Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

The Company

The Invesco Fixed Interest Investment Series is an investment company with variable capital ("ICVC"), incorporated in England and Wales on 8 May 2003.

The Company is a "UK UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority ("FCA") authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 30 April 2023, the Company consisted of eight Funds:

Invesco Corporate Bond Fund (UK)
Invesco Distribution Fund (UK)
Invesco Environmental Climate Opportunities Bond Fund (UK)
Invesco Global Bond Fund (UK)
Invesco Global Financial Capital Fund (UK)
Invesco High Yield Fund (UK)
Invesco Monthly Income Plus Fund (UK)
Invesco Tactical Bond Fund (UK)

Accounting Periods

Annual accounting date	30 April
Interim accounting date	31 October

Invesco Corporate Bond Fund (UK), Invesco Global Bond Fund (UK), Invesco Global Financial Capital Fund (UK) and Invesco Tactical Bond Fund (UK) will make distribution payments on 31 December (interim) and 30 June (final).

Invesco Environmental Climate Opportunities Bond Fund (UK) and Invesco High Yield Fund (UK) will make distribution payments quarterly on 30 September, 31 December, 31 March and 30 June (final).

Invesco Distribution Fund (UK) and Invesco Monthly Income Plus Fund (UK) will make monthly distributions, with the payment date being the last day of the month following the end of the distribution period.

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Launch of New 'M' Share Classes

New share classes, M Accumulation shares and M Income shares were launched at 200p per share for the Invesco Tactical Bond Fund (UK) on 9 September 2022, the Invesco High Yield Fund (UK) on 4 November 2022 and the Invesco Corporate Bond Fund (UK) on 24 March 2023.

Further details can be obtained from the most up to date relevant fund and share class specific Key Investor Information Document(s).

Invesco European High Income Fund (UK)

On 1 July 2022, the Manager wrote to the shareholders of the Invesco European High Income Fund (UK) giving 90 days' notice of its intention to terminate the Fund, having also informed the FCA of this decision. This Fund was closed on 19 August 2022. The termination was concluded on 27 June 2023.

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority ("ESMA") Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2022, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UK UCITS Schemes it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UK UCITS Schemes it manages. The Remuneration Policy is available within the Corporate Policies section of our website (www.invesco.com/uk). Paper copies of the Remuneration Policy can also be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UK UCITS related activities of the Manager in respect of performance year (1 January 2022 to 31 December 2022) is £49.51m of which £30.39m is fixed remuneration and £19.12m is variable remuneration. The number of beneficiaries apportioned to UK UCITS activities is 255.

Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Remuneration Policy (Unaudited) continued

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UK UCITS Schemes it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UK UCITS related activities for the performance year (1 January 2022 to 31 December 2022) is £14.91m of which £3.62m is paid to Senior Management and £11.29m is paid to other Identified Staff. Please note that remuneration for UK UCITS Schemes Identified Staff includes remuneration for staff employed by delegates.

Managing the risks presented by the Russia-Ukraine conflict

Financial markets have been impacted since February 2022, due primarily to geopolitical tensions arising from Russia's incursion into Ukraine and the impact of a subsequent range of sanctions, regulations and other measures which impaired normal trading in Russian securities. On 28 February 2022, Invesco Fund Managers Limited suspended the purchase of all Russian securities in its funds. There has been no significant impact on the Funds as a result of the conflict during the financial period ended 30 April 2023.

Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Managing the risks presented by the Russia-Ukraine conflict continued

The directors of Invesco Fund Managers Limited are actively monitoring the situation and, with the support of the investment manager, continue to manage the Funds' assets within their investment and risk parameters that have been established. The Directors will continue to review the situation in order to navigate through this period of heightened uncertainty.

Silicon Valley Bank, Signature Bank and Credit Suisse

Following the closure of Silicon Valley Bank ("SVB"), the possession of Signature Bank and the recent economic turmoil involving Credit Suisse, the Manager has assessed the impact on the net asset value of the Funds as immaterial.

As at 30 April 2023, none of the Funds were invested in SVB or Signature Bank. The Invesco Corporate Bond Fund (UK), Invesco Distribution Fund (UK), Invesco Global Bond Fund (UK), Invesco Global Financial Capital Fund (UK), Invesco High Yield Fund (UK), Invesco Monthly Income Plus Fund (UK) and Invesco Tactical Bond (UK) were all invested in Credit Suisse, however, those investments were only 1.01%, 0.31%, 0.74%, 0.62%, 0.58%, 0.59% and 0.37% of the net asset value of the Funds respectively.

Task Force on Climate-related Financial Disclosures ("TCFD") Portfolio Reports

For each Fund, we publish a Task Force on Climate-related Financial Disclosures ("TCFD") Portfolio Report which provides detailed climate-related information on the Fund. You can access these reports directly on our website via the following link: www.invesco.com/uk/icvctcf. These reports, in conjunction with our group-level TCFD report https://www.invesco.com/content/dam/invesco/emea/en/pdf/2022_IVZ_Global_TCFD_Report.pdf, provide a detailed overview of our approach to climate-related governance, strategy and risk management as well as metrics and targets. We encourage all investors in the Funds to review these reports to gain a deeper understanding of our commitment to managing climate-related risks and opportunities.

Invesco Environmental Climate Opportunities Bond Fund (UK):

Effective 7 July 2023, the Fund's ESG exclusion criteria was updated to include a Thermal Coal Power Generation restriction of $\geq 10\%$ of revenue. The Fund has been managed in accordance with this restriction since launch. This change is for clarification purposes only. The Responsible Investment Policy, which can be found in the Literature section below, has been updated accordingly.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The securities that the Funds invest in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity for the securities in which the Fund invests, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds.

The Funds have the ability to make use of financial derivatives (complex instruments) – significant use in the case of the Invesco Tactical Bond Fund (UK) – which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. The leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested, resulting in the Fund being exposed to a greater loss than the initial investment.

The Funds may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss. The Funds' performance may be adversely affected by variations in interest rates. The performance of the Invesco Environmental Climate Opportunities Bond Fund (UK), the Invesco Global Bond Fund (UK) and the Invesco Tactical Bond Fund (UK) may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

As one of the key objectives of the Invesco Distribution Fund (UK), the Invesco Environmental Climate Opportunities Bond Fund (UK), the Invesco Global Financial Capital Fund (UK), the Invesco High Yield Fund (UK) and the Invesco Monthly Income Plus Fund (UK) is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

The Invesco Environmental Climate Opportunities Bond Fund (UK)'s use of ESG criteria may affect the Fund's investment performance and therefore may perform differently compared to similar products that do not screen investment opportunities against ESG criteria.

As the Invesco Tactical Bond Fund (UK) can rapidly change its holdings across the fixed income and debt spectrum and cash, this can increase its risk profile.

As the Invesco Global Financial Capital Fund (UK) is a theme-based Fund, which only invests in fixed interest and other debt securities and shares of banks and other financial institutions, investors should be prepared to accept a higher degree of risk than for a Fund that is more widely diversified across different sectors.

Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Risk Profile continued

The Invesco Corporate Bond Fund (UK), Invesco Distribution Fund (UK), Invesco High Yield Fund (UK), Invesco Monthly Income Plus Fund (UK) and Invesco Tactical Bond Fund (UK) may invest in contingent convertible bonds and the Invesco Global Financial Capital Fund (UK) can invest in contingent convertible bonds, which may result in significant risk of capital loss based on certain trigger events.

Although the Invesco Global Bond Fund (UK) invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Invesco Global Bond Fund (UK) and the Invesco Tactical Bond Fund (UK) have the ability to invest more than 35% of its value in securities issued by a single government or public international body.

The Investment Managers of the Invesco Distribution Fund (UK), the Invesco Monthly Income Plus Fund (UK) and the Invesco Tactical Bond Fund (UK) have wide discretion to allocate flexibly within an asset class. Where the Investment Manager has wide discretion to allocate flexibly within an asset class (for example across the credit spectrum within fixed income) or between different asset classes (for example between equities, fixed income and cash) in respect of a Fund, the allocation of investments between different asset classes or between segments of the same asset class may have a significant effect on the Fund's performance. The Fund could miss attractive investment opportunities by having underweight exposure to markets that subsequently experience significant returns and could lose value by being overweight in markets that subsequently experience significant declines. As a result, the relevance of the risks associated with investing in each asset class (or segment of the same asset class) will fluctuate over time. This may result in periodic changes to the Fund's risk profile. In addition, the periodic allocation or rebalancing of investments may incur greater transaction costs than a fund with a static allocation strategy.

A more detailed description of risk factors that apply to these Funds is set out in the Prospectus.

Value Assessment (Unaudited)

The Manager conducted an assessment of value for each Fund. The assessment of value report will be made available to investors annually in a composite report for all the funds in Invesco's ICVC range on our website <https://www.invesco.com/uk/en/global-footer/corporate-policies.html>. The latest Value Assessment as at 31 December 2022 was published in May 2023.

Holdings in other Funds of the Company

As at 30 April 2023, no Funds held shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company.

The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

Certification of the Annual Report by the Manager

In accordance with the requirements of the Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

Director - Alan Trotter

Director - Rene Marston

Invesco Global Bond Fund (UK)

Invesco Global Financial Capital Fund (UK)

Invesco High Yield Fund (UK)

Invesco Monthly Income Plus Fund (UK)

Invesco Tactical Bond Fund (UK)

¹ The risk category for the Fund changed from 3 to 4 on 28 February 2023.

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents ("KIIDs"), which are available at www.invesco.com/uk or by contacting us.

Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Securities Lending (Unaudited)

for the year 1 May 2022 to 30 April 2023

Securities Lending

Securities lending transactions entered into by the Funds, including transfer of collateral received in exchange for securities lent, are subject to a written legal agreement between Invesco Asset Management Limited (the "investment adviser", on behalf of the Funds); Citibank UK Limited (the "Depository"); and The Bank of New York Mellon, London Branch (the "Securities Lending Agent").

Collateral received is segregated from the assets belonging to the Depository or the Securities Lending Agent.

The following table details the value of securities on loan as a proportion of the Funds' total lendable assets and Net Asset Value ("NAV") as at 30 April 2023. The income earned from securities lending is also shown for the year ended 30 April 2023. Total lendable assets represents the aggregate value of assets forming part of the Funds' securities lending programme. This excludes any assets held by the Funds that are not considered lendable due to any market, regulatory, investment or other restriction.

Securities on loan

Fund	% of lendable assets	% of NAV	Income earned £'000
Invesco Corporate Bond Fund (UK)	7.45	7.33	137
Invesco Distribution Fund (UK)	12.66	11.14	479
Invesco Global Bond Fund (UK)	14.28	12.66	11
Invesco Global Financial Capital Fund (UK)	5.64	4.46	5
Invesco High Yield Fund (UK)	7.40	6.58	247
Invesco Monthly Income Plus Fund (UK)	8.36	7.31	926
Invesco Tactical Bond Fund (UK)	12.31	11.34	201

The Funds entered into the securities lending programme on 10 February 2021.

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities lending revenues generated as compensation for its securities lending services and the Fund shall be entitled to the remainder of such net securities lending revenues.

The following table details the value of securities on loan and associated collateral received, analysed by counterparty as at 30 April 2023.

Invesco Fixed Interest Investment Series (the "Company")

Report of the Authorised Corporate Director (the "Manager")

Securities Lending (Unaudited)

for the year 1 May 2022 to 30 April 2023

Collateral continued

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received as collateral is based on the respective contractual maturity date, while for equity securities and exchange traded funds ("ETFs") received as collateral are presented as open transactions as they are not subject to a contractual maturity date.

As at 30 April 2023, all non-cash collateral received by the Funds in respect of securities lending transactions is held by the Funds (or through its delegates).

The following table lists the top ten issuers (or all the issuers if less than ten) by value of non-cash collateral received by the Funds by way of the title transfer collateral arrangement across securities lending transactions as at 30 April 2023.

