Northern Electric plc

Strategic Report for the Year Ended 31 December 2022

The directors present their annual report and audited financial statements for the year ended 31 December 2022 of Northern Electric plc (the "Company"), which have been drawn up and are presented in accordance with the Companies Act 2006 (the "CA06").

Business model

The Company is part of the Northern Powergrid Holdings Company and its subsidiaries group of companies (the "Northern Powergrid Group") and acts as a holding company of Northern Powergrid (Northeast) plc ("NPg Northeast"), Integrated Utility Services Limited ("IUS") and Northern Powergrid Metering Limited ("NPg Metering"), collectively, (the "Group").

NPg Northeast is an authorised distributor under the Electricity Act 1989 and holds an Licence granted by the Secretary of State. As a distribution network operator ("DNO"), NPg Northeast is regulated by the office of Gas and Electricity Markets ("Ofgem"), which in turn, is governed by the Gas and Electricity Markets Authority ("GEMA"). The completion of the 2021/22 Regulatory Year (on 31 March 2022), represented the end of year seven of the current RII0-ED1 price control, which became effective on 1 April 2015 and is due to end on 31 March 2023 (the "ED1 period"). NPg Northeast distributes electricity, to approximately 1.6 million customers connected to its electricity distribution network within its distribution services area in the northeast of England. As NPg Northeast is the largest contributor to the Group in terms of revenue, the Strategic Report predominantly concentrates on the performance and progress of that entity throughout the reporting year.

Revenue generated by NPg Northeast is primarily controlled by a distribution price control formula which is set out in the Licence. The price control formula does not directly constrain profits from year to year, but is a control on revenue that operates independently of a significant portion of NPg Northeast's costs. Allowed revenue is recovered from electricity suppliers via the application of Distribution use of System charges. These charges account for approximately 15% of the electricity end user's overall electricity bill. NPg Northeast's opening base allowed revenue (excluding the effects of incentive schemes and any deferred revenues from the prior price control) has been set to remain constant for each Regulatory Year from 1 April 2016 through to 31 March 2023. Nominal opening base allowed revenues will increase in line with inflation (as measured by the United Kingdom's Retail Prices Index "RPI").

IUS provides engineering contracting services and NPg Metering rents meters to energy suppliers.

Strategy

In common with the Northern Powergrid Group, the Group operates a strategy based on six core principles (the "Core Principles"), which comprise Financial Strength, Customer Service, Operational Excellence, Employee Commitment, Environmental Respect and Regulatory Integrity. The Core Principles (which are applied by the Northern Powergrid Group's parent company, Berkshire Hathaway Energy Company ("Berkshire Hathaway Energy")), set out the basis on which the Company and Group generates shareholder value over the longer-term and defines the standards by which the Northern Powergrid Group holds itself accountable. Each Core Principle is defined by a strategic objective which is intrinsically linked to the commitments made in the NPg Northeast's 2015 to 2023 regulatory well-justified business plan (the "Business Plan").

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

Submitted to Ofgem in March 2014, the Business Plan described the long-term strategy and commitments that NPg Northeast would achieve during the ED1 period in order to deliver sustainable growth with regard to those with whom NPg Northeast interacted and served. Developed after a period of consultation with stakeholders, the Business Plan focused on a number of priorities (described throughout the Strategic Report) including minimising costs, improving flood defences, enhancing customer service, prioritising employee safety, supporting vulnerable customers, protecting the environment and transitioning to low carbon technologies. The directors refer to the values established by the Core Principles and the commitments contained within the Business Plan when considering the consequence of decisions they make. The 2022 financial year denotes the last full year in which NPg Northeast operated under the Business Plan.

Following the publication of RIIO-ED2 (“ED2”) Business Planning guidance by Ofgem in August 2020, the Company commenced the development of its regulatory business plan for the ED2 period (1 April 2023 to 31 March 2028) (the “ED2 Plan”), which was submitted to Ofgem on 1 December 2021 (a copy of which can be found on the Northern Powergrid Group website). As part of the development of the ED2 Plan, the Company worked with the Customer Engagement Group (“CEG”), which was established for the purpose of providing independent scrutiny and challenge to ensure that customers’ interests are adequately reflected in the ED2 Plan. Ahead of the implementation of the ED2 Plan on 1 April 2023, the Company will participate in open hearings with Ofgem and interested stakeholders and consultations before Ofgem publishes its final determination in December 2022 (for further detail, see Regulatory Integrity).

During the transition into the ED2 Period and beyond, the strategy set out in the ED2 Plan will support NPg Northeast’s evolution from DNO to Distribution System Operator (“DSO”), in order to facilitate decarbonisation and take steps to achieve a fully integrated energy system. See Environmental Sustainability for more detail.

Many of the conditions set out in the Licence, including the way in which base allowed revenue will be determined will be revised as a result of the stipulations set out in the ED2 final determination. However, these will not come into effect until 1 April 2023 and will therefore not be reported on until the 31 December 2023 annual report and financial statements of the Group.

The Strategic Report focuses on each Core Principle and the performance of each KPI throughout the year in order to provide a summary of the success in achieving each strategic objective, progress made against certain Business Plan commitments and performance in relation to the Annual Plan.

The delivery of the Business Plan is supported by an annual business plan (the “Annual Plan”) which is submitted to the Northern Powergrid Group’s shareholder each financial year and is designed to phase progress towards the achievement of each commitment over the duration of the ED1 period. The phasing ensures that the deliverables in both plans can be measured effectively by using a mix of financial and non-financial Key Performance Indicators (“KPI”).

The Strategic Report focuses on each Core Principle and the performance of the associated KPIs throughout the Regulatory Year in order to provide a summary of the success in achieving each strategic objective, progress made against certain Business Plan commitments and performance in relation to the Annual Plan.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

FINANCIAL STRENGTH

Strategic objective: Strong finances that enable improvement and growth.

KPI	2022	2021
Operating Profit	£ 181.2 million	£ 184.2 million
Cash from operating activities	£ 288.3 million	£ 275.6 million
Cash used in investing activities	£ 170.2 million	£ 214.5 million
Credit Rating (Standard & Poor's)	A	A

Business Plan commitment: To build on the efficiencies achieved to date and in doing so, reduce base costs by 3.1% in 2015 to 2023 compared to the previous price control period.

Performance during the year: The Group continued to maintain good control in respect of both its capital and operating costs by effectively managing the financial risks that could have had an adverse impact on its business. Seven years through the ED1 Period, NPg Northeast has implemented efficiencies equivalent to a 4% reduction in base costs relative to the prior regulatory period.

Revenue: The Group's revenue at £558.2 million was £64.4 million higher than the prior year due to increased distribution use of system revenues as the result of higher tariffs including the recovery of payments made under the supplier of last resort process.

Operating profit and position at the year-end: The Group's operating profit of £181.2 million was £3.0 million lower than the previous year, primarily reflecting higher depreciation (£5.6 million), impact of Storm Arwen costs (£4.6 million), and higher pension costs (£21.2 million) offset by higher gross margin (£19.4 million) and lower bad debts (£5.4 million). The statement of financial position shows that, as at 31 December 2022, the Group had total equity of £1,398.0 million (2021: £1,466.3 million). The directors consider the Group to have a strong financial position which, when coupled with the preference of Berkshire Hathaway Energy for operating with lower levels of debt than equivalent companies in the sector, creates a stable base for continued strong performance during the ED1 period.

In April 2022, the Group issued a £350 million bond at 3.25% maturing in 2052, the funds will be used for general corporate purposes including the repayment of Northern Powergrid Group maturities in 2022.

Finance costs and investments: Finance costs net of investment income at £47.7 million were £7.4 million higher than the prior year mainly reflecting increased borrowings.

Taxation: The effective tax rate in the year was 21.7%. Tax charge for the year was £29.2 million which was £38.6 million lower than prior year of £67.8 million primarily due to the impact the tax rate change had on the deferred tax balance in the prior year. Details of the income tax expense are provided in Note 10 to the financial statements.

Share capital: The Company has one class of ordinary shares which carries no right to fixed income. Details of cumulative non-equity preference shares are contained in the borrowings Note 20. There were no changes to the Company's share capital during the year.

Cash flow: The Group aims to collect from customers and pay suppliers within contracted terms. Any surplus cash held is remitted to Yorkshire Electricity Group plc ("YEG"), a company in the Northern Powergrid Group, and invested accordingly, generating a market rate of return for the Northern Powergrid Group. Movements in cash flows were as follows:

- **Operating activities:** Cash flow from operating activities at £288.3 million was £12.7 million higher than the previous year due to higher profit before depreciation and amortisation offset by adverse working capital movements.
- **Investing activities:** Cash flow used in investing activities at £170.2 million was £44.3 million lower than the previous year reflecting lower purchases of plant, property and equipment and higher receipt of customer contributions.
- **Financing activities:** Cash inflow from financing activities at £108.4 million was £149.3 million higher than the previous year of £40.9 million outflow, mainly due to the increased borrowings as result of the new bond issued in April 2022.

Northern Electric plc
Strategic Report for the Year Ended 31 December 2022 (continued)

Pensions: The Company is a participating employer in the Group of the Electricity Supply Pension Scheme (the "DB Scheme"), a defined benefit scheme. Further details of the Group's commitments to the DB Scheme and the associated deficit repair payments are provided in Note 25 to the financial statements. The Group also participates in the Northern Powergrid Pension Scheme, which is a defined contribution scheme.

Insurance: As part of its insurance and risk strategy, the Group has in place insurance policies, which cover risks associated with employees, third party motor and public liability. The Group carries appropriate excesses on those policies and is effectively self-insured up to the level of those excesses.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

CUSTOMER SERVICE

Strategic objective: Delivering exceptional customer service.

KPI	2022	2021
Broad Measure of Customer Satisfaction ("BMCS")	88.3%	89.4%
BMCS Rank (out of 14)	12	11
BMCS Power Cuts	87.8%	88.9%
BMCS General Enquiries	94%	94.4%
BMCS Connections	86.2%	87.8%
Stakeholder Engagement and Customer Vulnerability ("SECV") rank (out of 6) (combined with Northern Powergrid (Yorkshire) plc)	6	5

Business Plan commitment: To provide a reliable, better communicated and faster customer service offering through a range of channels to suit stakeholder needs.

Performance during the year: In respect of BMCS performance, an independent market research company carried out telephone surveys with NPg Northeast's customers to find out how satisfied they were with services related to unplanned or planned power cuts, quotations and subsequent connections, and general enquiries. NPg Northeast recorded a decline in overall satisfaction scores at 88.3% compared to the prior year (89.4%) which had resulted in an overall BMCS rank of 12 out of 14.

To further enhance the service provided to customers a number of initiatives from NPg Northeast's customer service improvement plan were implemented. This included the continued development of the customer relationship management ("CRM") system, including the launch of an enduring connections solution (which equips customers with greater self-serve capabilities), the roll-out of additional communication and greater call handling capability.

Activity scheduled to take place during 2023 includes the further development of the CRM system to support a self-serve solution for low carbon technology additional load requests, the introduction of a proactive on-site response offering to support customers impacted by long duration power cuts and to provide out of hours delivery for certain services.

Connections to the network

Business Plan commitment: To further implement customer service improvements in support of the commitment to reduce routine, small works end-to-end connections lead times by 30% during the ED1 period, actively facilitate the development of competition from independent connections providers ("ICPs") and deliver the major works service improvement plan as part of the Ofgem Incentive on Connections Engagement ("ICE").

Performance during the year: End-to-end lead time improvement continued to be challenging due to the significant increase in connections volumes as a result of low carbon technology uptake and additional applications post the relaxation of Pandemic restrictions. In response NPg Northeast implemented a new quotation system which allowed customers to obtain a quote online and increased operational delivery capacity. This was in addition to the quote on site option, single point of contact and AutoDesign tool that were implemented in ED1.

NPg Northeast continued to comply with the processes set out in Standard Licence Condition 52 and the Competition in Connections Code of Practice. This included the provision of dual quotations, enabling ICPs to self-determine points of connection to the existing network and self-approve designs, and by facilitating the self-connection of new assets to NPg Northeast's low and high voltage networks by suitably accredited ICP operatives as a contestable activity.

In relation to NPg Northeast's ICE commitments for the 2022/23 regulatory period, the 11 actions included in the service improvement work plan were delivered by 31 March 2023.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

Corporate responsibility

Business Plan commitment: To build effective relationships with stakeholders whilst maximising the value of contact with customers, especially those who are vulnerable and hard to reach.

Performance during the year: In May 2022, NPg Northeast (together with Northern Powergrid (Yorkshire) plc) put forward its SECV submission to Ofgem in respect of work undertaken during the 2021/22 Regulatory Year. The material provided an overview of activities and case studies in areas such as support for vulnerable customers, decarbonisation, safety, environment, customer service, reliability and availability.

Following the review by Ofgem's panel, NPg Northeast achieved sixth place (of six) in the context of the DNOs (2020/21: fifth place (of five)). In response, an external assessment of the approach to engagement, fuel poverty provision and the support provided to vulnerable customers was undertaken and improvement plans were established.

During the year, NPg Northeast continued to develop its routine engagement activity with a focus on decarbonisation and resilience. This included enhancing existing relationships with local councils, Local Enterprise Partnerships and civic leaders, particularly during periods of severe weather and when providing support to vulnerable customers. In addition, engagement sessions were held (and attended by the CEG) to understand stakeholders' opinions on the commitments and proposed level of investment in the ED2 Plan.

The ongoing energy crisis and economic uncertainty exacerbated the challenges facing vulnerable customers. As a result, additional resource was allocated to assist those facing fuel poverty and work continued with partners who provide support services. NPg Northeast's fuel poverty partners resumed face to face advice where possible but also maintained online and telephone services. In addition, NPg Northeast's Community Partnering Fund financed nine grassroots organisations across the region to deliver fuel poverty support to vulnerable households. Alongside, the Company and all funded partners routinely promoted Priority Services Membership and shared energy efficiency materials and winter preparedness information to customers.

OPERATIONAL EXCELLENCE

Strategic objective: High-quality, efficient operators running a smart reliable energy system.

KPI	2021/22		2020/21	
	Actual	Target	Actual	Target
Customer minutes lost ("CML")	46.3	<52.8	36.8	<55.2
Customer interruptions ("CI")	49.8	<59.2	45.3	<60.0
KPI	2022		2021	
High voltage restoration time (minutes)	61.1		51.8	
Network investment (million)	£156.1		£187.6	

Business Plan commitment: To enhance the reliability of the network in support of the commitment to achieve 8% fewer unplanned power cuts and reduce the average length of unplanned power cuts by 20% during the ED1 period.

Performance during the year: CML and CI are the KPIs set by Ofgem and used by the Company to measure the quality of supply and system performance. Both CML and CI are measured on a regulatory year basis. CML measures the average number of supply minutes lost for every connected customer due to both planned and unplanned power cuts that last for three minutes or longer. CI measures the average number of supply interruptions per every 100 connected customers due to planned and unplanned power cuts that last for three minutes or longer. Performance during the year was better than Ofgem's target for both CML and CI.

In relation to high voltage restoration, NPg Northeast's high-voltage restoration performance during the year averaged 61.1 minutes (2021: 51.8 minutes), after allowing for severe weather incidents and other exemptions.

In respect of the Business Plan commitments, NPg Northeast together with Northern Powergrid (Yorkshire) plc achieved 26% fewer unplanned power cuts and a reduction of the average length of unplanned power cuts by 32% (relative to the prior regulatory period). Progress remains on track to outperform the original targets of 8% fewer unplanned power cuts and a 20% reduction in the number of unplanned customer minutes lost per customer.

Northern Electric plc
Strategic Report for the Year Ended 31 December 2022 (continued)

NPg Northeast invested £156.1 million during the year through its approved Network investment strategy (2021: £187.6 million), which has been designed to deliver improvements in Network performance and increase resilience. Various major projects were undertaken to reinforce the primary Network, refurbish transformers, rebuild overhead lines, remove and replace oil-filled cables, change deteriorated poles, replace switchgear and install and commission new remote-control points.

Further Network enhancements included the continued roll-out of the automatic power restoration system on the high voltage Network. At low voltage the implementation of next generation innovative low voltage technology devices continued with the addition of low-cost Network monitoring sensors which detect developing faults so that they can be proactively managed. Initiatives were also implemented as a result of the Reliability Improvement Plan including increasing the use of mobile generation to restore supplies.

