

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Man GLG Emerging Markets Corporate Credit Alternative Class IN H GBP Shares

(ISIN:IE000K8037K2) Man GLG Emerging Markets Corporate Credit Alternative (the 'Fund') is a sub-fund of Man Funds VI plc (the 'Company').

Man Asset Management (Ireland) Limited, part of Man Group plc, is the Manager of the Company.

Objectives and investment policy

- The Fund's investment objective is to provide investors with positive absolute returns, primarily through both long and short investments in emerging market corporate and sovereign bonds.
- The Fund will invest in a portfolio of emerging markets corporate and sovereign bonds. The Fund will take either long or synthetic short positions and may seek to avail itself of event driven investment opportunities, focussing on company, sector and country related opportunities. The Fund will use a bottom-up (evaluating each individual issuer rather than looking at movements in prices within a particular market or market segment), fundamental approach.
- The Fund may be fully exposed to below investment grade securities or in unrated securities under normal market conditions. The Fund will not have a specific sectoral or industrial focus. The Fund may be fully exposed to emerging markets.
- The Fund may also invest in supra-nationals, common stock and other equity securities globally, Rule 144A securities, money market instruments, currencies, other fixed income investments and eligible collective investment schemes. The Fund may also invest up to 10% in bonds that are convertible from debt to equity upon the occurrence of a trigger event (known as "CoCos").
- The Fund may actively use financial derivative instruments (i.e. instruments whose prices are dependent on one or more underlying assets) ("FDI") which may multiply the gains or losses made by the Fund on a given investment or on its investments generally.
- The Fund may use FDI to achieve its investment objective, for efficient portfolio management purposes and for hedging against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset.
- The Fund may increase its holdings of cash and other liquid assets in times of exceptional market circumstances or where it is of the opinion that there are insufficient investment opportunities.
- The Fund is actively managed and the Investment Manager will not select investments by reference to any benchmark or index.
- The Fund's reference currency is USD.
- The Fund may also invest in local currency and hard currency corporate issues from across the credit spectrum (including investment grade, high yield and distressed assets) which are identified as mispriced, either in absolute terms or relative to their peers.
- This share class is denominated in USD. The Fund will use FDI to the extent reasonably possible with the aim of protecting investors against GBP / USD currency fluctuations.
- The Investment Manager may use proprietary quantitative models which capture a number of elements, including without limitation, solvency analysis and valuation analysis of issuers, to support risk management and portfolio construction methods.
- Any income earned on investments will be added to the value of investors' shares and investors can buy and sell their shares on each dealing day of the Fund.
- Investment in the Fund is suitable for investors who can hold for the long term and who are prepared to have a medium to high risk investment in their portfolio in order to generate potentially higher returns.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 4 as funds of this nature engage in strategies that typically have a moderate volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The Fund will be exposed to credit risk on counterparties with which it trades in relation to on-exchange traded instruments such as futures and options and where applicable, 'over-the-counter' ("OTC", "non-exchange") transactions. OTC instruments may also be less liquid and are not afforded the same protections that may apply to participants trading instruments on an organised exchange.
- The Fund's use of FDI may result in increased leverage which may lead to significant losses.
- The Fund may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely and cost efficient sale of trading positions can be impaired by decreased trading volume and/or increased price volatility.

- The Fund will invest in financial derivative instruments ("FDI") (instruments whose prices are dependent on one or more underlying asset) to achieve its investment objective. The use of FDI involves additional risks such as high sensitivity to price movements of the asset on which it is based. The extensive use of FDI may significantly multiply the gains or losses.
- The Fund invests a significant proportion of its assets in securities issued by distressed companies that are either in default or in high risk of default, such investments involve significant risk.
- The value of investments designated in another currency may rise and fall due to exchange rate fluctuations. Adverse movements in currency exchange rates may result in a decrease in return and a loss of capital. It may not be possible or practicable to successfully hedge against the currency risk exposure in all circumstances.
- The Fund may invest a significant proportion of its assets in securities with exposure to emerging markets which involve additional risks relating to matters such as the illiquidity of securities and the potentially volatile nature of markets not typically associated with investing in other more established economies or markets.
- The Fund may invest a significant proportion of its assets in non-investment grade securities (such as "high yield" securities) are considered higher risk investments that may cause income and principal losses for the Fund. They are instruments which credit agencies have given a rating which indicates a higher risk of default. The market values for high yield bonds and other instruments tend to be volatile and they are less liquid than investment grade securities.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- There is no guarantee that the Fund will achieve its investment objective.

A complete description of risks is set out in the prospectus section entitled 'Certain Investment Risks'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.30%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	20.00% of the aggregate appreciation in value above Reference NAV.
------------------------	--------------------------------------------------------------------

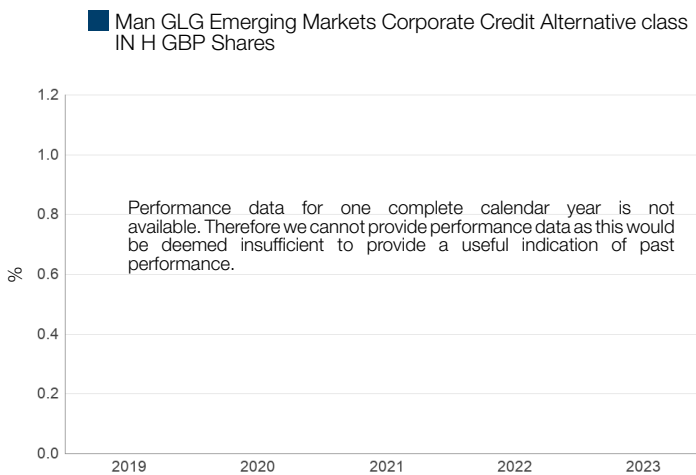

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

As this share class has not had a full year of performance, the ongoing charges figure is an estimated figure.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

Past performance

- The Fund was authorised in 2023.

Practical information

- Man Asset Management (Ireland) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.