Issuer	Value £'000	% of the Fund's NAV

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

1 Accounting Policies

a) Basis of preparation

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (“UK GAAP”), as defined within the UK Financial Reporting Standard (“FRS 102”) and the Statement of Recommended Practice ‘Financial Statements of UK Authorised Funds’ (the “SORP”), issued by the Investment Management Association (now known as the Investment Association) in May 2014 and updated in June 2017, the COLL and the Company’s Instrument of Incorporation and Prospectus.

b) Recognition of revenue

- i) Distributions and accumulations, excluding equalisation, receivable on the underlying collective investment schemes are recognised as revenue when the shares are quoted ex-dividend. The Manager rebates an amount equivalent to the ongoing charge suffered on this Fund’s share in the underlying collective investment schemes. Each rebate is paid to either the capital or revenue element of the Fund depending on whether the fee of the underlying Fund is charged to capital or revenue.
- ii) Dividends on quoted ordinary shares, collective investment schemes and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when they are declared.
- iii) Interest on bank balances and deposits is recognised on an accruals basis.
- iv) Revenue arising on debt securities is accreted or amortised over the life of such securities and recognised at a consistent rate over the life of the instrument (effective yield accounting). Future cash flows on all debt securities are considered when calculating revenue on an effective yield basis and where purchase costs are considered to reflect incurred credit losses, such losses are taken into account so that interest is recognised at a reasonably expected commercial rate. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital cost of these securities and dealt with as part of the revenue of the Company.
- v) All revenue is recognised at a gross amount that includes any withholding taxes but excludes any other taxes, such as attributable tax credits.
- vi) All REIT dividend revenue is recognised on an accruals basis and the allocation between income and capital is estimated when the security goes ex-dividend based upon previous income/capital allocations.
- vii) Bond, equity and index futures consist of both a capital and revenue return. The split of the overall futures return into its revenue and capital components is calculated as the underlying instrument yield less the implied cost of borrowing. The net revenue on long positions and the net expense on short positions are recognised as revenue and forms part of the Company’s distribution.
- viii) Returns from derivative securities are taken to capital and/or revenue depending on the motive and circumstances surrounding the particular transaction. The net revenue/expense on derivative positions are recognised as revenue and form part of the Company’s distribution.
- ix) Income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Securities Lending Agent shall retain 10% of the securities lending revenues generated as compensation for its securities lending services and the Fund shall be entitled to the remainder of such net securities lending revenues.

c) Stock dividends

Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares on the date they are quoted ex-dividend exceeds the cash dividend is taken to capital.

d) Special dividends and share buy-backs

The underlying circumstances behind both special dividends and the proceeds from share buybacks are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature. Amounts recognised as revenue will form part of the Company’s distribution. Any tax treatment thereon will follow the accounting treatment of the principal amount.

e) Underwriting commission

Underwriting commission is wholly recognised as revenue when the issue takes place, except where the Company is required to take up all or some of the shares underwritten, in which case an appropriate proportion of the commission received is deducted from the cost of those shares.

f) Expenses

All expenses, except for those relating to the purchase and sale of investments are charged initially against revenue and are accounted for on an accruals basis.

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

1 Accounting Policies continued

-
- g) Revenue allocation to share classes**
Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses and tax attributable to each class.
-
- h) Measurement basis**
The measurement basis used in preparing the financial statements is fair value for investments and historical cost for all other assets and liabilities.
-
- i) Basis of valuation of investments**
All investments are valued at their fair value as at the balance sheet date.
- All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. The Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the assumptions used are under continuous review by the Manager with particular attention paid to the carrying value of the investments. Over-the-counter derivative contracts shall be valued on the basis of unrealised gain or loss on the contract using current settlement price. When settlement price is not used, the over-the-counter derivative contracts will be valued at their fair value in accordance with the method of valuation (as used on a consistent basis) as shall have been agreed between the Manager and the Depositary.
-
- j) Accounting for Options**
For written (sold) options, the premium received, where the express purpose is to generate revenue, is accrued to the revenue account on a straight line basis over the life of the contract. Where the call option is exercised early the remainder of the premium to expiry will be retained in capital. The Portfolio Statement and Balance Sheet will also reflect any unrealised gain or loss on the underlying securities, this being measured by the difference between strike price and the market price at the balance sheet date.
-
- k) Exchange rates**
Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the year. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions. Foreign exchange gains and losses arising from translation are included in the Statement of Total Return and are included in net capital gains/(losses) on investments.
-
- l) Taxation and deferred taxation**
Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Corporation tax is charged at 20% of the revenue liable to corporation tax less expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset. Overseas capital gains tax is accounted for on an accruals basis.
-
- m) Efficient portfolio management**
Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in ‘Revenue’ or ‘Interest payable and similar charges’ in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in ‘Net capital gains/losses’ in the Statement of Total Return. Any positions on such transactions open at the period end are reflected in the Balance Sheet at their marked to market value.
-
- n) Dilution adjustment**
The need to apply a dilution adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustment on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, is fair to all
-

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

1 Accounting Policies continued

n) Dilution adjustment continued
Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Funds in the Invesco Fixed Interest Investment Series:

- where over a dealing period a Fund has experienced a large level of net issues or redemptions relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Fund in question (as calculated at the last valuation point); or
- where the Manager considers it necessary to protect the interests of the Shareholders of the Company.

On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Fund which may otherwise constrain the future growth of the Fund in question.

Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments by Fund and an indication of the frequency of application of such adjustments.

o) Credit default swaps
Open credit default swaps are shown in the Portfolio Statement and are priced at fair value. The treatment of the returns from credit default swaps depends upon the nature of the transaction. Both motives and circumstances are used to determine whether returns should be treated as capital or revenue. The capital element is reflected within Derivative Securities under Net capital gains and the revenue or expense element is reflected within credit default swaps under Revenue or under Interest payable and similar charges.

2 Distribution Policies

The Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Fund's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Fund accumulations and distributions are paid as interest distributions.

In calculating the amount to be distributed, the following Funds allocate the Manager's ongoing charge to capital, thereby increasing the amount available for distribution:

Invesco Distribution Fund (UK)
Invesco Environmental Climate Opportunities Bond Fund (UK)
Invesco Global Financial Capital Fund (UK)
Invesco High Yield Fund (UK)
Invesco Monthly Income Plus Fund (UK)

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Fund.

Marginal tax relief is not taken into account when determining the distribution.

Each share class has the same rights on a winding up of the Company.

4 Generic Risk Factors

In pursuing their investment objectives, the Funds of the Company hold a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

4 Generic Risk Factors continued

directly from their operations. Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Funds’ holding of financial instruments are set out below together with the Manager’s policy for managing these risks.

Counterparty risk

The Funds may enter into derivatives transactions or place cash in bank deposit accounts, which would expose the Funds to the credit of its counterparties and their ability to satisfy the terms of such contracts. In the event of a bankruptcy or insolvency of a counterparty, the Funds could experience delays in liquidating positions and significant losses, including declines in the value of investments during the year in which the Funds seek to enforce its rights, inability to realise any gains on their investments during such year and fees and expenses incurred in enforcing their rights.

In order to mitigate this risk, the Funds conduct trades through reputable counterparties. A diligent process to select and approve a new counterparty, as well as monitoring existing counterparties, is in place. During the approval process, various verifications are performed such as assessing the counterparty’s operational capabilities as well as their credit quality. On an ongoing basis, market analysis is reviewed by the firm’s trading and credit research teams in order to detect warning signs of a counterparty default. If the firm believes high risk of default exists, the counterparty is removed with immediate effect from the approved counterparty list.

Custody risk

The assets owned by each Fund are held on trust for the Fund by a custodian that is also regulated by the Financial Conduct Authority. The Financial Conduct Authority requires that the custodian ensures that there is legal separation of non-cash assets held under custody and that records are maintained that clearly identify the nature and amount of all assets under custody, the ownership of each asset and where the documents of title to that asset are located. In case of a potential bankruptcy of the custodian, cash positions in the Fund are not protected and there may be a delay in regaining full control of the non-cash assets.

Currency exchange risk

The Funds’ assets may be invested in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

Interest rate risk

Interest rate risk refers to the risk that bond prices generally fall as interest rates rise. Conversely, bond prices generally rise as interest rates fall. Specific bonds differ in their sensitivity to changes in interest rates depending on their individual characteristics. One measure of this sensitivity is called duration. The longer the duration of a particular bond, the greater its price sensitivity is to interest rate. Similarly, a longer duration portfolio of securities has greater price sensitivity. Falling interest rates may also prompt some issuers to refinance existing debt, which could affect the Fund’s performance.

Investing in an ESG Fund

The use of ESG criteria may affect a Fund’s investment performance and, as such, the Fund may perform differently compared to similar collective investment schemes that do not screen investment opportunities against ESG criteria. ESG based criteria used in the Fund may result in the Fund foregoing certain investment opportunities when it might otherwise be advantageous to do so, and/or selling investments due to their ESG characteristics when it might be disadvantageous to do so.

Investing in Financial Derivative Instruments

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager’s expectations in employing such techniques and instruments be incorrect, a Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Fund concerned. Transactions in derivatives are used in the Funds for both efficient portfolio management and investment purposes. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of a Fund.

Investing in High Yield Bonds

Where a Fund’s investment policy is to invest in higher risk fixed interest securities, many of the investments will be in “below investment grade” securities (generally defined as below BBB- by leading rating agencies). Investment in such securities brings an increased risk of default on repayment and therefore increases the risk that the income and capital of the Fund will be affected.

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

4 Generic Risk Factors continued

Investing in High Yield Bonds continued

As a general rule, fixed interest securities with an above average yield tend to be less liquid than securities issued by issuers with a higher investment grade. Furthermore, the solvency of issuers of such fixed interest securities may not be guaranteed in respect of either the principal claim or regarding the interest payments and it may not be excluded that such issuers may become insolvent.

Issuer risk

The Funds are subject to the risk that issuers of bonds or other fixed income securities do not make payments on such securities. A lowering of the credit rating of the issuer of a bond or of the bond itself may cause volatility in the price or reduce the security's liquidity, making it more difficult to sell.

Liquidity risk

The Funds may be affected by a decrease in market liquidity for the securities in which they invest, which may mean that the Funds may not be able to sell some securities at a fair price in a timely manner. In order to mitigate this risk, a substantial proportion of the Funds' assets consist of readily realisable assets.

Furthermore, Invesco monitors liquidity risk for each portfolio against its required minimum liquidity threshold. This includes holding a high enough proportion of assets that can be liquidated quickly and with a limited impact on price, also depending on its actual or hypothetical redemption profile, investment strategy, regulatory framework or contractual obligations. This is done by implementing a monitoring framework focused on Liquidation Size and Liquidation Cost.

Liquidity results are monitored at Fund level on a daily basis including against internally defined limits.

Market price risk

The Funds are exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such the prices of and the income generated by the Funds' securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

Taking charges from capital

Where the investment objective of a Fund is to treat the generation of income as a higher priority than capital growth, or the generation of income and capital growth have equal priority, all or part of the ongoing charge as well as other fees and expenses of the Fund may be taken from capital instead of income. The Funds take such fees and expenses from capital in order to manage the level of income paid and/or available to Shareholders. This may result in capital erosion or may constrain capital growth.

Calculation methods of the Risk Exposure

Following the assessment of the investment policy of each Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk (“VaR”) for the assessment of the global exposure of each Fund.

Value-at-Risk (“VaR”) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Fund is compared to that of a benchmark or reference portfolio. With this approach, the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) (“ESMA Guidelines”).

The Absolute VaR of a UK UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UK UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the $(\text{VaR of the UK UCITS Scheme}) / (2 * \text{VaR of the reference portfolio})$ is not greater than 100%.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);

Invesco Fixed Interest Investment Series (the “Company”)

Notes applicable to the financial statements of all Funds

4 Generic Risk Factors continued

Calculation methods of the Risk Exposure continued

- effective observation period (history) of risk factors of two years;
- daily calculation.

