## RISK AND REWARD PROFILE

### Risk Disclaimer

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.

Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases.

Please note the Fund's risk category may change in the future.

### Why is the fund in the specific category?

This Fund is ranked 3. This is due to historical price movement of such investments.

### The indicator does not take into account the following risks of investing in this Fund:

**Interest Rate Risk:** Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.

**Concentration Risk:** The Fund holds a limited number of investments. If one of these investments falls in value this can have a greater impact on the Funds' value than if it held a larger number of investments.

**Financial Techniques Impact:** The Fund may invest in derivatives. A relatively small movement in the derivative's underlying investment may have a much larger impact, positive or negative, on the value of the fund than if the fund were to hold the underlying investment itself.

Further details on risk factors that apply to this Fund are set out in the Risk Factors section of the prospectus.
