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on finding high quality companies at attractive valuations that can be held for the long term.
- In seeking to achieve the Performance Target, the Russell 2500 Index is used as a reference point for portfolio

construction and as a basis for setting risk constraints.

The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 10%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the index.

- Please note: The fund's ability to buy and sell small and mid-capitalisation shares and the associated costs can be affected during periods of market stress. In certain circumstances investors in the fund may not be able to sell their investment when they want to.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned 4.54%. (Source: FactSet, Institutional Accumulation Shares, net of fees). This compared with a return of 23.23% for our performance target (Source: FactSet, Russell 2500 Index + 3%).

Any data contained herein which is attributed to a third party ("Third Party Data") is the property of (a) third party supplier(s) (the "Owner") and is licensed for use by abrdn**. Third Party Data may not be copied or distributed. Third Party Data is provided "as is" and is not warranted to be accurate, complete or timely. **abrdn means the relevant member of abrdn group, being abrdn plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

abrdn North American Small & Mid-Cap Equity Fund (formerly abrdn American Unconstrained Equity Fund)

Continued

The fund underperformed its benchmark, largely due to stock selection. Sector wise, financials weighed on relative performance following the collapse of Silicon Valley Bank (SVB). The healthcare, information technology (IT) and industrials sectors were also notable detractors from performance. Conversely, the real estate sector benefitted the fund.

At the stock level, holding SVB Financial Group (parent of SVB) was unfavourable. The shares fell substantially in the day before trading was suspended and lost most of their remaining value when trading restarted several weeks later, and we subsequently disposed of our position. Ameresco's shares underperformed as the company had to issue additional debt due to a project delay. We sold our position as project delays due to supply shortages were increasingly limiting the company's visibility. Meanwhile, CONMED was negative. It experienced weakness stemming from new competition in the high growth segment of its business in addition to industry-wide concerns that new weight loss drugs will impact demand.

On the other hand, CyberArk Software added to returns as demand for the company's identity access management solutions accelerated after several high-profile hacks. e.l.f. Beauty, which was a new initiation in the second half of the period, was also positive. Its shares outperformed as sales momentum persisted and the company continued its above-category growth. The recent strong earnings release and an increase in guidance also helped its shares. Meanwhile, Onto Innovation contributed to performance as it confirmed a large order for its advanced packaging system, a segment benefiting from demand for artificial intelligence.

Market review

US equities rose strongly over the 12 months to 29 February 2024 in sterling terms.

Growth-focused stocks, such as technology companies, performed particularly well. These stocks were more sensitive to the prospect of monetary tightening coming to an end, and then reversing, because of the favourable effect on their future discounted earnings.

Markets experienced turmoil early in the review period along with increasing interest rates and following the banking sector collapses which led to fears of a recession. However, authorities' actions to stabilise the financial sector restored confidence. Meanwhile, the compromise agreement to suspend the US debt ceiling until January 2025, signed into law in June, removed the risk of a default and boosted investor confidence.

Faced with a relatively robust economy, the US Federal Reserve (Fed) continued to tighten monetary policy in to mid 2023. As a result, the target range for the fed funds

rate reached 5.25–5.50%, a 22-year high, in July 2023. Subsequently, the Fed maintained this rate for the rest of the period. The possibility of interest rates remaining elevated for a longer period weighed on markets during August to October. Additionally, the outbreak of war in the Middle East added to the uncertainty around inflation. Despite a dovish tone in late 2023, the Fed's messaging turned cautious in early 2024 and its Chairman Jerome Powell added that a rate reduction in March 2024 seemed unlikely. Nonetheless, given the sustained fall in the Fed's targeted inflation measure, three rate cuts – as forecast by the Fed's committee members in December's 'dot plot' – could still be possible in 2024. Against this backdrop, US stocks performed well later in the review period.

Portfolio Activity and Review

The fund transitioned during the first half of the review period, from an unconstrained large cap fund to a small- and mid-cap fund. As a result, many of the buys and sells during this period were driven by the reshaping of the portfolio to closely mirror the team's existing small and mid-cap portfolios.

In key portfolio activity during the first half of the period, the fund initiated Merit Medical Systems due to improved financial performance as a result of efforts from its Foundations for Growth programme. We also bought Magnolia Oil & Gas, a high-quality exploration and production company with a conservative balance sheet and focus on positive earnings growth, and Alphatec Holdings, a leading innovator for spinal procedures, which could benefit from positive earnings before interest, tax, depreciation and amortisation as it grows further penetration of lateral procedures in a wider array of indications.

The second half of the period was a busy one in terms of trading activity. The fund initiated Brinker International, a casual dining operator, as the company's focus on improving quality and execution has resulted in improved trends in the business. Also, within the consumer segments, we bought Steven Madden, a designer of footwear, apparel, and accessories. We believe the company's strong operations and clean balance sheet have the potential to continue supporting long-term earnings growth and shareholder-friendly capital allocation policies. We introduced Boot Barn, a leading national retailer in the niche western, country, and workwear market. We liked the company's exposure to footwear and everyday apparel items, which reduce fashion and markdown risk, as well as the potential long unit-growth runway ahead for the company. Meanwhile, we bought The Vita Coco Company, a leading producer of coconut water products, a category benefiting from secular health and wellness tailwinds. We believe the

abrdn North American Small & Mid-Cap Equity Fund (formerly abrdn American Unconstrained Equity Fund)

Continued

company's exposure to growing demographics, as well as its advantaged supply chain, can support sustainable earnings growth. As mentioned earlier in the report, we initiated e.l.f. Beauty, a cosmetic company that offers premium products at an affordable price point.

Elsewhere, in industrials, we initiated MSA Safety, which manufactures and sells safety products. In each of its product categories, MSA is either the market leader or the number two due to its product strength and continuous innovation. We bought Parsons Corporation as the IT services company's wide variety of cyber security solutions, management and design tools, and other offerings make them a provider of choice for the US Government. As budget authorisations continue to accelerate for IT and services, we believe that the firm could perform well. We also introduced The AZEK Company, a manufacturer of composite products for housing applications that is benefiting from the switching from higher maintenance wood products to lower maintenance polyvinyl chloride (PVC)-based products. Vertiv Holdings was another new holding, and we like this manufacturer of colling solutions as it is benefiting from the growth of data centers.

In communication services, we initiated Integral Ad Science Holding, a provider of independent measurement and verification tools for the digital advertisement industry. The company maintains a leading market position in the digital advertising space, an area benefiting from a secular shift from traditional mediums. In healthcare, we introduced Pacira Biosciences, a biotechnology company that specializes in non-opioid pain management therapies, a niche market that we are optimistic about in the coming years. We favour the fact that Pacira has a strong balance sheet, attractive margins and healthy free cash flow unlike most small-cap biotechnology companies. Elsewhere, we bought SM Energy, a high-quality exploration and production company that is growing its inventory in the Midland Basin and South Texas. We think the company has potential to take advantage of the commodity backdrop, which is supportive to higher energy prices.

We initiated WSFS Financial, a regional bank operating in the Delaware and Greater Philadelphia region. We believe that investors underappreciate the company's diverse deposit base and loan portfolio, growing wealth management business and track record of winning market share over time. We also introduced Materion Corporation, a producer of high-performance engineered materials serving multiple end markets, including the semiconductor industry. Lastly we initiated, Doubleverify Holdings, an internet advertisement verification company as continued strong growth expected from the expansion of advertising dollars into social media increases the size of

the market and the need of advertisers to ensure suitability of publishers for their advertisements.

Conversely, we sold Dorman Products, as demand for the company's discretionary products remains uncertain, while increased rates continue to weigh on profitability. We disposed of Burlington Stores due to concerns over the company's ability to execute turnaround plans amid a challenged consumer environment. We also offloaded National Vision Holdings, an eyewear retailer and optical exam provider, as we believe labour constraints could be a structural headwind, affecting both sales and profitability. Meanwhile, we sold SunOpta, a manufacturer of plant-based milks and fruit products, because the category-wide plant-based beverage slowdown, combined with the higher-rate-environment, has pressured earnings growth. We also disposed of Darling Ingredients. The company faced pressure regarding falling renewable diesel margins and fears of overcapacity in the industry. These concerns had been exacerbated by its higher debt position, lower-than-expected operational efficiency and integration challenges on its new acquisitions. We sold WD-40, a manufacturer of multi-purpose lubricants, to fund higher conviction ideas.

Elsewhere, CI Financial was sold over concerns about both the company's ability to monetise its US wealth business and its increasing leverage. We also disposed of First Interstate BancSystem to fund higher conviction ideas. We sold engineered equipment manufacturer Chart Industries since we were less satisfied with the outlook for return on capital. We disposed of The Shyft Group, a manufacturer of truck and van products, as we believe the demand environment for the company's e-commerce van offerings remains muted. We also sold SolarEdge Technologies as we believed the macroeconomic environment could continue to postpone US demand recovery. We offloaded Wolfspeed, a semiconductor material and devices company in favour of more attractive opportunities elsewhere. We sold healthcare stock Cryoport as growth in its commercial services business has disappointed, and we lack conviction in the outlook as cellular therapy growth has been slower than expected. We also disposed of Inmode after the aesthetics device company acknowledged headwinds in leasing rates and approvals for purchases of its equipment by care providers and demand for procedures showed impact from tougher economic conditions. Lastly, we sold Crown Holdings as the growth outlook for aluminium cans looked lower over the coming years.

abrdn North American Small & Mid-Cap Equity Fund (formerly abrdn American Unconstrained Equity Fund)

Continued

Portfolio Outlook and Strategy

US economic growth has been resilient, benefiting from several factors such as unwinding supply-chain pressures, falling energy prices, and higher productivity growth. Despite tighter credit conditions and greatly reduced household savings, the chances of a soft landing versus a mild recession are becoming more balanced as inflation subsides.

Against this backdrop, the outlook for small- and mid-cap stocks remains positive for several reasons. Firstly, small-cap stocks trade at a significant discount compared to their larger counterparts. We expect a broadening out of the market away from the 'Magnificent Seven' as investors grow more confident in the direction of the Fed's rate policy. Moreover, corporate balance sheets are flush with cash, often triggering merger and acquisition activity, with smaller companies historically benefiting as a result. Finally, higher-quality companies continue to be inexpensive relative to lower-quality companies, which is a core investment tenet of the small-cap strategy.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- Equity Risk – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Smaller and Mid Cap Risk – The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.
- Concentration Risk – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector, or closely related group of industries or sectors.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Prices			
Highest share price	220.5	231.1	236.4
Lowest share price	183.3	191.3	184.6

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

Bank and margin interest	63	35
Overseas dividends	437	673
Overseas REIT	26	24
Total revenue	526	732

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	524	639
Dealing charge	5	6
General administration charge	14	16
	543	661
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fee	2	2
	2	2
Total expenses	545	663

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £11,100 (2023: £10,200).

Notes to the Financial Statements

Continued

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	65	100
Total taxation (note 4b)	65	100

(b) Factors affecting total tax charge for the year

The tax assessed for the year is greater than (2023: greater than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

	2024 £'000	2023 £'000
Net (expense)/revenue before taxation	(19)	66
Corporation tax at 20% (2023: 20%)	(4)	13
Effects of:		
Revenue not subject to taxation	(87)	(134)
Overseas taxes	65	100
Overseas tax expensed	(1)	(1)
Excess allowable expenses	92	122
Total tax charge for year (note 4a)	65	100

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £2,355,000 (2023: £2,263,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net expense and distributions)

	2024 £'000	2023 £'000
Distribution	22	50
Add: Income deducted on cancellation of shares	5	7
Deduct: Income received on issue of shares	(2)	(6)
Total distributions for the year	25	51
Movement between net expense and distributions		
Net expense after taxation	(84)	(34)
Shortfall transfer from capital to revenue	109	85
Total distributions for the year	25	51

Details of the distribution per share are set out in this fund's distribution table.

Notes to the Financial Statements

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	25	44
Amounts receivable from the ACD for the issue of shares	-	1
Overseas withholding tax recoverable	1	1
Sales awaiting settlement	-	463
Total debtors	26	509

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	43	47
	43	47
abrdr Liquidity Fund (Lux) - US Dollar Fund Z1 Inc*	1,699	1,045
Net liquidity	1,742	1,092

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	45	47
Accrued expenses payable to the Depositary or associates of the Depositary	3	5
Amounts payable to the ACD for cancellation of shares	179	111
Other accrued expenses	-	5
Total creditors	227	168

9 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure 2024 £'000	Net foreign currency exposure 2023 £'000
Canadian Dollar	3,030	-
Euro	3	4
US Dollar	45,138	53,023
Total	48,171	53,027

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £2,409,000 (2023: £2,651,000).

Notes to the Financial Statements

Continued

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £2,405,000 (2023: £2,624,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Bilateral agreements

All stock lending is conducted by the stock lending agent on behalf of the fund using a standard agreement with available counterparties. It is collateralised daily with a right of recall within 24 hours.

At the balance sheet date the fund had the following positions.

2024 Counterparties	Stock on loan* £'000	Collateral (held)/pledged		Net exposure £'000
		Cash £'000	Stock* £'000	
UBS	87	-	(96)	(9)

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Sterling Corporate Bond Fund

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in Sterling-denominated investment grade corporate bonds.

Performance Target: To exceed the IA Sterling Corporate bond Sector Average return (after charges) over 1 year and be top quartile over rolling three year periods. The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 60% in Sterling denominated investment grade corporate bonds.
- The fund may also invest in bonds issued anywhere in the world by governments and corporations, including sub-sovereigns, sub-investment grade, inflation-linked, convertible, asset backed and mortgage backed bonds. The fund will employ techniques to reduce (hedge) risk related to currency movements on non-Sterling bonds.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to identify bonds and derivatives based on analysis of global economic and market conditions (for example, interest rates and inflation) and analysis of a company's prospects and creditworthiness compared to that of the market.
- In seeking to achieve the Performance Target, the Markit iBoxx Sterling Collateralized & Corporates Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 3%. Due to the active nature of the management process, the fund's profile may deviate significantly from the Markit iBoxx Sterling Collateralized & Corporates Index over the long term.

Please note: The fund's ability to buy and sell bonds and the associated costs can be affected during periods of market stress which could include periods where interest rates move sharply.

Derivatives and Techniques

- The fund will make routine use of derivatives to reduce risk, reduce cost and/or generate extra income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations or governments.

Performance Review

Over the period under review, the fund returned 6.45%. (Source: FactSet, Institutional Accumulation, net of fees). This compared to a return of 5.88% for our performance target. (Source: Morningstar Direct, the IA Sterling Corporate Bond Sector Average).

Neither the Owner nor any other third party sponsors, endorses or promotes the fund or product to which Third Party Data relates.

**abrdn means the relevant member of abrdn group, being abrdn plc together with its subsidiaries, subsidiary undertakings and associated companies (whether direct or indirect) from time to time.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund's credit decisions positively contributed to relative performance, while there was only a minor negative effect from interest-rate positioning. Security selection was beneficial, particularly in collateralised bonds and banks, but marginally detracted in government-related bonds and consumer non-cyclical. Sector allocation slightly detracted; it was most negative in government-related bonds and collateralised bonds, with the main positives being basic materials/industrials and consumer non-cyclical. By credit rating, BBB and A-rated bonds were the leaders, while high yield and AA bonds lagged. By issuer, the largest contributors were WMB Holdings, ANZ Group, Westpac Banking and Lloyds Banking Group. The main

abrdn Sterling Corporate Bond Fund

Continued

detractors were UBS Group, the Government of the UK, Deutsche Bank and Prudential.