In line with box 25 of ESMA Guidelines, as the Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

The table below details the VaR approach for each Fund and, for those Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 30 April 2023, as well as the daily average level of leverage for each Fund during the one year period ending 30 April 2023.

5 Investment Objective and Policy continued

which may reasonably be regarded as ancillary to the investment objectives of the Funds. They may also borrow, providing such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

6 Functional Currency

The Company's functional and presentational currency is Sterling. The financial statements are presented to the nearest £'000.

7 Bank Balances and Overdrafts

Bank balances and overdrafts are held by the Custodian, and are subject to the Custodian's variable credit and debit interest rates respectively.

8 Transactions and Balances with Related Parties

Invesco Fund Managers Limited (and its associates), as Manager, is a related party and acts as principal in respect of all transactions in the shares of the Company.

Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4, within each Fund. Management fee rebates are disclosed in note 2 and note 3 within each Fund. Amounts due at the end of the accounting year for Fund Management Fees are disclosed in note 10 within accrued expenses, within each Fund.

All issued and redeemed shares transacted with the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and balances due from and to the ACD are shown in notes 8 and 10 to the financial statements of each Fund.

Invesco Fund Managers Limited and its associates (including other authorised investment companies managed by Invesco Fund Managers Limited) held the following shareholdings in the Funds:

9 Post Balance Sheet Events

The net asset value in pence per share at the balance sheet date and the latest practicable date prior to the publication of the report has been shown in the table below. The % increase/(decrease) is a reflection of market fluctuations during this period. It is likely markets will continue to be much more volatile than normal over the next few months until the Russia-Ukraine conflict impact passes.

	Net Asset Value 30.4.23 (pence per share)	Net Asset Value 18.8.23 (pence per share)	Increase/ Decrease %
Invesco Corporate Bond Fund (UK)	257.60	249.92	(2.98)
Invesco Distribution Fund (UK)	326.40	321.90	(1.38)
Invesco Environmental Climate Opportunities Bond Fund (UK)	190.84	189.24	(0.84)
Invesco Global Bond Fund (UK)	241.58	229.79	(4.88)
Invesco Global Financial Capital Fund (UK)	394.30	412.90	4.72
Invesco High Yield Fund (UK)	297.52	308.08	3.55
Invesco Monthly Income Plus Fund (UK)	310.99	309.93	(0.34)
Invesco Tactical Bond Fund (UK)	272.79	267.17	(2.06)

The net asset value in pence per share is based on the Z Accumulation shares.

As at the 28 February 2022, 0.00% of net assets in the Invesco Distribution Fund (UK), 0.74% of net assets in the Invesco Global Bond Fund (UK) and 0.13% of net assets in the Invesco Tactical Bond Fund (UK) (with a value of £61,000, £1,472,000 and £1,192,000 respectively) was in securities with exposure to companies whose principal activities are in Russia. This has since fallen on 31 October 2022 to 0% of net assets (with a value of £Nil) for these funds.

Invesco Corporate Bond Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Corporate Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in investment grade corporate debt securities. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including government, unrated and non-investment grade corporate debt securities), money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2023.

Performance to 30 April 2023	Since	Since	Since	Percentage growth	
	31.10.22 %	30.4.22 %	30.4.20 %	Since 30.4.18 %	Since 30.4.13 %
Invesco Corporate Bond Fund (UK) (Z Accumulation shares)	6.40	-4.31	-4.91	1.47	21.41
IA Sterling Corporate Bond Sector ¹	4.61	-6.93	-9.51	-1.66	17.44
Fund Ranking	8/93	23/93	22/88	17/79	14/61

Standardised rolling 12 month performance	31.3.18	31.3.19	31.3.20	Percentage growth	
	31.3.19 %	31.3.20 %	31.3.21 %	31.3.21 %	31.3.22 %
Invesco Corporate Bond Fund (UK) (Z Accumulation shares)	2.1	1.1	9.2	-3.5	-7.2
IA Sterling Corporate Bond Sector ¹	3.0	0.8	9.1	-4.4	-9.5

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 30 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 30 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Corporate Bond Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned -4.3% in the year ending 30 April 2023. This placed the Fund in the first quartile of its peer group, the IA Sterling Corporate Bond Sector, which returned -6.9%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Corporate bond markets faced significant headwinds as the Bank of England raised interest rates several times to fight inflationary pressures. The UK Bank Rate was increased from 0.75% to 4.25%, taking borrowing costs to the highest level since 2008. With the UK inflation rate remaining stubbornly high, due to high food prices and a resilient labour market, financial markets are pricing in further rate hikes.

The year also witnessed bouts of volatility. In late September, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

With government bond yields rising, duration (sensitivity to interest rate movements) was the biggest detractor from performance. However, impact on the Fund's returns was cushioned somewhat by the Fund's lower duration than the wider market, which supported the Fund's outperformance versus its peer group. Credit contributed positively towards performance with subordinated financials and investment grade bonds leading the gains. There was also positive input from senior bank debt and corporate hybrids.

After several months of relentless repricing, we believe the levels of yield available on many corporate bonds are at attractive outright levels. Many bonds are priced below par, offering the potential for price appreciation as well as coupon payment. We believe these changes have left corporate bond markets looking more attractive.

In terms of Fund activity we added several bonds at discounts to par, for example Northumbrian Water Finance, Severn Trent Utilities Finance and University of Oxford. We also participated in new issues, including Land Securities Capital Markets, Engie and Wessex Water Services Finance. Over the year we increased exposure to government bonds (long-dated UK gilts) from 1.7% to 6.9%, and reduced credit risk by selling some subordinated debt in banks and insurers.

We believe we are nearing the peak of the interest rate hiking cycle in the UK. Although headline inflation is still very high, it's expected to decline sharply alongside the fall in energy prices. Core inflation looks to have peaked too in our view. This leaves us comfortable holding a higher portfolio duration than in the past. Since late 2007, the Fund has been underweight duration versus the broader market, as measured by the ICE BofA Sterling Corporate Index. By adding longer duration bonds, the Fund is overweight duration (as of 30 April 2023).

Sustained interest rate hikes in the face of high inflation have put downward pressure on growth and sentiment and increased market volatility. As the economic and market environment develops, the Fund will continue to seek to align risk with reward across its investment universe. This leads us to maintain a balanced approach and as ever we are only deploying capital when we think we are being appropriately rewarded for doing so.

Michael Matthews and Tom Hemmant, Fund Managers

¹ M Accumulation shares and M Income shares were issued at 200p on 24 March 2023. The operating charges and direct transaction costs percentages figures disclosed have been annualised for the period ended 30 April 2023. For the purpose of calculating the change in net assets per share these figures are actual and have not been annualised.

² Effective 1 March 2023, the Fund Management Fee for the D Accumulation and D Income share classes reduced from 0.45% to 0.30%.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

Invesco Corporate Bond Fund (UK)

Notes to the financial statements

6 Taxation	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
-------------------	---	---

a) Analysis of charge for the year

Overseas tax	-	1
Total tax charge	-	1

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Net revenue before taxation	62,634	61,688
Corporation tax at 20% (2022 - 20%)	12,527	12,338
Effects of:		
Overseas tax	-	1
Tax deductible interest distributions	(12,527)	(12,338)
Total tax charge	-	1

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
------------------------	---	---

Accumulations and distributions paid 31 December 2022	30,740	30,933
Accumulations and distributions paid 30 June 2023	29,580	27,250
	60,320	58,183
Amounts deducted on redemption of shares	4,111	5,127
Amounts received on issue of shares	(1,753)	(1,613)
	62,678	61,697

The distributable amount has been calculated as follows:

Net revenue after taxation	62,634	61,687
Equalisation on conversions	44	10
	62,678	61,697

8 Debtors	30.4.23 £'000	30.4.22 £'000
------------------	--------------------------	--------------------------

Accrued revenue	26,683	29,333
Amounts receivable for issue of shares	1,644	2,362
Amounts receivable from counterparties in respect of collateral on derivatives	260	-
Sales awaiting settlement	-	4,198
	28,587	35,893

9 Cash and bank balances	30.4.23 £'000	30.4.22 £'000
---------------------------------	--------------------------	--------------------------

Amount held at futures clearing houses and brokers	-	4,399
Cash and bank balances	9,400	10,040
	9,400	14,439

Invesco Corporate Bond Fund (UK)

Notes to the financial statements

10 Other creditors	30.4.23 £'000	30.4.22 £'000
Accrued expenses	972	1,204
Amounts payable for redemption of shares	3,804	6,236
Amounts payable to counterparties in respect of collateral on derivatives	2,940	-
Purchases awaiting settlement	-	690
	7,716	8,130

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 25. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £554,337,000 (2022 - £707,712,000) and amounts paid in respect of purchases in the accounting year is £569,778,000 (2022 - £662,847,000). Amounts received in respect of dividends in the accounting year is £448,000 (2022 - £71,000). Amounts due at the end of the accounting year for Fund Management Fees of £972,000 (2022 - £1,204,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 18 to 24.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' ("OTC") derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.23 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	3,026	3,026
Goldman Sachs	(457)	(457)
JP Morgan	1,188	1,188
RBS	468	468

Invesco Corporate Bond Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk continued

Counterparty Details of OTC Financial Derivative Transactions

30.4.22 Broker	Credit Default Swaps £'000	Forwards £'000	Total Exposure £'000
Bank of America Merrill Lynch	330	-	330
BNP Paribas	-	(3,507)	(3,507)
Deutsche Bank	-	(2,088)	(2,088)
Goldman Sachs	-	(85)	(85)
JP Morgan	-	(3,461)	(3,461)
RBS	-	(1,629)	(1,629)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £2,940,000 (2022 - Nil) in the form of cash and is shown in note 10.

Collateral pledged to these counterparties in respect of derivative contracts was £260,000 (2022 - Nil) in the form of cash and is shown in note 8.

b) Portfolio Statement Credit Ratings Breakdown	30.4.23 %	30.4.22 %
Investment Grade	83.29	79.62
Non-Investment Grade	7.60	10.86
Not Rated	4.72	6.95
Other	2.99	0.87
Portfolio of investments	98.60	98.30
Net other assets	1.40	1.70
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.23		
Level 1: Quoted prices	114,652	-
Level 2: Observable market data	1,521,416	598
Level 3: Unobservable data	-	-
	1,636,068	598
30.4.22		
Level 1: Quoted prices	33,832	1,912
Level 2: Observable market data	1,974,348	12,171
Level 3: Unobservable data	-	-
	2,008,180	14,083

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

Invesco Corporate Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs

for the year 1 May 2022 to 30 April 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	691,270	-	-	-	-
Total purchases	691,270	-		-	
Total purchases including transaction costs	691,270				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	946,554	-	-	-	-
Total sales	946,554	-		-	
Total sales net of transaction costs	946,554				
Derivative transaction costs		9		-	
Total transaction costs		9		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco Corporate Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2021 to 30 April 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	525,085	-	-	-	-
Total purchases	525,085	-		-	
Total purchases including transaction costs	525,085				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	983,967	-	-	-	-
Total sales	983,967	-		-	
Total sales net of transaction costs	983,967				
Derivative transaction costs		37		-	
Total transaction costs		37		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.75% (2022 - 0.57%).

Group 2: shares purchased on or after 1 November 2022

¹ Share classes launched 24 March 2023.

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Distribution Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Distribution Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund may invest up to 80% of its assets globally in corporate and government debt securities (including investment grade, non-investment grade and unrated) and up to 40% of its assets in shares or other equity related securities of companies globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2023.

