The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

VanEck Uranium and Nuclear Technologies UCITS ETF (the "Fund")

a sub-fund of VanEck UCITS ETFs plc (the "Company")

Share Class: USD A ISIN: IE000M7V94E1

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The Product's investment objective is to replicate, before fees and expenses, the MarketVector™ Global Uranium and Nuclear Energy Infrastructure Index (the "Index").

In order to seek to achieve its investment objective, the Management Company will normally use a replication strategy by investing directly in the underlying securities of the Index being the equity stock, American depository receipts (ADRs), global depository receipts (GDRs) and closed-ended exchange-listed Products which qualify as transferable securities and fulfil further requirements as outlined in the Prospectus. Such securities must be issued by companies who generate at least 50% of their revenues from uranium (including uranium mining, or mining projects that have the potential to generate at least 50% of their revenues from uranium when developed), or with at least 50% of their revenues from nuclear energy infrastructure. For the avoidance of doubt, where the Index already holds such equity securities, the Index will seek to remove the security when the percentage of revenue generated from the uranium segment drops below 25% of the relevant companies revenues and from the nuclear energy segment to 0% of the relevant companies revenues.

Where it is not practical or cost efficient for the Product to fully replicate the Index, the Management Company may utilise an optimized sampling methodology.

The Fund may invest in certain investment funds as described in the prospectus that track the spot price of uranium or invest in physical uranium.

The Fund may invest up to 15% of its Net Asset Value directly in shares issued by companies listed on the Shanghai Stock Exchange or the Shenzhen Stock Exchange. The Fund may invest more than 20% of its Net Asset Value in emerging markets.

The Product may also (or alternatively) invest in financial derivative instruments (FDIs) which relate to the Index or constituents of the Index. The FDIs which the Product may use are futures, options (puts and calls), swaps (including equity swaps and swaps on the Index), currency forwards and non-deliverable forwards (a forward contract that does not require settlement on maturity) (NDFs).

The Product may also invest in ancillary liquid assets and money market

instruments which may include bank deposits, depository receipts, certificates of deposit, fixed or floating rate instruments (treasury bills), commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix II of the Prospectus. Investment in ancillary liquid assets and money market instruments may be utilised in a variety of circumstances, including but not limited to, situations such as managing total exposure to cash and borrowing on a short-term basis and in anticipation of participation in a rights offering. Where it is not practical or cost efficient for the Product to fully replicate the Index, the Product will not avail of the increased limits as set out in Regulation 71 of the UCITS Regulations.

The Fund may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes.

Furthermore, the Product may not invest less than 51% of its Net Asset Value in equity securities which constitute "equity participation" within the meaning of section 2, Article 8 of the German Investment Tax Act.

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Investment Manager will regularly monitor the Fund's tracking accuracy.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

- Fund's base currency: U.S. Dollar
- Distribution policy: Income accumulated

The shares are admitted for trading on various stock exchanges and can be traded on the secondary market. The price of the shares offered on the secondary market may deviate from the net asset value of the shares. The return of the Fund is directly related to the return of the underlying assets minus the costs associated with the Fund. If the performance of the underlying assets decreases, the performance of the Fund will also decrease. There is no capital protection against Market Risk.

Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 7 because funds of this type have experienced very high rises and falls in value in the past.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Liquidity Risks: Exists when a particular financial instrument is difficult to purchase or sell. If the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous or

reasonable price, or at all.

- Risk of Investing in Natural Resources Companies: Investments in natural resources and natural resources companies, which include companies engaged in agriculture, alternatives (e.g., water and alternative energy), base and industrial metals, energy, forest products and precious metals, are very dependent on the demand for, and supply and price of, natural resources and can be significantly affected by events relating to these industries, including international political and economic developments, embargoes, tariffs, inflation, weather and natural disasters, livestock diseases, limits on exploration, often changes in the supply and demand for natural resources and other factors.
- Industry or Sector Concentration Risk: The Fund's assets may be concentrated in one or more particular sectors or industries. The Fund may be subject to the risk that economic, political or other conditions that have a negative effect on the relevant sectors or industries will negatively impact the Fund's performance to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

For more information on risks, please see the "Risk Factors" section of the Fund's prospectus, available on www.vaneck.com.
