- ▶ This Fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high. This indicator is a measure of a fund's volatility. The lowest number on the scale does not mean that a fund is risk free.

The Fund is subject to the following risks:

- ▶ **Liquidity Risk:** At times, some shares may trade infrequently which means it may be more difficult for the Fund to buy and sell them. Prices may also be subject to short term swings.
- ▶ **Counterparty Risk:** As the Fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the Fund, receiving less than is due or receiving nothing.

- ▶ **Market risk:** the value of investments and the income derived from them may fall as well as rise. There is no assurance that the investment objective of the Fund will be achieved.
- ▶ **Fixed Income Security Risk:** Fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of a fixed interest security is also affected by its credit rating.