IA Mixed Investment 20-60% Shares Sector ¹	2.9	-7.5	20.5	2.9	-5.1

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 54 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 54 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Distribution Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned -0.7% in the year ending 30 April 2023. This placed it in the first quartile of its peer group, the IA Mixed Investment 20-60% Shares Sector, which returned -2.7%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Bond and equity markets faced headwinds in the form of rising interest rates and slowing economic growth. To combat inflationary pressures, the Bank of England, in a series of hikes, increased the UK Bank Rate from 0.75% to 4.25%, taking borrowing costs to the highest level since 2008. With the UK inflation rate remaining stubbornly high, due to high food prices and a resilient labour market, financial markets are pricing in further rate hikes. In its latest report (May 23), the Bank of England is no longer forecasting a UK recession.

The year also witnessed bouts of volatility. In late September, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

With government bond yields rising, duration (sensitivity to interest rate movements) was the biggest detractor from performance. However, keeping duration relatively low, particularly during 2022, reduced the negative impact on the portfolio. The Fund's allocation to equities contributed positively towards performance. The largest individual contributors were all stock holdings - Co-Operative Bank, Compass and Informa. Credit also delivered positive, albeit modest, returns with gains in investment grade and high yield bonds offsetting weakness in subordinated financials. The three biggest individual detractors were all bond holdings - Nationwide Building Society, General Accident and Credit Suisse.

After several months of relentless repricing, we believe the levels of yield available on many corporate bonds are at attractive outright levels. Many bonds are priced below par, offering the potential for price appreciation as well as coupon payment. We believe these changes have left corporate bond markets looking more attractive.

As more value has emerged in bonds, we added to the Fund's holdings in investment grade. Given increased recessionary risks we also improved the quality of high yield bonds. Together these actions should give the Fund a more defensive stance. The equity allocation was reduced from 37% to 30% over the course of the year with the investment bias remaining on UK companies.

We believe we are nearing the peak of the interest rate hiking cycle in both the US and UK. Although headline inflation is still very high, it's expected to decline sharply alongside the fall in energy prices. Core inflation looks to have peaked too in our view. This leaves us comfortable with holding a higher level of duration than in the past. The Fund's duration was increased over the review period.

Sustained interest rate hikes in the face of high inflation have put downward pressure on growth and sentiment and increased market volatility. As the economic and market environment develops, the Fund will continue to seek to align risk with reward across its investment universe. This leads us to maintain a balanced approach and as ever we are only deploying capital when we think we are being appropriately rewarded for doing so.

Invesco Distribution Fund (UK)

Notes to the financial statements

6 Taxation

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
--	--------------------------------	--------------------------------

a) Analysis of charge for the year

Overseas tax	302	340
Total tax charge	302	340

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Net revenue before taxation	60,239	56,107
Corporation tax at 20% (2022 - 20%)	12,048	11,221
Effects of:		
Movement in unrecognised tax losses	7	9
Overseas tax	302	340
Relief on overseas tax expensed	(7)	(9)
Revenue not subject to tax	(3,048)	(3,504)
Tax deductible interest distributions	(9,000)	(7,717)
Total tax charge	302	340

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

7 Distributions

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
--	--------------------------------	--------------------------------

Accumulations and distributions paid 30 June 2022	6,625	6,561
Accumulations and distributions paid 31 July 2022	6,947	6,627
Accumulations and distributions paid 31 August 2022	6,421	6,761
Accumulations and distributions paid 30 September 2022	6,849	7,435
Accumulations and distributions paid 31 October 2022	6,746	6,513
Accumulations and distributions paid 30 November 2022	5,629	5,401
Accumulations and distributions paid 31 December 2022	5,711	5,796
Accumulations and distributions paid 31 January 2023	6,251	5,736
Accumulations and distributions paid 28 February 2023	5,765	5,573
Accumulations and distributions paid 31 March 2023	5,712	4,638
Accumulations and distributions paid 30 April 2023	6,794	6,895
Accumulations and distributions paid 31 May 2023	6,446	6,814
	75,896	74,750
Amounts deducted on redemption of shares	522	626
Amounts received on issue of shares	(245)	(218)
	76,173	75,158

The distributable amount has been calculated as follows:

Net revenue after taxation	59,937	55,767
Fund Management Fee taken to capital	16,236	19,391
	76,173	75,158

8 Debtors

	30.4.23 £'000	30.4.22 £'000
--	------------------	------------------

Accrued revenue	18,504	17,205
Amounts receivable for issue of shares	1,440	2,764
Overseas tax recoverable	80	66
Sales awaiting settlement	717	744
	20,741	20,779

Invesco Distribution Fund (UK)

Notes to the financial statements

9 Cash and bank balances	30.4.23	30.4.22
	£'000	£'000
Amount held at futures clearing houses and brokers	5,016	521
Cash and bank balances	15,867	12,767
	20,883	13,288

10 Other creditors	30.4.23	30.4.22
	£'000	£'000
Accrued expenses	1,293	1,470
Amounts payable for redemption of shares	3,007	3,576
Amounts payable to counterparties in respect of collateral on derivatives	9,110	-
Purchases awaiting settlement	4,340	3,302
	17,750	8,348

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 25. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £471,944,000 (2022 - £340,660,000) and amounts paid in respect of purchases in the accounting year is £452,918,000 (2022 - £340,448,000). Amounts received in respect of dividends in the accounting year is £602,000 (2022 - £190,000). Management fee rebates are disclosed in note 3. Amounts due at the end of the accounting year for Fund Management Fees of £1,293,000 (2022 - £1,470,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

As one of the key objectives of the Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

In accordance with the tax constraints of an interest distribution fund, it is not currently our intention to exceed a 40% equity asset allocation. However, investors should be aware that the Fund's IA sector classification (Mixed Investment 20-60% Shares) would permit an equity allocation of up to 60%.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events. The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 18 to 24.

Invesco Distribution Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' ("OTC") derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.23 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	7,451	7,451
JP Morgan	4,051	4,051
RBS	1,876	1,876

Counterparty Details of OTC Financial Derivative Transactions

30.4.22 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	(11,417)	(11,417)
Deutsche Bank	1,755	1,755
JP Morgan	(15,684)	(15,684)
RBS	(4,336)	(4,336)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £9,110,000 (2022 - Nil) in the form of cash and is shown in note 10.

b) Portfolio Statement Credit Ratings Breakdown	30.4.23 %	30.4.22 %
Investment Grade	31.78	25.42
Non-Investment Grade	28.55	29.93
Not Rated	5.73	5.99
Other	32.47	37.22
Portfolio of investments	98.53	98.56
Net other assets	1.47	1.44
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.23		
Level 1: Quoted prices	594,926	-
Level 2: Observable market data	871,390	405
Level 3: Unobservable data	22,174	-
	1,488,490	405
30.4.22		
Level 1: Quoted prices	624,416	-
Level 2: Observable market data	1,030,430	31,437
Level 3: Unobservable data	14,277	-
	1,669,123	31,437

Invesco Distribution Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

c) Valuation of financial instruments continued

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions – Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis – Management assess the investment company's progress against milestones expected at the time of investment in order to determine whether an adjustment is required to the transaction price to determine fair value.
- Multiples – Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets – Management determine the fair value based on the net asset value of the underlying portfolio company

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco; and
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

Invesco Distribution Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs

for the year 1 May 2022 to 30 April 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	65,230	27	0.04	136	0.21

Total transaction costs as a % of average net assets		0.01%		0.01%	

Invesco Distribution Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2021 to 30 April 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	54,950	29	0.05	85	0.15
Debt instruments	200,161	-	-	-	-
Total purchases	255,111	29		85	
Total purchases including transaction costs	255,225				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	106,097	46	0.04	4	0.00
Debt instruments	329,002	-	-	-	-
Total sales	435,099	46		4	
Total sales net of transaction costs	435,049				

Derivative transaction costs		14		-	
Total transaction costs		89		89	
Total transaction costs as a % of average net assets		0.01%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.86% (2022 - 0.64%).

Group 1: shares purchased prior to 1 April 2023
Group 2: shares purchased on or after 1 April 2023

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Environmental Climate Opportunities Bond Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Environmental Climate Opportunities Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus) and to support the transition to a low carbon economy. The Fund invests at least 80% of its assets in debt securities denominated in or hedged back into Sterling (including investment grade, non-investment grade and unrated) issued by companies, governments, supranational bodies and other public entities globally, which meet the Fund's environmental, social and governance (ESG) criteria as further detailed below. The Fund strategically invests in investment opportunities across the fixed interest credit risk spectrum.

The Fund pursues the following ESG criteria:

1. Negative ESG screening:

The Fund excludes bonds issued by companies with a certain degree of involvement in sectors, including but not limited to fossil fuels (including thermal coal, oil sands, Arctic drilling) as well as non-climate related sectors such as unconventional weapons and tobacco. The Fund also excludes companies that are involved in severe controversies pertaining to ESG. Such exclusions may vary depending on the activity from zero tolerance to exclusions based on percentage of revenue or other measures and may be updated from time to time.

2. Positive Climate screening:

The Fund invests in corporate or government bonds where the issuers' activities positively contribute to the transition to a low carbon economy, including but not limited to companies that have a low carbon footprint or have made or are making progress towards lowering their carbon footprint, based on the fund manager's proprietary methodology.

The Fund also invests in bonds issued by companies or governments that have committed to reduce their greenhouse gas (GHG) emissions to net zero by 2050 in line with the Paris Agreement on climate change.

The Fund also invests in other bonds with specific or defined sustainable characteristics, including but not limited to:

- green bonds, whose proceeds are used to finance environmental related projects;
- sustainability linked bonds, whose proceeds are used to help the issuer to achieve a specific sustainable objective; and/or
- transition bonds, whose proceeds are used to help the issuer shift to greener business activities.

More information regarding the Fund's ESG criteria can be found in the Fund's Investment Policy document, available from the literature section of our website.

In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. Such derivatives may not be fully aligned with the Fund's ESG criteria. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2023.

This standardised past performance information is updated on a quarterly basis. Standardised rolling 12 month performance data for the years 31 March 2018 to 31 March 2022 are not available as the Fund was launched on 7 February 2022.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 92 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 92 is based on the close of business bid price. 75% ICE BofA Global Corporate Index (hedged to GBP) and 25% ICE BofA Global High Yield Index (GBP Hedged)¹ data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. The Benchmark is a blend of indices that represent the type of bonds that the Fund may invest in and therefore the Funds' performance can be compared against it. However, the fund is actively managed and is not constrained by any benchmark.

Invesco Environmental Climate Opportunities Bond Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned -0.9% in the year ending 30 April 2023. This compares to a return of -1.4% for the Fund's comparator benchmark 75% ICE BofA Global Corporate Index (hedged to GBP) and 25% ICE BofA Global High Yield Index (GBP Hedged).

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. 75% ICE BofA Global Corporate Index (hedged to GBP) and 25% ICE BofA Global High Yield Index (GBP Hedged) data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Corporate bond markets faced significant headwinds as the Bank of England, US Federal Reserve and the European Central Bank raised interest rates several times to fight inflationary pressures. The year also witnessed bouts of volatility. In late September, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

With government bond yields rising, duration (sensitivity to interest rate movements) was the biggest detractor from performance. Credit contributed positively towards performance with investment grade bonds leading the gains. There was also positive input from high yield bonds and corporate hybrids.

The Fund is broadly diversified but emphasises important climate themes such as green energy, transport, financial services and buildings. In green energy we are financing large European and US utilities that investing heavily in renewable energy and electricity networks. These companies are well on the path to significantly reducing power emissions. We also finance pure green energy companies.

In transport we are financing rail and underground networks, auto parts suppliers and two large auto manufacturers. In financials, we have identified banks and insurance companies that have sector-leading plans to move away from fossil fuels. In buildings, we finance companies with ambitious plans to improve the energy efficiency of their existing property portfolios and build new energy efficient housing.

After several months of relentless repricing, we are finding genuinely attractive value in bonds issued by companies that are leading the way towards transition. Many bonds are priced below par, offering the potential for price appreciation as well as coupon payment. We believe these changes have left corporate bond markets looking more attractive.