CLIMATE CHANGE ADAPTATION

Strategic objective: Operate a highly reliable and resilient Network

	2021/22			2020/21		
	Annual	Cumulative	Target	Annual	Cumulative	Target
Flood Defences:						
High risk sites protected		95%	88%		94%	75%
Flood defence upgrades	0	125		1	125	
Installed at major substations	7	81		12	74	
Vegetation Management:						
High voltage network resilient to high winds	16.5		544	53		585
Clearance of spans	29,469		29,328	28,246		28,004
Collaboration:						
Local Resilience Forums	35		28	28		28

Northern Electric plc Strategic Report for the Year Ended 31 December 2022 (continued)

Business Plan commitment: To adapt to the effects of climate change by establishing and maintaining flood defences at all high-risk substations to national standards, delivering a programme of vegetation management and working collaboratively with regional infrastructure providers and local resilience forums.

Performance during the year: In respect of routine activity, NPg Northeast and its affiliate invested £5.0 million on flood mitigation works and £8.6 million on the continuation of the vegetation management programme.

In parallel, activity to understand the risks and opportunities presented by climate change, as well as the development of initiatives in response, continued to evolve.

Using the latest climate projections (UKCP18), alongside work with the Met Office and the Energy Networks Association, the Company carried out a risk assessment to identify and prioritise key climate related risks and their impact on the Network.

Focus was directed on two pathways. The first, in line with the 2°C global warming considered in the Paris agreement and the second, representing an increase in global mean surface temperature of 4.3°C by 2081-2100. The risk assessment was carried out across three timescales (current, medium term: 2050's and long term: 2080's) for each scenario, which resulted in the following key risks:

- Precipitation (extreme prolonged rainfall) - leading to flooding and erosion, and creating access issues, asset damage and reduced performance.
- Temperature (extreme heat) - high temperatures, which may reduce the performance and efficiency of assets.
- Precipitation (storms) - strong winds in conjunction with heavy rain, causing operational failure of above ground assets and increased faults.
- Temperature / Precipitation (gradual increase in temperature and rainfall) - warmer and wetter conditions extending vegetation growing seasons, resulting in accelerated growth and increasing management needs.

In terms of impact, sixteen asset related risks and four non-asset related risks were identified, all of which were included in NPg Northeast's Climate Change Adaptation report submitted to Department for Environment, Food and Rural Affairs ("Defra") in December 2021 and the Climate Resilience Strategy for 2023 to 2028 (both available on the Northern Powergrid Group website).

NPg Northeast's climate resilience framework (part of the aforementioned strategy) has been developed in line with guidance from Defra and the National Infrastructure Commission's approach to Climate Resilience and incorporates the recommended aspects of resilience: Anticipate, Assess, Adapt, Recover and Transform.

Statement pursuant to Listing Rule 14.3.27R Task Force on Climate-related Financial Disclosures ("TCFD")

Disclosures consistent with the TCFD Recommendations and Recommended Disclosures have been included in the 'Climate Change Adaptation' section of the Strategic Report and the two documents outlined above. It should be noted that the Company has a negligible impact on the environment and climate given its principal accountability is that of a Holdings Company.

Northern Electric plc
Strategic Report for the Year Ended 31 December 2022 (continued)

EMPLOYEE COMMITMENT

Strategic objective: High-performing people doing rewarding jobs in a safe and secure workplace

KPI	2022		2021	
	Actual	Target	Actual	Target
Northern Powergrid Group occupational safety and health administration ("OSHA") rate	0.26	0.09	0.29	0.09
Preventable vehicle accidents	10	14	23	14
Lost time accidents	0	0	1	0
Medical treatment accidents	0	1	2	1
Operational incidents	5	3	6	4
Absence rate	3.3%		3.3%	

Health and safety

Business Plan commitment: To deliver world class safety performance and halve the accident rate during the ED1 period.

Performance during the year: In common with the Berkshire Hathaway Energy group, the Northern Powergrid Group measures its safety performance using the OSHA rate, which is a measure used to capture safety incidents down to minor levels of medical treatment. The Northern Powergrid Group failed to meet its target of 0.09 having achieved an OSHA rate of 0.26 (2021: 0.29), which equated to six recordable incidents against a goal of two or fewer. Three incidents involved minor burn injuries, and as such, an intervention plan was implemented. NPg Northeast had a positive year in terms of PVAs, with ten recorded against a target of 14 or fewer.

In respect of the Business Plan commitment, at 31 December 2022, NPg Northeast's accident rate had been reduced by 42%, which is on target to achieve a 50% reduction by 31 March 2023.

Improving safety performance remains a key priority and the way in which this is achieved is set out in the Group's safety and health improvement plan ("SHIP"). During the year, the SHIP focused on 45 initiatives in the areas of enhanced engagement, operational performance, risk management, road risk, occupational health and public safety. This included an upgrade of the telematics system in all fleet vehicles, continuation of driver training, weekly driving performance analysis for fleet vehicle drivers and the introduction of a new system for display screen equipment assessments.

The mental health and wellbeing of staff continues to form an integral part of the SHIP. Existing support includes an independent employee assistance service, which is a confidential, self-referral counselling and information service to assist with personal or work-related problems and access to services including counselling and physiotherapy referrals.

In terms of the Pandemic, safe working practices and procedures remained under review by members of the safety team, senior management team, Health and Safety Committee and the Board, in conjunction with trade union representatives until measures were relaxed.

During the year, NPg Northeast successfully retained its ISO 45001 accreditation scheme for its health and safety management system.

Northern Electric plc Strategic Report for the Year Ended 31 December 2022 (continued)

Employees

Business Plan commitment: To emphasise the importance of leadership and high standards of performance by engaging, collaborating and working with employees and their trade union representatives.

Performance during the year: As Pandemic restrictions eased, an enduring approach to agile working was launched, allowing eligible colleagues to adopt flexible ways of working. This enhanced The Group's ability to attract new talent whilst fostering teamwork and collaboration. Alongside, the Group continued to develop its health and wellbeing offering and in support, appointed a new occupational health partner.

In relation to development, training sessions on topics which formed part of the Diversity, Equality and Inclusion plan were provided to further promote a more inclusive culture. Routine training also continued in key areas such as customer service, cyber security and management development. In 2023, the Group's leadership offering will be refreshed in line with the Berkshire Hathaway Energy Performance Management Framework.

During the year, 41 new recruits (2021: 38) joined the NPg Northeast's and Northern Powergrid (Yorkshire) plc's workforce renewal programme. At 31 December 2022, the Company had 1,281 employees (2021: 1,228).

Further information concerning how the Northern Powergrid group is supporting gender diversity in the energy industry can be found in the Northern Powergrid Group's gender pay gap report via the Northern Powergrid Group's corporate website.

Employee engagement

The board and senior management team keep employees and trade union representatives informed of and involved as appropriate in developments that may impact them now or in the future. This approach has been chosen as the most effective way of interacting with employees due to the combination of collectively bargained and personal contract holders. In support of this process, the Director of People and Change routinely reports to the board and the Health and Safety Committee to ensure that the views of employees are considered and to facilitate the discussion of and any subsequent decision making in respect of employee related concerns or issues.

Consultation for collectively bargained employees is agreed with trade union representatives in the form of a constitutional framework. In addition, all employees are consulted to establish their views and identify key priorities using employee engagement surveys.

During the year, the President and Chief Executive Officer, members of the board and senior management team provided regular updates on financial, organisational, safety and customer service performance. As social distancing measures eased, the executive directors engaged directly with employees during operational and office-based site visits, and induction and graduation events. Communication with employees was delivered via various channels including group wide text messages to quickly disseminate key information concerning safety, the Pandemic and Major Incident Management Plans, regular briefings, line manager conversations, meetings with trade union representatives and utilising the Northern Powergrid Group's intranet.

The Berkshire Hathaway Energy code of business conduct ("Code of Conduct")

The Northern Powergrid Group has adopted the Code of Conduct, which details the commitment to ethics and compliance with the law, provides reporting mechanisms for known or suspected ethical or legal violations, and establishes minimum standards of behaviour expected of all employees. In support of this, a "speaking up" process is in place enabling all employees to raise concerns of unethical acts, malpractice or impropriety (including bribery or corruption), and an anonymous help line operated by an independent company is also available. All colleagues complete an annual online training programme covering the requirements of the Code of Conduct.

Employment of disabled persons

NPg Northeast's policy is to provide all protected groups, including disabled people, with equality at work in respect of employment, training, career development and promotion, having regard to their aptitudes and abilities. Should any member of staff become disabled during their employment, the Company will make reasonable adjustments, wherever possible.

Northern Electric plc Strategic Report for the Year Ended 31 December 2022 (continued)

ENVIRONMENTAL RESPECT

Strategic objective: Leaders in environmental respect and low carbon technologies.

KPI	2022		2021	
	Actual	Target	Actual	Target
Total oil/fluid lost (litres)	10,164	<11,406	8,986	<11,583
SF6 gas discharges (kg)	22.08	<12.75	19.20	<13.50
Environmental incidents	3	<2	0	<2
KPI	2022		2021	
Carbon footprint (tonnes)	14,375		14,496	
KWh Energy Consumed	20,867,214		21,241,374	
Business carbon footprint	Tonnes	Per km ²	Tonnes	Per km ²
Scope 1	2,728	0.19	2,737	0.19
Scope 2	2,439	0.17	2,679	0.19
Scope 3	9,208	0.64	9,080	0.62
Total carbon footprint (tonnes)	14,375	1.00	14,496	1.00

Note: KWh energy consumed relates to depot energy and fleet fuel usage.

The chosen business carbon footprint intensity ratio is based on the Company's licence area which equals 14.394 km.

The methodology adopted to calculate energy and business carbon footprint data is aligned with international standards, those required by Defra and BEIS and is compliant with ISO 14064-1:2006.

Business Plan commitment: Deliver Environmental "RESPECT" (Responsibility, Efficiency, Stewardship, Performance, Evaluation, Communication and Training) and in doing so reduce oil and fluid loss by 15% and our business carbon footprint by 10% during the ED1 period.

Performance during the year: NPg Northeast operates a United Kingdom Accreditation Service scheme for environmental management and is certified to the environmental management systems standard ISO 14001:2015. This is designed to enhance environmental performance, fulfil compliance obligations and achieve environmental objectives, all of which contribute to the attainment of the KPIs. A full recertification assessment was carried out in March 2020 with continued certification confirmed following the last surveillance audit in October 2022.

NPg Northeast's carbon footprint reporting framework is certified under the Certified Emissions Measurement and Reduction Scheme for compliance with ISO 14064-1:2006. Certification was reconfirmed in August 2022.

Remote working and less travel has led to a further reduction in NPg Northeast's carbon footprint to 14,375 tonnes (2021: 14,496 tonnes). This improvement (combined with Northern Powergrid (Yorkshire) plc) demonstrated a carbon footprint reduction of 39% at 31 December 2022, well ahead of the original 10% ED1 commitment.

In support of the target to further reduce oil and fluid loss, the 2022 annual environmental improvement plan included replacing fluid-filled cables and locating cable fluid leaks more quickly resulting in a total fluid loss of 10,164 litres (2021: 8,986). In relation to the Business Plan commitment, at 31 December 2022, NPg Northeast and its affiliate had achieved a 51% reduction in oil and fluid loss (15% commitment).

To maintain its strict policy of environmental protection and legal compliance, NPg Northeast continued to assess environmental risks and mitigate threats through programmes of work such as fluid-filled cable replacement, undergrounding overhead lines in areas of outstanding natural beauty, installing flood defences, implementing secondary containment in high-risk substations and removing equipment containing polychlorinated biphenyl from the Network. Whilst prevention is paramount, in the event NPg Northeast's activity does result in a leak or spill, the services of an appointed 24-hour a day environmental response consultancy is used to minimise the effects of any incident.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

NPg Northeast takes its environmental responsibilities very seriously and has a proven track record of lowering emissions and minimising the wider environmental impact of Network activity. Reducing the level of internal carbon footprint is a key priority and consequently, plans have been developed to become carbon net neutral by 2040. This includes initiatives such as increasing ultra-low emission or zero emission vehicles to 40% of NPg Northeast's fleet of vehicles by 2028 and the adoption of science-based targets.

Science-based targets are a set of goals developed to provide a clear route to reducing greenhouse gas emissions. Emissions reduction targets are considered science based if they are consistent with keeping global warming below 1.5°C above pre-industrial levels. NPg Northeast's science-based targets were verified by the Science-based Targets Initiative in December 2021.

In respect of NPg Northeast's wider environmental impact, plans have been developed to achieve zero waste to landfill by 2035 and to divert 90% of waste from all of NPg Northeast's operations by 2028. In addition to safeguarding the environment from its direct activity, NPg Northeast also operates a programme which is aimed at protecting natural habitats and increasing the variety and variability of species and ecosystems at 200 major sites.

To date, NPg Northeast's performance against a number of stretching KPIs to reduce carbon usage and minimise the effects on stakeholders and the environment has been positive. However, it is acknowledged that becoming carbon neutral by 2040 and working with suppliers and partners in order to accomplish this, is not without its challenges and risks. Accordingly, NPg Northeast will continue to evolve its ambitions and enhance the implementation of environmental plans throughout the ED2 period.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

Environmental Sustainability

Strategic focus: Enable significant growth in customers connecting low carbon technologies, support all pathways to net zero emissions and significantly reduce NPg Northeast's carbon footprint.

Performance during the year: As the country takes action to reduce carbon emissions in line with the net zero target by 2050, the way in which electricity is produced and used is expected to have a substantial impact on the Network over time. Accordingly, in the year, NPg Northeast engaged with Ofgem to secure the funding to support its DSO strategy and therefore, act as a key facilitator in the country's net zero transition by placing decarbonisation at the heart of its investment and actions for the ED2 period.

As the volume and total capacity of decentralised energy generation grows and given the greater range of load and generation technologies now connected to the Network, NPg Northeast continued to develop and action innovative solutions that will reduce the need for traditional and potentially expensive reinforcement.

In the past year, NPg Northeast engaged with the market for flexibility by consulting on investment solutions where there was an option for customers to change their energy consumption and generation patterns, thereby facilitating a more efficient and greener Network. And to better understand how to prepare the Network for the future needs of its customers and the potential pathways to net zero, NPg Northeast published further Distribution Future Energy Scenarios in February 2022 (available via the Northern Powergrid group corporate website).

From an innovation perspective, NPg Northeast runs a portfolio of projects in the priority areas of customer vulnerability, resilience and decarbonisation. One ongoing energy efficiency project has the potential to deliver a 4% reduction in domestic energy use, giving rise to an average £40 annual saving. Meanwhile, the scope of the Silent Power generators for temporary restorations was expanded to support larger and high voltage faults. Ongoing innovation projects aim to provide support to rural communities.

Whilst NPg Northeast transitions into the ED2 period and the role of the DSO becomes better defined, decarbonisation will continue to become central not only to NPg Northeast's strategy, but the way in which the Company contributes more broadly to the evolution of the energy industry and the stakeholders with whom it interacts. NPg Northeast has been progressive in its ambition to reduce its own business carbon footprint. However, more is required and it is acknowledged that NPg Northeast has a key role to play in facilitating regional decarbonisation by fulfilling the functions of DSO. This means investing in people, processes and systems in order to actively manage the Network and to optimise the use of assets and generated energy in the region.

As part of NPg Northeast's ED2 Plan submission, a number of strategic objectives shaped the development of the accompanying DSO strategy. This included 'flexibility first', involving deploying flexible solutions as an alternative to Network reinforcement, 'whole system collaboration' in order to engage with the wider market on whole system energy solutions, 'data and digitalisation', to facilitate solutions in areas such as open data, 'openness and transparency' to collaborate in joint planning with our stakeholders and, finally, fostering a 'workplace and workforce fit for the future', to build regional and national skills.

Collectively, these objectives have been developed to achieve a number of outcomes and benefits. Consequently, during ED2, NPg Northeast will proceed with its plans for DSO to enable open energy data sharing, transform the way decisions and plans are made throughout the Company, support the development of new flexible energy markets, increase customer and Network flexibility and facilitate a whole system energy system. In support, the new DSO business unit was launched in 2022, and is led by the Director of Policy & Markets.

Northern Electric plc Strategic Report for the Year Ended 31 December 2022 (continued)

REGULATORY INTEGRITY

Strategic objective: Trustworthy, fair and balanced.

KPI: Completion of a quarterly regulatory compliance affirmation process.

Business Plan commitment: To manage the Group's business to the highest behavioural standards and adhere to a policy of strict compliance with all relevant standards, legislation and regulatory conditions.

