Fund Objective & Policy

The Fund aims to provide a monthly income with prospects for investment growth over the long term. It looks to provide an income yield higher than the FTSE All-Share Index over rolling 3-year periods, after the deduction of charges. The Fund is actively managed, and invests in a combination of company shares and bonds; typically, between 70-80% in UK company shares and 20%-30% in bonds. The Fund considers UK companies to mean companies listed on the London Stock Exchange; predominantly those domiciled in the UK, or which have significant UK business operations. The Fund selects companies that exhibit above average income generation potential, as well as those considered to offer opportunities more by way of share price or dividend growth. These companies may be chosen from any industry or economic sector, and whilst there is no restriction on size, investment tends to focus on the larger companies included in the FTSE All-Share Index. The bonds selected are usually investment grade corporate bonds, but may also include government bonds. These bonds are denominated in sterling (or hedged back to sterling, if a different currency). The FTSE All-Share Index is regarded as an appropriate performance measure of the UK stock market, with over 600 companies currently included. The income yield of this index provides a suitable target benchmark against which the level of income generated by the Fund will be measured and evaluated over time. The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate. The Fund is not permitted to invest in derivatives for investment purposes, but derivatives may be used with the aim of reducing risk or managing the Fund more efficiently. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

Risk & Reward Profile

UCITS SRRI

The Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward. Please see the Key Investor Information Document for more information.

Key Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund may invest in derivatives (complex instruments linked to the rise and fall of the value of other assets) with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The fund may exhibit significant price volatility.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

Income Yield

| | Rolling over 3 years |
|------------------------|----------------------|
| Share Class – Yield | 3.23% |
| FTSE All-Share - Yield | 3.62% |

The above share class and index yield calculations use the average yield for a rolling 3-year period.

Typical Investor Profile

The Fund may be suitable for investors with an investment horizon of more than five years seeking monthly income and potential capital growth who are prepared to tolerate large price fluctuations. If investors are uncertain if the Fund is suitable for them, they are advised to contact a financial adviser.

Share classes in the table may not be open to all investors, please refer to the Prospectus for further information. Overall impact of costs: Costs and expected returns may increase or decrease as a result of currency and exchange rate fluctuations, if costs are to be paid in another currency than your local currency. The ongoing charges figure (OCF), exit charges (maximum amount to be deducted shown in the table above) and transaction costs show the percentage that may be deducted from your expected returns. The OCF is usually based on the last year's expenses, includes charges such as the Fund's annual management charge and operating costs. Transaction costs displayed are based on a three year average total and are calculated based on FYE Report and Account figures. Where the fund is less than 3 years old the transaction costs are based on proxy and actual costs. All transaction costs are as at 07/03/23. Additional distributor or intermediary fees may not be included. In some cases, the OCF may be based on an estimate of future charges. For a more detailed breakdown please visit www.columbiathreadneedle.com / fees.