Market Review

Corporate bonds had a solid performance over the 12-month period.

Turbulence in the global banking sector in March 2023 caused credit spreads – the yield premium received by investors in return for the typically greater risk of lending to companies rather than governments – to widen to levels last seen in the autumn of 2022. This was largely driven by the collapse of Credit Suisse and concerns around regional banks in the US. However, the negative effect of wider credit spreads was offset by lower government bond yields amid a flight to safety. Nonetheless, a backdrop of sharply rising interest rates, stubbornly high annual inflation and a worsening economic outlook meant that challenging market conditions persisted over April and May.

Calm then returned to corporate bond markets over the next few months. Spreads tightened on growing expectations that global inflation pressures may be peaking. This fuelled investors' hopes that the current cycle of interest-rate rises could be nearing its end and helped corporate bonds to perform better as investors' appetite for riskier assets started to return. As a result, corporate bond markets exhibited strong performance towards the end of the period, with spreads ending significantly lower than where they were before the volatility seen in March 2023. Underlying UK government bond yields also fell, and this, coupled with tightening credit spreads, produced strong total returns from the asset class.

The Bank of England (BoE) announced a further four interest-rate increases over the period, taking its base rate from 3.50% at the start of 2023 to 5.25% by the end of it. Following the 50-basis-point (bp) hike in February, the BoE increased its base rate by a further 25 bps in both March and May, by 50 bps in June and then by 25 bps in August. As a result, UK annual consumer inflation continued to trend downwards over the period. However, it has still remained above the BoE's 2% target, as well as the rates recorded in both the US and eurozone, in part due to elevated food prices. UK annual core inflation in January 2024 stayed flat month on month, coming in at a lower-than-expected 5.1%.

Portfolio Activity and Review

We added to the water sector, which had suffered from negative headlines. There were cheap new issues from Thames Water and Southern Water. We also added to Northumbrian Water and Anglian Water. We reduced United Utilities after strong performance. The fund deployed cash balances that had built up into attractive new deals from US issuer MetLife, as well as topping up bank exposure via senior non-preferred issues from Société Générale and Crédit Agricole.

Meanwhile, we reduced some of the fund's credit exposure. We trimmed some of our real estate holdings, including Hammerson, Workspace and Berkeley Group. We reduced exposure to financials, trimming exposure across the sector from senior to Additional Tier 1 bonds. We also trimmed our holdings in Virgin Money and Athene, a single A insurance company. The fund also cut its exposure to corporate hybrids, selling EDF and Enel, as well as airports and Volkswagen. In addition, the fund took profits in holdings that had performed well, including FirstGroup 2024s and BPCE Tier 2 bonds. These sales were done to increase the fund's liquidity, with the proceeds mainly invested into Gilts to maintain the fund's duration.

Portfolio Outlook and Strategy

While the fundamental backdrop for 2024 remains uncertain, investment-grade credit continues to attract interest. Credit spreads are approaching tight levels on a historic basis. However, at this stage of the cycle, where we are close to renewed economic growth and lower interest rates, that is normal. We expect policy rates to fall in the UK this year, providing comfort to bond buyers. For the time being, the two worst potential scenarios for bonds – deflation (and no rate cuts) or a hard landing (which would be bad for credit markets) – appear to be off the table. We expect heightened yield volatility as we transition to a lower inflation environment and subsequent rate cuts. Sector and security selection remain key at current valuations.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk				
←				→			
1	2	3	4	5	6	7	

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- Credit Risk – The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk – The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- High Yield Credit Risk – The fund invests in high yield bonds which typically carry a greater risk of default than those with lower yields.
- ABS/MBS Risk – Asset and mortgage backed securities are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- Convertible Securities Risk – These investments can be changed into another form upon certain triggers as such they can exhibit risks typically associated with both bonds and equities. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
- Derivatives Risk – The use of derivatives may involve additional liquidity, credit and counterparty risks and may lead to substantial loss and increased volatility in adverse market conditions. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Highest share price	155.2	167.6	178.6
Lowest share price	136.9	126.3	164.5

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

4 Interest Payable and Similar Charges

	2024 £'000	2023 £'000
Derivative expense	-	38
Interest payable	7	4
Total interest payable & similar charges	7	42

5 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Total taxation (note 5b)	-	-

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	13,038	5,026
Corporation tax at 20% (2023: 20%)	2,607	1,005
Effects of:		
Distributions treated as tax deductible	(2,607)	(1,005)
Total tax charge for year (note 5a)	-	-

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

6 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
First interim distribution	3,433	1,420
Second interim distribution	3,904	1,459
Third interim distribution	3,663	1,646
Final distribution	2,832	2,210
	13,832	6,735
Add: Income deducted on cancellation of shares	1,207	87
Deduct: Income received on issue of shares	(586)	(654)
Total distributions for the year	14,453	6,168

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
Movement between net revenue and distributions		
Net revenue after taxation	13,038	5,026
Expenses charged to capital	1,410	1,142
Shortfall transfer from capital to revenue	5	-
Total distributions for the year	14,453	6,168

Expenses taken to capital include the ACD, Registration, Dealing expenses and the General administration charge.

Where deductions are made from capital these may limit the growth in value of the relevant fund. However, more income is generally available to distribute to shareholders.

Details of the distribution per share are set out in this fund's distribution tables.

7 Debtors

	2024 £'000	2023 £'000
Accrued revenue	3,235	3,889
Amounts receivable from the ACD for the issue of shares	27	-
Sales awaiting settlement	373	3,900
Total debtors	3,635	7,789

8 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	2	6
Cash at broker	755	906
	757	912
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	4,280	1,848
Net liquidity	5,037	2,760

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

Notes to the Financial Statements

Continued

9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	147	92
Accrued expenses payable to the Depositary or associates of the Depositary	4	4
Amounts payable to the ACD for cancellation of shares	339	1,091
Other accrued expenses	-	6
Purchases awaiting settlement	632	2,985
Total creditors	1,122	4,178

10 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 9.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 9.

11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Trades in the year				
Bonds	96,017	74,761	153,240	53,977
Inspecie transactions	-	103,101	-	-
Trades in the year before transaction costs	96,017	177,862	153,240	53,977
Total net trades in the year after transaction costs	96,017	177,862	153,240	53,977

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.64% (2023: 0.90%), this is representative of the average spread on the assets held during the year.

13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000

14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
2024				
Currency				
UK Sterling	10,102	189,894	7,228	207,224
Euro	1,039	3,220	(4,705)	(446)
US Dollar	1,414	-	(1,414)	-
Total	12,555	193,114	1,109	206,778

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
2023				
Currency				
UK Sterling	4,823	234,802	15,876	255,501
Euro	-	7,055	(7,094)	(39)
US Dollar	3,841	1,781	(5,631)	(9)
Total	8,664	243,638	3,151	255,453

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

Notes to the Financial Statements

VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

2024	Minimum	Maximum	Average
VaR 99% 1 Month	5.62%	6.84%	6.26%

2023	Minimum	Maximum	Average
VaR 99% 1 Month	4.24%	7.26%	5.64%

At the year end date, there was a 1% chance of the portfolio value falling (or rising) more than 5.65%, £11,538,000 (2023: 6.77%, £17,034,000) in a one month period.

This calculation is generally determined by the use of an industry recognised medium term risk model, typically based on 3–5 year history. The method assumes normal market conditions and that the portfolio remains unchanged.

Counterparty risk

Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

2024	Market value £'000	Percentage of total net assets %
Investment grade securities	186,498	90.20
Below investment grade securities	10,817	5.22
Unrated securities	3,317	1.61
Total value of securities	200,632	97.03

2023	Market value £'000	Percentage of total net assets %
Investment grade securities	229,856	89.98
Below investment grade securities	17,517	6.86
Unrated securities	2,652	1.03
Total value of securities	250,025	97.87

Investment grade information used in the above table is based on credit ratings issued by market vendors.

Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

Notes to the Financial Statements

Continued

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
Leveraged instruments				
Forward currency contracts	18,318	48	16,102	108
Futures	22,538	150	23,383	161
Swaps	8,555	(762)	8,000	(483)
Total market exposure	49,411	(564)	47,485	(214)

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Broker or exchange exposure					
Goldman Sachs	150	755	-	905	0.44
	150	755	-	905	0.44

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Broker or exchange exposure					
Goldman Sachs	161	907	-	1,068	0.42
	161	907	-	1,068	0.42

Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn UK Ethical Equity Fund

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in UK equities (company shares) which adhere to the abrdn UK Ethical Equity Investment Approach.

Performance Target: To achieve the return of the FTSE All-Share Index, plus 2% per annum over rolling five year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated, or domiciled in the UK or companies that derive a significant proportion of their revenues or profits from UK operations or have a significant proportion of their assets there.
- All investments will adhere to the abrdn UK Ethical Equity Investment Approach available on www.abrdn.com under "Fund Centre".
- The fund may also invest in other funds (including those managed by abrdn), money-market instruments, and cash.
- The fund will invest at least 70% in companies that the abrdn ESG House Score quantitatively identifies as having preferred ESG characteristics in a global context in accordance with the abrdn UK Ethical Equity Investment Approach. This analysis covers areas such as human rights, labour rights, environmental safeguards and combating bribery and corruption.
- The approach utilises abrdn's equity investment process, where companies invested in are given an overall quality rating, a component of which is the ESG Quality Rating which enables the management teams to qualitatively identify and avoid ESG laggards.
- As part of the approach the fund applies a set of company exclusions which are related but not limited to animal testing, weaponry, pornography, gambling, tobacco and alcohol.

Management Process

- The fund management team use their discretion (active management) to maintain a diverse asset mix at sector and stock level.

- Their primary focus is on stock selection using research techniques to select individual companies where the management team have a different view than that of the market, and which align with their views regarding future economic and business conditions.
- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies in order to inform portfolio construction.
- Through the application of the abrdn UK Ethical Equity Investment Approach the fund is expected to have a lower carbon intensity than the FTSE All-Share Index.
- This approach reduces the benchmark investable universe by a minimum of 20%.
- In seeking to achieve the Performance Target, the FTSE All-Share Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 12%. Due to the ethical nature of the management process, there are a material number of stocks and sectors in the FTSE All-Share Index that the fund is unable to invest, which means the fund's performance profile may deviate significantly from that of the FTSE All-Share Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned 0.53% (Source: FactSet, Institutional Accumulation, net of fees). This compared with a return of 2.46% in the performance target (Source: FactSet, the FTSE All-Share Index +2%).

abrdn UK Ethical Equity Fund

Continued

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The financials, technology and industrials sectors were particular areas of weakness in the fund, although the above-index positioning in technology and industrials proved positive, as did the absence of exposure to the basic materials sector, which was one of the softest in the period.

At the stock level, Close Brothers Group declined due to cost pressures in its asset management business and concerns over the risk of sizeable customer redress following the announcement of a Financial Conduct Authority Consumer Duty review of motor finance lending practices before 2021. The holding in Keywords Studios also weighed on returns with the company's shares falling on concerns that artificial intelligence technology could disrupt its testing, support and games development businesses. Other detractors included above-index positions in insurance and financial services provider Prudential as well as professional information technology services provider FDM Group. Our lack of exposure to Rolls-Royce Holdings also hurt relative performance.

On the plus side, our overweight positions in Intermediate Capital, a private equity investor, and data analytics group RELX proved especially beneficial as the shares in both performed well. Genuit Group's shares rallied as the prospect of rate cuts increased risk appetite among investors and Hollywood Bowl made gains after the company reported it was trading ahead of expectations, with an acceleration in like-for-like sales growth. Our lack of exposure to Anglo American, British American Tobacco, BP and AstraZeneca all proved beneficial to relative performance as they all lagged the market.

Market Review

The UK stock market, as represented by the FTSE All-Share Index, rose over the period. The FTSE 100 Index, which consists mainly of large, multinational companies made modest gains although it underperformed markets in the US and Europe due to weakness in oil and commodity prices. Meanwhile, the FTSE 250 Index, which contains mid-sized companies typically more focused on the domestic UK economy, dropped back slightly due to concerns about the prospects for the British economy. In the first six months of the period, market sentiment was affected by persistently high inflation and rising interest rates. The Bank of England (BoE) announced a further five interest rate increases, taking its base rate from 3.50% at the start of 2023 to 5.25% by the end of the year. The

collapse of US-based Silicon Valley Bank and a loss of confidence in Switzerland's Credit Suisse also caused volatility although financial regulators intervened swiftly to avert a more serious crisis.

In the second half, inflation eased more rapidly and mortgage rates also began to drop. The BoE halted its monetary tightening policy and, towards the end of the period, Governor Andrew Bailey indicated the next move in interest rates would be downwards. That provided a boost to UK equities, although official data showed the UK economy declined by 0.3% in the final three months of 2023, putting the country into a technical recession. There were declines in both business activity and confidence in the second half, particularly in the construction sector which is vulnerable to high interest rates. More broadly, sentiment was affected by tensions in the Middle East and concerns about the impact on global trade of Houthi attacks in the Suez Canal.

Portfolio Activity and Review

In terms of portfolio activity, the fund initiated several new positions over the 12-month period, including Telecom Plus, a utility provider which has the potential for sustained high growth, and Spirax-Sarco Engineering, a specialist in thermal energy management and niche pumping systems that we have admired for some time. We also introduced a position in the diversified automotive distributor Inchcape, which has strong relationships with original equipment manufacturers.

Over the period, we topped up a number of existing positions, including technology company Kainos Group after the shares dropped on concerns of slowing demand. We also added to Oxford Instruments and Hargreaves Lansdown on weakness and supported capital raises at Sirius Real Estate and Molten Ventures, as both sought to capitalise on investment opportunities in their respective markets. In order to fund this activity, we exited building materials company Grafton Group and food-on-the-go provider Greggs, where we viewed valuations as increasingly full. We added capital to utility SSE, funded by reducing the holding in National Grid as we felt the valuation and balance sheet position of SSE presented a more compelling opportunity to capitalise on the huge investment needed to transition the UK power grid to greener energy. We also cut back our holdings in Bellway, Diploma, Howden Joinery, Lloyds Banking Group, RELX and Intermediate Capital.

Several positions were fully exited, including Marshalls, where weak trading coupled with debt in the wake of an ill-timed acquisition raised the risk levels. We also exited Coca-Cola HBC following share-price strength in

abrdn UK Ethical Equity Fund

Continued

the recent inflationary environment which had reduced the upside. The company continues to run significant operations in Russia and this brings geopolitical risks.

Other exits included Spectris, Unite, Marks & Spencer, Drax Group, Grainger, Workspace Group, Instem, IMI, Porvair and Redrow.