Performance during the year: In order to assure compliance with distribution licence and other regulatory obligations, NPg Northeast operates a regulatory compliance affirmation process, under which ownership of approximately 1,900 regulatory obligations is assigned to 71 responsible managers. Those responsible managers are required to review compliance with the relevant obligations on a quarterly basis and report on any identified non-compliances or perceived risks which are then addressed by members of the senior management team. To minimise the risk of NPg Northeast breaching its licence conditions and other statutory requirements (which could lead to financial penalties), the board reviews the outcomes of each exercise. Each quarterly regulatory compliance affirmation process was completed satisfactorily during the year.

NPg Northeast submitted its annual Data Assurance Report to Ofgem in February 2022, which included risk assessments of the regulatory returns to be submitted for the Regulatory Year ahead (April 2022 to March 2023), together with a report detailing the assurance work actually carried out in the year ended 28 February 2022 and the findings of that work.

Ofgem completed its review process to determine the network charges that DNOs will be able to levy over the ED2 period and issued a consultation on its draft determinations for the ED2 period on 29 June 2022, to which the Company submitted a comprehensive response. Ofgem issued its final determinations on 30 November 2022.

The main focus in the ED2 period will be on investing in supporting the move away from dependence on fossil fuels towards cleaner, cheaper and more secure sources of energy, such as wind and solar power, to connect those sources of generation to the network and to facilitate the anticipated significant increase in the use of low carbon technologies such as heat pumps and electric vehicles.

On 2 March 2023, NPg Northeast and its affiliate sought permission from the Competition and Markets Authority (the "CMA") to appeal against the licence modifications that give effect to the ED2 price control. The appeal relates to two specific areas:

1. the misallocation of allowances that is inconsistent with efficient costs; and
2. the approach to determining rewards for the Business Plan Incentive.

The permission for the appeal was granted by the CMA, the appeal is expected to conclude in the fourth quarter of 2023 in accordance with the timetable required of the CMA. The outcome of these appeals may increase or reduce the revenue available to NPg Northeast if the CMA amends the price control determination.

Northern Electric plc Strategic Report for the Year Ended 31 December 2022 (continued)

PRINCIPAL RISKS AND UNCERTAINTIES

The Northern Powergrid Group operates a structured and disciplined approach to the management of risk as part of its overall risk management policy and in support of its financial reporting practices. A system is in place to facilitate the identification of new and emerging opportunities and risks, including those associated with the achievement of the Northern Powergrid Group's strategic objectives and Core Principles. This includes regular reviews of the macro environment as well as risks that arise from within functional business areas. Once identified, key risks and their respective controls and mitigation plans are continually assessed and formally reviewed on a quarterly basis by the Risk Advisory Board ("RAB") in order that they are managed to an acceptable level in accordance with the Northern Powergrid Group's risk appetite. The RAB routinely reports its findings to the board to ensure the directors are sufficiently apprised of the risk exposure associated with the pursuit of the Company's and Group's long-term strategy.

The risk management programme includes regular reviews of the crisis management, disaster recovery and major incident plans. To determine the level of disaster preparedness and responsiveness against threats to business continuity, risk management plans and processes are periodically tested. This self-evaluation approach is reinforced by that of the Berkshire Hathaway Energy group, which benchmarks risk management activities across its business units and shares significant lessons learned. The business continuity and disaster recovery plans were fully tested as a result of the Pandemic, and whilst adaptation and flexibility was required, operational performance remained resilient and employees continued to perform their duties safely.

Principal Risks

During the year, the risk posed by leaving the European Union was removed. In addition, following the relaxation of rules, the Pandemic no longer remains as a principal risk. No other notable changes have taken place. The Northern Powergrid Group's principal risks are not ranked or prioritised in any particular order.

Cyber and Information Security

Unauthorised access or compromise of the Information Technology or Operational Technology networks, resulting in loss of network control and availability. Unauthorised access or loss of large volumes of data or sensitive data.

Mitigations:

- Robust cyber security risk mitigation programme is in place.
- Accreditation under the ISO 27001 Information Security standard for operational, customer, employee and financial information.
- Compliant to the Network Information Security Directive and the Basic Cyber Assessment Frameworks.
- Compliance with the Centre for Internet Security Critical Security Controls.
- Monitored by the Information Security Executive Committee and the board.

Regulatory and policy positioning

Decisions taken resulting in negative impacts to our business model.

Mitigations:

- NPg Northeast policy position supporting the expanded role of DSO was published in December 2021.
- Innovation projects in place to develop and demonstrate future technologies and commercial practices.
- NPg Northeast engages in a robust regulatory and stakeholder engagement programme the latter of which is scrutinised by the CEG.
- NPg Northeast is actively involved in consultations on the ED2 price controls.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

Network resilience

Loss of the operational network due to significant weather events, targeted physical attack or catastrophic asset failure resulting in sustained or widespread loss of essential supply.

Mitigations:

- Major incident and crisis management policies, plans and governance arrangements are in place.
- An industry mutual aid agreement exists.
- Network investment ensures grid resilience.
- Grid resilience programme and audits.
- Vulnerable site protocols.
- Climate resilience strategy and framework.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

Safety

Fatality or serious harm caused to an employee or a third party.

Mitigations:

- Overseen by the Health and Safety Committee.
- Clear policies and procedures exist that comply with legislation to ensure the safety of the employees and customers.
- Safety Health and Improvement Plan.
- Health and safety training is provided to employees on a continuous basis.
- Enhanced audit programme and inspection regimes are in place.
- ISO45001 safety management system in place.

Environment and climate protection

Failure to prevent network assets from having a significant negative impact on the environment.

Mitigations:

- Incident response process and robust policies and procedures in place
- Programme to reduce fluid loss and the Company's business carbon footprint and remove assets containing polychlorinated biphenyl from the network.
- Investment in technology to minimise environmental incidents and 'self-heal' the network.
- Asset inspection and maintenance programme.
- Environment improvement plan and Environment Action Plan.
- Path to carbon neutrality by 2040.
- Waste management and habitat protection programmes.
- Science-based targets approved by the Science-based Targets Initiative.
- ISO14001 environmental management system in place.

Resource availability

Access to and availability of skilled resource resulting in an inability to deliver work programmes.

Mitigations:

- Mix of direct labour and contracted resource is used.
- Workforce renewal programmes in place to recruit and retain employees.
- Ongoing training and development builds internal capability.
- Employee engagement and health and well-being initiatives are in place.
- Diversity, equality and inclusion plan.

Efficiency and output performance

Failure to maintain cost and output performance competitiveness in the industry.

Mitigations:

- Robust business planning process.
- Financial controls in place including detailed review of actuals against budget, competitive tendering process, and capital expenditure approvals process.
- Monthly executive business performance review.
- Comprehensive "Efficient Output Delivery" programme.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

Financial risks

The exposure to interest rate, tax, liquidity and treasury risks.

Mitigations:

- Monitored by the Treasury department.
- The Group is financed by long-term borrowings at fixed rates has access to short-term borrowing facilities at floating rates of interest.
- As at 31 December 2022, 97% of the Group's long-term borrowings were at fixed rates and the average maturity for the long-term borrowings was 23 years.
- Financial covenant monitoring is in place.
- Regulatory adjustments control the effect of taxation changes.

Internal control

A strong internal control environment exists to support the financial reporting process, including regular reporting, a series of operational and financial policies, investigations undertaken by internal audit and a stringent process for ensuring the implementation of internal audit recommendations. In addition, the Group utilises comprehensive business planning procedures, regularly reviews KPIs to assess progress towards its goals, and has a strong internal audit function to provide independent scrutiny. Financial controls include centralised treasury operations and established procedures for the planning, approving and monitoring of major capital expenditure.

The RAB monitors the effectiveness of internal controls and reports on its findings to the board and Berkshire Hathaway Energy. As part of the statutory reporting process, the Group's external auditor reviews and tests a number of internal controls and reports their findings and recommendations for improvements to the board.

Controls which are applicable to financial decisions are governed via a schedule of delegations of authority which are approved by the board (and applies to the Northern Powergrid Group) for the purpose of enabling the senior management team to make decisions up to certain financial limits, above which point the decision making reverts to the directors. These limits reflect the board's level of risk appetite and are reviewed on an annual basis.

In accordance with Berkshire Hathaway Energy's requirements to comply with the Sarbanes-Oxley Act, the Group undertakes a quarterly risk control assessment confirming that the effectiveness of the system of internal controls have been reviewed during the year. A self-certification process is in place, in support of this review, whereby certain senior managers are required to confirm that the system of internal control in their area of the business is operating effectively. Consequently, the directors believe that a robust system of risk assessment and management is in place.

The Northern Powergrid Group does not have a specific human rights policy. However, in accordance with the Core Principles, it remains fully committed to operating ethically and responsibly and with fairness and integrity. This is implemented through its policies and procedures, which are applicable to all stakeholder groups and encompasses employees' health, safety and welfare, dealings with customers (particularly those who are vulnerable), the impact of the Northern Powergrid Group on the environment and the contribution to sustainability.

To ensure that the Northern Powergrid Group maintains the highest level of ethical standards in the conduct of its business, Berkshire Hathaway Energy's Code of Conduct has been adopted (See 'Employees'). The Northern Powergrid Group has robust procedures in place to meet the requirements of the Bribery Act 2010. Every employee must undertake training in respect of the Northern Powergrid Group's anti-corruption and anti-bribery policy each year.

Northern Electric plc

Strategic Report for the Year Ended 31 December 2022 (continued)

Section 172(1) statement

Decision-making at the Board

All matters which under the Company's governance arrangements are reserved for decision by the Directors are presented at Board meetings. Directors are briefed on any potential impacts and risks for customers, and other stakeholders and how they are to be managed. The Directors take these factors into account before making decisions, which together they believe are in the best interests of the Company and its member.

Long-term sustainability

As referenced throughout the Strategic Report, NPg Northeast's business model is to make sufficient profit in order to invest in the Network thereby, ensuring the integrity of the electricity supply for its customers. To achieve this objective, the Company and Group delivers its service to fulfil the needs of the stakeholders with whom it interacts and in doing so, ensures all business relationships are conducted in an open and transparent manner. Consequently, fostering business relationships is a prerequisite of the activity performed by the Group in the pursuit of its goals and the long-term sustainability of the Group is at the forefront of decision-making.

The Group's policy in respect of engaging with stakeholders is governed by the Core Principles and the Code of Conduct. The Core Principle of 'Regulatory Integrity' defines the Northern Powergrid Group's commitment to comply with all laws wherever it does business and the expectation that all employees (including directors) manage their activities in a manner that is compliant with all standards, regulations and corporate policies. In addition, the Code of Conduct requires adherence to the highest level of ethical conduct and fair dealings with all customers, suppliers and competitors.

Employees

As detailed in the 'Employee Commitment' section, the Group works hard to ensure the health and safety of employees and to provide them with opportunities for advancement alongside fair terms whilst remunerating appropriately. Activities undertaken by the board in the year included reviewing health and safety performance, monitoring key appointment changes, receiving regular updates on the Northern Powergrid Group's Diversity, Equity and Inclusion plan, reviewing the Northern Powergrid Group's gender pay gap report and approving the delegations of authority.

Customers

Customers, whether they are domestic or commercial, are the primary stakeholder group served by the Group and therefore the services offered are all tailored to provide a benefit or enhance an experience. During the year, the board of NPg Northeast regularly reviewed performance levels, closely monitored the response in respect of Storm Arwen, including compensation arrangements and engaged with the Chair of the CEG. Further detail of the Group's relationship with customers and the support programmes provided is discussed in 'Customer Service'.

Producers and suppliers

The Group works closely with its supply chain and has measures in place to ensure the treatment of all supplies is fair and equitable. Relations with suppliers is managed using a supplier registration system which supports a robust and transparent procurement process and ensures strict compliance with the prevention of slavery and human trafficking. As a consequence, the system allows the Group to make informed decisions which align with its values when awarding contracts. When considering suppliers, the board advocates prompt payment practices, which are reviewed regularly by the internal audit function, and the implementation of procedures to reduce the risk of modern slavery in supply chains - as set out in the Northern Powergrid Group's annual modern slavery statement.

Financial stakeholders

Financial information is routinely made available to financial stakeholders, including relationship banks and bondholders. Directors participate directly with stakeholders when entering into new financial arrangements. During the year, the board approved an interim dividend, the annual and interim accounts and the tax strategy.

Community and environment

Each Director is required to take all reasonable steps to minimise any detrimental impact the Group's operations may have on the environment (see 'Environmental Respect'). NPg Northeast also supports a range of charitable and community activities to help customers with fuel poverty and safety around electricity ('Community' section). During the year, NPg Northeast donated £6,954,879.52 to the Northern Powergrid Foundation and the directors routinely reviewed environmental performance and made decisions pursuant to Environmental Respect.

Regulator

NPg Northeast is in regular dialogue with Ofgem concerning new policy development and emerging risks or opportunities within the sector. As outlined in 'Regulatory Integrity', to meet its licence conditions, NPg Northeast and the directors provide regular reporting to Ofgem (including the annual regulatory certificates and Regulatory Accounts), contribute to various regulatory consultations and monitor regulatory compliance. Given the implications on NPg Northeast's long-term strategy, the relationship with Ofgem, the evolving ED2 framework, the transition to DSO were regular items on the board agenda throughout the year.

Northern Electric plc
Strategic Report for the Year Ended 31 December 2022 (continued)

Acting fairly as between the Company's owners

The Company has one class of ordinary shares which are all held by Northern Powergrid Limited, a company owned by Northern Powergrid UK Holdings. The Company also has one class of preference shares, further details of which can be found in Note 20.

Non-financial information statement

In accordance with Section 414CA(7) of the CA06, the directors have elected to set out the information required by Section 414CB (1) to (6) in the group annual report and audited consolidated financial statements of Northern Powergrid Holdings Company, a copy of which, will be published on the Northern Powergrid Group's corporate website.

Approved by the Board on 28 April 2023 and signed on its behalf by:

A P Jones
Director

Northern Electric plc

Directors' Report for the Year Ended 31 December 2022

The directors present their annual report and the audited consolidated financial statements for the year ended 31 December 2022.

Dividends

During the year, an interim dividend of £114.9 million was paid (2021: £26.0 million). The directors recommend that no final dividend be paid in respect of the year (2021: £nil).

The Group's dividend policy is that dividends will be paid only after having due regard to available distributable reserves, available liquid funds and the financial resources and facilities needed to enable the Company and Group to carry on its business for at least the next year. In addition, the level of dividends is set to maintain sufficient equity so as not to jeopardise the Company's and NPg Northeast's investment grade issuer credit ratings. These strict parameters align with the conditions set out in NPg Northeast's distribution licence and are considered carefully by the board so as to ensure that the payment of any dividend does not cause NPg Northeast to breach any licence obligations in the future.

Directors of the Company

The directors who held office during the year under review and to the date of signing this report were:

T H France (resigned 14 April 2022)
C D Haack (resigned 14 April 2022)
A P Jones (appointed 14 April 2022)
P A Jones (resigned 14 April 2022)
S J Lockwood (appointed 14 April 2022)
J N Reynolds

During the year, none of the directors had an interest in any contract which was material to the business of the Company or Group. During the year and up to the date of approval of the Directors' Report, an indemnity contained in the Company's (and each company within the Northern Powergrid Group's) Articles of Association was in force for the benefit of the directors of the Company and as directors of associated companies, which was a qualifying indemnity provision for the purposes of the Companies Act 2006.

Future developments and future outlook

The financial position of the Group, as at 31 December 2022, is shown in the consolidated statement of financial position. There have been no significant events since the year end and the directors intend that:

- NPg Northeast will continue to implement the Business Plan during the remainder of the ED1 period, before it transitions into the ED2 period, and by delivering the strategic objectives linked to the Core Principles, will develop its business by efficiently investing in the Network and improving the quality of supply and service provided to customers. IUS will develop its business by concentrating on its core skills of engineering contracting thereby delivering a high standard of service to its existing clients and pursuing opportunities to increase its portfolio of clients.
- NPg Metering will retain its focus on pursuing opportunities in the market for meter asset provision as the smart meter roll-out programme develops.

There are no plans to change the existing business model of the Company, or any of the companies within the Group.

Research and development

The Group supports a programme of research that is expected to contribute to higher standards of performance and a more cost-effective operation of its business. During the year, the Group invested £1.6 million (2021: £0.8 million) (Note 5 to the financial statements) in its research and development activities.

Northern Electric plc

Directors' Report for the Year Ended 31 December 2022 (continued)

Political donations

During the year, no contributions were made to political organisations (2021: £nil).