We are nearing the peak of the global interest rate hiking cycle. Although headline inflation is still very high, it's expected to decline sharply alongside the fall in energy prices. Core inflation looks to have peaked too in our view. This leaves us comfortable holding a higher portfolio duration than the broader market.

Sustained interest rate hikes in the face of high inflation will ultimately put downward pressure on growth but this period is likely to be marked by increased market volatility. As the economic and market environment develops, the Fund will continue to seek to align risk with reward across its investment universe. This leads us to maintain a balanced approach and as ever we are only deploying capital when we think we are being appropriately rewarded for doing so.

Notes to the financial statements

6 Taxation	01.5.22 to 30.4.23 £'000	07.2.22 to 30.4.22 £'000
-------------------	---	---

a) Analysis of charge for the year/period

Overseas tax	-	-
Total tax charge	-	-

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.5.22 to 30.4.23 £'000	07.2.22 to 30.4.22 £'000
Net revenue before taxation	283	42
Corporation tax at 20% (2022 - 20%)	57	8
Effects of:		
Tax deductible interest distributions	(57)	(8)
Total tax charge	-	-

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.22 to 30.4.23 £'000	07.2.22 to 30.4.22 £'000
------------------------	---	---

Accumulations and distributions paid 30 September 2022	67	-
Accumulations and distributions paid 31 December 2022	79	-
Accumulations and distributions paid 31 March 2023	85	-
Accumulations and distributions paid 30 June 2023	101	50
	332	50
Amounts deducted on redemption of shares	1	-
Amounts received on issue of shares	(14)	-
	319	50

The distributable amount has been calculated as follows:

Net revenue after taxation	283	42
Fund Management Fee taken to capital	36	8
	319	50

8 Debtors	30.4.23 £'000	30.4.22 £'000
------------------	--------------------------	--------------------------

Accrued revenue	114	77
Amounts receivable for issue of shares	39	-
	153	77

9 Cash and bank balances	30.4.23 £'000	30.4.22 £'000
---------------------------------	--------------------------	--------------------------

Amount held at futures clearing houses and brokers	17	-
Cash and bank balances	86	60
	103	60

10 Other creditors	30.4.23 £'000	30.4.22 £'000
---------------------------	--------------------------	--------------------------

Accrued expenses	4	3
Amounts payable for redemption of shares	1	-
Purchases awaiting settlement	113	-
	118	3

Invesco Environmental Climate Opportunities Bond Fund (UK)

Notes to the financial statements

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 25. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £3,474,000 (2022 - £647,000) and amounts paid in respect of purchases in the accounting year is £3,753,000 (2022 - £647,000). Amounts received in respect of dividends in the accounting year is £5,000 (2022 - Nil). Amounts due at the end of the accounting year for Fund Management Fees of £4,000 (2022 - £3,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund invests in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

As one of the key objectives of the Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The use of ESG criteria may affect the Fund's investment performance and, as such, the Fund may perform differently compared to similar collective investment schemes that do not screen investment opportunities against ESG criteria. ESG based criteria used in the Fund may result in the Fund foregoing certain investment opportunities when it might otherwise be advantageous to do so, and/or selling investments due to their ESG characteristics when it might be disadvantageous to do so.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 18 to 24.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' ("OTC") derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.23 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	51	51
Citigroup	5	5
JP Morgan	28	28
RBS	12	12

Invesco Environmental Climate Opportunities Bond Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk continued

Counterparty Details of OTC Financial Derivative Transactions

30.4.22 Broker	Credit Default Swaps £'000	Forwards £'000	Total Exposure £'000
Bank of America Merrill Lynch	1	-	1
BNP Paribas	-	(40)	(40)
Goldman Sachs	-	(47)	(47)
RBS	-	(33)	(33)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

b) Portfolio Statement Credit Ratings Breakdown	30.4.23 %	30.4.22 %
Investment Grade	63.36	69.17
Non-Investment Grade	27.65	28.21
Not Rated	3.89	2.42
Other	3.99	(0.95)
Portfolio of investments	98.89	98.85
Net other assets	1.11	1.15
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.23		
Level 1: Quoted prices	243	7
Level 2: Observable market data	8,890	1
Level 3: Unobservable data	-	-
	9,133	8
30.4.22		
Level 1: Quoted prices	51	-
Level 2: Observable market data	7,154	128
Level 3: Unobservable data	-	-
	7,205	128

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

Total transaction costs		-		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco Environmental Climate Opportunities Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the period 7 February 2022 to 30 April 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	881	-	-	-	-
Total purchases	881	-		-	
Total purchases including transaction costs	881				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	292	-	-	-	-
Total sales	292	-		-	
Total sales net of transaction costs	292				
Derivative transaction costs		-		-	
Total transaction costs		-		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year/period. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.65% (2022 - 0.50%).

Group 1: shares purchased prior to 1 February 2023
Group 2: shares purchased on or after 1 February 2023

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Global Bond Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Global Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in debt securities (including investment grade, non-investment grade and unrated) issued by governments, supranational bodies, other public entities as well as by companies, globally. The Fund will take active currency positions globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund uses derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. Total return swaps will be used by the Fund. The expected proportion of total assets subject to total return swaps is 30%. Such level might be exceeded or might be subject to changes in the future. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2023.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 116 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 116 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Global Bond Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned -0.1% in the year ending 30 April 2023. This placed it in the second quartile of its peer group, the IA Global Mixed Bond Sector, which returned -2.0%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

It was a challenging period for global bond markets as the US Federal Reserve, European Central Bank and Bank of England increased interest rates several times to stem inflation. The year also witnessed bouts of volatility. In late September, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

Credit contributed positively towards performance with government and higher quality corporate bonds leading the gains. Overall returns from credit, however, were held back by weakness in subordinated financials (debt that falls under, or behind senior debt). Duration (sensitivity to interest rate movements) had a positive impact, particularly from emerging market bonds, whereas foreign exchange exposure, especially against the weakening Japanese yen, diluted returns.

The Fund is mainly invested in government bonds (both developed and emerging markets). Currently this exposure includes both conventional and inflation-linked government bonds. Additional exposure is held in investment grade corporate bonds and some corporate emerging market bonds where we can benefit from the extra yield available. Currency markets provide a further source of potential return for the Fund. Duration of the Fund is actively managed.

There's growing evidence that inflation in the US and in particular the stickier elements, such as shelter, are starting to ease. While we expect inflation to fall, at times the market has been impatient in looking for central banks to end interest rate increases. Central banks remain cautious. The US Federal Reserve is aware of past mistakes and appears to prefer the risk of over-tightening (too many rate hikes) than let inflation take hold again.

However, we believe that we are near to the peak of the current hiking cycle in both the US and UK, with potentially a little further to go for the eurozone. This leaves us comfortable with the Fund holding a higher level of duration.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

	299	477

Invesco Global Bond Fund (UK)

Notes to the financial statements

6 Taxation	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
a) Analysis of charge for the year		
Corporation tax	11	20
Double taxation relief	(11)	(20)
Overseas tax	35	66
Overseas capital gains tax paid	-	76
Total tax charge	35	142

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Net revenue before taxation	5,915	5,052
Corporation tax at 20% (2022 - 20%)	1,183	1,010
Effects of:		
Capitalised income subject to tax	4	7
Double taxation relief	(11)	(20)
Overseas capital gains tax paid	-	76
Overseas tax	35	66
Tax deductible interest distributions	(1,176)	(997)
Total tax charge	35	142

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Accumulations and distributions paid 31 December 2022	3,139	2,400
Accumulations and distributions paid 30 June 2023	2,886	2,328
	6,025	4,728
Amounts deducted on redemption of shares	431	451
Amounts received on issue of shares	(571)	(182)
	5,885	4,997

The distributable amount has been calculated as follows:

Net revenue after taxation	5,880	4,910
Equalisation on conversions	1	4
Overseas capital gains tax paid	-	76
Tax relief on rebates taken to capital	4	7
	5,885	4,997

8 Debtors	30.4.23 £'000	30.4.22 £'000
Accrued revenue	1,829	1,572
Amounts receivable for issue of shares	484	174
Amounts receivable from counterparties in respect of collateral on derivatives	430	-
	2,743	1,746

9 Cash and bank balances	30.4.23 £'000	30.4.22 £'000
Amount held at futures clearing houses and brokers	407	194
Cash and bank balances	6,033	6,062
	6,440	6,256

Invesco Global Bond Fund (UK)

Notes to the financial statements

10 Other creditors	30.4.23	30.4.22
	£'000	£'000
Accrued expenses	125	129
Amounts payable for redemption of shares	754	411
Purchases awaiting settlement	-	1,120
	879	1,660

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 25. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £64,435,000 (2022 - £55,403,000) and amounts paid in respect of purchases in the accounting year is £65,434,000 (2022 - £55,403,000). Amounts received in respect of dividends in the accounting year is £316,000 (2022 - £351,000). Management fee rebates are disclosed in note 2. Amounts due at the end of the accounting year for Fund Management Fees of £125,000 (2022 - £129,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund has the ability to invest more than 35% of its value in government and public securities issued by any one body.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 18 to 24.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' ("OTC") derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.23	Credit			Interest Rate	Total
Broker	Default	Forwards	Inflation Swaps	Swaps	Exposure
	Swaps	£'000	£'000	£'000	£'000
	£'000		£'000		
Bank of America Merrill Lynch	(189)	-	(121)	336	26
BNP Paribas	-	(66)	-	-	(66)
Citigroup	-	33	-	-	33

JP Morgan	-	74	(957)	-	-	(883)
RBS	-	-	(566)	-	-	(566)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral pledged to these counterparties in respect of derivative contracts was £430,000 (2022 - Nil) in the form of cash and is shown in note 8.

b) Portfolio Statement Credit Ratings Breakdown	30.4.23 %	30.4.22 %
Investment Grade	83.52	80.06
Non-Investment Grade	11.85	16.19
Not Rated	0.44	0.53
Other	0.04	1.03
Portfolio of investments	95.85	97.81
Net other assets	4.15	2.19
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.23		
Level 1: Quoted prices	37,673	-
Level 2: Observable market data	145,226	3,257
Level 3: Unobservable data	-	-
	182,899	3,257
30.4.22		
Level 1: Quoted prices	5,117	36
Level 2: Observable market data	183,395	4,563
Level 3: Unobservable data	-	-
	188,512	4,599

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

Invesco Global Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs

for the year 1 May 2022 to 30 April 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	108,847	-	-	-	-
Total purchases	108,847	-		-	
Total purchases including transaction costs	108,847				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	108,458	-	-	-	-

Total transaction costs		3		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco Global Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2021 to 30 April 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	52,058	-	-	-	-
Total purchases	52,058	-		-	
Total purchases including transaction costs	52,058				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	94,429	-	-	-	-
Total sales	94,429	-		-	
Total sales net of transaction costs	94,429				
Derivative transaction costs		12		-	
Total transaction costs		12		-	
Total transaction costs as a % of average net assets		0.01%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.39% (2022 - 0.33%).

Group 1: shares purchased prior to 1 November 2022
Group 2: shares purchased on or after 1 November 2022

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Global Financial Capital Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Global Financial Capital Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in capital instruments which include debt securities (including non-investment grade, unrated and contingent convertible bonds), shares and other equity related securities issued by banks and other financial institutions globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), government debt securities, deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. Total return swaps will be used by the Fund. The expected proportion of total assets subject to total return swaps is 30%. Such level might be exceeded or might be subject to changes in the future. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2023.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 138 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 138 is based on the close of business bid price. Invesco Composite Index¹ data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. The Benchmark is a blend of indices that represent the type of bonds and equities that the Fund may invest in and therefore, the Fund's performance can be compared against it. However, the Fund is actively managed and is not constrained by any benchmark. The Invesco Composite Index is calculated by reference to 50% ICE BofA Global Financial Index GBP-Hedged (Total Return), 30% ICE BofA Contingent Capital Index GBP-Hedged (Total Return) and 20% FTSE All World Financials Index GBP-Hedged (Total Return).