Portfolio Outlook and Strategy

There has been some positive news in the UK with regard to interest rates and inflation prints, but there do remain challenges to economic growth in many areas of the world. We are also in a year full of elections, and with geo-political clashes ongoing. However, the outlook for UK consumer spending is arguably improving, with inflation seemingly past its worst, continued wage rises helping affordability and ongoing resilience in the labour market. The Asda Income tracker shows encouraging improvements, and consumers willingness to spend on areas like travel and leisure is clear in company reporting. Whilst the headlines may state a technical recession, it certainly doesn't feel that way on the ground looking at how companies are trading.

There are challenges for some businesses, with destocking and delayed decision-making in some industries driving a more challenging short term for businesses. But the overall message is one of companies continuing to navigate well, and looking to drive earnings growth. Shares are responding to fundamentals and reporting, both in an upwards and downwards direction. Avoiding earnings downgrades is likely to continue to be an important driver of performance. This supports our long-term focus on those company-specific fundamentals. We've also seen more of a focus on some quality dynamics by the market, reflective of the challenges still out there at a macro level and the sharp downward reactions shares have taken to disappointments.

We remain focused on bottom-up stock picking, examining prospects on a company-by-company basis over the fund's three- to five-year investment horizon. The focus is on finding businesses within the acceptable universe defined by the fund's ethical policy, which are well positioned for growth, and have resilient earnings streams and underappreciated business models.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- **Equity Risk** - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **ESG Investment Risk** - Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in assets which similar funds do not (and thus perform differently) and which may not align with the personal views of any individual investor.
- **Concentration Risk** - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Derivatives Risk** - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Lowest share price	155.3	145.5	179.1

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

UK REIT	75	204
Total revenue	8,059	8,018

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	1,682	2,011
Dealing charge	46	53
General administration charge	127	157
	1,855	2,221
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fee	6	7
	6	7
Total expenses	1,861	2,228

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £11,100 (2023: £10,200).

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	19	16
Total taxation (note 4b)	19	16

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
(b) Factors affecting total tax charge for the year		
The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:		
Net revenue before taxation	6,195	5,788
Corporation tax at 20% (2023: 20%)	1,239	1,158
Effects of:		
Revenue not subject to taxation	(1,575)	(1,547)
Overseas taxes	19	16
Excess allowable expenses	336	389
Total tax charge for year (note 4a)	19	16

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £7,924,000 (2023: £7,588,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions

	2024 £'000	2023 £'000
Distribution	4,903	5,107
Add: Income deducted on cancellation of shares	1,345	864
Deduct: Income received on issue of shares	(72)	(199)
Total distributions for the year	6,176	5,772

Details of the distribution per share are set out in this fund's distribution table.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	148	128
Amounts receivable from the ACD for the issue of shares	16	14

8 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 7.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 7.

11 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

Total investment assets	177,383	-	-	235,032	-	-

12 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £8,869,000 (2023: £11,752,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £820,000 (2023: £1,229,000).

Distribution Table

For the year ended 29 February 2024 (in pence per share)

Final dividend distribution

Group 1 – shares purchased prior to 1 March 2023

Group 2 – shares purchased between 1 March 2023 and 29 February 2024

	Revenue	Equalisation	Distribution paid 30/04/24	Distribution paid 28/04/23
Retail accumulation				
Group 1	4.3258	-	4.3258	3.1614
Group 2	2.0146	2.3112	4.3258	3.1614
Institutional accumulation

Institutional A accumulation				
Group 1	-	-	-	0.9872
Group 2	-	-	-	0.9872
Platform 1 accumulation				
Group 1	3.2039	-	3.2039	2.4473
Group 2	1.5460	1.6579	3.2039	2.4473
Platform 1 income				
Group 1	1.7567	-	1.7567	1.3711
Group 2	0.5463	1.2104	1.7567	1.3711
ZC accumulation				
Group 1	8.6291	-	8.6291	6.9348
Group 2	4.0778	4.5513	8.6291	6.9348

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn UK Government Bond Fund

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in UK Government bonds.

Performance Target: To achieve the return of the FTSE Actuaries UK Conventional Gilts All Stocks Index plus 0.5% per annum (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA UK Gilt Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 80% in government bonds issued or guaranteed by the UK Government.
- The fund may also invest in investment grade bonds issued anywhere in the world by governments, sub-sovereigns and corporations including inflation-linked bonds. The fund will employ techniques to reduce (hedge) risk related to currency movements on non-Sterling bonds.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to identify investments after analysing global economic and market conditions (for example, interest rates and inflation) in addition to analysing of individual bonds and derivatives.
- In seeking to achieve the Performance Target, the FTSE Actuaries UK Conventional Gilts All Stocks Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 1.5%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the FTSE Actuaries UK Conventional Gilts All Stocks Index over the longer term.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives can be used to generate growth, consistent with the fund's risk profile, if market prices are expected to rise ("long positions") or fall ("short positions").
- These positions can be used in overseas markets.
- Derivatives include instruments used to manage expected changes in interest rates, inflation, currencies or creditworthiness of corporations or governments.

Performance Review

Over the review period, the fund returned 0.23% (Source: FactSet, Institutional Accumulation Shares). This compared to a return of 1.56% for our performance target (Source: FactSet, FTSE Actuaries UK Conventional Gilts All Stocks Index +0.5%).

Source: FactSet, Basis: total return, published NAV to NAV, net of annual charges, UK net income reinvested, GBP.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

Market Review

The review period was a volatile one for government bonds while global central banks, including the Bank of England (BoE), continued their hawkish stances to combat high inflation levels.

In March 2023, the collapse of two regional US banks and the forced sale of Credit Suisse to rival UBS evoked fears of a banking crisis and initially led to a rally in global yields. However, these concerns were then appeased by swift regulatory intervention. Overall, yields ended the first quarter of 2023 lower. In March, the BoE raised interest rates by 25 basis points (bps). On the fiscal side of the ledger, UK Chancellor Jeremy Hunt delivered his first spring budget. From a Gilt market perspective, the budget confirmed the Gilt funding remit for the fiscal year.

abrdn UK Government Bond Fund

Continued

Although the figure was materially down from the October 2022 forecast, the level of Gilt supply was still high.

Higher core inflation and better economic data provided a hostile backdrop for government bonds in the second quarter of 2023. The UK was the standout underperformer; 10-year Gilt yields rose by around 90 bps in the three months to end June. While bonds were weak across the board, front-end rates came under even more pressure. Curves flattened aggressively in the face of increased threats of rate hikes from central banks. Contributory factors for the sharp re-pricing in global bonds included sticky inflation and accelerating wage growth. The BoE increased its base rate twice over the period, hiking it by 25 bps in May and 50 bps in June.

'Higher for longer' dominated central bank rhetoric across much of the third quarter. We witnessed a flurry of 25-bp interest-rate hikes, which were widely signalled to be the last of the cycle, in the absence of further shocks. Near-term rate cuts were increasingly being priced out of market expectations. Sovereign bonds were weak; at a headline level, 10-year bond yields in the US rose by 74 bps, Germany rose by 45 bps and the UK by a mere 5 bps. The BoE's Monetary Policy Committee (MPC) hiked only once in the quarter, taking base rates to 5.25%. Despite strong falls in headline inflation figures, core inflation (excluding food and energy) remained relatively resilient. Accordingly, the MPC was explicit in its desire to keep rates high for an extended period of time, employing the analogy of 'Table Mountain' as its desired path. Purchasing Managers' Index (PMI) data pointed to significant pessimism regarding the UK's growth prospects, though this was somewhat offset by positive real income growth.

The onset of hostilities in the Middle East led to significant market uncertainty at the beginning of October and the fourth quarter of 2024. Fears of escalation and rising oil prices plagued the economic landscape. Meanwhile, 10-year Gilt yields rose by seven bps over the month. In November, the Gilt market was strong across the curve; yields fell by 37 bps at the two-year point and by 57 bps at the 10-year point. As widely anticipated, the BoE held rates at 5.25% in the November meeting, with a 6-3 vote delivering a somewhat hawkish tone. But while the central bank continued to deliver cautious messaging, the market shifted towards a consensus that the interest rate-hiking cycle was over. Finally, during December, Gilts outperformed their European counterparts. Once more, the BoE held interest rates at 5.25%, while reiterating its prior messaging of "sufficiently restrictive for sufficiently long". While the tone was perhaps more hawkish than the market had expected, the messaging was essentially unchanged. Inflation concerns were aired, and Governor Bailey stated that there was "still some way to go" to curb

UK inflation. He added that "further tightening in monetary policy would be required if there were evidence of more persistent inflationary pressures".

UK annual core inflation in January 2024 stayed flat month on month, coming in at a lower-than-expected 5.1%. However, it remained above the BoE's 2% target. The BoE was the only major central bank to meet in February 2024 and held rates unchanged. Growth data for the final quarter of 2023 showed that the UK fell into recession, with GDP contracting by 0.3%, although BoE officials said that data has shown an improvement in 2024. The Consumer Price Index inflation reading for January showed prices rising by 4.0% year on year, while annual core inflation was recorded at 5.1%; both figures were below analysts' estimates. Market prices suggested that the first BoE rate cut might come in June.

Portfolio Activity and Review

Given the volatility in early 2023, the fund started March 2023 with a flexible approach to duration management. Positive strategies included a US curve steepener – long 2s vs 10s – where the fund held the trade at the beginning of the period and took profits in March, and then entered the trade again in June. The other strategy that contributed to relative returns was the long cross-market Australia position, while Australia continued to be our favoured long. We held the position versus the UK at the start of the period and then re-entered versus the US at the end of the period.

On the other hand, the long UK Gilts versus German Bunds strategy detracted from returns. The surprise stickiness of UK inflation in May and June saw UK Gilts materially underperform in cross-market pairing.

UK forward-looking data started to turn as the aggressive monetary policy tightening enacted by the BoE since December 2021 was finally having an impact. The difficulty for the BoE was that the more backward-looking data was still looking uncomfortably high. The key data sets watched by the BoE are private sector wages and services inflation. For the BoE to stop hiking they would need to see these two data sets start to recede.

As a result of this development, the fund went long UK duration. Gilts underperformed dramatically over the summer months due to the narrative that UK inflation was out of control. We believed that narrative was incorrect and were therefore happy to hold UK duration.

As the fund headed into the third quarter, the two key positions for the fund were long duration and steeper curves. The fund went into the period holding a long duration bias, and this worked against it initially. As yields continued to rise in October, we felt the move was

abrdrn UK Government Bond Fund

Continued

overdone and therefore started to increase position sizing. The fund held long positions across Germany, US and UK in both the 5 and 10-year part of the curve. In November, the fund added a very front-end position in the UK by buying December 2025 Sonia futures. As yields went higher in November and December, the fund started to take profits and ended the calendar year neutral. In January, the fund added a short duration position, on the view that markets had gone too far and early January supply would weigh on yields. Yields indeed went higher and the fund then took profits. Finally, the fund finished the period by adding back a long duration position in US treasuries.

The other key theme for the fund over the period was curve steepening. In August and September, the fund held US and UK 2 vs 10s steepeners. We then took profits on the UK and US curve position. The fund went back into US curve steepeners in November, subsequently taking profits in early January.

A further contributor of performance came from the cross market positioning. In the early months of the period, the fund was long Australia versus US and this strategy worked well, while the Fund took profits in September and October. Later in December, the fund started to oppose the under-performance of 30-year UK Gilts versus German Bunds, a strategy that worked well into year end, but acted as a small drag on performance in January.

As we headed into the new calendar year, we felt that global yields had moved too far and we therefore moved tactically short. Meanwhile, yields moved higher and the fund took profits. We now feel that yields are largely rangebound, and where we believe value lies is in the divergence between Europe and UK versus the US. We are therefore positioned long UK and Europe versus the US.

Finally, the fund continued to be active in Gilt relative strategies.

Portfolio Outlook and Strategy

Recent conditions have been frustrating for investment managers. Economic data continues to surprise to the upside and economic forecasts have seen significant revision. Accordingly, holding any longer-term strategic trades has proven difficult. Prices in government bond markets have been particularly volatile. There have been many false dawns, for both bond bulls and bears.

It is now a question of when – not if – the BoE cuts rates. Elsewhere, the first major political event of the year was the budget, which took place on 6 March 2024. On the political front, the UK will go to the polls this year – Prime Minister Sunak was eager to talk down the chances of a Spring election. With the widening chasm between Labour

and the Tories in the polls, Sunak will need as much time as possible if he is to salvage a (very unlikely) win.

Beyond domestic factors, several global events could significantly impact government bond markets. Geopolitical tensions, particularly those that disrupt energy supplies or global trade, can trigger risk aversion and flight-to-safety behaviour. This could potentially lead investors to seek the relative stability of government bonds, driving prices up and yields down. Conversely, a global economic slowdown could dampen inflation expectations, causing bond yields to decline. Additionally, policy decisions by major central banks around the world, especially the US Federal Reserve, can influence global interest rates and, by extension, impact the demand for UK Gilts.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk			Typically higher rewards, higher risk			
←						→
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- Credit Risk - The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- Interest Rate Risk - The fund invests in securities which can be subject to price fluctuation for a variety of reasons including changes in interest rates or inflation expectations.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks and may lead to substantial loss and increased volatility in adverse market conditions. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

4 Interest Payable and Similar Charges

	2024 £'000	2023 £'000
Derivative expense	-	27
Interest payable	1	1
Total interest payable & similar charges	1	28

5 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Total taxation (note 5b)	-	-

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	5,782	809
Corporation tax at 20% (2023: 20%)	1,156	162
Effects of:		
Distributions treated as tax deductible	(1,156)	(162)
Total tax charge for year (note 5a)	-	-

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end there are no surplus expenses and therefore no deferred tax asset in the current or prior year.

6 Distributions

	2024 £'000	2023 £'000
Interim distribution	2,785	319
Final distribution	3,112	498
	5,897	817
Add: Income deducted on cancellation of shares	455	21
Deduct: Income received on issue of shares	(570)	(29)
Total distributions for the year	5,782	809

Details of the distribution per share are set out in this fund's distribution tables.

7 Debtors

	2024 £'000	2023 £'000
Accrued revenue	1,417	284
Amounts receivable from the ACD for the issue of shares	13	19
Expenses reimbursement receivable from the ACD	1	1
Sales awaiting settlement	-	218
Total debtors	1,431	522

8 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	363	1
Cash at broker	406	343
	769	344
abrdrn Liquidity Fund (Lux) – Sterling Fund Z1 Inc*	2,077	321
Net liquidity	2,846	665

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle and commonly reflects collateral held by the fund. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

9 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	55	8
Accrued expenses payable to the Depositary or associates of the Depositary	4	5
Amounts payable to the ACD for cancellation of shares	642	29
Other accrued expenses	-	6
Purchases awaiting settlement	-	395
Total creditors	701	443

Notes to the Financial Statements

10 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrtn Fund Managers Limited at the end of the accounting year are disclosed in notes 7 and 9.

Amounts payable to abrtn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 9.

Amounts receivable from abrtn Fund Managers Limited in respect of subsidised fees are disclosed in notes 1 and 3 and any amounts due at the year end in note 7.

11 Portfolio Transaction Costs

There are no transaction costs associated with the purchases or sales of bonds and derivatives during the year, or in the prior year.

Bonds are dealt on a spread agreed between buyer and seller with reference to the expected cashflows and current credit profiles.