Financial instruments

Financial risk management

Details of financial risks are included in the Principal Risks and Uncertainties, found in the Strategic Report and in Note 29 to the financial statements.

Financial derivatives

As at 31 December 2022 the Group held one derivative financial instrument (2021: one) to mitigate the interest rate risk on a floating interest rate loan. More details on derivative financial instruments are available in Note 30 to the financial statements.

Stakeholder engagement and environmental disclosures

In accordance with Paragraphs 11 and 15 of Schedule 7 of the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008, details concerning the relationship and engagement with employees and those with whom the Company and Group does business, in addition to information concerning greenhouse gas emissions can be found in the Section 172 Statement and the Strategic Report (Environmental Respect and Employee Commitment).

Vote holder and issuer notification

There have been no disclosures to the Company under Disclosure and Transparency Rule 5 (Vote Holder and Issuer Notification Rules).

Vote holder and issuer notification

There have been no disclosures to the Company under Disclosure and Transparency Rule 5 (Vote Holder and Issuer Notification Rules).

Directors' biographies

Alex P Jones

Mr Jones joined the Northern Powergrid Group in January 2015 and became Finance Director in March 2022. He is a Chartered Accountant having completed his training with KPMG, spending seven years in their Restructuring practice. Prior to becoming Finance Director, Mr Jones was the Director of Performance and Planning, leading on the development of the Northern Powergrid Group's Business Plan. He has also spent time leading the Northern Powergrid Group's engineering and major projects operations teams.

Stephen J Lockwood

Appointed in April 2022, Mr Lockwood joined the Northern Powergrid Group in 1983 and became Group Financial Controller in 2016. Prior to this he held a number of finance roles in the Northern Powergrid Group. Mr Lockwood is a qualified Chartered Management Accountant and Chartered Tax Advisor.

John N Reynolds OBE

Mr. Reynolds was appointed in January 2011 as a director of Northern Powergrid Holdings Company and in October 2017 as Chairman of the audit committee and a director of the Company. Mr Reynolds is the Chief Executive Officer of Castle Water. He is a Fellow of the Institution of Engineering & Technology, a Fellow of the Energy Institute and is a former commission member of the Water Industry Commission for Scotland. Mr Reynolds chaired the Church of England Ethical Investment Advisory Group, and is a former council member of the Central Finance Board of the Methodist Church. He is the author of a number of books and articles on business ethics. Mr. Reynolds previously held senior management roles at HSBC and Houlihan Lokey.

Northern Electric plc

Directors' Report for the Year Ended 31 December 2022 (continued)

CORPORATE GOVERNANCE STATEMENT

In accordance with Disclosure and Transparency Rule (DTR) 7.2.9, the directors have elected to set out the information required by DTR 7.2.1 to DTR 7.2.7 R in a separate statement, a copy of which can be found on the Northern Powergrid Group's corporate website.

Audit committee

The board of Northern Powergrid Holdings Company has established an audit committee for the Northern Powergrid Group under delegated terms of reference which carries out the functions required by DTR 7.1.3 R.

Composition:

- J N Reynolds, non-executive Director (Chair)
- A P Jones, Finance Director (appointed 14 April 2022)
- M Knowles, independent member - Northern Powergrid Holdings Company
- S J Lockwood - Group Financial Controller (resigned 14 April 2022)

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

. Company law requires the directors to prepare financial statements for each financial year. Under that law the directors are required to prepare the group financial statements in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006 and International Financial Reporting Standards adopted pursuant to Regulation (EC) No 1606/2002 as it applies in the European Union. The financial statements also comply with International Financial Reporting Standards ("IFRSs") as issued by the International Accounting Standards Board ("IASB"). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and the Group and of the profit or loss of the Group and Company for that period.

In preparing these financial statements, International Accounting Standard 1 requires the directors to:

- Properly select and apply accounting policies;
- Present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- Provide additional disclosures when compliance with the specific requirements in IFRSs are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the Company's and the Group's financial position and financial performance; and
- Make an assessment of the Company's and the Group's ability to continue as a going concern.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's and the Group's transactions and disclose with reasonable accuracy at any time the financial position of the Company and the Group and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and the Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Group's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Directors' responsibility statement pursuant to DTR 4

Each of the directors as at the date of the annual reports and financial statements, whose names and functions are set out in the Directors Report confirms that, to the best of their knowledge:

- The financial statements, prepared in accordance with applicable UK law and in conformity with IFRS, give a true and fair view of the assets, liabilities, financial position and profit of the Company and the undertakings included in the consolidation taken as a whole;
- The Strategic Report includes a fair review of the development and performance of the business and the position of the Company and the undertakings included in the consolidation taken as a whole, together with a description of the principal risks and uncertainties it faces; and

Northern Electric plc

Directors' Report for the Year Ended 31 December 2022 (continued)

- The annual report and financial statements, taken as a whole, are fair, balanced and understandable and provide the information necessary for shareholders to assess the Company and Group's position and performance, business model and strategy.

Northern Electric plc

Directors' Report for the Year Ended 31 December 2022 (continued)

Going Concern

A review of the Group's business activities during the year, together with details regarding its future development, performance and position, its objectives, policies and processes for managing its capital, its financial risk management objectives and details of its exposures to trading risk, credit risk and liquidity risk are set out in the Strategic Report, the Report of the Directors and the appropriate notes to the financial statements.

The Northern Powergrid Group is financed both in its operating companies and in other entities within the Group, and companies may lend within the Group. For that reason, financial health is considered with reference to the Northern Powergrid Group.

When considering if to continue to adopt the going concern basis in preparing the annual report and financial statements, the directors have taken into account a number of factors, including the following:

- The Northern Powergrid Group's main subsidiaries, NPg Northeast and NPg Yorkshire are stable electricity distribution businesses operating an essential public service and are regulated by the Gas and Electricity Markets Authority ("GEMA"). In carrying out its functions, GEMA has a statutory duty under the Electricity Act 1989 to have regard to the need to secure that licence holders are able to finance the activities, which are the subject of obligations under Part 1 of the Electricity Act 1989 (including the obligations imposed by the electricity distribution licence) or by the Utilities Act 2000;
- The Northern Powergrid Group is profitable with strong underlying cash flows. The Northern Powergrid Group, NPg Northeast and NPg Yorkshire hold investment grade credit ratings;
- The Northern Powergrid Group is financed by long-term borrowings with an average maturity of 18 years and has access to short-term committed borrowing facilities of £242 million provided by Barclays Bank plc, Lloyds Bank plc, HSBC UK Bank plc and Royal Bank of Canada;
- The Northern Powergrid Group benefits from strong investment-grade credit ratings which allow access to a range of financing options including the capital markets. A successful bond issue by the Northern Powergrid Group in April 2022, demonstrates that the Northern Powergrid Group's bonds remain attractive to investors and there is an active market with strong appetite to invest;
- The Northern Powergrid Group has prepared forecasts which taking into account reasonable possible changes in trading performance, show that the Northern Powergrid Group has sufficient resources to settle its liabilities as they fall due for at least the 12 months from the date of these accounts. The directors have had discussions with the bank who have indicated that they would continue to provide the short term facilities to the Northern Powergrid Group for the foreseeable future on acceptable terms; and
- Consideration was also given to the obligations contained in NPg Northeast's and Northern Powergrid (Yorkshire) plc's licences to provide Ofgem with annual certificates, confirming that the directors have a reasonable expectation that the Group will have sufficient financial and operational resources available for the continuation of business for a period of at least 12 months. The board determined any material variations to the assumptions used when providing those certificates were unlikely within the eight-year period or beyond.

Consequently, after making enquiries, the directors have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. In addition, a letter of support was received from Northern Powergrid Holdings Company. Accordingly, they continue to adopt the going concern basis in preparing the annual report and financial statements.

Northern Electric plc
Directors' Report for the Year Ended 31 December 2022 (continued)

Disclosure of information to the auditor

Each director has taken steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the group's auditor is aware of that information. The directors confirm that there is no relevant information that they know of and of which they know the auditor is unaware.

Reappointment of auditor

A resolution to re-appoint Deloitte LLP as the Company's auditor and authorise the directors to determine their remuneration will be proposed at the annual general meeting.

Approved by the Board on 28 April 2023 and signed on its behalf by:

A handwritten signature in black ink, appearing to be 'A P Jones', written over a horizontal line.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc

Report on the audit of the financial statements

Opinion

In our opinion:

- the financial statements of Northern Electric plc (the 'parent company') and its subsidiaries (the 'group') give a true and fair view of the state of the group's and of the parent company's affairs as at 31 December 2022 and of the group's profit for the year then ended;
- the group financial statements have been properly prepared in accordance with United Kingdom adopted international accounting standards and International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB);
- the parent company financial statements have been properly prepared in accordance with United Kingdom adopted international accounting standards and as applied in accordance with the provisions of the Companies Act 2006; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- the consolidated income statement;
- the consolidated statement of comprehensive income;
- the consolidated and parent statement of financial position;
- the consolidated and parent company statements of changes in equity;
- the consolidated and parent company statement of cash flows; and
- the related notes 1 to 34.

The financial reporting framework that has been applied in the preparation of the group financial statements is applicable law, United Kingdom adopted international accounting standards and IFRSs as issued by the IASB. The financial reporting framework that has been applied in the preparation of the parent company financial statements is applicable law and United Kingdom adopted international accounting standards and as applied in accordance with the provisions of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the group and the parent company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard as applied to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. The non-audit services provided to the group and parent company for the year are disclosed in note 9 to the financial statements. We confirm that we have not provided any non-audit services prohibited by the FRC's Ethical Standard to the group or the parent company.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc (continued)

Summary of our audit approach

Key audit matters

The key audit matters that we identified in the current year were:

- Accounting for capital spend - overhead allocation model and Storm Arwen costs; and
- Valuation of defined benefit obligations.

Within this report, key audit matters are identified as follows:

- Newly identified
- Increased level of risk
- Similar level of risk
- Decreased level of risk

Materiality

The materiality that we used for the group financial statements was £8.0m which was determined on the basis of income before tax.

Scoping

Our scope provides full scope audit coverage of 100% of the group's revenue, 99% of profit before tax as well as 100% of net assets. Audit work to respond to the risks of material misstatement was performed directly by the audit engagement team.

Significant changes in our approach

There was no significant change in our approach except for adopting a controls reliance approach for the testing of revenue for the first time in the current year.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the group's and parent company's ability to continue to adopt the going concern basis of accounting included:

- assessing financing facilities including nature of facilities, repayment terms and covenants;
- evaluating the linkage to business model and medium-term risks;
- assessing assumptions used in the forecasts, including forecasted information relating to next price control review RIIO-ED2;
- calculating the amount of headroom in the forecasts, specifically relating to cash and covenants on borrowings;
- performing sensitivity analysis; and
- evaluating sophistication of the model used to prepare the forecasts, testing of clerical accuracy of those forecasts and our assessment of the historical accuracy of forecasts prepared by management.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group's and parent company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team.

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc (continued)

Accounting for capital spend - overhead allocation model and Storm Arwen costs

Key audit matter description

Total additions to property, plant and equipment in the year in, within the main trading subsidiary of the group, Northern Powergrid (Northeast) plc were £163m (2021: £191m) with the majority of the additions to the Company's electricity distribution system, as disclosed in Note 11 to the financial statements. These additions include £45m capitalised overheads (2021: £38m). A portion of overheads are capitalised to the extent that it is probable that future economic benefits associated with the asset will flow to the Company and the cost of the item can be measured reliably in accordance with IAS 16 and the Company's policies. The allocation of overheads to capital results from analysis of the costs incurred and their relevant cost drivers, this is reviewed annually.

The judgements around amounts capitalised associated with Storm Arwen, and the calculation of capitalised overheads remains an area at risk of potential bias due to the level of subjectivity in the percentage of overheads capitalised, both create a potential fraud risk. In particular, the key risk that management's judgement in the percentage amounts capitalised are not reflective of the capital spend and as such PPE could be material misstated as a consequence. This is as disclosed in Note 2, including the note relating to critical judgements in applying accounting policies.

How the scope of our audit responded to the key audit matter

- We have obtained an understanding of relevant controls surrounding accounting for capital spend;
- We have analysed the capital spend and the overhead allocation percentages in the year and compared these to prior years to identify any unusual and relevant fluctuations. We have also analysed current policies in place and assessed their suitability in line with IAS 16, along with reviewing the approach management takes towards assessing capitalised overheads and any change introduced in the current year; and
- We have performed testing of the total overheads including within the allocation model which are subsequently capitalised based on management's assessment of percentage allocation.

Key observations

Based on the work performed, and the evidence obtained, we have concluded that management's overhead capitalisation judgement is reasonable, with policies applied being appropriate and consistent with the requirements of IAS 16.

Valuation of defined benefit obligations

Key audit matter description

The group operates a defined pension scheme, for which key judgement relate to the determination of the present value of the defined benefit obligation. Within this, we also consider consistency with International Accounting Standard 19: Employee benefits (IAS 19). In accordance with management's actuary, the present value of the funding surplus is £151.5m (2021: £262.2m), with an underlying obligation of £965.5m (2021: £1,480.4m). The present value of the defined benefit obligation is derived and is subject to judgement in the assumption setting. Due to the continued settlements in the year for the scheme, there continues to be an additional risk around the valuation modelling of each settlement and the impact to the actuarial assumptions due to the change in the profile of the membership of the scheme. The accounting policy and disclosure is found in note 25 to the financial statement.

How the scope of our audit responded to the key audit matter

- We have obtained an understanding of the relevant controls involved in the review of the actuary report at the year-end;
- We have obtained and tested the underlying data and assumptions utilised by management's actuary in the calculation of the pension obligations;
- We challenged the settlement model utilised and tested the underlying data used in the model to derecognise the obligations; and
- We considered the estimates of management's actuary and challenged management's assumptions and judgements by comparing the assumptions and results to benchmarked figures. We involved our internal specialists in performing this work.

Key observations

Based on the work performed above, and the evidence obtained, we conclude that each of the relevant assumptions used by management to estimate the defined benefit obligation are consistent with the requirement of IAS 19. We have also concluded that these assumptions are within a reasonable range when compared to comparable schemes and our internal benchmarks.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc (continued)

Our application of materiality

Materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Group financial statements

Materiality

£8.0m (2021: £7.9m)

Basis for determining materiality

5% of income before tax (2021: 5% of income before tax)

Rationale for the benchmark applied

The group contains large trading entities. The industry revenue is highly regulated, therefore, there is a focus on income before tax.

Parent company financial statements

Materiality

£3.8m (2021: £4.2m)

Basis for determining materiality

Parent company materiality equates to 3% of net assets (2021: 3%), which is capped at 55.1% of group materiality (2021: 53.3%).

Rationale for the benchmark applied

Total equity shows how much of the value of shareholdings are in the company and as such investor value. The company is not trading and as such incurs no revenue.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc (continued)

Performance materiality

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole.

Group financial statements

Performance materiality

60% (2021: 60%) of group materiality

Parent company financial statements

Performance materiality

60% (2021: 60%) of parent company materiality

Basis and rationale for determining

In determining performance materiality, we have considered the following:

- our risk assessment, including our assessment of the group's overall control environment and we considered it appropriate to rely on controls on the revenue cycle; and
- the volume of uncorrected misstatements in the prior period and control deficiencies identified

Error reporting threshold

We agreed with the Board of Directors that we would report all audit differences in excess of £0.4m (2021: £0.4m), as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Board of Directors on disclosure matters that we identified when assessing the overall presentation of the financial statements.

An overview of the scope of our audit

Identification and scoping of components

Our group audit was scoped by obtaining an understanding of the group and its environment, including internal controls, and assessing the risks of material misstatement at the group level. The operations of the group are mainly focused on the United Kingdom in the electricity distribution business, with some overseas assets in the oil and gas industry.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc (continued)

The focus of our audit work was on the main regulated business, Northern Powergrid (Northeast) plc, with work performed at a combination of the group's offices in the North East and Yorkshire regions, and we have audited the significant sub consolidations in the group. Other sizeable companies within the group include Integrated Utility Services Limited, which provides contracting and maintenance services to the electricity, rail and water industries, and Northern Powergrid Metering Limited which leases smart meters to energy providers. Our audit scope provides full scope audit coverage 94% of the group's revenue (2021: 100%), 94% of profit before tax (2021: 99%) as well as 99% of net assets (2021: 100%).

