### BlackRock ICS Sterling Liquid Environmentally Aware Fund

A sub-fund of Institutional Cash Series plc

Class Premier Accumulating GBP

ISIN: IE00BKC9GJ54

Manager: BlackRock Asset Management Ireland Limited

## Objectives and Investment Policy

- ▶ The Fund is a "Short Term Variable NAV Money Market Fund" as defined by the EU Money Markets Funds Regulations. The Fund aims to provide a return in line with money market rates. This aim is consistent with maintaining capital and ensuring its underlying assets can easily be bought or sold in the market (in normal market conditions). Money invested in the Fund is not protected or guaranteed.
- ▶ The Fund will do this by maintaining a portfolio of high credit quality (according to the Investment Manager's assessment of credit worthiness) money market instruments (MMIs) (i.e. debt securities with short term maturities) and short term fixed income securities (such as bonds). It may also invest in cash and in deposits with credit institutions (e.g. banks) and in units of other short term money market funds.
- ▶ The Investment Manager will, in addition to the investment objective set out above, and subject always to investing in such assets as required for the Fund to meet its investment objective, take into account environmental and other characteristics when selecting the Fund's investments, as a non-financial objective as set out in the Fund's prospectus.
- ▶ The Fund's assets may be issued or guaranteed by the United Kingdom government or other sovereign governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and shall always be denominated in Sterling.
- ▶ The Fund will limit its investment to assets which have 397 days or less remaining until the full principal must be repaid. The weighted average maturity (i.e. the average length of time to the date when the principal of the asset is to be repaid in full (or, in respect of interest rate notes, the average length of time to the next interest rate reset to a money market rate) of all of the Fund's assets will be up to 60 days. The weighted average life (i.e. the average length of time to the date when the principal of the assets is to be repaid in full) of all of the Fund's assets will be up to 120 days. To calculate these averages, figures are adjusted to reflect the relative holdings of each of the Fund's assets. At least 7.5% of its assets must mature within a day and 15% within a week. Within the 15% of assets that mature within a week, up to 7.5% can consist of highly liquid government securities that can be redeemed and settled within five working days.
- ▶ Unless expressly stated, the environmental and other criteria set out in the Fund's prospectus are not taken into account when selecting the Fund's investments in direct government securities and instruments. Such securities and instruments may not comply with the environmental and other criteria set out in the Fund's prospectus and at times the entire Fund could be comprised of such securities and instruments to help meet the Fund's investment objective.
- ▶ The Fund may also enter into reverse repurchase agreements on a short term basis. Through these, the Fund agrees to purchase government securities from certain eligible third parties for cash and that the seller can buy these back at an agreed time and price.
- ▶ The Fund is actively managed. The investment manager has discretion to select the Fund's investments and is not constrained by any benchmark in this process. The Sterling Overnight Index Average Rate (SONIA) should be used by investors to compare the performance of the Fund. The investments of this VNAV Fund are valued using the mark-to-market method (i.e. a valuation based on current market prices) where possible, and if not, the mark-to-model method (i.e. a valuation based on a financial model) is used. The NAV is calculated to four decimal places and forms the dealing NAV.
- ▶ Recommendation: This Fund may not be suitable for investors who seek long-term capital growth.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The Fund is valued at multiple valuation points throughout each day in order to offer investors the ability to buy and sell shares at multiple times during the day. The minimum initial investment for this share class is £500,000,000.

For more information on the Fund, share/unit classes, valuation methodology, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com).

## Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated one due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Short Term Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund.
- On any day where the net return (i.e. return less costs and expenses) of the Fund is negative an Accumulating Share Class of the fund will see a decrease in the NAV per Share.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

The ongoing charge figure shown here is estimated and based on the expected annualised charges. This figure may vary from year to year. It excludes portfolio trade-related costs and any entry/exit charge paid to an underlying collective investment scheme (if any).

One-off charges taken before or after you invest