Derivatives are dealt on a spread agreed between buyer and seller with reference to the underlying investment.

	Purchases		Sales	
	2024 £'000	2023 £'000	2024 £'000	2023 £'000
Trades in the year				
Bonds	193,281	75,663	219,076	75,246
Inspecie transactions	124,887	-	-	-
Trades in the year before transaction costs	318,168	75,663	219,076	75,246
Total net trades in the year after transaction costs	318,168	75,663	219,076	75,246

At the balance sheet date the average portfolio dealing spread (i.e. the spread between bid and offer prices expressed as a percentage of the offer price) was 0.07% (2023: 0.15%), this is representative of the average spread on the assets held during the year.

13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Bonds	142,584	7,088	-	51,975	2,597	-

Total investment liabilities	(161)	(2)	-	(16)	(429)	-

14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Notes to the Financial Statements

Continued

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
2024				
Currency				
UK Sterling	2,840	149,672	483	152,995
Australian Dollar	4	-	-	4
Canadian Dollar	-	-	(9)	(9)
Euro	2	-	5	7
US Dollar	-	-	(1)	(1)
Total	2,846	149,672	478	152,996
2023				
Currency				
UK Sterling	438	54,572	(71)	54,939
Australian Dollar	(74)	-	70	(4)
Euro	25	-	(25)	-
US Dollar	-	-	(1)	(1)
Total	389	54,572	(27)	54,934

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

VaR

The table below indicates the VaR of the fund, measured as the maximum one-month loss in value from adverse changes in market risk factors (e.g. equity prices, interest rates, inflation rates and foreign currency exchange rates) that is expected with a 99 percent confidence level. Calculated on this basis, the VaR indicates that the net value of the fund could be expected to fall over a one-month period by more than the corresponding VaR in 1% of cases, assuming the fund does not alter its positioning over that period.

Notes to the Financial Statements

Continued

2024	Minimum	Maximum	Average
VaR 99% 1 Month	7.00%	8.39%	7.48%

2023	Minimum	Maximum	Average
VaR 99% 1 Month	5.05%	8.69%	6.70%

At the year end date, there was a 1% chance of the portfolio value falling (or rising) more than 7.02%, £10,647,000 (2023: 7.94%, £4,334,000) in a one month period.

This calculation is generally determined by the use of an industry recognised medium term risk model, typically based on 3–5 year history. The method assumes normal market conditions and that the portfolio remains unchanged.

Counterparty risk

Credit quality of debt security investment assets

The following table shows the credit quality of the part of the investment portfolio that is invested in debt securities.

	Market value £'000	Percentage of total net assets %
2024		
Investment grade securities	149,672	97.83
Below investment grade securities	-	-
Unrated securities	-	-
Total value of securities	149,672	97.83

	Market value £'000	Percentage of total net assets %
2023		
Investment grade securities	54,403	99.03
Below investment grade securities	-	-
Unrated securities	169	0.31
Total value of securities	54,572	99.34

Investment grade information used in the above table is based on credit ratings issued by market vendors.

Financial derivatives instrument risk

These types of transaction can introduce market exposure greater than the market value of the instrument. These transactions exchange benefits with a third party at a future date creating both counterparty and concentration risk. The Investment Adviser's policies for managing these risks are outlined in the fund's prospectus.

Notes to the Financial Statements

Continued

At the balance sheet date the fund had the following exposures:

	2024		2023	
	Market exposure £'000	Market value £'000	Market exposure £'000	Market value £'000
Leveraged instruments				
Forward currency contracts	1,486	2	727	(2)
Futures	22,435	(30)	10,436	(11)
Swaps	-	-	20,991	(276)
Total market exposure	23,921	(28)	32,154	(289)

The total market exposure is the sum of the notional derivative contracts on a gross basis with no offsetting.

The fund uses the commitment method to calculate global exposure. Leverage is not significant in this context.

Counterparty risk

Where the fund enters market transactions this creates concentration risk where a clearing broker operates on an exchange. Where the clearing broker is not solvent the market exposure can be transferred. Exposure is reduced by the daily exchange of margin by both parties held in the name of the depositary. At the year end the fund had the following clearing broker exposure.

2024	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Broker or exchange exposure					
Goldman Sachs	(30)	406	1	377	0.25
	(30)	406	1	377	0.25

2023	Market value of derivatives £'000	Market value of cash £'000	Market value of stock £'000	Total £'000	Percentage of total net assets %
Broker or exchange exposure					
Goldman Sachs	(287)	342	301	356	0.65
	(287)	342	301	356	0.65

Bilateral agreements

Where the fund enters bilateral agreements this introduces counterparty risk. Where a counterparty defaults on their obligation, exposure is reduced by the collateral held/pledged by both parties.

Certain derivatives are conducted on a master ISDA (International Swaps and Derivatives Association) agreement. Positions are collateralised daily in line with the agreement including a right of termination at fair value and a right of recall/substitution on any stock collateral within 24 hours.

At the balance sheet date the fund had the following positions.

2024	Collateral (held)/pledged			Net exposure £'000
	Forwards £'000	Cash £'000	Stock £'000	
Counterparties				
Goldman Sachs	2	-	-	2

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital.

Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn UK Smaller Companies Fund

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in UK small-capitalisation equities (company shares).

Performance Target: To achieve the return of the Deutsche Numis Smaller Companies Plus AIM ex Investment Companies Index plus 3% per annum (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA UK Smaller Companies Equity Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 60% in small-capitalisation equities and equity related securities of companies listed, incorporated, or domiciled in the UK or companies that derive a significant proportion of their revenues or profits from UK operations or have a significant proportion of their assets there.
- Small capitalisation companies are defined as any stock having a market cap less than the 10th percentile stock of the overall UK equity market.
- The fund may also invest up to 40% in mid and larger capitalisation companies listed, incorporated or domiciled in the UK.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and stock level.
- Their primary focus is on stock selection using the management team's quality, growth and momentum approach. It aims to identify companies that exhibit a range of high quality characteristics, operate in growing markets and display positive business momentum.
- In seeking to achieve the Performance Target, the Numis Smaller Companies Plus AIM ex Investment Companies Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index, should not exceed

10%. Due to the active nature of the Investment process, the fund's performance profile may deviate significantly from that of the Numis Smaller Companies Plus AIM ex Investment Companies Index.

Please note: The fund's ability to buy and sell small and mid-capitalisation shares and the associated costs can be affected during periods of market stress. In certain circumstances investors in the fund may not be able to sell their investment when they want to.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned -3.35% (Source: FactSet, Institutional Accumulation, net of fees). This compared to a return of -3.02% for our performance target (Source: FactSet, the Deutsche Numis Smaller Companies Plus AIM ex Investment Companies Index +3%).

abrdn UK Smaller Companies Fund

Continued

The fund's performance was almost in line with the performance target over the period. From a stock perspective, the main contributors included Ashtead Technology whose stock rose as investors welcomed an impressive trading update at the end of the third quarter and the acquisition of a leading offshore energy infrastructure company in Scotland. Hollywood Bowl Group's stock was lifted by news that the company was trading ahead of expectations with good sales growth confirming that bowling has remained popular despite the pressures on disposable incomes caused by inflation. Bytes Technology Group also made gains in the wake of a positive earnings update as it benefits from the growth of AI and Microsoft's expansion in cloud computing. The company is planning to pay a special dividend thanks to strong trading momentum and a confident outlook. Late in the period the shares dropped back on the news that the CEO had resigned after making undisclosed trades in the company's stock.

Our overweight position in infrastructure play Hill & Smith proved positive as its shares advanced thanks to a strong interim trading report and indications that the company's strategy of boosting its earnings by acquiring growing businesses is paying off. The fund also benefited from holding Smart Metering Systems after the firm's board recommended a cash takeover offer from private-equity company KKR. Marketing firm 4imprint Group was another strong performer as it published more good results and a special dividend. Some of the gains were reversed later in the period after reports from the management team that short-term demand had weakened due to the more cautious US macroeconomic environment.

Our exposure to video game developer Team17 proved to be the largest individual detractor after the company issued an unexpected profit warning. We subsequently exited the position. Our holdings in the Industrials sector were also among the largest detractors. Shares in power control systems manufacturer XP Power fell after it was forced to lower its profit forecast and suspend its dividends. We subsequently exited the position. Our holding in DiscoverIE Group was also negative despite the company issuing a trading statement that was in line with investor expectations. The main cause was a negative read-across from other electronics names.

Elsewhere, Big Technologies weighed on performance after it indicated that growth would be lower in 2023 due to adverse contract timings, and Future's stock declined as investors reacted negatively to news of a significant investment programme by the company to reposition the business. Earnings downgrades due to increased investment levels hit our holding in Impax Asset Management Group.

Market Review

UK smaller company stocks were volatile over the period and slightly underperformed their large-cap peers, mainly due to concerns about the weakness of the British economy early in 2024. In the first six months market sentiment was affected by persistently high inflation and rising interest rates. The Bank of England (BoE) announced a further five interest rate increases, taking its base rate from 3.50% at the start of 2023 to 5.25% by the end of the year. The collapse of US-based Silicon Valley Bank and a loss of confidence in Switzerland's Credit Suisse also caused volatility although financial regulators intervened swiftly to avert a more serious crisis.

Inflation fell faster than expected in the second half and mortgage rates began to ease down as well. The clear downward trend in inflation finally led the BoE to halt its monetary tightening policy and, towards the end of the period, Governor Andrew Bailey indicated the next move would be downwards. He added that UK inflation was on course to fall to its 2% target in the first half of 2024, before rising again later in the year. Official data showed the UK economy had shrunk by 0.3% in the final three months of 2023, putting the country into a technical recession. There were declines in both business activity and confidence in the second half, particularly in the construction sector which is vulnerable to high interest rates. More broadly, sentiment was affected by tensions in the Middle East and concerns about the impact on global trade of Houthi attacks in the Suez Canal.

Portfolio Activity and Review

We introduced several new positions to the fund in the period. Johnson Service Group is a textile rental and related services business that has higher organic growth and margins than its peers. The firm's investment strategy has helped to widen its competitive advantage. Airline Jet2 is poised to benefit from robust demand for holidays while shipping company Clarkson is a global leader in shipping services, using insights from its leading position to facilitate the arteries of global trade, and investing to support the decarbonisation agenda. Alpha Group International is a leading non-bank provider of financial solutions dedicated to corporates. Engineering group Ricardo is a business truly transformed having followed a strategy laid out years ago. The new CEO has been key to driving that, but there is still a lot more the company can do, especially on cross-selling and driving organic growth and bolt-on acquisitions. Food manufacturer Premier Foods has made considerable progress in the last five years and the momentum should be sustained by its well-defined domestic and international opportunities, as well as the firm's record in innovation and execution. Chemring Group is a defence

abrdn UK Smaller Companies Fund

Continued

business which benefits from good cash conversion, while the quality of its order book is underpinned by strong, long-term customer relationships. We also took new positions in property businesses Cairn Homes and Morgan Sindall, along with Renew, an engineering services firm, advisory service XPS Pensions Group and power equipment manufacturer Volex.

Conversely, we exited both GB Group and Focusrite over a lack of visibility on end-market recovery. Other sales in the period included Watches of Switzerland Kin & Carta, Marshalls, Safestore, Ergomed and Kainos.

Portfolio Outlook and Strategy

There has been some positive news in the UK with regard to interest rates and inflation prints, but there do remain challenges to economic growth in many areas of the world. We are also in a year full of elections, and with geo-political clashes ongoing. However, the outlook for UK consumer spending is arguably improving, with inflation seemingly past its worst, continued wage rises helping affordability and ongoing resilience in the labour market. The Asda Income tracker shows encouraging improvements, and consumers willingness to spend on areas like travel and leisure is clear in company reporting. Whilst the headlines may state a technical recession, it certainly doesn't feel that way on the ground looking at how companies are trading.

The portfolio continued to demonstrate strong and resilient earnings growth, and we've seen another pleasing reporting season. There are challenges for some businesses, with destocking and delayed decision-making in some industries driving a more challenging short term for businesses. But the overall message is one of companies continuing to navigate well and looking to drive earnings growth. Shares are responding to fundamentals and reporting, both in an upwards and downwards direction. Avoiding earnings downgrades is likely to continue to be an important driver of performance. This supports our long-term focus on those company-specific fundamentals. We've also seen more of a focus on some quality dynamics by the market, reflective of the challenges still out there at a macro level and the sharp downward reactions shares have taken to disappointments. This supports the quality focus within our investment process, and earnings resilience has been a key theme for us which has helped support that resilience of earnings and also earnings growth.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 29 February 2024.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- **Equity Risk** – The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Smaller and Mid Cap Risk** – The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.
- **Concentration Risk** – A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Derivatives Risk** – The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Highest share price	499.9
Lowest share price	428.5

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

^A Z Accumulation share class was launched on 23 June 2023.

^B The opening net asset value stated is the share class launch price.

Notes to the Financial Statements

1 Net Capital Losses

	2024 £'000	2023 £'000
Non-derivative securities	(74,226)	(393,933)
Transaction charges	(13)	(11)
Net capital losses	(74,239)	(393,944)

2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	2,485	1,601
Overseas dividends	-	342
UK dividends	28,960	24,626
UK REIT	619	836
Total revenue	32,064	27,405

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	7,634	10,357
Dealing charge	189	243
General administration charge	767	999
	8,590	11,599
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fee	26	32
	26	32
Total expenses	8,616	11,631

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £11,100 (2023: £10,200).

Notes to the Financial Statements

Continued

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Total taxation (note 4b)	-	-

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	23,428	15,774
Corporation tax at 20% (2023: 20%)	4,685	3,155
Effects of:		
Revenue not subject to taxation	(5,791)	(4,994)
Excess allowable expenses	1,106	1,839
Total tax charge for year (note 4a)	-	-

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £31,835,000 (2023: £30,729,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Distribution	21,468	15,144
Add: Income deducted on cancellation of shares	2,881	1,573
Deduct: Income received on issue of shares	(600)	(166)
Total distributions for the year	23,749	16,551

Movement between net revenue and distributions

Net revenue after taxation	23,428	15,774
Expenses charged to capital	321	462
Equalisation on conversion	-	315
Total distributions for the year	23,749	16,551

Expenses taken to capital include the ACD, Registration, Dealing expenses and the General administration charge. This policy only applies to the income classes.

Where deductions are made from capital these may limit the growth in value of the relevant fund. However, more income is generally available to distribute to shareholders.

Details of the distribution per share are set out in this fund's distribution table.

Notes to the Financial Statements

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	2,195	1,580
Amounts receivable from the ACD for the issue of shares	27	180
Sales awaiting settlement	3,785	1,108
Total debtors	6,007	2,868

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	2	1
	2	1
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	47,916	59,130
Net liquidity	47,918	59,131

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	826	754
Accrued expenses payable to the Depositary or associates of the Depositary	6	10
Amounts payable to the ACD for cancellation of shares	3,728	1,727
Other accrued expenses	-	5
Purchases awaiting settlement	2,296	300
Total creditors	6,856	2,796

9 Related Party Transactions

abrdrn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdrn Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdrn Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Equities	940,868	-	-	1,137,378	-	-
Collective Investment Schemes	-	47,916	-	-	59,130	-
Total investment assets	940,868	47,916	-	1,137,378	59,130	-

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Notes to the Financial Statements

Continued

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £49,439,000 (2023: £59,825,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £7,865,000 (2023: £3,722,000).