A component materiality was used to perform the audit work for all component entities for FY22 this ranged from £0.3m to £6.4m (2021: £0.3m to £6.3m). Component materiality is used to reduce to an appropriately low level of probability that the aggregate of uncorrected and undetected misstatements in the group financial statements exceeds materiality for the group financial statements as a whole.

At the group level, we have tested the consolidation process and carried out analytical procedures to confirm our conclusion that there was no risk of material misstatement of the aggregated financial information of the remaining components but subject to audit or audit of specific balances.

Audit work to respond to the risks of material misstatement was performed directly by the group audit engagement team. There have been material changes in scope from prior year except for adopting a no reliance on controls approach for the testing of revenue.

Our consideration of the control environment

We have involved our IT specialists to assess relevant controls over the Company's IT landscape which contains a number of IT systems and tools used to support business processes. These include controls within the Oracle and Durabill systems integral to relevant business cycles. However, we identified control deficiencies and reported these to the Board of Directors. We evaluated the impact of these deficiencies on our audit and revised our risk assessment as appropriate. The Directors discuss their assessment of the control environment on p. 16-19 of the Annual Report.

We have evaluated the design and implementation of key manual controls of key business cycles through a combination of tests of inquiry, inspection, observation and re-performance.

Our consideration of climate related risks

In planning our audit, we have considered the potential impact of climate change on the Group's business and its financial statements.

The Group continues to develop its assessment of the potential impacts of environmental, social and governance ("ESG") related risks, including climate change, as outlined on page 11.

As a part of our audit, we have obtained management's climate-related risk assessment and held discussions with the Group ESG Manager to understand the process of identifying climate-related risks, the determination of mitigating actions and the impact on the Group's financial statements

We performed our own qualitative risk assessment of the potential impact of climate change on the Group's account balances and classes of transactions and have read the annual report to consider whether they are materially consistent with the financial statements and our knowledge obtained in the audit.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated.

If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc (continued)

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc (continued)

Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance including the design of the group's remuneration policies, key drivers for directors' remuneration, bonus levels and performance targets;
- results of our enquiries of management, internal audit and the Board of Directors about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the group's documentation of their policies and procedures relating to:
 - o identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
 - o detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud; and
 - o the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations.
- the matters discussed among the audit engagement team and relevant internal specialists, including tax, valuations, pensions, IT, actuarial and industry specialists regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the following areas: Accounting for capital spend - overhead allocation model and Storm Arwen costs (given that this involves key and complex judgement by management) and valuation of defined benefit obligations. In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the group operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the UK Companies Act, Listing Rules, pensions legislation, tax legislation.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the group's ability to operate or to avoid a material penalty. These included the group's operating licence regulated by the Gas and Electricity Markets Authority (GEMA).

Audit response to risks identified

As a result of performing the above, we identified accounting for capital spend - overhead allocation model and Storm Arwen costs, and valuation of defined benefit obligations as key audit matters related to the potential risk of fraud. The key audit matters section of our report explains the matters in more detail and also describes the specific procedures we performed in response to those key audit matter.

In addition to the above, our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management, the Board of Directors and legal counsel concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance, reviewing internal audit reports and reviewing correspondence with HMRC and Ofgem; and
- in addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business. We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Northern Electric plc

Independent Auditor's Report to the Members of Northern Electric plc (continued)

Report on other legal and regulatory requirements

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the group and the parent company and their environment obtained in the course of the audit, we have not identified any material misstatements in the strategic report or the directors' report.

Matters on which we are required to report by exception

Adequacy of explanations received and accounting records

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns.

We have nothing to report in respect of these matters.

Directors' remuneration

Under the Companies Act 2006 we are also required to report if in our opinion certain disclosures of directors' remuneration have not been made.

We have nothing to report in respect of this matter.

Other matters which we are required to address

Auditor tenure

Following the recommendation of the Board of Directors, we were appointed by the Board of Northern Powergrid Holdings Company in 1998 to audit the financial statements for the year ending 31 December 1998 and subsequent financial periods. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 24 years, covering the years ending 31 December 1998 to 31 December 2021.

Consistency of the audit report with the additional report to the Board of Directors

Our audit opinion is consistent with the additional report to the Board of Directors we are required to provide in accordance with ISAs (UK).

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Approved by the Board on 28 April 2023 and signed on its behalf by:

A P Jones
Director

Northern Electric plc
(Registration number: 02366942)
Company Statement of Financial Position as at 31 December 2022 (continued)

The Directors have taken the exemption offered under section 408 of the Act from publishing a separate statement of profit or loss. The Company reported a profit for the financial year ended 31 December 2022 of £108.9 million (2021: £19.5 million).

Consolidated / Company Statement of Cash Flows

Yorkshire Electricity Group plc, a Northern Powergrid Group company, acting on behalf of other group companies was authorised to settle various liabilities against the relevant intercompany accounts. The Group / Company has disclosed the underlying cash flows as operating, investing or financing according to their nature on the basis that, as a principal, the entity has the right to the cash inflows and/or the obligation to settle the liability and ensure clarity of disclosure of the cash costs of the business.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022

1 General information

The company is a public company limited by share capital, incorporated in England and Wales and domiciled in the United Kingdom and is part of the Northern Powergrid Holdings Company and its subsidiaries group of companies (the "Northern Powergrid Group").

The address of its registered office is:
Lloyds Court, 78 Grey Street, Newcastle upon Tyne, Tyne and Wear, NE1 6AF, United Kingdom.

2 Accounting policies

Statement of compliance

The Group financial statements have been prepared in accordance with International Financial Reporting Standards and its interpretations adopted by the IASB ("adopted IFRS's").

Summary of significant accounting policies and key accounting estimates

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of preparation

The financial statements have been prepared in accordance with adopted IFRSs and under the historical cost convention as modified by financial instruments recognised at fair value.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies.

The nature of the Company's business model, strategic objectives, operations and activities are set out in the Strategic Report.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Going Concern

A review of the Group's business activities during the year, together with details regarding its future development, performance and position, its objectives, policies and processes for managing its capital, its financial risk management objectives and details of its exposures to trading risk, credit risk and liquidity risk are set out in the Strategic Report, the Directors' Report and the appropriate notes to the financial statements.

The Northern Powergrid Group is financed both in its operating companies and in other entities within the Group, and companies may lend within the Group. For that reason, financial health is considered with reference to the Northern Powergrid Group.

When considering if to continue to adopt the going concern basis in preparing the annual report and financial statements, the directors have taken into account a number of factors, including the following:

- The Northern Powergrid Group's main subsidiaries, NPg Northeast and NPg Yorkshire, are stable electricity distribution businesses operating an essential public service and are regulated by the Gas and Electricity Markets Authority ("GEMA"). In carrying out its functions, GEMA has a statutory duty under the Electricity Act 1989 to have regard to the need to secure that licence holders are able to finance the activities, which are the subject of obligations under Part 1 of the Electricity Act 1989 (including the obligations imposed by the electricity distribution licence) or by the Utilities Act 2000;
- The Northern Powergrid Group is profitable with strong underlying cash flows. The Northern Powergrid Group, NPg Northeast and NPg Yorkshire hold investment grade credit ratings;
- The Northern Powergrid Group is financed by long-term borrowings with an average maturity of 18 years and has access to short-term committed borrowing facilities of £242 million provided by Barclays Banks plc, Lloyds Bank plc, HSBC UK Banks plc and Royal Bank of Canada;
- The Northern Powergrid Group benefits from strong investment-grade credit ratings which allow access to a range of financing options including the capital markets. A successful bond issue by the Northern Powergrid Group in April 2022, demonstrates that the Northern Powergrid Group's bonds remain attractive to investors and there is an active market with strong appetite to invest;
- The Northern Powergrid Group has prepared forecasts which taking into account reasonable possible changes in trading performance, show that the Northern Powergrid Group has sufficient resources to settle its liabilities as they fall due for at least the 12 months from the date of these accounts. The directors have had discussions with the bank who have indicated that they would continue to provide the short-term facilities to the Northern Powergrid Group for the foreseeable future on acceptable terms; and
- Consideration was also given to the obligations contained in NPg Northeast's and NPG Yorkshire's licences to provide Ofgem with annual certificates, confirming that the directors have a reasonable expectation that the Group will have sufficient financial and operational resources available for the continuation of business for a period of at least 12 months. The board determined any material variations to the assumptions used when providing those certificates were unlikely within the eight-year period or beyond.

Consequently, after making enquiries, the directors have a reasonable expectation that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future. In addition, a letter of support was received from Northern Powergrid Holdings Company. Accordingly, they continue to adopt the going concern basis in preparing the annual report and financial statements.

Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations, that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on amounts recognised in the consolidated financial statements:

- The split of operating and capital expenditure and the allocation of overheads to property, plant and equipment: The allocation of overheads to capital is derived from a detailed analysis of the costs and their cost drivers which is reviewed on annual basis. The percentage allocation of overheads across the workstream categories are obtained from section managers who are asked to provide reasoning and supporting evidence for the allocation. Finance then undertake a financial impact assessment review and the rationale to ensure it complies with IFRS. The amount of overheads capitalised in the year was £45.0 million (2021: £38.3 million), this was an increase from 53.2% to 54.3%.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Key sources of estimation uncertainty

The following are the key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

- Assumptions used when evaluating long-term pension plans - these assumptions and their possible impacts are disclosed in Note 25.

Changes in accounting policy

New standards and amendments

Effective for periods beginning on or after 1 January 2022

- Amendments to IFRS 3: Reference to the Conceptual Framework
- Amendments to IAS 16: Property, Plant & Equipment - Proceeds before Intended Use
- Amendments to IAS 37: Onerous Contracts - Cost of Fulfilling a Contract
- Annual Improvements to IFRS Standards 2018-2020

These amendments did not have a material impact on the financial statements.

The other amendments have had no material impact on the financial statements including the comparatives.

The Directors have considered new accounting standards issued that are not yet applicable and have noted no material changes are likely to arise.

Leases

The Group applies IFRS 16 to all leases (except as noted below) which include buildings, Land and fleet vehicles. The right-of-use assets are initially measured at the amount of the lease liability plus any initial direct costs incurred by the lessee. Subsequently, the assets are measured under the fair value method. The corresponding lease liability is initially measured at present value of all lease payments over the lease term and can be restated if the terms or other criteria of the contract change. These values can be found in the Statement of Financial Position.

The Group has taken practical expedients as per below:

- For short-term leases (lease term of 12 months or less) and leases of low-value assets (which includes personal computers, small items of office furniture and telephones), the Company has opted to recognise a lease expense on a straight-line basis as permitted by IFRS 16. This expense is presented within 'administrative expenses' in the Statement of Profit or Loss.
- Applies single discount rate to a portfolio of leases;
- Uses hindsight to determine the lease term when contract contains options to extend or terminate the lease; and
- Adjusts right of use asset by provision for onerous leases as an alternative to performing an impairment review.

The weighted average lessee's incremental borrowing rate applied to determine the present value of the lease liabilities during the current period was 2.33% (2021: 1.753%).

The Group recognises depreciation of right-of-use assets (within administration expenses) and interest on lease liabilities (within finance costs) in the Statement of Profit and Loss. Within the Statement of cash flow, the Company separates the total amount of cash paid between the principal portion and the interest, both of which are presented within financing activities.

Right-of-use assets are depreciated over the shorter of the useful life of the asset or the lease term. For information regarding the depreciation charge per class of asset and carrying value, please refer to Note 12 Right of use assets.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Revenue recognition

Recognition

The Group earns revenue from the provision of services relating to revenue from a contract to provide services is recognised by the following means:

- Distribution use of system income is recognised on a per unit (volumetric i.e. kWh and capacity (kVA)) and fixed (per 'customer' per day) basis;
- Customer contributions for connections are amortised over the life of the corresponding asset;
- Contracting revenue is recognised in line with expenditure;
- Meter asset provision income is accounted for under lease accounting;
- Intercompany recharges for services provided are based on costs incurred; and
- Other revenue includes assessment and design fees and disconnections from the network and are recognised by reference to the proportion of total costs of providing the service.

This revenue is recognised in the accounting period when the services are rendered at an amount that reflects the consideration to which the entity expects to be entitled in exchange for fulfilling its performance obligations to customers.

The principles in IFRS are applied to revenue recognition criteria using the following 5 step model:

1. Identify the contracts with the customer
2. Identify the performance obligations in the contract
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations in the contract
5. Recognise revenue when or as the entity satisfies its performance obligations

Fee arrangements

Below are details of fee arrangements and how these are measured and recognised, for revenue from the provision of services:

- For regulated use of system income the revenue for the service is recognised on the basis of agreed charging methodologies which is recognised on a per unit (volumetric i.e. kWh and capacity (kVA)) and fixed (per 'customer' per day) basis.
- For fixed price for contracted service revenue is recognised based on the stage of completion and performance obligations met for actual services provided as a proportion of the total fixed fee agreed in the contract.
- For stage payment on long-term contracts revenue is recognised by reference to stage of manufacture at the year end date using contractual rates specified in the contract. Revenue on materials is measured at the actual amount of the material used on the contract at the price specified in the contract.

The performance obligations involved in engineering contracting work are accounted for as follows:

- Where the outcome of a contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion.
- Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.
- Where the outcome of a contract cannot be estimated reliably, contract revenue is recognised to the extent of the costs incurred where it is probable they will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

- When contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is shown as amounts due from customers for contract work. For contracts where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is shown as the amounts due to customers for contract work. Amounts received before the related work is performed are included in the consolidated statement of financial position, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the consolidated statement of financial position under trade and other receivables.

Other performance obligations include but are not limited to:

- Provision of vehicles over a specified period accounted for under lease accounting; and
- Passage of milestones and completion of installation of equipment for engineering contracting.

Contract modifications

The Group's contracts are often amended for changes in contract specifications and requirements. Contract modification exists when the amendment either creates new or changes the existing enforceable rights and obligations. The effect of a contract modification on the transaction price and the Group's measure of progress for the performance obligation to which it relates, is recognised as an adjustment to revenue in one of the following ways:

- a. Prospectively as an additional separate contract;
- b. Prospectively as a termination of the existing contract and creation of a new contract;
- c. As part of the original contract using a cumulative catch up; or
- d. As a combination of b) and c).

The facts and circumstances of any contract modification are considered individually as the types of modifications will vary contract by contract and may result in different accounting outcomes. Judgement is applied in relation to the accounting for such modifications where the final terms or legal contracts have not been agreed prior to the period end as management need to determine if a modification has been approved and if it either creates new or changes existing enforceable rights and obligations of the parties. Depending upon the outcome of such negotiations, the timing and amount of revenue recognised may be different in the relevant accounting periods. Modification and amendments to contracts are undertaken via an agreed formal process. For example, if a change in scope has been approved but the corresponding change in price is still being negotiated, management use their judgement to estimate the change to the total transaction price.

Investments in associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have the rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of associates or joint ventures are incorporated in these consolidated financial statements using the equity method of accounting except when classified as held for sale. Investments in associates or joint venture entities are initially recognised at cost and adjusted thereafter to recognise the Group's share of profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture, the Group discontinues recognising its share of future losses.

An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture. On acquisition of the investment in an associate or a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

Fixed asset investments are stated at cost less provision or amounts written off for impairment in value.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Investments in subsidiaries

Investments in subsidiaries are accounted for at cost less impairment.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and call deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

Trade receivables

Trade receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognised initially at the transaction price. They are subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for the impairment of trade receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the average cost method.

The cost of finished goods and work in progress comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. At each reporting date, inventories are assessed for impairment. If inventory is impaired, the carrying amount is reduced to its selling price less costs to complete and sell; the impairment loss is recognised immediately in profit or loss.

Trade payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognised initially at the transaction price and subsequently measured at amortised cost using the effective interest method.

Borrowings

All borrowings are initially recorded at the amount of proceeds received, net of transaction costs. Borrowings are subsequently carried at amortised cost, with the difference between the proceeds, net of transaction costs, and the amount due on redemption being recognised as a charge to the income statement over the period of the relevant borrowing.

Interest expense is recognised on the basis of the effective interest method and is included in finance costs.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the directors' best estimate of the expenditure required to settle the obligation at the reporting date and are discounted to present value where the effect is material.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Impairment of non-financial assets

At the balance sheet date, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

An intangible asset with an indefinite useful life is tested for impairment at least annually and whenever there is an indication that the asset may be impaired.

Where the recoverable amount is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Share capital

Ordinary shares are classified as equity. Equity instruments are measured at the fair value of the cash or other resources received or receivable, net of the direct costs of issuing the equity instruments. If payment is deferred and the time value of money is material, the initial measurement is on a present value basis.