Invesco Global Financial Capital Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned 6.1% in the year ending 30 April 2023. This compares to a return of -4.4% for the Fund's comparator benchmark Invesco Composite Index¹.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class. Invesco Composite Index¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

It was a mixed year for financials with bond prices falling as central banks embarked upon a series of interest rate hikes to stem inflation, whereas equities rallied strongly on the basis that improving net interest margins for banks would boost earnings. The US Federal Reserve, European Central Bank and Bank of England were all active in raising the cost of borrowing despite growing concerns over slowing economic activity.

The year also witnessed bouts of volatility. In late September, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

The Fund's equity holdings drove performance with sentiment towards the banking sector bolstered by the release of healthy corporate earnings results. The biggest individual stock contributors were UniCredit, Commerzbank and Co-Operative Bank. With government bond yields rising, duration (sensitivity to interest rate movements) detracted from performance. Credit risk also had a negative, albeit smaller, impact on performance, predominately from subordinated financials (debt that falls under, or behind senior debt). Exposure to Credit Suisse Additional Tier 1 ("AT1") (junior) bank debt was the largest individual detractor from Fund performance.

Following the acquisition of Credit Suisse by UBS and the subsequent sharp and indiscriminate sell off of Additional Tier 1 bank debt, we took advantage of market weakness to buy some AT1 positions in European banks. We believe that the circumstances that led to the takeover were unique to Credit Suisse (both the UK and European regulators have subsequently reiterated their commitment to respecting the capital hierarchy in the event of a bank resolution) and that the banking sector in Europe remains strongly supported by healthy fundamentals and liquidity.

The Fund is invested across the capital structure of banks, insurers and other financials, but has a focus on subordinated bonds. To fully exploit opportunities in the sector the Fund also invests in equities with exposure focused on a select group of high-quality European banks. We took advantage of share price strength to take some profits from these equity holdings. Following these transactions, the Fund's allocation to equities was reduced.

We think that UK and European banks are actually in a better place today than they have been in many years. Bigger capital bases, better quality assets, reduced influence of investment banking activities and increasingly profitable.

¹ The Invesco Composite Index is calculated by reference to 50% ICE BofA Global Financial Index GBP-Hedged (Total Return), 30% ICE BofA Contingent Capital Index GBP-Hedged (Total Return) and 20% FTSE All World Financials Index GBP-Hedged (Total Return).

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

6 Taxation

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
--	--------------------------------	--------------------------------

a) Analysis of charge for the year

Overseas tax	31	28
Total tax charge	31	28

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Net revenue before taxation	1,509	1,155
Corporation tax at 20% (2022 - 20%)	302	231
Effects of:		
Overseas tax	31	28
Revenue not subject to tax	(88)	(88)
Tax deductible interest distributions	(214)	(143)
Total tax charge	31	28

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

7 Distributions

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Accumulations and distributions paid 31 December 2022	844	594
Accumulations and distributions paid 30 June 2023	882	830
	1,726	1,424
Amounts deducted on redemption of shares	165	104
Amounts received on issue of shares	(158)	(169)
	1,733	1,359

The distributable amount has been calculated as follows:

Net revenue after taxation	1,478	1,127
Fund Management Fee taken to capital	255	232
	1,733	1,359

8 Debtors

	30.4.23 £'000	30.4.22 £'000
Accrued revenue	406	323
Amounts receivable for issue of shares	96	28
Overseas tax recoverable	34	48
	536	399

9 Cash and bank balances

	30.4.23 £'000	30.4.22 £'000
Cash and bank balances	240	220

10 Other creditors

	30.4.23 £'000	30.4.22 £'000
Accrued expenses	22	21
Amounts payable for redemption of shares	90	5
Purchases awaiting settlement	273	244
	385	270

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 25. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £12,818,000 (2022 - £13,991,000) and amounts paid in respect of purchases in the accounting year is £13,384,000 (2022 - £14,089,000). Amounts due at the end of the accounting year for Fund Management Fees of £22,000 (2022 - £21,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

As one of the key objectives of the Fund is to provide income, the Manager's ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

As the Fund invests primarily in capital instruments issued by banks and financial institutions globally, it can invest extensively in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 18 to 24.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' ("OTC") derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.23 Broker	Forwards £'000	Total Exposure £'000

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk continued

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

b) Portfolio Statement Credit Ratings Breakdown	30.4.23	30.4.22
	%	%
Investment Grade	19.13	12.48
Non-Investment Grade	35.01	36.48
Not Rated	10.88	14.19
Other	34.56	36.66
Portfolio of investments	99.58	99.81
Net other assets	0.42	0.19
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets	Liabilities
	£'000	£'000
30.4.23		
Level 1: Quoted prices	7,729	-
Level 2: Observable market data	23,347	21
Level 3: Unobservable data	1,330	-
	32,406	21
30.4.22		
Level 1: Quoted prices	9,538	-
Level 2: Observable market data	20,799	462
Level 3: Unobservable data	855	-
	31,192	462

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions – Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis – Management assess the investment company's progress against milestones expected at the time of investment in order to determine whether an adjustment is required to the transaction price to determine fair value.
- Multiples – Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

c) Valuation of financial instruments continued

represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.

- Net assets – Management determine the fair value based on the net asset value of the underlying portfolio company

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco; and
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

14 Portfolio transaction costs

for the year 1 May 2022 to 30 April 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	2,091	1	0.05	3	0.14

Total transaction costs as a % of average net assets		0.02%		0.01%	

Invesco Global Financial Capital Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2021 to 30 April 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	5,167	3	0.06	8	0.15
Debt instruments	10,548	-	-	-	-
Total purchases	15,715	3		8	
Total purchases including transaction costs	15,726				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	3,225	2	0.06	-	-
Debt instruments	4,031	-	-	-	-
Total sales	7,256	2		-	
Total sales net of transaction costs	7,254				

Derivative transaction costs		-		-	
Total transaction costs		5		8	
Total transaction costs as a % of average net assets		0.01%		0.03%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 1.52% (2022 - 1.40%).

Group 1: shares purchased prior to 1 November 2022
Group 2: shares purchased on or after 1 November 2022

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco High Yield Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco High Yield Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in corporate and government debt securities which are either non-investment grade or unrated. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including investment grade debt securities), equities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2023.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 161 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 161 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco High Yield Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned -4.5% in the year ending 30 April 2023. This placed the Fund in the fourth quartile of its peer group, the IA Sterling High Yield Sector, which returned -2.0%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

High yield bond markets faced headwinds in the form of rising interest rates and slowing economic growth. To combat inflationary pressures, the Bank of England, in a series of hikes, increased the UK Bank Rate from 0.75% to 4.25%, taking borrowing costs to the highest level since 2008. With the UK inflation rate remaining stubbornly high, due to high food prices and a resilient labour market, financial markets are pricing in further rate hikes. In its latest report (May 23), the Bank of England is no longer forecasting a UK recession.

The year also witnessed bouts of volatility. In late September, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

With government bond yields rising, duration (sensitivity to interest rate movements) was the biggest detractor from performance. Credit risk also had a negative impact on performance, predominately from subordinated financials (debt that falls under, or behind senior debt). Exposure to Credit Suisse Additional Tier 1 ("AT1") (junior) bank debt was the largest individual detractor from Fund performance. Excluding financials, high yield bonds delivered positive returns.

A quarter of the Fund is in subordinated bank debt, with AT1 the main part of that. AT1s do not feature in the high yield indices, however, over the long term they have been a powerful contributor to the Fund's performance.

During the AT1 market sell off, we added to non-Credit Suisse AT1 positions, including Nationwide, Barclays, Deutsche Bank and Societe Generale. We believe that Credit Suisse was a unique set of circumstances (both the UK and European regulators have subsequently reiterated their commitment to respecting the capital hierarchy in the event of a bank resolution) and that the banking sector in Europe remains strongly supported by healthy fundamentals and liquidity.

Yields on the AT1s of the sort of strongly capitalised, diversified banks we hold remain higher than in the corporate high yield market and we believe that in many cases the balance of risk to potential reward is attractive.

The US Federal Reserve funds rate is now above 5% for the first time since 2007. This highlights how far central banks have moved interest rates since the start of 2022. The tightening effect this has had on economies will help calm inflation. But it is important to shift focus towards the broader negative impact on economies. For us, this is particularly relevant to the weaker parts of the high yield bond market. Whilst we continue to enjoy the higher income that today's higher yields offer, our more cautious outlook for the global economy and for high yield bond markets remains unchanged. In recognition of the macroeconomic risks over the medium-term horizon, we increased the quality of the Fund by adding some investment grade bonds and reducing exposure to corporate high yield.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

¹ M Accumulation shares and M Income shares were issued at 200p on 4 November 2022. The operating charges and direct transaction costs percentages figures disclosed have been annualised for the period ended 30 April 2023. For the purpose of calculating the change in net assets per share these figures are actual and have not been annualised.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

Invesco High Yield Fund (UK)

Notes to the financial statements

6 Taxation	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
-------------------	---	---

a) Analysis of charge for the year

Overseas tax	16	3
Total tax charge	16	3

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Net revenue before taxation	17,526	11,660
Corporation tax at 20% (2022 - 20%)	3,505	2,332
Effects of:		
Movement in unrecognised tax losses	3	-
Overseas tax	16	3
Relief on overseas tax expensed	(3)	-
Tax deductible interest distributions	(3,505)	(2,332)
Total tax charge	16	3

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
------------------------	---	---

Accumulations and distributions paid 30 September 2022	4,243	3,266
Accumulations and distributions paid 31 December 2022	4,768	3,362
Accumulations and distributions paid 31 March 2023	5,832	3,564
Accumulations and distributions paid 30 June 2023	5,694	3,450
	20,537	13,642
Amounts deducted on redemption of shares	762	588
Amounts received on issue of shares	(1,864)	(819)
	19,435	13,411

The distributable amount has been calculated as follows:

Net revenue after taxation	17,510	11,657
Fund Management Fee taken to capital	1,925	1,754
	19,435	13,411

8 Debtors	30.4.23 £'000	30.4.22 £'000
------------------	--------------------------	--------------------------

Accrued revenue	5,808	3,806
Amounts receivable for issue of shares	785	956
	6,593	4,762

9 Cash and bank balances	30.4.23 £'000	30.4.22 £'000
---------------------------------	--------------------------	--------------------------

Cash and bank balances	2,545	1,605
------------------------	-------	-------

10 Other creditors	30.4.23 £'000	30.4.22 £'000
---------------------------	--------------------------	--------------------------

Accrued expenses	176	140
Amounts payable for redemption of shares	1,348	2,139
Amounts payable to counterparties in respect of collateral on derivatives	1,300	-
Purchases awaiting settlement	4,141	2,723
	6,965	5,002

Invesco High Yield Fund (UK)

Notes to the financial statements

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 25. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £127,142,000 (2022 - £77,034,000) and amounts paid in respect of purchases in the accounting year is £124,879,000 (2022 - £83,133,000). Amounts received in respect of dividends in the accounting year is £74,000 (2022 - £2,000). Amounts due at the end of the accounting year for Fund Management Fees of £176,000 (2022 - £140,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 18 to 24.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' ("OTC") derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.23 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	1,665	1,665
Deutsche Bank	(22)	(22)
JP Morgan	895	895
RBS	456	456

Counterparty Details of OTC Financial Derivative Transactions

30.4.22 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	(1,392)	(1,392)
Deutsche Bank	30	30
JP Morgan	(1,469)	(1,469)
RBS	(660)	(660)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Invesco High Yield Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk continued

Collateral received from counterparties in respect of derivative contracts was £1,300,000 (2022 - Nil) in the form of cash and is shown in note 10.