Distribution Table

For the year ended 29 February 2024 (in pence per share)

Final dividend distribution

Group 1 – shares purchased prior to 1 March 2023

Group 2 – shares purchased between 1 March 2023 and 29 February 2024

ZA income				
Group 1	6.1654	-	6.1654	4.6221
Group 2	6.1654	-	6.1654	4.6221

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Asian Pacific Growth Equity Fund (closed)

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in Asian equities (company shares).

Performance Target: To achieve the return of the MSCI AC Asia Pacific ex Japan Index +3% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA Asia Pacific ex Japan Equity Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in Asian countries, including Australasia, or companies that derive a significant proportion of their revenues or profits from Asian, including Australasia, operations or have a significant proportion of their assets there.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on finding high quality companies at attractive valuations that can be held for the long term.
- In seeking to achieve the Performance Target, the MSCI AC Asia Pacific ex Japan is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 8%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the MSCI AC Asia Pacific ex Japan.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

Over the period under review, the fund returned -6.01% (Source: Morningstar Direct, Platform 1 Accumulation, net of fees). This compared to a return of -1.98% for our performance target (Source: FactSet, MSCI AC Asia Pacific ex Japan Index).

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund underperformed its benchmark in the period with stock selection in China proving to be the main factor weighing on relative returns. Initial optimism over the demand boost from China's faster-than-expected re-opening waned as macroeconomic data began to reflect soft domestic demand and fading momentum in exports. There was also a notable value tilt as state-owned enterprises benefited from reforms, but otherwise the market was more sentiment-driven due to a lack of sufficient policy support and the stalled economic recovery. In sector terms, our consumer holdings were affected as investor hopes of a strong rebound in sales proved overly optimistic with consumer sentiment weaker than expected. Shares of China Tourism Group Duty Free had recovered well on news of China's reopening, but the

abrdrn Asian Pacific Growth Equity Fund (closed)

Continued

stock became volatile later on due to investor concerns about the strength of the recovery in consumption levels and the impact of the resumption of international travel. Drinks producer Budweiser APAC and automobile retailer Zhongsheng Group were also affected in the sector.

LONGi Green Energy Technology also weighed on performance after the European Commission unveiled proposed targets and reforms intended to reduce Europe's dependence on China for green or renewable energy products. The information technology sector also detracted from performance over the period, chiefly due to the fund's software holdings in China: Glodon, Yonyou Network Technology and GDS Holdings. In Glodon's case, investors were concerned that weakness in the Chinese property sector might impact the company given its construction software products. These losses were partially mitigated by the performance of our non-benchmark semiconductor stocks, ASM International and ASML, which outperformed as visibility on a potential turnaround in the semiconductor cycle improved and delivered reasonable results.

Several of the fund's Indian holdings were among the most positive contributors to performance, reflecting the generally buoyant economic and market conditions in the country. Stocks spanning several sectors benefited from this, including HDFC, SBI Life, Power Grid Corp and Maruti Suzuki.

Market Review

Stock markets in the Asia Pacific (excluding Japan) region fell over the period in sterling terms with sentiment driven mainly by concerns about inflation, the potential for further interest rate rises, the US debt ceiling talks and signs that China's recovery might be stalling. A decision by Opec+ members to cut oil production sparked fears that it could stoke inflation.

The period started brightly as investors welcomed some positive Chinese economic data and a 25-basis-point cut in the reserve requirement ratio (RRR) by the People's Bank of China. However, this was tempered by weakness in the financial sector as the US Federal Reserve's interest-rate tightening cycle contributed to stresses in the US banking system. That led to the closure of some US regional banks such as Silicon Valley Bank and contagion fears rippled across to Credit Suisse in Europe and banks in developed Asian countries.

Stocks in mainland China and Hong Kong were among the weakest as monthly data towards the end of the period showed a decline in manufacturing activity, and weakening trade raised concerns about the strength of the Chinese recovery. Australia was also in negative territory due to the heavy banking exposure in the

local-market benchmark, an unexpected policy-rate increase and weakness in commodity-related stocks. Taiwan lagged on weak industrial production and exports, but sentiment was lifted later by gains in the technology sector due to optimism over the artificial-intelligence theme. India was among the top performers, with the release of first-quarter GDP data showing stronger-than-expected growth. Indonesia was lifted by positive comments from Bank Indonesia that highlighted increasing domestic demand and exports.

Portfolio Activity and Review

Portfolio activity in the period consisted mainly of closing all positions in the fund.

Portfolio Outlook and Strategy

The fund closed on 12 May 2023.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk			
←					→		
1	2	3	4	5	6	7	

Risk and reward indicator table as at 12 May 2023.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in emerging market equities and/or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
- Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Total taxation (note 4b)	22	42

(b) Factors affecting total tax charge for the year

The tax assessed for the year is greater than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	95	275
Corporation tax at 20% (2023: 20%)	19	55
Effects of:		
Revenue not subject to taxation	(28)	(110)
Overseas taxes	7	35
Excess allowable expenses	9	55
Overseas capital gains tax	41	24
Deferred Tax	(26)	(17)
Total tax charge for year (note 4a)	22	42

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Deferred tax

Deferred tax charge at the start of the year	26	43
Deferred tax credit in statement of total return for year (note 4a)	(26)	(17)
Provision at the end of the year	-	26

(d) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £932,000 (2023: £923,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3

Collective Investment Schemes	-	-	-	-	5	-
Total investment assets	-	-	-	24,489	5	-

14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign	Net foreign
	currency	currency
	exposure	exposure
	2024	2023
	£'000	£'000
Australian Dollar	-	4,349
China Renminbi	-	2,698
Euro	-	609
Hong Kong Dollar	-	6,017
Indian Rupee	14	3,486
Indonesian Rupiah	-	974
Philippines Peso	-	243
Singapore Dollar	-	1,175
South Korean Won	-	2,062
Taiwan Dollar	27	2,666
Thai Baht	-	306
US Dollar	-	32
Total	41	24,617

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £2,000 (2023: £1,231,000).

Notes to the Financial Statements

Continued

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £Nil (2023: £1,225,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £41,000 (2023: £150,000).

Distribution Tables

For the year ended 29 February 2024 (in pence per share)

Special dividend distribution

Group 1 – shares purchased prior to 1 March 2023

Group 2 – shares purchased between 1 March 2023 and 11 May 2023

Group 2	-	-	-	3.3464

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Emerging Markets Opportunities Equity Fund (closed)

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in emerging market equities (company shares).

Performance Target: To achieve the return of the MSCI emerging markets Index, plus 3% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA Global emerging markets Equity Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in emerging market countries, or companies that derive a significant proportion of their revenues or profits from emerging market operations or have a significant proportion of their assets there.
- Emerging markets include Asian, Eastern European, Middle Eastern, African or Latin American countries.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view of a company's prospects than that of the market, and which align with their views regarding future economic and business conditions.
- In seeking to achieve the Performance Target, the MSCI emerging market Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 8%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the MSCI emerging market Index over the longer term.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

For the period from 1 March 2023 to 12 May 2023, when the fund was closed, the value of the abrdn Emerging Markets Opportunities Equity Fund fell by 3.28% (Source: Morningstar Direct, Platform 1 Accumulation, net of fees). This compared to a decline of 0.79% in its performance target (Source: FactSet, the MSCI Emerging Markets Index +3%).

Source: MSCI. Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

From a country perspective, the fund benefitted from strong stock selection in India. The overweight to HDFC Bank and lack of exposure to IT services provider Infosys proved particularly favourable. Elsewhere in emerging Asia, the overweight to South Korea-based petrochemical and battery producer LG Chem was also positive, while Kazakh fintech company Kaspi.kz rallied following strong first-quarter results. In Indonesia, Bank Rakyat advanced as execution in the micro segment continued to support earnings growth.

Within Latin America, our stock picks in Brazil stood out as market sentiment improved on favourable economic data. Lender Bradesco made notable gains.

abrdn Emerging Markets Opportunities Equity Fund (closed)

Continued

Conversely, stock selection in China and the non-benchmark exposure to Hong Kong held back performance. Risk appetite towards Chinese equities weakened over the period mainly due to the slower-than-expected pace of economic rebound, triggering a sell-off in domestic consumption-focused names. The fund's overweight to alcoholic beverage company Wuliangye Yibin and China Tourism Group Duty Free detracted from relative returns.

Other disappointments included the above-benchmark exposure to LONGi Green Energy and healthcare services firm Hangzhou Tigermed. The former retreated on weaker-than-expected results, while the latter was weighed down by slowing domestic outsourcing research and development demand. Our Hong Kong-listed holdings were not spared from the sell-off as weak investor sentiment carried over to the H-share market.

Nevertheless, there are still plenty of reasons to be sanguine about the opportunities in China. The consumption recovery is still happening, even if at a slower pace than previously anticipated. We believe policy measures will remain accommodative and calibrated towards specific sectors.

Portfolio Activity and Review

In key portfolio activity, we sold Biocon and FEMSA to fund more attractive opportunities elsewhere.

Portfolio Outlook and Strategy

The fund closed on 12 May 2023.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 12 May 2023.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
- Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

Notes to the Financial Statements

1 Net Capital Losses

	2024 £'000	2023 £'000
Non-derivative securities	(5,087)	(7,080)
Other (losses)/gains	(363)	107
Subsidised fees taken from the capital account*	-	15
Transaction charges	(7)	(35)
Net capital losses	(5,457)	(6,993)

* Subsidised fees are paid by the ACD.

2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	11	17
Overseas dividends	1,286	5,986
Overseas REIT	22	74
UK dividends	-	109
Total revenue	1,319	6,186

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	226	1,073
Dealing charge	-	1
General administration charge	1	3
	227	1,077
Payable to the Depository or associates of the Depository, and agents of either of them:		
Depository's fees	-	(2)
Revenue collection expenses	1	1
Safe custody fees	8	35
	9	34
Other:		
Professional fees	-	8
Subsidised fees*	-	(19)
	-	(11)
Total expenses	236	1,100

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £5,520 (2023: £10,200).

* Subsidised fees are paid by the ACD.

Notes to the Financial Statements

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	107	451
Overseas capital gains tax	464	-
Total current tax	571	451
Deferred tax (note 4c)	(391)	169
Total taxation (note 4b)	180	620

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

	2024	2023
Net revenue before taxation	1,082	5,081
Corporation tax at 20% (2023: 20%)	216	1,016
Effects of:		
Revenue not subject to taxation	(253)	(1,162)
Overseas taxes	107	451
Overseas tax expensed	(1)	(9)
Excess allowable expenses	38	155
Overseas capital gains tax	464	-
Deferred Tax	(391)	169
Total tax charge for year (note 4a)	180	620

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Deferred tax

Deferred tax charge at the start of the year	391	222
Deferred tax charge in statement of total return for year (note 4a)	(391)	169
Provision at the end of the year	-	391

(d) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £1,796,000 (2023: £1,758,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

Notes to the Financial Statements

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Special Distribution	986	-
Distribution	-	4,322
Add: Income deducted on cancellation of shares	5	570
Deduct: Income received on issue of shares	(6)	(262)
Total distributions for the year	985	4,630
Movement between net revenue and distributions		
Net revenue after taxation	902	4,461
Overseas capital gains tax on realised gains	464	-
Overseas deferred capital gains tax on unrealised gains	(391)	169
Undistributed revenue carried forward	10	-
Total distributions for the year	985	4,630

Details of the distribution per share are set out in this fund's distribution tables.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	-	436
Amounts receivable from the ACD for the issue of shares	-	148
Expenses reimbursement receivable from the ACD	-	24
Overseas withholding tax recoverable	112	127
Sales awaiting settlement	-	306
Total debtors	112	1,041

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	7	1,729
	7	1,729
abrdrn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	-	532
Net liquidity	7	2,261

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

ZC accumulation	1,418,765	30,735	(1,449,500)	-	-
ZB accumulation	56,014,030	-	(56,014,030)	-	-

13 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000	2024 £'000	2024 £'000	2023 £'000	2023 £'000	2023 £'000
Fair value of investment assets	Level 1	Level 2	Level 3*	Level 1	Level 2	Level 3*
Equities	-	-	-	150,184	-	-
Collective Investment Schemes	-	-	-	-	532	-
Total investment assets	-	-	-	150,184	532	-

* Level 3 includes assets valued at nil by the abrdn VPC, as detailed in the portfolio statement. These assets have been valued at nil due to current market conditions.

14 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign currency exposure 2024 £'000	Net foreign currency exposure 2023 £'000
	Brazilian Real	-
China Renminbi	-	9,803
Euro	-	1,420
Hong Kong Dollar	-	40,575

Notes to the Financial Statements

Continued

Currency	Net foreign currency exposure	Net foreign currency exposure
	2024 £'000	2023 £'000
Indian Rupee	111	20,149
Indonesian Rupiah	-	4,836
Malaysian Ringgit	-	2,697
Mexican Peso	-	9,729
Nigeria Naira	-	(14)
Saudi Riyal	-	2,301
South Africa Rand	-	2,691
South Korean Won	-	17,837
Taiwan Dollar	-	21,739
UAE Dirham	-	563
US Dollar	4	8,347
Total	115	148,296

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £6,000 (2023: £7,415,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £Nil (2023: £7,536,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £119,000 (2023: £1,608,000).

Distribution Tables

For the year ended 29 February 2024 (in pence per share)

Special dividend distribution

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn Europe ex UK Growth Equity Fund (closed)

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in European equities (company shares).

Performance Target: To achieve the return of the FTSE World Europe ex UK Index plus 3% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA Europe ex UK Equity Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated, or domiciled in European countries, or companies that derive a significant proportion of their revenues or profits from European operations or have a significant proportion of their assets there.
- European countries can include the emerging markets of Europe, but excludes the UK.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view of a company's prospects than that of the market, and which align with their views regarding future economic and business conditions.
- In seeking to achieve the Performance Target, FTSE World ex UK Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 8%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the FTSE World ex UK Index over the longer term.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

For the review period ended 3 March 2023, the value of the abrdn Europe ex UK Equity Growth Fund rose by 1.38% (Source: FactSet, Platform 1 Accumulation, net of fees). This compared with an increase of 1.55% in the comparator benchmark (Source: Morningstar, the IA OE Europe Excluding UK Index) and an increase of 1.16% in the performance target (Source: FactSet, the FTSE World Europe ex-UK Index +3%).

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

abrdn Europe ex UK Growth Equity Fund (closed)

Continued

The fund closed on 3 March 2023 during the first week of the new review period. As the annual report ended 28 February 2023 noted, the biggest detractor was Polypeptide, which weakened after a profit warning related to a delay in high-margin Covid-19-related revenues and rising inflationary pressures. French video games group Ubisoft also fell back after Tencent increased its stake by purchasing stock from the Guillemot family. While this was clear recognition from an external player of the value in Ubisoft, it also effectively removed the potential for a bid for the company. Shares in Dutch payments platform Adyen suffered as some investors switched from growth to value stocks due to the uncertain macroeconomic background. Higher commodity and energy prices were a notable feature in the period, and Koninklijke DSM underperformed as it struggled to pass these on to customers and subsequently lowered its earnings guidance for 2022.