Dividends

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividends are approved by the Company's shareholders.

Tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the Group operates and generates taxable income.

Deferred income tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements and on unused tax losses or tax credits in the Group. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the reporting date.

The carrying amount of deferred tax assets are reviewed at each reporting date and a valuation allowance is set up against deferred tax assets so that the net carrying amount equals the highest amount that is more likely than not to be recovered based on current or future taxable profit.

Amortisation

Amortisation is provided on intangible assets so as to write off the cost, less any estimated residual value, over their expected useful economic life as follows:

Asset class	Amortisation method and rate
Software development	up to 10 years

Amortisation of intangible assets is performed on a straight-line basis over the asset's expected economic useful life.

Basis of consolidation

The Group financial statements consolidate the financial statements of the Company and its subsidiary undertakings drawn up to 31 December 2022.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

A subsidiary is an entity controlled by the Company. Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate. Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Group.

The purchase method of accounting is used to account for business combinations that result in the acquisition of subsidiaries by the Group. The cost of a business combination is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the business combination. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. Any excess of the cost of the business combination over the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities recognised is recorded as goodwill.

Inter-company transactions, balances and unrealised gains on transactions between the Company and its subsidiaries, which are related parties, are eliminated in full.

Intra-group losses are also eliminated but may indicate an impairment that requires recognition in the consolidated financial statements.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group. Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the Group's equity therein. Non-controlling interests consist of the amount of those interests at the date of the original business combination and the non-controlling shareholder's share of changes in equity since the date of the combination. Total comprehensive income is attributed to non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Financial instruments

Initial recognition

Financial assets and financial liabilities comprise all assets and liabilities reflected in the statement of financial position, although excluding property, plant and equipment, investment properties, intangible assets, deferred tax assets, prepayments, deferred tax liabilities and employee benefits plan.

The Group recognises financial assets and financial liabilities in the statement of financial position when, and only when, the Group becomes party to the contractual provisions of the financial instrument.

Financial assets are initially recognised at fair value. Financial liabilities are initially recognised at fair value, representing the proceeds received net of premiums, discounts and transaction costs that are directly attributable to the financial liability.

All regular way purchases and sales of financial assets and financial liabilities classified as fair value through profit or loss ("FVTPL") are recognised on the trade date, i.e. the date on which the Group commits to purchase or sell the financial assets or financial liabilities. All regular way purchases and sales of other financial assets and financial liabilities are recognised on the settlement date, i.e. the date on which the asset or liability is received from or delivered to the counterparty. Regular way purchases or sales are purchases or sales of financial assets that require delivery within the timeframe generally established by regulation or convention in the marketplace.

Subsequent to initial measurement, financial assets and financial liabilities are measured at either amortised cost or fair value.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Classification and measurement

Financial instruments are classified at inception into one of the following categories, which then determine the subsequent measurement methodology:

Financial assets are classified into one of the following three categories:

- financial assets at amortised cost;
- financial assets at fair value through other comprehensive income (FVTOCI); or
- financial assets at fair value through the profit or loss (FVTPL).

Financial liabilities are classified into one of the following two categories:

- financial liabilities at amortised cost; or
- financial liabilities at fair value through the profit or loss (FVTPL).

The classification and the basis for measurement are subject to the Group's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets, as detailed below:

Financial assets at amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the assets are held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

If either of the above two criteria is not met, the financial assets are classified and measured at fair value through the profit or loss (FVTPL).

If a financial asset meets the amortised cost criteria, the Group may choose to designate the financial asset at FVTPL. Such an election is irrevocable and applicable only if the FVTPL classification significantly reduces a measurement or recognition inconsistency.

Financial assets at fair value through other comprehensive income

A financial asset is measured at FVTOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investments that is not held for trading, the Group may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis.

If an equity investment is designated as FVTOCI, all gains and losses, except for dividend income, are recognised in other comprehensive income and are not subsequently included in the statement of income.

Financial assets at fair value through the profit or loss

Financial assets not otherwise classified above are classified and measured as FVTPL.

Financial liabilities at amortised cost

All financial liabilities, other than those classified as financial liabilities at FVTPL, are measured at amortised cost using the effective interest rate method.

Financial liabilities at fair value through the profit or loss

Financial liabilities not measured at amortised cost are classified and measured at FVTPL. This classification includes derivative liabilities.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Derecognition

Financial assets

The Group derecognises a financial asset when:

- the contractual rights to the cash flows from the financial asset expire;
- it transfers the right to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred; or
- the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset and the sum of the consideration received is recognised as a gain or loss in the profit or loss.

Any cumulative gain or loss recognised in OCI in respect of equity investment securities designated as FVTOCI is not recognised in profit or loss on derecognition of such securities. Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Group is recognised as a separate asset or liability.

The Group enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of risks and rewards of the transferred assets or a portion of them. In such cases, the transferred assets are not derecognised.

When the Group derecognises transferred financial assets in their entirety, but has continuing involvement in them then the entity should disclose for each type of continuing involvement at the reporting date:

- (a) The carrying amount of the assets and liabilities that are recognised in the entity's statement of financial position and represent the entity's continuing involvement in the derecognised financial assets, and the line items in which those assets and liabilities are recognised;
- (b) The fair value of the assets and liabilities that represent the entity's continuing involvement in the derecognised financial assets;
- (c) The amount that best represents the entity's maximum exposure to loss from its continuing involvement in the derecognised financial assets, and how the maximum exposure to loss is determined; and
- (d) The undiscounted cash outflows that would or may be required to repurchase the derecognised financial assets or other amounts payable to the transferee for the transferred assets.

Financial liabilities

The Group derecognises a financial liability when its contractual obligations are discharged, cancelled, or expire.

Modification of financial assets and financial liabilities

Financial assets

If the terms of a financial asset are modified, the Group evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to the cash flows from the original financial asset are deemed to expire. In this case the original financial asset is derecognised and a new financial asset is recognised at either amortised cost or fair value.

If the cash flows are not substantially different, then the modification does not result in derecognition of the financial asset. In this case, the Group recalculates the gross carrying amount of the financial asset and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in the statement of income.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Financial liabilities

If the terms of a financial liabilities are modified, the Group evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual obligations from the cash flows from the original financial liabilities are deemed to expire. In this case the original financial liabilities are derecognised and new financial liabilities are recognised at either amortised cost or fair value.

If the cash flows are not substantially different, then the modification does not result in derecognition of the financial liabilities. In this case, the Group recalculates the gross carrying amount of the financial liabilities and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in the statement of income.

Impairment of financial assets

Measurement of Expected Credit Losses

The Group recognises loss allowances for expected credit losses (ECL) on financial instruments that are not measured at FVTPL, namely:

- Financial assets that are debt instruments;
- Accounts and other receivables;
- Financial guarantee contracts issued; and
- Loan commitments issued.

The Group classifies its financial instruments into stage 1, stage 2 and stage 3, based on the applied impairment methodology, as described below:

Stage 1: for financial instruments where there has not been a significant increase in credit risk since initial recognition and that are not credit-impaired on origination, the Group recognises an allowance based on the 12-month ECL.

Stage 2: for financial instruments where there has been a significant increase in credit risk since initial recognition but they are not credit-impaired, the Group recognises an allowance for the lifetime ECL.

Stage 3: for credit-impaired financial instruments, the Group recognises the lifetime ECL.

The Group measures loss allowances at an amount equal to the lifetime ECL, except for the following, for which they are measured as a 12-month ECL:

- debt securities that are determined to have a low credit risk (equivalent to investment grade rating) at the reporting date; and
- other financial instruments on which the credit risk has not increased significantly since their initial recognition.

The Group considers a debt security to have low credit risk when their credit risk rating is equivalent to the globally understood definition of 'investment grade'.

A 12-month ECL is the portion of the ECL that results from default events on a financial instrument that are probable within 12 months from the reporting date.

Provisions for credit-impairment are recognised in the statement of income and are reflected in accumulated provision balances against each relevant financial instruments balance.

Evidence that the financial asset is credit-impaired include the following;

- Significant financial difficulties of the borrower or issuer;
- A breach of contract such as default or past due event;
- The restructuring of the loan or advance by the Group on terms that the Group would not consider otherwise;
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- The disappearance of an active market for the security because of financial difficulties;
- There is other observable data relating to a Group of assets such as adverse changes in the payment status of borrowers or issuers in the Group, or economic conditions that correlate with defaults in the Group.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

For trade receivables, the Group applies the simplified approach, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

To measure the expected credit losses, trade receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due. The contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets.

The expected loss rates are based on the payment profiles of sales over a period of 36 months before 31 December 2021 and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Group has identified the GDP and the unemployment rate of the countries in which it sells its goods and services to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

Derivative financial instruments

Derivative financial instruments are contracts, the value of which is derived from one or more underlying financial instruments or indices, and include futures, forwards, swaps and options in the interest rate, foreign exchange, equity and credit markets.

Derivative financial instruments are recognised in the statement of financial position at fair value. Fair values are derived from prevailing market prices, discounted cash flow models or option pricing models as appropriate.

In statement of financial position, derivative financial instruments with positive fair values (unrealised gains) are included as assets and derivative financial instruments with negative fair values (unrealised losses) are included as liabilities.

The changes in the fair values of derivative financial instruments entered into for trading purposes are included in trading income.

Hedge accounting

Derivatives held for risk management purposes include all derivative assets and liabilities that are not classified as trading assets and liabilities.

The Group designates certain derivatives held for risk management as well as certain non-derivative financial instruments as hedging instruments in qualifying hedging relationships. On initial designation of the hedge, the Group formally documents the relationship between the hedging instruments and hedge items, including the risk management objective and strategy in undertaking the hedge, together with the method that will be used to assess the effectiveness of the hedging relationship. The Group makes an assessment, both at inception of the hedge relationship and on an ongoing basis, of whether the hedging instruments are expected to be highly effective in offsetting that changes in the fair value or cash flows of the respective hedged items during the period for which the hedge is designated.

These hedging relationships are discussed below.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Cash flow hedges

The Group makes an assessment for a cash flow hedge of a forecast transaction, of whether the forecast transaction is highly probable to occur and presents an exposure to variations in cash flows that could ultimately affect profit or loss.

When a derivative is designated as the hedging instrument in a hedge of the variability in cash flows attributable to a particular risk associated with a recognised asset or liability that could affect profit or loss, then the effective portion of changes in the fair value of the derivative is recognised in OCI and presented in the hedging reserve within equity. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss. The amount recognised in OCI is reclassified to profit or loss as a reclassification adjustment in the same period as the hedged cash flows affect profit or loss, and in the same line item in the statement of profit or loss and OCI.

If the hedging derivative expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for cash flow hedge accounting, or the hedge designation is revoked, then hedge accounting is discontinued prospectively. However, if the derivative is novated to a central clearing counterparty by both parties as a consequence of laws or regulations without changes in its terms except for those that are necessary for the novation, then the derivative is not considered expired or terminated.

Accounting estimates and assumptions

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of certain financial assets, liabilities, income and expenses.

The use of estimates and assumptions is principally limited to the determination of provisions for impairment and the valuation of financial instruments as explained in more detail below.

Provisions for impairment

In determining impairment of financial assets, judgement is required in the estimation of the amount and timing of future cash flows as well as an assessment of whether the credit risk on the financial asset has increased significantly since initial recognition and incorporation of forward-looking information in the measurement of ECL.

Fair value of financial assets and liabilities

Where the fair value of financial assets and liabilities cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is derived from observable markets where available, but where this is not feasible, a degree of judgement is required in determining assumptions used in the models. Changes in assumptions used in the models could affect the reported fair value of financial assets and liabilities.

Property, plant and equipment

Property, plant and equipment is stated in the statement of financial position at cost, less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

The cost of property, plant and equipment includes directly attributable incremental costs incurred in their acquisition and installation.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

2 Accounting policies (continued)

Depreciation

Depreciation is charged so as to write off the cost of assets, other than land and properties under construction over their estimated useful lives, as follows:

Asset class	Depreciation method and rate
Distribution system:	
- Generation assets	15 years
- Conventional metering equipment	up to 5 years
- Information technology equipment	up to 10 years
- Land	not depreciated
- Other system assets	45 years
Land and buildings:	
- Freehold buildings	up to 60 years
- Leasehold buildings	lower of lease period or 60 years
- Non-operational land	not depreciated
Furniture, fittings and equipment	up to 10 years
Metering equipment	up to 15 years

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any material changes in those estimates accounted for on a prospective basis. Due to the significance of the Group's investment in property, plant and equipment, variations in estimates could impact operating results both positively and negatively although, historically, few changes have been required.

Assets in the course of construction are carried at cost, less any recognised impairment loss. Costs include professional fees, and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Such assets are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation on these assets, on the same basis as other assets, commences when the assets are commissioned. Assets are derecognised when they are disposed of profit or loss on disposal is recognised in other gains on the statement of profit or loss.

Intangible assets

Goodwill arising on the acquisition of an entity represents the excess of the cost of acquisition over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the entity recognised at the date of acquisition. Goodwill is initially recognised as an asset at cost and is subsequently measured at cost less any accumulated impairment losses. Goodwill is held in the currency of the acquired entity and revalued to the closing rate at each reporting period date.

Goodwill is not subject to amortisation but is tested for impairment.

Negative goodwill arising on an acquisition is recognised directly in the income statement. On disposal of a subsidiary or a jointly controlled entity, the attributable amount of goodwill is included in the determination of the profit or loss recognised in the income statement on disposal.

Finance income and costs policy

Finance income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Finance costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use are added to the cost of those assets, until such time as the assets are substantially ready for their intended use.

All other borrowing costs are recognised in profit or loss in the period which they are incurred.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

3 Revenue

The analysis of the Group's revenue for the year from continuing operations is as follows:

	2022	2021
	£ 000	£ 000
Distribution revenue	412,147	356,842
Amortisation of deferred revenue	29,253	27,945
Contracting revenue	22,609	20,198
Meter asset rental	86,334	81,106
Other revenue	7,847	7,653
	<u>558,190</u>	<u>493,744</u>

The tables below represent the internal information provided to the President and Chief Executive Officer of the Group for the purposes of resource allocation and segmental performance appraisal. The Northern Powergrid Group operates in four principal areas of activity, those of the distribution of electricity, engineering contracting, gas exploration and smart meter rental in the United Kingdom.

Reportable segments are those that meet two or more of the following criteria under IFRS 8:

- Its reported revenue is 10% or more of the combined revenue of all segments;
- The absolute measure of its profit or loss is 10% or more of the combined reported profit; and
- Its assets are 10% or more of the combined assets of all segments.

The Group is separated into the following segments:

Distribution: Northern Powergrid (Northeast) plc

Contracting: Integrated Utility Services Limited

Metering: Northern Powergrid Metering Services Limited

Other: Includes support activities

Other finance income	5,450	1,337
Finance costs		
Interest on borrowings at amortised cost	(53,395)	(41,906)
Interest expense on leases	(372)	(417)
Borrowing costs included in cost of qualifying asset	<u>606</u>	<u>666</u>
Total finance costs	<u>(53,161)</u>	<u>(41,657)</u>
Net finance costs	<u><u>(47,711)</u></u>	<u><u>(40,320)</u></u>

Borrowing costs included in the costs of qualifying assets during the year arose on the general borrowing pool and are calculated by applying a capitalisation rate of 3.14% (2021: 3.28%) to expenditure on such assets.

7 Staff costs

	2022	2021
	£ 000	£ 000
Salaries	70,853	68,713
Social security costs	8,775	8,147
Defined benefit pension cost	20,857	5,106
Defined contribution pension cost	<u>5,102</u>	<u>4,503</u>
	105,587	86,469
Less charged to property plant and equipment	<u>(46,318)</u>	<u>(43,804)</u>
	<u><u>59,269</u></u>	<u><u>42,665</u></u>

A large proportion of the Group's employees are members of the DB Scheme, details of which are given in the Employee Benefit Obligations Note 25.

The average monthly number of persons employed by the Group (including directors) during the year, analysed by category was as follows:

	2022	2021
	No.	No.
Distribution	1,248	1,247
Engineering contracting	155	155
Other	<u>14</u>	<u>14</u>
	<u><u>1,417</u></u>	<u><u>1,416</u></u>

The Company had an average monthly number of 11 employees during the year ended 31 December 2022 (2021:12).