b) Portfolio Statement Credit Ratings Breakdown	30.4.23	30.4.22
	%	%
Investment Grade	9.18	6.15
Non-Investment Grade	79.99	84.08
Not Rated	7.12	6.96
Other	3.49	2.66
Portfolio of investments	99.78	99.85
Net other assets	0.22	0.15
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets	Liabilities
	£'000	£'000
30.4.23		
Level 1: Quoted prices	273	-
Level 2: Observable market data	326,730	216
Level 3: Unobservable data	4,475	-
	331,478	216
30.4.22		
Level 1: Quoted prices	721	-
Level 2: Observable market data	232,743	3,900
Level 3: Unobservable data	2,877	-
	236,341	3,900

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions – Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis – Management assess the investment company's progress against milestones expected at the time of investment in order to determine whether an adjustment is required to the transaction price to determine fair value.
- Multiples – Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets – Management determine the fair value based on the net asset value of the underlying portfolio company

Invesco High Yield Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

c) Valuation of financial instruments continued

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco; and
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

14 Portfolio transaction costs

for the year 1 May 2022 to 30 April 2023

	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Purchases (excluding derivatives)					
Debt instruments	186,241	-	-	-	-
Total purchases	186,241	-		-	
Total purchases including transaction costs	186,241				
Sales (excluding derivatives)					
Equity instruments	177	-	-	-	-
Debt instruments	68,642	-	-	-	-
Total sales	68,819	-		-	
Total sales net of transaction costs	68,819				
Derivative transaction costs		-		-	
Total transaction costs		-		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco High Yield Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2021 to 30 April 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	32	-	-	-	-
Debt instruments	139,511	-	-	-	-
Total purchases	139,543	-		-	
Total purchases including transaction costs	139,543				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	793	1	0.13	-	-
Debt instruments	103,599	-	-	-	-
Total sales	104,392	1		-	
Total sales net of transaction costs	104,391				

Derivative transaction costs		-		-	
Total transaction costs		1		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 1.18% (2022 - 1.06%).

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Monthly Income Plus Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Monthly Income Plus Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets globally in corporate and government debt securities (including investment grade, non-investment grade and unrated) and shares or other equity related securities of companies. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2023.

Performance to 30 April 2023	Since	Since	Since	Percentage growth

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 187 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 187 is based on the close of business bid price.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Monthly Income Plus Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned -2.3% in the year ending 30 April 2023. This placed it in the second quartile of its peer group, the IA Sterling Strategic Bond Sector, which returned -4.1%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Bond and equity markets faced headwinds in the form of rising interest rates and slowing economic growth. To combat inflationary pressures, the Bank of England, in a series of hikes, increased the UK Bank Rate from 0.75% to 4.25%, taking borrowing costs to the highest level since 2008. With the UK inflation rate remaining stubbornly high, due to high food prices and a resilient labour market, financial markets are pricing in further rate hikes. In its latest report (May 23), the Bank of England is no longer forecasting a UK recession.

The year also witnessed bouts of volatility. In late September, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

With government bond yields rising, duration (sensitivity to interest rate movements) was the biggest detractor from performance. However, keeping duration relatively low, particularly during 2022, reduced the negative impact on the portfolio. The Fund's allocation to equities contributed positively towards performance. Credit also delivered positive, albeit modest, returns with gains in investment grade and high yield bonds offsetting weakness in subordinated financials. The largest individual contributors were Co-Operative Bank and HSBC (both equities). The biggest individual detractors were General Accident and Nationwide Building Society (both bonds).

After several months of relentless repricing, we believe the levels of yield available on many corporate bonds are at attractive outright levels. Many bonds are priced below par, offering the potential for price appreciation as well as coupon payment. We believe these changes have left corporate bond markets looking more attractive.

As more value has emerged in bonds, we added to the Fund's holdings in investment grade which are offering higher yields than a year ago. Given increased recessionary risks we also improved the quality of high yield bonds, whilst maintaining some liquidity for the Fund. We sold some high yield bonds from lower rated companies that could struggle in a weaker economy. Together these actions should give the Fund a more defensive stance. The allocation to equities remains just under 10%.

We believe we are nearing the peak of the interest rate hiking cycle in both the US and UK. Although headline inflation is still very high, it's expected to decline sharply alongside the fall in energy prices. Core inflation looks to have peaked too in our view. This leaves us comfortable with holding a higher level of duration than in the past. The Fund's duration was increased over the review period.

The US Federal Reserve funds rate is now above 5% for the first time since 2007. This highlights how far central banks have moved interest rates since the start of 2022. The tightening effect this has had on economies will help calm inflation. But it is important to shift focus towards the broader negative impact on economies. For us, this is particularly relevant to the weaker parts of the high yield bond market. Whilst we continue to enjoy the higher income that today's higher yields offer, our more cautious outlook for the global economy and for high yield bond markets remains unchanged.

	88	55

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

6 Taxation	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
a) Analysis of (credit)/charge for the year		
Corporation tax	44	22
Corporation tax prior year adjustment	(180)	-
Overseas tax	46	124
Total tax (credit)/charge	(90)	146

b) Factors affecting the tax (credit)/charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Net revenue before taxation	106,125	92,016
Corporation tax at 20% (2022 - 20%)	21,225	18,403
Effects of:		
Overseas tax	46	124
Prior year adjustment	(180)	-
Revenue not subject to tax	(1,279)	(1,234)
Tax deductible interest distributions	(19,902)	(17,147)
Total tax (credit)/charge	(90)	146

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

7 Distributions	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Accumulations and distributions paid 30 June 2022	10,047	9,328
Accumulations and distributions paid 31 July 2022	10,473	9,882
Accumulations and distributions paid 31 August 2022	10,667	9,915
Accumulations and distributions paid 30 September 2022	11,058	9,972
Accumulations and distributions paid 31 October 2022	12,123	9,653
Accumulations and distributions paid 30 November 2022	10,303	8,908
Accumulations and distributions paid 31 December 2022	9,271	8,801
Accumulations and distributions paid 31 January 2023	10,203	8,055
Accumulations and distributions paid 28 February 2023	9,585	9,241
Accumulations and distributions paid 31 March 2023	9,600	8,505
Accumulations and distributions paid 30 April 2023	10,357	10,483
Accumulations and distributions paid 31 May 2023	9,986	9,374
	123,673	112,117
Amounts deducted on redemption of shares	903	717
Amounts received on issue of shares	(787)	(694)
	123,789	112,140
The distributable amount has been calculated as follows:		
Net revenue after taxation	106,215	91,870
Fund Management Fee taken to capital	17,574	20,270
	123,789	112,140

8 Debtors	30.4.23 £'000	30.4.22 £'000

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on page 25. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £572,111,000 (2022 - £403,175,000) and amounts paid in respect of purchases in the accounting year is £558,151,000 (2022 - £424,294,000). Amounts received in respect of dividends in the accounting year is £1,937,000 (2022 - £1,449,000). Management fee rebates are disclosed in note 3. Amounts due at the end of the accounting year for Fund Management Fees of £1,404,000 (2022 - £1,591,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 18 to 24.

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' ("OTC") derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.23 Broker	Forwards £'000	Total Exposure £'000
BNP Paribas	10,231	10,231
Citigroup	127	127
JP Morgan	4,852	4,852
RBS	2,175	2,175

Counterparty Details of OTC Financial Derivative Transactions

30.4.22 Broker	Credit Default Swaps £'000	Forwards £'000	Total Exposure £'000
Bank of America Merrill Lynch	(1,883)	-	(1,883)
BNP Paribas	-	(16,465)	(16,465)
Goldman Sachs	-	1,146	1,146
JP Morgan	-	(22,268)	(22,268)
RBS	-	(6,312)	(6,312)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £11,890,000 (2022 - Nil) in the form of cash and is shown in note 10.

Collateral pledged to these counterparties in respect of derivative contracts was £300,000 (2022 - Nil) in the form of cash and is shown in note 8.

Level 3: Unobservable data	20,655	-
	2,181,442	49,439

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

13 Generic Risk factors continued

c) Valuation of financial instruments continued

The majority of financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor. Instruments classified as level 3: Unobservable data mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions – Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis – Management assess the investment company's progress against milestones expected at the time of investment in order to determine whether an adjustment is required to the transaction price to determine fair value.
- Multiples – Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets – Management determine the fair value based on the net asset value of the underlying portfolio company

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company;
- Consideration of seniority of the securities held and terms of repayment upon realisation;
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding;
- Consideration of any outstanding payments to be made by Invesco; and
- Industry statistics or events (such as mergers, acquisitions and the risk of default).

Notes to the financial statements

14 Portfolio transaction costs

for the year 1 May 2022 to 30 April 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	8,276	4	0.05	41	0.50
Debt instruments	572,371	-	-	-	-
Total purchases	580,647	4		41	
Total purchases including transaction costs	580,692				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	10,271	4	0.04	-	-
Debt instruments	666,520	-	-	-	-
Total sales	676,791	4		-	
Total sales net of transaction costs	676,787				

Derivative transaction costs		19		-	
Total transaction costs		27		41	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco Monthly Income Plus Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2021 to 30 April 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	3,583	1	0.03	8	0.22
Debt instruments	530,066	-	-	-	-
Total purchases	533,649	1		8	
Total purchases including transaction costs	533,658				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments	14,131	4	0.03	-	-
Debt instruments	474,045	-	-	-	-
Total sales	488,176	4		-	
Total sales net of transaction costs	488,172				

Derivative transaction costs		30		-	
Total transaction costs		35		8	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 1.19% (2022 - 0.90%).

Group 2: shares purchased on or after 1 April 2023

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Tactical Bond Fund (UK)

Investment report for the year

The Investment Objective and Policy of the Invesco Tactical Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund has a flexible allocation to corporate and government debt securities (including investment grade, non-investment grade and unrated) and cash. Depending on market conditions the Fund may invest up to 100% of its net assets in cash, cash equivalents, short-term debt securities and money-market instruments. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, collective investment schemes (including funds managed by the Invesco group) and deposits. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. Total return swaps will be used by the Fund. The expected proportion of total assets subject to total return swaps is 30%. Such level might be exceeded or might be subject to changes in the future. The Fund may engage in securities lending. The expected proportion of total assets that may be subject to securities lending arrangements is 20%. Such level might be exceeded or might be subject to changes in the future.

The objectives currently shown within these financial statements are those objectives that were in place as at 30 April 2023.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.com/uk or by contacting us.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. This may differ from the performance figure shown on page 225 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 225 is based on the close of business bid price. UK 3 Month Treasury Bills¹ data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Invesco Tactical Bond Fund (UK)

Investment report for the year

Strategy, review and outlook

The Fund returned -0.4% in the year ending 30 April 2023. This compares to a return of 2.8% for the Fund's comparator benchmark, UK 3 Month Treasury Bills.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class. UK 3 Month Treasury Bills data source: Lipper, total return, in Sterling

Past performance is not a guide to future returns.

It was a challenging period for global bond markets as the US Federal Reserve, European Central Bank and Bank of England increased interest rates several times to stem inflation. The year also witnessed bouts of volatility. In late September, bond yields spiked in reaction to the UK government's unfunded mini budget. More recently, the collapse of US Silicon Valley Bank and Credit Suisse's forced merger with UBS triggered market turbulence. In both cases, central banks acted swiftly and effectively in restoring market confidence.

With government bond yields rising, duration (sensitivity to interest rate movements) detracted from performance. Foreign exchange exposure, especially against the weakening Japanese yen and Norwegian krone, also diluted returns. However, there was positive input from credit with investment grade and high yield bonds along with corporate hybrids (subordinated debt instruments) and emerging market bonds all delivering positive returns. While exposure to Credit Suisse Additional Tier 1 (junior) bank debt had a negative impact on performance, overall returns from subordinated financials (debt that falls under, or behind senior debt) were modestly positive.