On the upside, Novo Nordisk received a boost from strong growth in its GLP-1 franchise across all markets. The company made further progress in rebuilding the supply of obesity drug Wegovy, and the growing appeal of the pharmaceutical sector's defensive growth characteristics also helped to lift the shares. Prosus rebounded after a period of weak performance, aided by a modest recovery in the share prices of some of its portfolio companies. Prosus' shares were further boosted after the company announced a large, multi-year share buyback scheme. The fund's lack of a holding in Roche was beneficial as the company's shares declined on an absence of news flow and fading Covid-19-related sales.

Market Review

In the months leading up to the fund's closure, European markets regained some ground due to resilient company results and investor hopes that an end to interest rate rises might be near. In late 2022, shares surged on the back of better-than-expected US inflation data, although it proved a short-lived recovery as markets dipped again in December. However, the new year brought renewed optimism amid falling inflation, lower energy prices and elevated natural gas storage levels in Europe. China's decision to reopen its economy faster than had been anticipated also provided a boost to markets.

In February, investor sentiment was lifted by better economic data and rising business confidence. The markets in Germany, France and Italy all performed above the global average for the month. However, some inflationary signs remained and the European Central Bank raised interest rates by 50 basis points and repeated warnings that further hikes were to be expected. Share prices were volatile in March as the collapse of

US-based Silicon Valley Bank generated contagion which culminated in Europe in the takeover of Credit Suisse by UBS. However, central bank intervention soon helped to restore confidence and recover losses, with gains among technology and other growth stocks especially strong.

Portfolio Activity and Review

There was no portfolio activity between 1 March and 3 March 2023.

Portfolio Outlook and Strategy

The fund closed on 3 March 2023.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 3 March 2023.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in emerging market equities and/or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income. The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	26	212
Total taxation (note 4b)	26	212

(b) Factors affecting total tax charge for the year

The tax assessed for the year is greater than (2023: greater than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net (expense)/revenue before taxation	(12)	999
Corporation tax at 20% (2023: 20%)	(2)	200
Effects of:		
Revenue not subject to taxation	1	(337)
Overseas taxes	26	212
Excess allowable expenses	1	137
Total tax charge for year (note 4a)	26	212

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £2,209,000 (2023: £2,208,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net (expense)/revenue and distributions)

	2024 £'000	2023 £'000
Distribution	-	461
Add: Income deducted on cancellation of shares	-	368
Deduct: Income received on issue of shares	-	(42)
Total distributions for the year	-	787
Movement between net (expense)/revenue and distributions		
Net (expense)/revenue after taxation	(38)	787
Undistributed revenue carried forward	38	-
Total distributions for the year	-	787

11 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Equities	-	-	-	48,646	-	-
Total investment assets	-	-	-	48,646	-	-

12 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

Fluctuations in the foreign exchange rates can adversely affect the value of a portfolio. The following table details the net exposure to the principal foreign currencies that the fund is exposed to including any instruments used to hedge against foreign currencies, if applicable.

Currency	Net foreign	Net foreign
	currency	currency
	exposure	exposure
	2024	2023
	£'000	£'000
Danish Krone	60	5,462
Euro	249	33,760
Norwegian Krone	5	1,428
Swedish Krona	-	1,432
Swiss Franc	-	6,980
US Dollar	-	2
Total	314	49,064

At 29 February 2024, if the value of Sterling increased or decreased by 5% against all other currencies, with all other variables remaining constant, then the change in net assets attributable to shareholders from investment activities will increase or decrease by approximately £16,000 (2023: £2,453,000).

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

Notes to the Financial Statements

Continued

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £Nil (2023: £2,432,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £314,000 (2023: £77,000).

Distribution Table

Group 2	-	-	-	4.3762

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdrn UK Growth Equity Fund (closed)

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in UK equities (company shares).

Performance Target: To achieve the return of the FTSE All-Share Index, plus 3% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA UK All Companies Equity Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated, or domiciled in the UK or companies that derive a significant proportion of their revenues or profits from UK operations or have a significant proportion of their assets there.
- The fund may also invest in other funds (including those managed by abrdrn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view than that of the market, and which align with their views regarding future economic and business conditions.
- In seeking to achieve the Performance Target, the FTSE All-Share Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 8%. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the FTSE All-Share Index over the longer term.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

For the review period ended 3 March 2023, the value of abrdrn UK Growth Equity Fund Platform 1 Accumulation increased by 0.31% compared to a return of -2.59% in the performance target, the FTSE All-Share Index +3%.

Source: FactSet, Basis: total return, published NAV to NAV, net of annual charges, UK net income reinvested, GBP.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund closed on 3 March 2023. As the annual report ended 28 February 2023 previously noted, the fund's underweight allocation and stock selection in the consumer discretionary sector was the main driver of underperformance during the review period prior to the fund's closure. Other detractors were our choice of holdings in basic materials and an above-index-position in the telecommunications sector. Meanwhile, an underweight exposure to and weak stock selection in the utilities sector also weighed on returns.

On the upside, good stock selection helped generate relative returns in the healthcare and technology sectors, compensating for some of the negative performance of the Fund. Meanwhile, an underweight positioning and stock selection in the real estate sector was also beneficial. Lastly, our choice of stocks in the consumer staples and financial sectors as well as a slightly overweight position in the energy sector also contributed to positive returns.

Market Review

In the months prior to the closing of the fund, inflation dominated the economic landscape. The annual inflation rate increased steadily, hitting a 41-year high of 11.1% in October 2022, before it began to recede. The Bank of England reacted to surging inflation with successive interest-rate rises, taking the base rate from 0.25% at the start of 2022 to 3.50% by the calendar year's end. The central bank increased the base rate by a further 0.50% in February.

In economic news, in January 2023, the International Monetary Fund predicted that the UK would be the only major developed economy to experience a negative growth rate across the whole of 2023.

Figures published by S&P Global indicated that private-sector activity in Britain declined for a sixth consecutive month in January, falling at its fastest pace since 2021. Yet, UK equities made solid progress in January on renewed hopes that central banks could soon start to slow the pace of interest-rate rises. Meanwhile, despite increased volatility in February, UK shares enjoyed monthly gains during the month as well. In the final days of the month, sterling increased to almost US\$1.21 against the US dollar, buoyed by the agreement between the UK and the European Union (EU) regarding post-Brexit trading arrangements in Northern Ireland.

Finally, market volatility in March was a reminder that a period of rapidly rising rates brings with it new challenges. The reaction to bank failures in the US indicated the high level of uncertainty present globally. As a result, predicting the trajectory of macroeconomic conditions remained close to impossible.

Portfolio Activity and Review

Portfolio activity between 1 March and 3 March 2023 consisted of closing all positions in the fund.

Portfolio Outlook and Strategy

The fund closed on 3 March 2023.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 3 March 2023.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

	2024 £'000	2023 £'000
Bank and margin interest	-	42
Overseas dividends	-	80
UK dividends	64	3,643
UK REIT	-	39
Total revenue	64	3,804

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	10	1,219
Dealing charge	-	6
General administration charge	-	18
	10	1,243
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fee	-	3
	-	3
Total expenses	10	1,246

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £4,200 (2023: £10,200).

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	-	16
Total taxation (note 4b)	-	16

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
(b) Factors affecting total tax charge for the year		
The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:		
Net revenue before taxation	54	2,557
Corporation tax at 20% (2023: 20%)	11	511
Effects of:		
Revenue not subject to taxation	(13)	(744)
Overseas taxes	-	16
Excess allowable expenses	2	233
Total tax charge for year (note 4a)	-	16

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £13,100,000 (2023: £13,098,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions

	2024 £'000	2023 £'000
Special distribution	54	-
Distribution	-	2,393
Add: Income deducted on cancellation of shares	-	354
Deduct: Income received on issue of shares	-	(206)

11 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Notes to the Financial Statements

Continued

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3*	Level 1	Level 2	Level 3*
Equities	-	-	465	101,135	-	610
Total investment assets	-	-	465	101,135	-	610

* Savannah Energy PLC which is part of the fund's investment portfolio is considered as level 3 investment. The security was suspended on 13 December 2022 due to challenges to complete the acquisition of an energy business in South Sudan, the ACD continues to value the investment based on the last trading price without any adjustment and as such there is estimation uncertainty involved in the valuation of the security. Given the performance of the underlying business and the general performance of oil and gas sector, the ACD consider valuation basis as appropriate, however continues to monitor the valuation including underlying performance of the Company.

12 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £23,000 (2023: £5,087,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £485,000 (2023: £1,540,000).

Distribution Tables

For the year ended 29 February 2024 (in pence per share)

Special dividend distribution

Group 1 – shares purchased prior to 1 March 2023

Group 2 – shares purchased between 1 March 2023 and 02 March 2023

	Revenue	Equalisation	Distribution paid 03/05/23
Retail accumulation			
Group 1	0.1898	-	0.0491
Group 2	0.1327	0.0571	0.0491
Institutional accumulation

Final dividend distribution

Group 1 – shares purchased prior to 3 March 2023

Group 2 – shares purchased between 3 March 2023 and 29 February 2024

	Revenue	Equalisation	Distribution paid 30/04/24	Distribution paid 28/04/23
Retail accumulation				
Group 1	-	-	-	8.2427
Group 2	-	-	-	8.2427
Institutional accumulation				
Group 1	-	-	-	11.8374
Group 2	-	-	-	11.8374
Platform 1 accumulation				
Group 1	-	-	-	2.3534
Group 2	-	-	-	2.3534
ZC accumulation				
Group 1	-	-	-	5.0556
Group 2	-	-	-	5.0556

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn UK High Alpha Equity Fund (closed)

For the year ended 29 February 2024

Investment Objective

To generate growth over the long term (5 years or more) by investing in UK equities (company shares).

Performance Target: To achieve the return of the FTSE 350 Index plus 4% per annum over rolling three year periods (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA UK All Companies Equity Sector Average.

The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in the UK or companies that derive a significant proportion of their revenues or profits from UK operations or have a significant proportion of their assets there.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a concentrated asset mix at sector and stock level, with sector weightings within the portfolio typically a by-product of the underlying stock exposure.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view than that of the market, and which align with their views regarding future economic and business conditions.
- In seeking to achieve the Performance Target, the FTSE 350 Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily expected to exceed 10%. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the FTSE 350 Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

For the review period ended 3 March 2023, the value of abrdn UK High Alpha Equity Fund Platform 1 Accumulation rose by 0.28% compared to a return of -2.46% in the performance target, the FTSE 350 Index +4%.

The fund closed on 3 March 2023 during the first week of the new review period. As the annual report ended 28 February 2023 previously noted, the main detractors from a stock perspective included Moonpig Group, which weakened as its results indicated that discretionary purchases by customers had fallen. Vodafone also proved to be a drag on performance, with sentiment affected by disappointing results from the mobile network. Construction products group Genuit was among a number of stocks affected by concerns in the middle of 2022 that UK domestic economic policy might lead to a slowdown in construction activity. Not holding BP proved costly as it surged on the back of higher energy prices, although that was mitigated to some extent by our holding in Royal Dutch Shell.

Our holdings in Countryside Partnerships and Bellway also detracted as mortgage rates rose sharply after the 'mini-budget' impacting affordability and demand for new homes. For Countryside, performance was

abrdn UK High Alpha Equity Fund (closed)

Continued

further hindered when its growth targets proved to be too optimistic, resulting in the departure of the CEO. On the upside, Go-Ahead Group, Euromoney and Thungela Resources were among the top-performing stocks. Shares in pharmaceutical business Indivior advanced after the company raised guidance for its Sublocade opioid-use treatment. Late in the period, NatWest Group shares rose due to growing optimism over prospects for the UK economy, with rising interest rates also set to benefit the bank's profitability.

Market Review

In the months prior to the closing of the fund, inflation dominated the economic landscape. The annual inflation rate increased steadily, hitting a 41-year high of 11.1% in October 2022, before it began to recede. The Bank of England reacted to surging inflation with successive interest-rate rises, taking the base rate from 0.25% at the start of 2022 to 3.50% by the calendar year's end. The central bank increased the base rate by a further 0.50% in February.

In economic news, in January 2023, the International Monetary Fund predicted that the UK would be the only major developed economy to experience a negative growth rate across the whole of 2023. Figures published by S&P Global indicated that private-sector activity in Britain declined for a sixth consecutive month in January, falling at its fastest pace since 2021. Yet, UK equities made solid progress in January on renewed hopes that central banks could soon start to slow the pace of interest-rate rises. Meanwhile, despite increased volatility in February, UK shares enjoyed monthly gains during the month as well. In the final days of the month, sterling increased to almost US\$1.21 against the US dollar, buoyed by the agreement between the UK and the European Union (EU) regarding post-Brexit trading arrangements in Northern Ireland.

Finally, market volatility in March was a reminder that a period of rapidly rising rates brings with it new challenges. The reaction to bank failures in the US indicated the high level of uncertainty present globally. As a result, predicting the trajectory of macroeconomic conditions remained close to impossible.

Portfolio Activity and Review

There was no significant portfolio activity in the period.

Portfolio Outlook and Strategy

The Fund closed on 3 March 2023.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 3 March 2023.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Notes to the Financial Statements

1 Net Capital Gains

	2024 £'000	2023 £'000
Non-derivative securities	179	2,371
Transaction charges	-	(4)
Net capital gains	179	2,367

2 Revenue

	2024 £'000	2023 £'000
Bank and margin interest	-	29
Overseas dividends	-	66
UK dividends	50	2,794
UK REIT	-	32
Total revenue	50	2,921

3 Expenses

	2024 £'000	2023 £'000
Payable to the Authorised Corporate Director, associates of the Authorised Corporate Director and agents of either of them:		
Authorised Corporate Director's periodic charge	4	985
Dealing charge	-	4
General administration charge	-	9
	4	998
Payable to the Depositary or associates of the Depositary, and agents of either of them:		
Safe custody fee	-	2
	-	2
Total expenses	4	1,000

Irrecoverable VAT is included in the above expenses, where relevant.
The audit fee for the year, including VAT, was £4,200 (2023: £10,200).

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	7	17
Total taxation (note 4b)	7	17

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
(b) Factors affecting total tax charge for the year		
The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:		
Net revenue before taxation	46	1,920
Corporation tax at 20% (2023: 20%)	9	384
Effects of:		
Revenue not subject to taxation	(10)	(572)
Overseas taxes	7	17
Excess allowable expenses	1	188
Total tax charge for year (note 4a)	7	17
Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.		
(c) Factors that may affect future tax charge		
At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £4,223,000 (2023: £4,222,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.		

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Special Distribution	50	-
First interim distribution	-	890
Second interim distribution	-	854
Third interim distribution	-	690
Final distribution	-	439
	50	2,873
Add: Income deducted on cancellation of shares	-	34
Deduct: Income received on issue of shares	-	(6)
Total distributions for the year	50	2,901
Movement between net revenue and distributions		
Net revenue after taxation	39	1,903
Expenses charged to capital	4	998
Undistributed revenue carried forward	7	-
Total distributions for the year	50	2,901

Expenses taken to capital include the ACD, Registration, Dealing expenses and the General administration charge.