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

8 Directors' remuneration

The directors' remuneration for the year was as follows:

	2022	2021
	£	£
Highest paid		
Short-term employee benefits	94,578	396,843
Other long-term benefits	100,193	435,990
	<u>194,771</u>	<u>832,833</u>
Total		
Short-term employee benefits	244,542	492,069
Post retirement benefits - defined benefit	21,582	-
Post retirement benefits - defined contribution	6,001	9,180
Other long-term benefits	159,137	493,661
	<u>431,262</u>	<u>994,910</u>
Post retirement benefits		
No. of Directors who were members of a defined contribution scheme in the year	<u>4</u>	<u>2</u>
No. of Directors who were members of a defined benefit scheme in the year	<u>1</u>	<u>-</u>
	2022	2021
	£	£
Key personnel remuneration		
Short-term employee benefits	1,070,859	648,896
Post retirement benefits - defined benefit	33,482	24,529
Post retirement benefits - defined contribution	81,910	87,751
Other long-term benefits	515,380	257,160
	<u>1,701,631</u>	<u>1,018,336</u>

Other key personnel includes a number of senior functional managers who, whilst not board directors, have authority and responsibility for planning, directing and controlling activities of the Group.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

9 Auditor's remuneration

The auditor's remuneration for the year was as follows:

	2022	2021
	£ 000	£ 000
Fees payable to the auditor for audit of the Company's annual accounts	43	38
Fees payable to the auditor for audit of the Company's subsidiaries pursuant to legislation	383	337
Total audit fees	426	375
Audit of regulatory reporting	59	51
Other services	8	51
Total auditor's remuneration	<u>493</u>	<u>477</u>

Other services relate to non-statutory audit services including bond issuance and pensions.

10 Income tax

Tax charged in the income statement

	2022	2021
	£ 000	£ 000
Current taxation		
UK corporation tax	29,874	28,387
UK corporation tax adjustment to prior periods	(664)	(832)
	<u>29,210</u>	<u>27,555</u>
Deferred taxation		
Arising from origination and reversal of temporary differences	(1,814)	336
Deferred tax expense/(credit) from unrecognised temporary difference from prior period	705	610
Deferred tax credit relating to changes in tax rates or laws	1,060	39,315
Total deferred taxation	<u>(49)</u>	<u>40,261</u>
Tax expense in the income statement	<u>29,161</u>	<u>67,816</u>

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

10 Income tax (continued)

The tax on profit before tax for the year is higher than the standard rate of corporation tax in the UK (2021 - higher than the standard rate of corporation tax in the UK) of 19.0% (2021 - 19.0%).

The differences are reconciled below:

	2022	2021
	£ 000	£ 000
Profit before tax	<u>134,602</u>	<u>145,545</u>
Corporation tax at standard rate	25,574	27,654
Increase in deferred tax due to changes in tax rates or laws	1,060	39,315
Tax effect of result of joint venture entities	(192)	(207)
Decrease in current tax from adjustment for prior periods	(664)	(832)
Permanent differences (including non-taxable dividends)	1,069	(198)
Pension contributions recognised in other comprehensive income	-	(255)
Increase/(decrease) in deferred tax from adjustment for prior periods	705	610
Non-deductible interest	1,710	1,710
Release of deferred tax in respect of prior year holdover relief claim	(33)	(45)
Other tax effects for reconciliation between accounting profit and tax expense/(income)	<u>(68)</u>	<u>64</u>
Total tax charge	<u>29,161</u>	<u>67,816</u>

The Autumn Budget 2022 confirmed that the corporation tax rate will increase to 25% from 1 April 2023 as previously enacted. Deferred tax balances are therefore measured at 25% at 31 December 2022 (25% at 31 December 2021) after taking into account the estimated effect of timing differences which will reverse at the 19% rate prior to 1 April 2023.

There is no uncertainty over the acceptable income tax treatment.

Should any uncertainties arise the Group will apply adopted amendments to IFRIC 23.

Amounts recognised in other comprehensive income

10 Income tax (continued)

Deferred tax

Group

Deferred tax movement during the year:

	At 1 January 2022 £ 000	Recognised in income £ 000	Recognised in other comprehensive income £ 000	At 31 December 2022 £ 000
Accelerated tax depreciation	128,826	2,798	-	131,624
Pension benefit obligations	55,431	(2,972)	(24,725)	27,734
Other items	(1,463)	158	5,140	3,835
Holdover relief	58	(33)	-	25
	<u>182,852</u>	<u>(49)</u>	<u>(19,585)</u>	<u>163,218</u>
			Recognised in other comprehensive income £ 000	At 31 December 2021 £ 000
	At 1 January 2021 £ 000	Recognised in income £ 000		
Accelerated tax depreciation	99,729	29,097	-	128,826
Pension benefit obligations	8,957	9,498	36,976	55,431
Other items	(1,950)	(525)	1,012	(1,463)
Holdover relief	116	(58)	-	58
	<u>106,852</u>	<u>38,012</u>	<u>37,988</u>	<u>182,852</u>

The other deferred tax liability of £3.8m (2021:£1.5m asset) includes the deferred tax impact of cash flow hedges, provisions and employee benefits which are deductible on a paid basis. Within pension benefit obligations the movement in the year represents deferred tax on the movement in retirement benefit obligation/asset. A proportion of the movement has been capitalised in property, plant and equipment.

The average credit period on receivables is 30 days. No interest is charged on outstanding trade receivables.

The Group always measures the loss allowance for trade receivables at an amount equal to lifetime expected credit loss. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date.

There has been no change in the estimation techniques or significant assumptions made during the current reporting period.

As the Company's historical credit loss experience does shows significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is distinguished as follows:

- Distribution businesses: DUoS receivables, damages receivables, and other receivables;
- Metering: contracted meters, contracted churn, and non-contracted churn; and
- Engineering contracting.

	31 December 2022 £ 000	31 December 2021 £ 000
At 1 January	8,757	6,154
Amounts utilised/written off in the year	(144)	(3,791)
Amounts recognised in the income statement	<u>966</u>	<u>6,394</u>
At 31 December	<u><u>9,579</u></u>	<u><u>8,757</u></u>

The significant increase in the amount recognised in the prior year follows the failure of a number of a electricity supply companies in 2021. Subject to certain conditions mentioned on page 82, losses arising in relation to distribution use of system debts will be recovered through an increase in future allowed income.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

16 Trade and other receivables (continued)

Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Company compares the risk of a default occurring on a financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment the Company considers historical experience as well as forward-looking information that is available without undue cost or effort. Forward-looking information includes the future prospects of the industries in which the Company's debtors operate obtained from economic expert reports, financial analysts, government bodies, relevant think-tanks and other similar organisations. In particular the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- significant increases in credit risk on other financial instruments of the same debtor; and
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Distribution use of system receivables

The customers served by the Group's distribution network are supplied predominantly by a number of electricity supply businesses (circa 110) with the E.ON group accounting for approximately 21.7% of distribution revenues in 2022 (2021: 21.5%) and British Gas plc accounting for approximately 14.1% of distribution revenues in 2022 (2021: 11.4%). Ofgem under Code Governance arrangements, set out a framework known as Credit Cover within the Distribution Connection and Use of System Agreement (DCUSA), which sets credit limits for each supply business based on its credit rating (taken from a credit agency). If no score is available, then they can build up their credit limit through good payment history. In addition, suppliers can provide other forms of collateral to cover their value at risk (measured as being equivalent to 45 days usage) or if their credit rating alone is not sufficient to cover their value at risk. Acceptable collateral typically is provided in the form of a parent company guarantee, letter of credit, cash or an escrow account.

Provided the Group has implemented credit control, billing and collection processes in line with best practice guidelines and can demonstrate compliance with the guidelines or is able to satisfactorily explain departure from the guidelines, any losses arising from supplier default will be recovered through an increase in future allowed income. Losses incurred to date have not been material therefore no ECL has been made on DUoS balances.

The following is the expected credit loss for receivables past due:

	Not due	Current	1-3 months	3-6 months
	£ 000	£ 000	£ 000	£ 000

Other distribution trade receivables

Sales of goods and services comprise all income streams which are not classified as DUoS income. Examples of non-DUoS income streams would be service alterations/disconnections, assessment and design fees, and recovery of amounts for damage caused by third parties to the distribution system. The average credit period on sales of goods and services is 30 days. Interest is not generally charged on the trade receivables paid after the due date.

The following is the expected credit loss for receivables past due:

Damages receivables

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

16 Trade and other receivables (continued)

Meter asset provision

Included in trade receivables are balances relating to the provision of meters through Northern Powergrid Metering Limited. The average credit period on these receivables is 30 days. Interest is not generally charged on receivables paid after the due date.

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or when the debtor is over 1 year past due. None of the trade receivables that have been written off are subject to enforcement activities.

For receivables where there is no specific provisions, a provision is made for debts past their due date based on lifetime expected credit loss determined by reference to past default experience. The following is the expected credit loss for receivables past due:

Engineering contracting receivables

The average credit period on Engineering contracting receivables is 30 days. Interest is not generally charged on receivables paid after due date. Included in the Group's construction contracts balance are debtors with a carrying amount of £1.9 million (2021: £2.1 million), which are past due at the reporting date for which the Group has provided for an irrecoverable amount of £0.1 million (2021: £0.1 million) based on past experience. The Group does not hold and collateral over these balances. The average age of these receivables is 50 days (2021: 54days).

Included in the Group's construction contracts balance are debtors with a carrying amount of £nil (2021: £nil) which are past due at the reporting date for which the Group has not provided as there has not been a significant change in credit quality and the amounts are still considered recoverable. The Group does not hold any collateral over these balances.

The average credit period on sales of goods and services is 30 days. Interest is not generally charged on the trade receivables paid after the due date.

Finance lease receivables

Northern Transport Finance Limited ("NTFL"), a wholly owned subsidiary, enters into credit finance arrangements for motor vehicles with employees in the Group. All agreements are denominated in sterling. The term of the finance agreements is predominantly three years.

The interest rate inherent in the agreements is fixed at the contract date for all of the term of the agreement. The average effective interest rate contracted is approximately 6.5% (2021: 6.5%) per annum. None of these debts are past due and there are no indicators of impairment.

The interest rate inherent in the agreements is fixed at the contract date for all of the term of the agreement. None of these debts are past due and there are no indicators of impairment.

The directors consider the carrying value of finance lease receivables approximates their fair value. The maximum risk exposure is the book value of these receivables, less the residual value of the leased assets.

	Minimum lease payments £ 000	Interest £ 000	Present value £ 000
2022			
Within one year	4,027	(109)	3,918
In two to five years	4,624	(537)	4,087
	<u>8,651</u>	<u>(646)</u>	<u>8,005</u>

	Minimum lease payments £ 000	Interest £ 000	Present value £ 000
2021

In two to five years	3,036	(334)	2,702
	<u>8,111</u>	<u>(426)</u>	<u>7,685</u>

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

16 Trade and other receivables (continued)

Operating lease receivables

Operating leases relate to the metering assets owned by the Group with lease terms of 10 years, these are disclosed in Note 11. The lessee does not have an option to purchase the meters at the expiry of the lease period.

The total future value of minimum lease payments is as follows:

	31 December 2022 £ 000	31 December 2021 £ 000
Within one year	79,519	73,145
In two to five years	262,627	272,860
Over five years	<u>145,932</u>	<u>131,950</u>
	<u><u>488,078</u></u>	<u><u>477,955</u></u>

The group's exposure to credit and market risks, including maturity analysis, relating to trade and other receivables is disclosed in note 29 "Financial risk review".

17 Cash and cash equivalents

	Group		Company	
	31 December 2022 £ 000	31 December 2021 £ 000	31 December 2022 £ 000	31 December 2021 £ 000
Cash at bank	15,324	26,098	-	-
Other cash and cash equivalents	<u>253,337</u>	<u>16,042</u>	<u>18,090</u>	<u>29,036</u>
	<u><u>268,661</u></u>	<u><u>42,140</u></u>	<u><u>18,090</u></u>	<u><u>29,036</u></u>

Cash and cash equivalents have a maturity of less than three months, are readily convertible to cash and are subject to an insignificant risk of changes in value. The carrying amount of these assets approximates their fair value. Other cash and cash equivalents include intercompany loans that are highly liquid and repayable on demand.

Of the total financial liabilities of £1,318.2 million, £1,254.6 million (2021: £936.9 million) relates to external borrowings and preference shares whose fair value is determined with reference to quoted market prices. The directors' estimates of the fair value of internal borrowings are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions or dealer quotes for similar instruments. The valuation of liabilities set out above is based on Level 1 inputs.

The terms of the cumulative preference shares:

- entitle holders, in priority to holders of all other classes of shares, to a fixed cumulative preferential dividend of 8.061p (net) per share per annum payable half-yearly in equal amounts on 31 March and 30 September;
- on a return of capital on a winding up, or otherwise, will carry the right to repayment of capital together with a premium of 99p per share and a sum equal to any arrears or accruals of dividend. This right is in priority to the rights of ordinary shareholders;
- carry the right to attend a general meeting of Northern Electric plc and vote if, at the date of the notice convening the meeting, payment of the dividend to which they are entitled is six months or more in arrears, or if a resolution is to be considered at the meeting for the winding-up of Northern Electric plc or abrogating, varying or modifying any of the special rights attaching to them; and

Northern Electric plc

Other payables	14,792	13,763	317	145
	<u>117,404</u>	<u>103,412</u>	<u>4,252</u>	<u>4,515</u>

The group's exposure to market and liquidity risks, including maturity analysis, relating to trade and other payables is disclosed in note 29 "Financial risk review".

The Group's exposure to market and liquidity risks, including maturity analysis, related to trade and other payables is disclosed in the financial risk review Note 29.

The directors consider that the carrying amount of other financial liabilities approximates their fair value, calculated by discounting future cash flows at market rate at the statement of financial position date. The valuation is based on Level 1 inputs. Trade creditors and accruals principally comprise amounts outstanding for trade purchases and on-going costs. Invoices are paid at the end of the month following the date of the invoice. The Group has financial risk management policies in place to ensure that all payables are paid within the credit timeframe. The standard payment term for trade payables is net monthly.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

24 Deferred revenue

	Group		Company	
	31 December 2022 £ 000	31 December 2021 £ 000	31 December 2022 £ 000	31 December 2021 £ 000
Opening balance	677,658	669,356	-	-

	<u>681,802</u>	<u>677,658</u>	<u>-</u>	<u>-</u>

Deferred revenue relates to customer contributions towards distribution system assets. The Group's policy is to credit the customer contribution to revenue on a straight-line basis, in line with the useful life of the distribution system assets.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

25 Pension and other schemes

Defined benefit pension schemes

Electricity Supply Pension Scheme

The Group contributes to two pension schemes, which it operates on behalf of the participating companies within the Group. Those pension schemes are:

- The Northern Powergrid Group of the ESPS (the "DB Scheme"); and
- The Northern Powergrid Pension Scheme.

The Northern Powergrid Pension Scheme was introduced for new employees of the Group from July 1997 and is a money purchase arrangement accounted for as a defined contribution scheme.

The DB Scheme is a defined benefit scheme for directors and employees, which provides pension and other related retirement benefits based on final pensionable pay. The DB Scheme closed to staff commencing employment with the Group on or after 23 July 1997. Members who joined before this date, including some Protected Persons under The Electricity (Protected Persons) (England and Wales) Pension Regulations 1990, continue to build up future pension benefits.

Under the DB Scheme, employees are typically entitled to annual pensions on retirement at age 63 of one-eightieth of final pensionable salary for each year of service plus an additional tax-free cash lump sum at retirement of three times pension. Benefits are also payable on death and following other events such as withdrawing from active service.

No other post-retirement benefits are provided to members of the DB Scheme.

Pension regulation

The UK pensions market is regulated by the Pensions Regulator whose key statutory objectives in relation to UK defined benefit plans are to:

- protect the benefits of members;
- promote and to improve understanding of good administration;
- reduce the risk of situations arising which may lead to compensation being payable from the Pension Protection Fund ("PPF"); and
- minimise any adverse impact on the sustainable growth of an employer.

The Pensions Regulator has various powers including the power to:

- wind up a scheme where winding up is necessary to protect members' interests;
- appoint or remove a trustee;
- impose a schedule of company contributions where trustees and company fail to agree on appropriate contributions; and
- impose contributions where there has been a detrimental action against the scheme.