In terms of Fund positioning, the allocation to government bonds was increased through the purchase of UK gilts, German bunds and US treasuries. We also selectively added to emerging markets, recently buying a locally denominated Indonesian Treasury bond with an attractive yield and a US dollar priced sovereign bonds issued by the Dominican Republic. While we sold several smaller positions in investment grade bonds, we also participated in a number of attractively priced new issues. The allocation to these higher quality bonds remains close to 20%, relatively unchanged over the year. Exposure to credit risk through holdings in subordinated financials and corporate high yield, however, was reduced.

We think recent months have marked a transition phase between inflation, interest rate and economic growth concerns, leading to periods of volatility. This has been exacerbated by banking issues, first in the US, then UBS's takeover of Credit Suisse. Although both these incidents have been contained, they do serve as a catalyst for slower growth.

There's growing evidence that inflation in the US and in particular the stickier elements, such as shelter, are starting to ease. While we expect inflation to fall, at times the market has been impatient in looking for central banks to end interest rate increases. Central banks remain cautious. The US Federal Reserve is aware of past mistakes and appears to prefer the risk of over-tightening (too many rate hikes) than let inflation take hold again.

However, we believe that we are near to the peak of the current hiking cycle in both the US and UK, with potentially a little further to go for the eurozone. This leaves us comfortable with the Fund holding a higher level of duration.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

¹ M Accumulation shares and M Income shares were issued at 200p on 9 September 2022. The operating charges and direct transaction costs percentages figures disclosed have been annualised for the period ended 30 April 2023. For the purpose of calculating the change in net assets per share these figures are actual and have not been annualised.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Fund and share class returns before operating charges.

The operating charges figure is equivalent to the FMF shown on page 18, which we also refer to as the ongoing charge in our Key Investor Information Documents ("KIIDs") and our literature.

Notes to the financial statements

6 Taxation

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
--	--------------------------------	--------------------------------

a) Analysis of charge for the year

Overseas tax	5	38
Total tax charge	5	38

There is no corporation tax charge for the year (2022 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2022 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The factors are explained below:

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Net revenue before taxation	34,603	17,332
Corporation tax at 20% (2022 - 20%)	6,921	3,466
Effects of:		
Movement in unrecognised tax losses	1	8
Overseas tax	5	38
Relief on overseas tax expensed	(1)	(8)
Tax deductible interest distributions	(6,921)	(3,466)
Total tax charge	5	38

Authorised investment companies with variable capital are exempt from tax on capital gains in the UK. Therefore any capital return is not included in the above reconciliation.

7 Distributions

	01.5.22 to 30.4.23 £'000	01.5.21 to 30.4.22 £'000
Accumulations and distributions paid 31 December 2022	16,410	9,130
Accumulations and distributions paid 30 June 2023	18,553	9,760
	34,963	18,890
Amounts deducted on redemption of shares	3,500	705
Amounts received on issue of shares	(3,862)	(2,301)
	34,601	17,294
The distributable amount has been calculated as follows:		
Net revenue after taxation	34,598	17,294
Equalisation on conversions	3	-
	34,601	17,294

8 Debtors

	30.4.23 £'000	30.4.22 £'000
Accrued revenue	10,890	8,687
Amounts receivable for issue of shares	8,475	9,640
Amounts receivable from counterparties in respect of collateral on derivatives	1,820	-
Sales awaiting settlement	-	1,848
	21,185	20,175

9 Cash and bank balances

	30.4.23 £'000	30.4.22 £'000
Amount held at futures clearing houses and brokers	6,616	942
Cash and bank balances	19,887	20,522
	26,503	21,464

Invesco Tactical Bond Fund (UK)

Notes to the financial statements

10 Other creditors	30.4.23	30.4.22
	£'000	£'000
Accrued expenses	670	631
Amounts payable for redemption of shares	4,368	7,458
Amounts payable to counterparties in respect of collateral on derivatives	7,330	480
Purchases awaiting settlement	3,549	7,464
	15,917	16,033

11 Commitments, contingent liabilities and contingent assets

There were no commitments, contingent liabilities or contingent assets at the balance sheet date (2022 - Nil).

12 Related parties

Related party interests in the Fund are disclosed in note 8 of the notes applicable to the financial statements of all Funds on pages 25-26. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts received in respect of sales in the accounting year is £581,469,000 (2022 - £387,439,000) and amounts paid in respect of purchases in the accounting year is £582,053,000 (2022 - £324,352,000). Amounts received in respect of dividends in the accounting year is £697,000 (2022 - £31,000). Amounts due at the end of the accounting year for Fund Management Fees of £670,000 (2022 - £631,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

The Fund invests in bonds and other fixed income securities that are subject to the risk that issuers do not make payments on such securities. The solvency of organisations with whom the Fund invests cannot be guaranteed and may adversely affect performance. The Fund may be adversely affected by a decrease in market liquidity which may impair the Fund's ability to acquire or to dispose of securities at their intrinsic value. The Fund may invest in high yield bonds which are regarded as being more speculative (than investment grade bonds) as to the issuer's ability to make payments of principal and interest.

The Fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

The Fund's performance may be adversely affected by variations in interest rates and by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.

The generic risk factors relating to the Fund are discussed more fully in note 4 of the notes applicable to the financial statements of all Funds on pages 18 to 24.

a) Counterparty risk

The Fund's exposure to counterparty risk in respect of 'Over The Counter' ("OTC") derivative contracts is the fair value of these contracts as shown in the portfolio statement. This is reflected in the table below.

Counterparty Details of OTC Financial Derivative Transactions

30.4.23	Credit	Foreign			Interest Rate	Total
Broker	Default	Exchange	Forwards	Inflation Swaps	Swaps	Exposure
	Swaps	Options	£'000	£'000	£'000	£'000

13 Generic Risk factors continued

a) Counterparty risk continued

Counterparty Details of OTC Financial Derivative Transactions

30.4.22 Broker	Credit Default Swaps £'000	Foreign Exchange Options £'000	Forwards £'000	Inflation Swaps £'000	Interest Rate Swaps £'000	Total Exposure £'000
Bank of America						
Merrill Lynch	435	-	-	(246)	227	416
BNP Paribas	-	-	(7,093)	-	-	(7,093)
Goldman Sachs	-	-	(237)	-	-	(237)
JP Morgan	-	370	(7,781)	-	-	(7,411)
RBS	-	-	(2,688)	-	-	(2,688)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the Manager, the counterparty risk is mitigated. In respect of derivative assets (positive numbers per the table), the Fund is exposed to counterparty risk from the counterparty shown, whereas in respect of derivative liabilities (negative numbers per the table) the counterparty shown is exposed to counterparty risk from the Fund.

Collateral received from counterparties in respect of derivative contracts was £7,330,000 (2022 - £480,000) in the form of cash and is shown in note 10.

Collateral pledged to these counterparties in respect of derivative contracts was £1,820,000 (2022 - Nil) in the form of cash and is shown in note 8.

b) Portfolio Statement Credit Ratings Breakdown	30.4.23 %	30.4.22 %
Investment Grade	73.35	64.54
Non-Investment Grade	22.72	33.42
Not Rated	0.90	1.52
Other	0.61	(1.69)
Portfolio of investments	97.58	97.79
Net other assets	2.42	2.21
Net Assets	100.00	100.00

c) Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the basis of valuation of instruments used to measure their fair value.

	Assets £'000	Liabilities £'000
30.4.23		
Level 1: Quoted prices	198,640	-
Level 2: Observable market data	813,688	12,286
Level 3: Unobservable data	-	-
	1,012,328	12,286
30.4.22		
Level 1: Quoted prices	85,433	178
Level 2: Observable market data	860,267	20,861
Level 3: Unobservable data	-	-
	945,700	21,039

All financial instruments are classified as level 1: Quoted prices and level 2: Observable market data. The instruments classified as level 2 mainly comprises Bonds and OTC Derivatives. Bonds are valued using prices provided by the primary vendor and validated to the secondary vendor. The OTC derivatives are valued by the primary vendor using various valuation techniques, reviewed and validated to the secondary vendor.

Invesco Tactical Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs

for the year 1 May 2022 to 30 April 2023

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	871,127	-	-	-	-
Total purchases	871,127	-		-

Total sales net of transaction costs	792,934				
Derivative transaction costs		14		-	
Total transaction costs		14		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

Invesco Tactical Bond Fund (UK)

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 May 2021 to 30 April 2022

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	671,928	-	-	-	-
Total purchases	671,928	-		-	
Total purchases including transaction costs	671,928				

Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Debt instruments	286,201	-	-	-	-
Total sales	286,201	-		-	
Total sales net of transaction costs	286,201				
Derivative transaction costs		37		-	
Total transaction costs		37		-	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments, cash and short-term collective investment schemes utilised as part of a daily sweep to manage the Fund's daily liquidity position are excluded from the analysis.

For the Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.48% (2022 - 0.40%).

¹ Share classes launched 9 September 2022.

Equalisation applies only to shares purchased during the distribution period ("Group 2"). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Fixed Interest Investment Series (the “Company”)

Regulatory statements

Statement of the Manager’s Responsibilities

The Collective Investment Schemes sourcebook (“COLL”) requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Depositary’s Responsibilities

The Depositary is responsible for the safekeeping of all the property of the Company which is entrusted to it and ensuring proper registration of tangible moveable property, and for the collection of income arising from all such scheme property. It is the duty of the Depositary to take reasonable care to ensure that the Company is managed and operated by the Manager in accordance with the Financial Conduct Authority’s Collective Investment Schemes Sourcebook (“the Sourcebook”), the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) (the “OEIC Regulations”), the Company’s Instrument of Incorporation, and the Prospectus, as appropriate, concerning: the pricing of and dealing in Shares in the Company; the application of income of the Company; and the investment portfolio and borrowing activities of the Company.

Depositary’s Report to Shareholders

Having carried out procedures and enquiries considered duly necessary to discharge our responsibilities as Depositary of the Company, based on information and explanations provided to us, we believe that, in all material respects, the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation and calculation of the price of the Company’s shares and the application of the Company’s income in accordance with the Sourcebook, and where applicable, the OEIC regulations, the Company’s Instrument of Incorporation, and the Prospectus;
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company; and
- (iii) has otherwise, ensured the proper operation of the Company.

Invesco Fixed Interest Investment Series (the "Company")

Independent auditors' report to the Shareholders of Invesco Fixed Interest Investment Series

Report on the audit of the financial statements

Opinion

In our opinion, the financial statements of Invesco Fixed Interest Investment Series (the "Company"):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 30 April 2023 and of the net revenue and the net capital gains/losses on the scheme property of the Company and each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco Fixed Interest Investment Series is an Open Ended Investment Company ('OEIC') with 8 sub-funds. The financial statements of the Company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise: the Balance Sheets as at 30 April 2023; the Statements of Total Return, and the Statements of Change in Net Assets Attributable to Shareholders for the year then ended; the Distribution tables; and the Notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's or any sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's or any sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the Authorised Corporate Director with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on our work undertaken in the course of the audit, the Collective Investment Schemes sourcebook requires us also to report certain opinions as described below.

Authorised Corporate Director's Report

In our opinion, the information given in the Authorised Corporate Director's Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Independent auditors' report to the Shareholders of Invesco Fixed Interest Investment Series continued

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Manager's Responsibilities, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the sub-fund's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual sub-fund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of the Collective Investment Schemes sourcebook, and we considered the extent to which non-compliance might have a material effect on the financial statements, in particular those parts of the sourcebook which may directly impact on the determination of amounts and disclosures in the financial statements. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue or to increase the net asset value of the Company or the sub-funds. Audit procedures performed included:

- Discussions with the Authorised Corporate Director, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reviewing relevant meeting minutes, including those of the Authorised Corporate Director's board of directors;
- Identifying and testing journal entries, specifically any journals posted as part of the financial year end close process; and
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's Shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