Notes to the Financial Statements

Continued

Where deductions are made from capital these may limit the growth in value of the relevant fund. However, more income is generally available to distribute to shareholders.

Details of the distribution per share are set out in this fund's distribution tables.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	-	211

11 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024 £'000 Level 1	2024 £'000 Level 2	2024 £'000 Level 3*	2023 £'000 Level 1	2023 £'000 Level 2	2023 £'000 Level 3*
Fair value of investment assets						
Equities	-	-	342	78,840	-	449
Total investment assets	-	-	342	78,840	-	449

* Savannah Energy PLC which is part of the fund's investment portfolio is considered as level 3 investment. The security was suspended on 13 December 2022 due to challenges to complete the acquisition of an energy business in South Sudan, the ACD continues to value the investment based on the last trading price without any adjustment and as such there is estimation uncertainty involved in the valuation of the security. Given the performance of the underlying business and the general performance of oil and gas sector, the ACD consider valuation basis as appropriate, however continues to monitor the valuation including underlying performance of the Company.

12 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Notes to the Financial Statements

Continued

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £17,000 (2023: £3,964,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £351,000 (2023: £1,228,000).

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

abrdn UK High Income Equity Fund (closed)

For the year ended 29 February 2024

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in UK equities (company shares).

Performance Target: To deliver a yield greater than that of the FTSE 350 Index over a rolling five year period (before charges) and achieve a return in excess of the FTSE 350 Index over a rolling five year period (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target.

Performance Comparator: IA UK Equity Income sector average.

The ACD believes that this is an appropriate target/comparator for the fund based on the investment policy of the fund.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities and equity related securities of companies incorporated or domiciled in the UK or having significant operations and/or exposure to the UK.
- The fund may also invest in other funds (including those managed by abrdn) and money-market instruments, and cash.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view of a company's prospects than that of the market, and which align with their views regarding future economic and business conditions.
- The fund aims to generate a high income relative to its benchmark index, in line with the performance target of a yield greater than that of the FTSE 350 Index over a rolling five year period (before charges).
- In seeking to achieve the Performance Target, the FTSE 350 Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ("tracking error") between the returns of the fund and the index is not ordinarily

expected to exceed 9%. Due to the income nature of the management process, the fund's performance profile may deviate significantly from that of the FTSE 350 Index.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth at proportionate risk (often referred to as "Efficient Portfolio Management").
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to company shares.

Performance Review

For the period ended 27 October 2023, the value of the fund fell by 11.73% (Platform 1 Income shares net of fees) compared to a decrease of 5.91% in the performance target (the FTSE 350 Index (TR)).

Source: FactSet, Basis: total return, published NAV to NAV, net of annual charges, UK Net income reinvested, GBP.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

Companies selected for illustrative purposes only to demonstrate the investment management style described herein and not as an investment recommendation or indication of future performance.

The fund underperformed the performance target in the period mainly due to stock selection in the industrials and energy sectors, but the losses were partially mitigated by our above-index exposure to the energy sector.

At the stock level, an overweight exposure to pest control group Rentokil Initial, a new position in the period, was the top detractor as the shares dropped back after the company reported weaker-than-expected revenue growth due to softening demand. Overweight positioning in information technology services and business solutions provider FDM Group also weighed on relative returns. Specialist mortgage lender OSB Group lost ground after announcing a change of assumptions on customer behaviour in part of its mortgage book, leading to a

abrdn UK High Income Equity Fund (closed)

Continued

pullback against an environment of a likely slowdown in buy-to-let mortgage demand.

On the plus side, Intermediate Capital Group added to returns after reporting results ahead of expectations and the stock also benefited from optimism around falling inflation and the prospect of reductions in interest rates. Pharmaceuticals groups AstraZeneca and Hikma were also among the top contributors to performance, along with sports betting and gambling business Entain. Not having exposure to Lloyds Banking Group or St James's Place proved beneficial to performance as their shares underperformed.

Market Review

The FTSE All-Share Index fell over the period. The FTSE 100 Index, which contains many so-called defensive shares that tend to hold their value better during times of economic uncertainty as well as several energy and mining companies, dropped back but proved more resilient than the FTSE 250 Index, which contains smaller companies typically more focused on the domestic UK economy. While the FTSE 100 was given some support by commodity prices remaining at historically high levels, with energy prices rising in the wake of renewed tensions in the Middle East, the FTSE 250 was more affected by continued concerns about the outlook for growth in the UK.

The UK economy continued to stage a lacklustre post-pandemic recovery compared with those of other G7 countries. According to a preliminary estimate, GDP stagnated over the third quarter of 2023, after a 0.2% expansion in output over the previous three months. Also according to a preliminary estimate, the UK's annual GDP growth rate remained at 0.6% in the third quarter.

Inflation loomed large on the UK economic landscape. The Bank of England (BoE) continued to react to surging inflation with successive interest-rate rises, taking its base rate from 4.25% at the start of the period to 5.25% in October. Specifically, the BoE increased its base rate by 25 basis points (bps) in May, by a further 50 bps in June and then by another 25 bps in August, taking it to 5.25%. As a result, UK annual consumer inflation continued to trend downwards. However, it still remained stubbornly high, with annual core inflation at 6.1% in September significantly above that in the US and eurozone, in part due to elevated food prices.

Portfolio Activity and Review

In terms of portfolio activity, the fund initiated positions in several businesses, including housebuilder Vistry Group, Games Workshop Group, Oxford Instruments, which manufactures tools and systems for industry and research, life and pensions consolidator Chesnara, Genus, a biotechnology company specialising in animal genetics, London Stock Exchange, renewable energy company Drax, Safestore Holdings and Rotork, which manufactures industrial flow control equipment. We also introduced a holding in Sage Group, an accounting software provider, Rentokil Initial, as we saw the negative market reaction to the third quarter trading update as overdone, along with new positions in credit rating agency Experian, data analytics group RELX and Moonpig, which provides online greetings cards and gifts.

The fund exited a number of its positions late in the period, including Shell, HSBC, Energean and Glencore, in anticipation of the merger with the LF abrdn Income Focus Fund and the abrdn UK Income Equity Fund.

The fund closed on 27 October 2023.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the fund. The table below shows the fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk				Typically higher rewards, higher risk		
←				→		
1	2	3	4	5	6	7

Risk and reward indicator table as at 27 October 2023.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The fund's investments are concentrated in a particular country or sector, or closely related group of industries or sectors.
- The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Lowest share price	247.9	242.3	228.3

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV.

Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

^A Retail accumulation share class was closed on 27 October 2023.

Prices			
Highest share price	76.94	79.77	77.06
Lowest share price	65.11	67.62	67.38

The closing net asset value (£'000) divided by the closing number of shares may not calculate to the closing net asset value per share (p) due to rounding differences. The published closing net asset value per share (p) is based on unrounded values and represents the actual price.

The return after charges figures are based on the accounting NAV, as the financial statements are produced at a valuation point that is different from the published daily NAV. Operating charges are expenses associated with the maintenance and administration of the fund on a day to day basis that are actually borne by the share class.

Highest and Lowest prices are based on official published daily NAVs.

4 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	249	350
Total taxation (note 4b)	249	350

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: less than) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	8,899	13,312
Corporation tax at 20% (2023: 20%)	1,780	2,662
Effects of:		
Revenue not subject to taxation	(2,114)	(3,283)
Overseas taxes	249	350
Excess allowable expenses	334	621
Total tax charge for year (note 4a)	249	350

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £19,746,000 (2023: £19,412,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

5 Distributions (including the movement between net revenue and distributions)

	2024 £'000	2023 £'000
Interim distribution	8,617	10,316
Special distribution	800	-
Final distribution	-	5,392
	9,417	15,708
Add: Income deducted on cancellation of shares	299	698
Deduct: Income received on issue of shares	(27)	(274)
Total distributions for the year	9,689	16,132

Notes to the Financial Statements

Continued

	2024 £'000	2023 £'000
Movement between net revenue and distributions		
Net revenue after taxation	8,650	12,962
Expenses charged to capital	1,769	3,170
Undistributed revenue carried forward	(730)	-
Total distributions for the year	9,689	16,132

Expenses taken to capital include the ACD, Registration, Dealing expenses and the General administration charge.

Where deductions are made from capital these may limit the growth in value of the relevant fund. However, more income is generally available to distribute to shareholders.

Details of the distribution per share are set out in this fund's distribution tables.

6 Debtors

	2024 £'000	2023 £'000
Accrued revenue	-	1,762
Amounts receivable from the ACD for the issue of shares	-	13
Overseas withholding tax recoverable	69	69
Sales awaiting settlement	-	3,124
Total debtors	69	4,968

7 Liquidity

	2024 £'000	2023 £'000
Cash and bank balances		
Cash at bank	-	1
	-	1
abrdn Liquidity Fund (Lux) - Sterling Fund Z1 Inc*	-	1,330
Net liquidity	-	1,331

* Although reflected in the investment assets figure, liquidity funds are used by the fund as a liquidity vehicle. Therefore, the ACD considers the net liquidity position of the fund as the aggregate of cash at bank and in hand, bank overdrafts and liquidity fund positions.

Notes to the Financial Statements

Continued

8 Creditors

	2024 £'000	2023 £'000
Accrued expenses payable to ACD	-	253
Accrued expenses payable to the Depositary or associates of the Depositary	-	4
Amounts payable to the ACD for cancellation of shares	-	2,179
Amounts payable on termination	69	-
Other accrued expenses	-	5
Total creditors	69	2,441

9 Related Party Transactions

abrdr Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party and acts as principal in respect of all transactions of shares in the fund.

The aggregate monies received through issue and paid on cancellation of shares are disclosed in the statement of change in net assets attributable to shareholders.

Any amounts due from or due to abrdr Fund Managers Limited at the end of the accounting year are disclosed in notes 6 and 8.

Amounts payable to abrdr Fund Managers Limited, in respect of expenses are disclosed in note 3 and any amounts due at the year end in note 8.

10 Portfolio Transaction Costs

12 Fair Value Hierarchy

The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1: Unadjusted quoted market prices in active markets that are accessible at the measurement date for the identical unrestricted assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3: Inputs for asset or liability that are not based on observable market data (unobservable inputs).

	2024	2024	2024	2023	2023	2023
	£'000	£'000	£'000	£'000	£'000	£'000
Fair value of investment assets	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3*
Equities	-	-	-	318,528	-	7,575
Collective Investment Schemes	-	-	-	-	1,330	-
Total investment assets	-	-	-	318,528	1,330	7,575

* The Level 3 assets include Savannah Energy which has been valued at the last traded price.

13 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

The majority of the fund's financial assets are in non-interest bearing assets. Therefore, the fund's exposure to interest rate risk is considered insignificant. This is consistent with the exposure during the prior year.

Other price risk

The fund's investment portfolio is exposed to market price fluctuations which are monitored by the Investment Adviser in pursuance of the investment objectives and policies. Adherence to investment guidelines and to investment and borrowing powers mitigate the risk of excessive exposure to any particular type of security or issuer.

An increase or decrease in market values will therefore have a direct effect on the value of the investment assets in the portfolio and therefore a proportionate effect on the value of the fund.

As at 29 February 2024, if the prices of investments held by the fund increased or decreased by 5%, with all other variables remaining constant, then net assets attributable to the shareholders would increase or decrease by approximately £Nil (2023: £16,372,000).

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

The fund receives 85% of the revenue returns from stock lending. The gross earnings for the year are £1,000 (2023: £Nil) and expenses paid to the lending agent, Citibank, are £Nil (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on demand or in less than one year, 2024 £69,000 (2023: £3,171,000).

Equalisation

This applies only to shares purchased during the distribution period (group 2 shares). It is the average amount of revenue included in the purchase price of group 2 shares and is refunded to the holders of these shares as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of shares for capital gains tax purposes.

ASI UK Recovery Equity Fund (closed)

For the year ended 29 February 2024

Investment Objective

ASI UK Recovery Equity Fund is no longer open to investors, having redeemed all shares on 22 October 2020. It is the intention of the ACD to terminate the fund at a later date once the residual assets and liabilities are settled. As a result the financial statements for this fund has not been prepared on a going concern basis. At the time of the share cancellation, all realisable securities were sold. One security which was not immediately realisable due to being delisted, continues to be held at the current balance sheet date. Should an opportunity to sell it for value arise, it will be sold, otherwise abrdn will, in conjunction with the Depositary, pursue any possible residual value from it until all such opportunities have been reasonably exhausted.

Notes to the Financial Statements

1 Expenses

The audit fee for the year, including VAT, was £4,200 (2023: £2,400). The audit fees for 2024 will be paid by the ACD.

2 Taxation

	2024 £'000	2023 £'000
(a) Analysis of charge in year		
Overseas taxes	(6)	-
Total taxation (note 4b)	(6)	-

(b) Factors affecting total tax charge for the year

The tax assessed for the year is less than (2023: equal to) the standard rate of corporation tax in the UK for funds of authorised Open-Ended Investment Companies (20%). The differences are explained below:

Net revenue before taxation	-	-
Corporation tax at 20% (2023: 20%)	-	-
Effects of:		
Overseas taxes	(6)	-
Total tax charge for year (note 4a)	(6)	-

Authorised Open-Ended Investment Companies are exempt from tax on capital gains in the UK. Therefore, any capital gain is not included in the above reconciliation.

(c) Factors that may affect future tax charge

At the year end, after offset against revenue taxable on receipt, there is a potential deferred tax asset of £905,000 (2022: £905,000) due to surplus expenses. It is unlikely that the fund will generate sufficient taxable profits to utilise these amounts and therefore no deferred tax asset has been recognised in the current or prior year.

3 Creditors

	2024 £'000	2023 £'000
Amounts payable on termination	13	7
Total creditors	13	7

4 Related Party Transactions

abrdn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party. There were no transactions with the ACD during the current or prior year.

Notes to the Financial Statements

Continued

5 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

The fund closed on 22 October 2020.

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest rate risk is an unfavourable change in interest rates that can affect the price of a security, which in turn results in the portfolio experiencing a loss. Interest rate changes not only affect fixed income products but have material impacts on funding arrangements and other asset types.

The following table shows separately the value of investments at fixed interest rates, at variable rates and those that are non-interest bearing instruments.

The interest rate risk profile of the fund's investments at the year end consists of:

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
2024				
Currency				
UK Sterling	13		(13)	
Total	13	-	(13)	-

	Floating rate financial assets £'000	Fixed rate financial assets £'000	Financial assets/ (liabilities) not carrying interest £'000	Total £'000
2023				
Currency				
UK Sterling	7	-	(7)	-
Total	7	-	(7)	-

A one percent increase in the value of the fund's floating rate financial assets would have the effect of increasing the return and net assets as at year end date by £Nil (2023: £Nil). A one percent decrease would have an equal and opposite effect.

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: £Nil).

Liquidity risk

All of the fund's financial liabilities are payable on termination of the fund which is expected to be completed within one to five years, 2024 £13,000 (2023: £7,000).

