# BNY Mellon Sustainable European Opportunities Fund

**INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B4Q5KM81)**

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

## Objectives and Investment Policy

### OBJECTIVE

To achieve capital growth over the long term (5 years or more).

### POLICY

#### The Fund will:

- invest at least 75% of its assets in a concentrated portfolio of continental European companies that meet the Investment Manager's sustainability criteria, where environmental, social, governance ("ESG") considerations are an integral part of the criteria. The Investment Manager's sustainability criteria exclude certain companies and involve other general and company level ESG-related analysis of a company's activities;
- invest in continental Europe (excluding the UK); and
- invest in equities (company shares), including ordinary shares, preference shares and other equity-related securities.

#### The Fund may:

- invest in European emerging market countries;
- invest in money market instruments, deposits, cash and near cash;
- hold warrants, convertible bonds and partly paid securities where these have been acquired by the Fund as a result of corporate actions;
- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income; and

- invest up to 10% of its assets in other collective investment schemes.

**Benchmark:** The Fund will measure its performance against the FTSE World Europe ex UK TR Index as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because, while it does not take ESG factors into account, it includes a broad representation of the asset class, sectors and geographical areas in which the Fund predominantly invests.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

### OTHER INFORMATION

**Treatment of income:** net income generated will be retained within the Fund and reflected in the value of your shares.

**Dealing:** you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

## Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 6 because its historical value has shown relatively high volatility. With a Fund rating of 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

### THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

**Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.

**Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

**Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

**Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.

**Concentration Risk:** A fall in the value of a single investment may have a significant impact on the value of the Fund because it typically invests in a limited number of investments.

**Sustainable Funds Risk:** The Fund follows a sustainable investment approach, which may cause it to perform differently than funds that have a similar objective but which do not integrate sustainable investment criteria when selecting securities. The Fund will not engage in stock lending activities and, therefore, may forego any additional returns that may be produced through such activities.

**Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

**Geographic Concentration Risk:** Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