Global Emerging Markets Equity Unconstrained Fund (closed)

For the year ended 29 February 2024

Global Emerging Markets Equity Unconstrained Fund is no longer open to investors, having redeemed all shares on 14 January 2016. It is the intention of the ACD to terminate the funds at a later date once the residual assets and liabilities are settled. As a result the financial statements for this fund has not been prepared on a going concern basis. At the time of the share cancellation, all realisable securities were sold. One security which was not immediately realisable due to being delisted, continues to be held at the current balance sheet date. Should an opportunity to sell it for value arise, it will be sold, otherwise abrdn will, in conjunction with the Depositary, pursue any possible residual value from it until all such opportunities have been reasonably exhausted.

3 Related Party Transactions

abrtn Fund Managers Limited, as Authorised Corporate Director (ACD), is a related party.

There were no transactions with abrtn Fund Managers Limited in the current or prior year.

Any amounts due to abrtn Fund Managers Limited at the end of the accounting year in respect of the termination of the fund are disclosed in note 2.

4 Risk Management Policies and Disclosures

The risks inherent in the fund's investment portfolio are as follows:

The fund closed on 14 January 2016.

Foreign currency risk

The fund's net exposure to foreign currencies (including any instruments used to hedge against foreign currencies) is not significant. Therefore, the financial statements are not subject to any significant risk of currency movements. This is consistent with the exposure during the prior year.

Interest rate risk

Interest receivable on bank deposits or payable on bank overdrafts will be affected by fluctuations in interest rates. The Authorised Corporate Director continuously reviews interest rates and inflation expectations.

A one per cent increase in the value of the fund's floating rate financial assets would have the effect of increasing the return and net assets as at year end date by £Nil (2023: £Nil). A one per cent decrease would have an equal and opposite effect.

Financial derivatives instrument risk

The fund had no exposure to derivatives as at 29 February 2024 (2023: Nil).

Liquidity risk

All of the fund's financial liabilities are payable on the termination of the fund which is expected to be completed within one to five years, 2024 £1,000 (2023: £1,000).

Securities Financing Transactions Disclosure (unaudited)

The fund's engage in Securities Financing Transactions (SFTs) (as defined in Article 3 of Regulation (EU) 2015/2365, SFTs include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions, Total Return Swaps (TRS) and margin lending transactions). In accordance with Article 13 of the Regulation, the fund's involvement in and exposures related to securities lending at the year end are detailed below:

Global data

Data on reuse of collateral

Non-cash collateral will not be sold, re-invested or pledged. There are no investment returns therefore associated with the securities held as collateral.

Cash collateral will only be: Placed on deposit; Invested in high-quality government bonds; Used for the purpose of reverse repo transactions with credit institutions that are subject to prudential supervision (and on terms that permit the Manager to recall at any time the full amount of cash on an accrued basis); or Invested in short-term money market funds (as defined for the purposes by the European Securities and Markets Authority ("ESMA")).

The returns earned by the Fund from the reinvestment of cash collateral in money market funds during the year are disclosed below.

Money Market Fund	Return %
Aberdeen Standard Liquidity Fund (Lux) – Euro Fund	4.01
Aberdeen Standard Liquidity Fund (Lux) – Sterling Fund	5.36

Safekeeping of collateral

Collateral is received under a title transfer arrangement and collateral received must be held by or on behalf of the Depositary. Collateral is held in an account belonging to the fund with only assets belonging to the fund in this account.

Collateral is posted to a Central Counterparty Clearing House or broker in a segregated account for the fund. Where collateral is exchanged bilaterally a recall position on the assets is retained.

Remuneration (unaudited)

Undertakings for Collective Investment Transferrable Securities V Directive (UCITS V) Remuneration Disclosure UCITS V Fund Annual Report and Accounts

Remuneration Policy

The abrdn plc Remuneration Policy applies with effect from 1 January 2023. The purpose of the abrdn plc Remuneration Policy (the "**Policy**") is to document clearly the remuneration policies, practices and procedures of abrdn as approved by the abrdn plc Remuneration Committee (the "**Committee**"). The Policy is available on request.

The Policy applies to employees of the abrdn group of companies ("**Group**" or "**abrdn**"), including UCITS V Management Companies ("**ManCos**") and the UCITS V funds that the ManCo manages.

Remuneration Principles

abrdn applies Group wide principles for remuneration policies, procedures and practices ensuring that:

- Remuneration within the Group is simple, transparent and fair.
- Our Policy supports our long-term strategy by reinforcing a performance-driven culture. It aligns the interests of our employees, shareholders and, importantly, our clients/customers.
- Our remuneration structure is flexible to accommodate the different challenges and priorities across all businesses and functions as appropriate.
- Remuneration policies, procedures and practices promote good conduct, including sound and effective risk management and do not encourage risk taking that exceeds the level of tolerated risk appetite.
- Remuneration extends beyond the provision of fixed and variable pay, with a focus on the retirement provision and the wellbeing needs of our employees, as part of our remuneration philosophy.
- Total remuneration delivered is affordable for the Group.

Remuneration Framework

Employee remuneration is composed of fixed and variable elements of reward as follows:

- a) Fixed remuneration (salary and cash allowances, where appropriate; and Benefits (including pension)).
- b) Variable remuneration (bonus, a proportion of which may be subject to retention or deferral depending on role and regulatory requirements; senior employees may also be awarded a long-term incentive award).

Appropriate ratios of fixed: variable remuneration will be set to as to ensure that:

- a) Fixed and variable components of total remuneration are appropriately balanced and
- b) The fixed component is a sufficiently high proportion of total remuneration to allow abrdn to operate a fully flexible policy on variable remuneration components, including having the ability to award no variable remuneration component in certain circumstances where either individual and/or Group performance does not support such an award.

Continued

Base salary	<p>Base salary provides a core reward for undertaking the role and depending on the role, geographical or business market variances or other indicators, additional fixed cash allowances may make up a portion of fixed remuneration. Periodic reviews take into account the employee's role, scope of responsibilities, skills and experience, salary benchmarks (where available) and, where relevant, any local legislative or regulatory requirements.</p>
Benefits (including retirement benefit where appropriate)	<p>Benefits are made up of core benefits which are provided to all employees; and extra voluntary benefits that may be chosen by certain employees which may require contribution through salary sacrifice or other arrangements.</p> <p>Retirement benefits are managed in line with the relevant legislative requirements and governance structures. In certain, very limited circumstances, a cash allowance may be offered in lieu of a retirement arrangement.</p>
Annual Performance Bonus Awards	<p>Employees who have been employed during a performance year (1 January to 31 December) may be eligible to be considered for an annual bonus in respect of that year.</p> <p>Annual bonuses are based upon Group, Business / Function, Team and Individual performance (with individual performance assessed against agreed goals and behaviours). The variable remuneration pool for all eligible employees, including Identified Staff or Material Risk Takers ("MRTs"), is determined initially by reference to profitability and other quantitative and qualitative financial and non-financial factors including risk considerations (on an ex-post and ex-ante basis). In reaching its final funding decision, the Committee exercises its judgement to ensure that the outcome reflects holistic Company performance considerations.</p> <p>abrdn Fund Managers Limited has specific obligations to act in the best interests of the UCITS V funds it manages and its investors. Accordingly, the performance of the underlying funds and the interests of investors (including, where relevant, investment risk) are also taken into account as appropriate. The Risk and Capital Committee and the Audit Committee formally advise the Committee as part of this process.</p> <p>The overall bonus pool is allocated to businesses and functions based on absolute and relative performance of each business and function and their alignment with strategic priorities and risk considerations. Allocation by region and subdivision/team is determined on a discretionary basis by the business / function and regional heads based on the absolute and relative performance of the constituent teams and alignment with strategic priorities.</p> <p>Individual annual bonus awards are determined at the end of the 12-month performance period with performance assessed against financial and non-financial individual objectives, including behaviour and conduct. Individual awards for Identified Staff are reviewed and approved by the Committee (with some individual award approvals delegated, as appropriate, to the Group's Compensation Committee, over which the Committee retains oversight). In carrying out these approvals, the Committee seeks to ensure that outcomes are fair in the context of overall Group performance measures and adjusted, where appropriate, to reflect input from the Risk and Capital Committee and the Audit Committee. Variable remuneration awards are subject to deferral for a period of up to three years. A retention period may also be applied as required by the relevant regulatory requirements. Deferral rates and periods comply, at a minimum, with regulatory requirements. In addition to the application of ex-ante adjustments described above, variable remuneration is subject to ex-post adjustment (malus / clawback arrangements).</p>
Other elements of remuneration – selected employees	<p>The following remuneration arrangements may be awarded in certain very limited circumstances:</p> <p>Carried Interest Plans – These arrangements are designed to reward performance in roles where a carried interest plan is appropriate. Selected employees are granted carried interest shares in private market funds established by the Group.</p> <p>Buy-Out Awards/Guaranteed Bonuses – These are intended to facilitate/support the recruitment of new employees. Buy-outs are not awarded, paid or provided unless they are in the context of hiring new employees. Guaranteed bonuses are not awarded, paid or provided unless they are exceptional and in the context of hiring new employees and limited to the first year of service. These awards are only made where such a payment or award is permitted under any relevant remuneration regulations and are designed to compensate for actual or expected remuneration foregone from previous employers by virtue of their recruitment.</p> <p>Retention and Special Performance Awards / LTIP – Supports retention and/or the delivery of specific performance outcomes and/or to incentivise senior employees to support the long-term, sustained performance of abrdn. The Company may determine that it is appropriate to grant such awards in limited circumstances. Awards are structured to deliver specific retention and/or performance outcomes. Retention and/or special performance awards comply with all relevant regulatory requirements.</p> <p>Severance Pay – Payment made to support an employee whose role is considered to be redundant. Severance payments comply with any legislative and regulatory requirements and any payments are inclusive of any statutory entitlement. In the event of severance, the treatment of any individual elements of an employee's remuneration is governed, as appropriate, by relevant plan or scheme rules.</p>

Control Functions

The Group ensures that, as appropriate, senior employees engaged in a control function are independent from the business units they oversee and have appropriate authority to undertake their roles and duties. These include, but are not necessarily limited to, Risk, Compliance and Internal Audit function roles. Senior employees engaged in a control function are remunerated in a way that ensures they are independent from the business areas they oversee, have appropriate authority and have their remuneration directly overseen by the Committee.

Conflicts of Interest

The Policy is designed to avoid conflicts of interest between the Group and its clients and is designed to adhere to local legislation, regulations or other provisions. In circumstances or jurisdictions where there is any conflict between the Policy and local legislation, regulations or other provisions, then the latter prevail. Where the Committee receives input from members of management on the remuneration arrangements in operation across the Group, this never relates to their own remuneration.

Personal Investment Strategies

The Company adheres to the regulatory principles and industry best practice on the use of personal hedging strategies which act in restricting the risk alignment embedded in employee remuneration arrangements.

UCITS V Identified Staff / MRTs

The 'Identified Staff' or MRTs of abrdn Fund Managers Limited are those employees who could have a material impact on the risk profile of abrdn Fund Managers Limited or the UCITS V funds it manages. This broadly includes senior management, decision makers and control functions. For the purposes of this disclosure, 'Identified Staff' includes employees of entities to which activities have been delegated.

Quantitative remuneration disclosure

The table below provides an overview of the following:

- Aggregate total remuneration paid by abrdn Fund Managers Limited to its entire staff; and
- Aggregate total remuneration paid by abrdn Fund Managers Limited to its UCITS V 'Identified Staff'.

Amounts shown reflect payments made during the financial reporting period in question. The reporting period runs from **1 January 2023 to 31 December 2023** inclusive.

	Headcount	Total Remuneration £'000
abrdn Fund Managers Limited¹	1,087	147,082
of which		
Fixed remuneration		119,255
Variable remuneration		27,827
abrdn Fund Managers Limited 'Identified Staff'²	96	35,228
of which		
Senior Management ³	41	20,859
Other 'Identified Staff'	55	14,369

¹ As there are a number of individuals indirectly and directly employed by abrdn Fund Managers Limited this figure represents an apportioned amount of abrdn's total remuneration fixed and variable pay, apportioned to the ManCo on an AUM basis. The Headcount figure provided reflects the number of beneficiaries calculated on a Full Time Equivalent basis.

² The Identified Staff disclosure relates to UCITS V MRTs and represents total compensation of those staff of the ManCo who are fully or partly involved in the activities of the ManCo.

³ Senior management are defined in this table as ManCo Directors and members of the abrdn plc Board, together with its Executive Committee, Investment Management Committee and Group Product Committee.

Further Information

Constitution

abrdrn OEIC II was incorporated on 22 May 1998, under the FCA Regulations. The Company is an open-ended investment company (OEIC) with variable capital under regulation 14 (authorisation) of the OEIC Regulations.

Consumers' rights and protections, including any derived from EU legislation, are currently unaffected by the result of the UK referendum to leave the European Union and will remain unchanged unless and until the UK Government changes the applicable legislation.

Documentation and Prices

Copies of the current Prospectus and Key Investor Information Documents (KIIDs) for the abrdrn OEIC II, daily prices, together with the latest Annual (and if issued later the interim) Report and Accounts for any funds, are available to download at abrdrn.com. A paper copy of the Report and Accounts is available on request from the ACD.

Notices/Correspondence

Please send any notices to abrdrn Fund Managers Limited, PO Box 12233, Chelmsford, CM99 2EE. Any notice to the ACD will only be effective when actually received by the ACD. All notices will be sent to the investor at the address set out in the application form or the latest address which the investor has notified to the ACD, and will be deemed to have been received three days after posting. Events detailed in these terms and conditions will be carried out on the dates specified, unless the dates are a non-business day, when they will be carried out on the next business day.

Complaints and Compensation

If you need to complain about any aspect of our service, you should write to the Complaints Team, abrdrn, PO Box 12233, Chelmsford CM99 2EE, who will initiate our formal complaints procedure. If you prefer, you may call the Complaints Team on 0345 113 6966 or email complaints@abrdrn.com in the first instance.

Alternatively if you have a complaint about the Company or funds you can contact the Depositary directly. A leaflet detailing our complaints procedure is available on request. We will endeavour to respond to your complaint as soon as possible and will notify you of our outcome within 8 weeks. If the complaint is not resolved by us to your satisfaction then you may have the right to take your complaint to the Financial Ombudsman Service (FOS). To contact the FOS Service you should write to The Financial Ombudsman Service, Exchange Tower, London, E14 9SR, email complaint.info@financial-ombudsman.org.uk or telephone 0800 023 4567 (free for landlines and mobiles) or 0300 123 9123 (calls cost no more than calls to 01 and 02 numbers) or +44 20 7964 0500 (available from outside the UK – calls will be charged).

We are covered by the Financial Services Compensation Scheme, which means if we become insolvent, you may be entitled to compensation. The level of compensation will depend on the type of business and the circumstances of your claim. Investments are covered up to £85,000 for claims against firms that fail on or after 1 April 2019. Details are available from the FSCS Helpline on 0800 678 1100 or 020 7741 4100 and on the FSCS website: www.fscs.org.uk.

UCITS

The funds were certified under the Undertaking for Collective Investment in Transferable Securities (UCITS) directive, which allows the ACD to market the funds in member States of the European Union subject to relevant local laws, specifically marketing laws.