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

25 Pension and other schemes (continued)

Role of Trustees

The DB Scheme is administered by a board of Trustees which is legally separate from the Company. The assets of the DB Scheme are held in a separate trustee-administered fund. The board of Trustees is made up of Trustees appointed by the Company, as the Principal Employer of the DB Scheme, Trustees elected by the membership and an independent trustee. The Trustees are required by law to act in the interests of all relevant beneficiaries and are responsible in particular for the asset investment strategy plus the day-to-day administration of the benefits payable. They also are responsible for jointly agreeing with the Principal Employer the level of contributions due to the DB Scheme.

Funding requirements

UK legislation requires that pension schemes are funded prudently (i.e. to a level in excess of the current expected cost of providing benefits). The last actuarial valuation of the DB Scheme was carried out by the Trustee's actuarial advisors, Aon, as at 31 March 2022. Such valuations are required by law to take place at intervals of no more than three years. Following each valuation, the Trustees and the Northern Powergrid Group must agree the contributions required (if any) such that the DB Scheme is fully funded over time on the basis of suitably prudent assumptions.

At the latest funding valuation as at 31 March 2019, the funding deficit was assessed to be £116.3 million. In light of this and subsequent changes in the funding position, the Group agreed with the Trustees in September 2020 to pay £2.44 million per month from 1 April 2019 to 31 March 2021. A further £29.3 million will be paid on 30 November 2021 and 30 November 2022 and £14.1 million on 30 November 2023 and 30 November 2024. These amounts are in 2019/20 prices and will be updated on 1 April 2020 and on each 1 April thereafter in line with annual changes in RPI inflation. If the actuarial assumptions are borne out in practice then the funding deficit is expected to be removed by 31 March 2025. The amounts due each November may be reduced by up to 100% depending on the updated funding position. Due to a significantly improved funding position, the November 2021 and 2022 deficit contributions were suspended. The next actuarial valuation is underway as at 31 March 2022 and is expected to be completed by 30 June 2023, by which time a new contribution schedule will be agreed.

The contributions payable by the Group to the DB Scheme in respect of future benefits which are accruing is 49.1% of pensionable pay. These contributions were determined as part of the 31 March 2019 actuarial valuation and are payable in addition to the deficit repair contributions mentioned above. These rates will remain in place until such a time as a new schedule of contributions is agreed between the Trustees and the Group as part of the 31 March 2022 valuation.

In addition, the Group pays contributions to cover the expenses of running the DB Scheme are 6.3% of pensionable pay from 1 October 2020.

The Northern Powergrid Group's total contribution to the DB Scheme for the next financial year are expected to be £11.2m (subject to a new contribution schedule being put in place).

The Trust Deed provides the Group with an unconditional right to a refund of surplus assets assuming the gradual settlement of plan liabilities over time. Furthermore, in the ordinary course of business the Trustees have no right to unilaterally wind up, or otherwise augment the benefits due to members of the DB scheme. Based on these rights, any net surplus in the plan is recognised in full.

Profile of the scheme

The defined benefit obligation ("DBO") includes benefits for current employees, former employees and current pensioners. The overall duration of the DB Scheme's obligation was assessed to be about 17 years based on the results of the 31 March 2019 funding valuation. This is the weighted-average time over which benefit payments are expected to be made.

As at 31 March 2019, broadly about 30% of the liabilities are attributable to current employees (duration about 24 years), 10% to former employees (duration about 23 years) and 60% to current pensioners (duration about 13 years). Given increases in yields, we anticipate that the overall duration of the Scheme's obligation will have reduced to around 14 years at 31 December 2022.

Investment objectives for the DB Scheme

Northern Electric plc

Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

25 Pension and other schemes (continued)

The Trustees aim to achieve the Scheme's investment objectives through investing partly in a diversified mix of growth assets which, over the long term, are expected to grow in value by more than low risk assets like cash and gilts. This is done with a broad liability driven investing framework that uses cash, gilts and other hedging instruments like swaps in a capital efficient way. In combination this efficiently captures the Trustees' risk tolerances and return objectives relative to the Scheme's liabilities.

The Company and Trustees have agreed a long-term strategy for reducing investment risk as and when appropriate. This includes the use of Liability Driven Investment (LDI) from October 2016 to more closely match the nature and duration of the DB Scheme's liabilities through the use of derivatives such as swaps and repurchase agreements. The portfolio is designed to hedge a proportion of the interest rate and inflation risk inherent in the Scheme's liabilities. The target hedging level is currently 99% (2021: 99%) of the DB Scheme's liabilities as measured on the basis used for the funding valuation.

The trustees insure certain benefits which are payable on death before retirement.

Risks

Volatile asset returns

The DBO is calculated using a discount rate set with reference to corporate bond yields. If assets underperform this discount rate, this will create an element of deficit. The DB Scheme aims to hold a proportion (7%) of its assets in return-seeking assets (such as equities) which, although expected to outperform corporate bonds in the long-term, create volatility and risk in the short-term.

Mitigation

The allocation to return-seeking assets is monitored to ensure it remains appropriate given the DB Scheme's long-term objectives. The Trustees regularly review the strategy from return-seeking assets and have diversified some return-seeking assets from equities into Reinsurance and Listed Infrastructure to reduce overall risk. To avoid concentration risk, the allocation to UK equity is restricted to 35% of the total equity allocation.

Changes in bond yields

A decrease in corporate bond yields will increase the value placed on the DBO for accounting purposes, although this will be partially offset by an increase in the value of the DB Scheme's bond holdings.

Mitigation

The DB Scheme aims to hold a substantial proportion of its assets (73%) as bonds and Liability Driven Investments (LDI), which provide a significant hedge against falling bond yields (falling yields which increase the DBO will also increase the value of the bond assets). There are some differences in the credit quality of bonds held by the DB Scheme and the bonds analysed to decide the DBO discount rate, such that there remains some risk should yields on different quality bond/swap assets diverge.

Inflation risk

A significant proportion of the DBO is indexed in line with price inflation (specifically in line with RPI) and higher inflation will lead to higher liabilities

Mitigation

The DB Scheme invests around 42% in LDI (included in the 73% above) which provides a hedge against higher-than-expected inflation increases on the DBO (rising inflation will increase both the DBO and the value of the LDI portfolio).

Life expectancy risk

The majority of the DB Scheme's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the liabilities.

Mitigation

The DB Scheme regularly reviews actual experience of its membership against the actuarial assumptions underlying the future benefit projections and carries out detailed analysis when setting an appropriate scheme specific mortality assumption.

Currency risk

To increase diversification, the DB Scheme invests in overseas assets. This leads to a risk that foreign currency movements negatively impact the value of assets in Sterling terms.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

25 Pension and other schemes (continued)

Mitigation

The DB Scheme hedges a proportion of the overseas investments currency risk for those overseas currencies that can be hedged efficiently. The DB Scheme's currency hedging ratio is currently 50% in respect of overseas developed market currencies.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

25 Pension and other schemes (continued)

Other risks

There are a number of other risks associated with the DB Scheme including operational risks (such as paying out the wrong benefits), legislative risks (such as the government increasing the burden on pension schemes through new legislation) and other demographic risks (such as a higher proportion of members dying than assumed with a dependant eligible to receive a survivor's pension from the DB Scheme).

Reporting at 31 December 2022

For the purposes of this disclosure, the current and future pension costs of the Northern Powergrid Group have been assessed by Aon, a qualified independent actuary, using the assumptions set out below, which the actuary has confirmed represent a reasonable best estimate of those costs. The review has been based on the same membership and other data as at 31 March 2019. The board of Northern Powergrid Holdings Company has accepted the advice of the actuary and formally approved the use of these assumptions for the purpose of calculating the pension cost of the Northern Powergrid Group.

The results of the latest funding valuation at 31 March 2019 have been adjusted to 31 December 2021. Those adjustments take account of experience over the period since 31 March 2019, changes in market conditions, and differences in the financial and demographic assumptions. The present value of the DBO and the related current service cost were measured using the Projected Unit Credit Method.

For schemes closed to new members, such as the DB Scheme, the current service cost calculated under the Projected Unit Credit Method is expected to increase as the members of the DB Scheme approach retirement.

Principal actuarial assumptions

The significant actuarial assumptions used to determine the present value of the defined benefit obligation at the statement of financial position date are as follows:

	31 December 2022	31 December 2021
	%	%
Discount rate	4.80	1.95
Future salary increases	3.20	3.45
Future pension increases	2.75	2.85
Inflation - RPI	2.95	2.95
Inflation- CPI	2.50	2.55
Proportion of pension exchanged for additional cash at retirement	10.00	10.00

Post retirement mortality assumptions

	31 December 2022	31 December 2021
	Years	Years
Life expectancy for male currently aged 60	26.70	26.70
Life expectancy for female currently aged 60	26.60	28.60
Life expectancy at 60 for male currently aged 45	27.40	27.40
Life expectancy at 60 for female currently aged 45	29.70	29.60

	31 December 2022 £ 000	31 December 2021 £ 000
Actuarial (gains) and losses arising from changes in demographic assumptions	(900)	(2,900)
Actuarial (gains) and losses arising from changes in financial assumptions	(530,100)	(55,100)
Actuarial (gains) and losses arising from experience adjustments	47,900	(19,200)
Return on plan assets in excess of that recognised in net interest	<u>582,000</u>	<u>(87,900)</u>
Amounts recognised in the Statement of Comprehensive Income	<u><u>98,900</u></u>	<u><u>(165,100)</u></u>

Sensitivity analysis

Significant actuarial assumptions for determination of the defined benefit obligation are discount rate, inflation, and mortality. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant:

	31 December 2022			31 December 2021		
	+ 0.1%	0.0%	- 0.1%	+ 0.1%	0.0%	- 0.1%
Adjustment to discount rate	£ 000	£ 000	£ 000	£ 000	£ 000	£ 000
Present value of total obligation	<u>952,700</u>	<u>965,500</u>	<u>979,300</u>	<u>1,445,600</u>	<u>1,480,400</u>	<u>1,505,600</u>
	31 December 2022			31 December 2021		
	+ 0.1%	0.0%	- 0.1%	+ 0.1%	0.0%	- 0.1%
Adjustment to rate of inflation	£ 000	£ 000	£ 000	£ 000	£ 000	£ 000
Present value of total obligation	<u>978,700</u>	<u>965,500</u>	<u>953,300</u>	<u>1,503,900</u>	<u>1,480,400</u>	<u>1,466,300</u>
	31 December 2022			31 December 2021		
Adjustment to mortality age rating assumption	+ 1 Year £ 000	None £ 000	- 1 Year £ 000	+ 1 Year £ 000	None £ 000	- 1 Year £ 000
Present value of total obligation	<u>995,300</u>	<u>965,500</u>	<u>934,900</u>	<u>1,545,600</u>	<u>1,480,400</u>	<u>1,415,600</u>

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

25 Pension and other schemes (continued)

The sensitivity analysis presented above may not be representative of the actual change in defined benefit obligation as it is unlikely that the changes in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

26 Dividends

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

29 Financial risk review

Capital management

The Group manages its capital centrally to ensure that entities in the Group will be able to continue as going concerns while maximising the return to stakeholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from 2021.

The capital structure of the Group consists of net debt (borrowings as detailed in Note 20 offset by equity of the Company (comprising issued capital, reserves and retained earnings as detailed in Notes 18 and 19).

At 31 December 2022, 97% of the Group's long-term borrowings were at fixed rates (2021: 96%) and the average maturity for these borrowings was 23 years (2021: 20 years).

During the year all obligations under the various debt covenants have been complied with.

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. The carrying amount of financial assets recorded in the financial statements, which is net of impairment losses, represents the Group's maximum exposure to credit risk as no collateral or other credit enhancements are held.

The Group's income is primarily generated from use of system revenue from electricity suppliers; suppliers are credit checked by independent ratings agencies. Impaired income from DUoS will be recovered in future periods through system charges and is therefore of no material risk to the Group. The Company's receivables are subject to expected credit loss calculations disclosed further within the trade receivables (Note 16). The Group's credit risk exposure is shown below:

Group

		Gross carrying amount	Loss allowance	Net carrying amount
		£ 000	£ 000	£ 000
2022	Notes			
Trade and other receivables	16	107,986	(9,579)	98,407
Income tax asset		1,054	-	1,054
Cash and short-term deposits	17	268,661	-	268,661
Contracts	3	5,824	-	5,824
	16	<u>383,525</u>	<u>(9,579)</u>	<u>373,946</u>
		Gross carrying amount	Loss allowance	Net carrying amount
		£ 000	£ 000	£ 000
2021	Notes			
Trade and other receivables	16	100,749	(8,757)	91,992
Income tax asset		2,294	-	2,294
Cash and short-term deposits	17	42,140	-	42,140
Contracts	3	7,593	-	7,593
	16	<u>152,776</u>	<u>(8,757)</u>	<u>144,019</u>

For trade receivables the Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. The Group determines the expected credit losses on these items by using a provision matrix, estimated based on historical credit loss experience based on the past due status of the debtors, adjusted as appropriate to reflect current conditions and estimates of future economic conditions. Accordingly, the credit risk profile of these assets is presented based on their past due status in terms of the provision matrix. Note 16 includes further details on the loss allowance for these assets.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

29 Financial risk review (continued)

The carrying amount of the Group's financial assets at FVTPL as disclosed in Note 28 best represents their respective maximum exposure to credit risk. The Group holds no collateral over any of these balances.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

29 Financial risk review (continued)

Company

		Gross carrying amount £ 000	Loss allowance £ 000	Net carrying amount £ 000
2022	Notes			
Trade and other receivables	16	1,035	-	1,035
Cash and cash equivalents	17	<u>18,090</u>	<u>-</u>	<u>18,090</u>
		Gross carrying amount £ 000	Loss allowance £ 000	Net carrying amount £ 000

Trade and other receivables	16	3,866	-	3,866
Cash and cash equivalents	17	<u>29,036</u>	<u>-</u>	<u>29,036</u>

Amounts due from Group undertakings are regarded as low credit risk as the Group has a strong capacity to meet its contractual cash flow obligations and maintains an investment grade credit rating.

Liquidity risk

Ultimate responsibility of liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short, medium, and long-term funding and liquidity management requirements. The Group manages liquidity by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The Group has access to a £100 million revolving credit facility provided by Barclays Bank plc, Lloyds Bank plc, HSBC UK Bank plc and Royal Bank of Canada. The facility was executed in December 2021 for a period of three years, with two 1-year extensions. During 2022, the first 1-year extension option was exercised, extending the expiry date to December 2022. In addition, the Group has access to further short-term borrowing facilities provided by YEG and to a £22 million overdraft facility provided by Lloyds Bank plc, which is reviewed annually, these borrowings are repayable on demand.

At 31 December 2022, the Group had available £88.8m (2021: £121.6m) of undrawn committed borrowing facilities in respect of which all conditions precedent had been met.

Maturity analysis for financial liabilities

The following table sets out the remaining contractual maturities of financial liabilities by type.

Market risk

Market risk is the risk of loss arising from movements in market variables such as interest rates, exchange rates and commodity prices. Risks are mitigated by utilising appropriate risk management products.

The Group's policy on interest rate risk is designed to limit the Group's exposure to floating interest rates. Consistent with this policy, at 31 December 2022 the Group had 97% (2021: 96%) of long term debt at fixed rates. Short-term loans under the multicurrency revolving credit facility are charged at a floating rate of interest at SONIA plus 0.20% plus a credit adjustment spread. In aggregate, 14% of the amortising long-term loan and the capital expenditure facility loans are at a floating rate of interest at SONIA plus 1.55% and 1.60% respectively, thus exposing the Group to cash flow interest rate risk. A 1% movement in interest rates would subject the Group to an approximate change in interest costs of £0.4m per year. This is considered an acceptable level of risk. All other loans are at fixed interest rates and expose the Group to fair value interest rate risk.

More information on the use of cash flow hedges to manage interest rate risk on is available in Note 30.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

29 Financial risk review (continued)

Financial risk

The Group is not subject to significant risk relating to foreign exchange.

30 Derivatives held for risk management and hedge accounting

Derivatives held for risk management

Derivatives are financial instruments that derive their value from the price of an underlying item such as interest rates, foreign exchange rates, credit spreads, commodities, equity or other indices. In accordance with Board approved policies, derivatives are transacted to manage our exposure to fluctuations in interest rate. The Group uses derivatives to manage these risks from our financing portfolio to optimise the overall cost of accessing the debt capital markets.

The following table provides a reconciliation by risk category of components of equity and analysis of other comprehensive income items (net of tax) resulting from hedge accounting. All derivative financial instruments relate to cash flow hedges.

	2022		2021	
	Assets £ 000	Liabilities £ 000	Assets £ 000	Liabilities £ 000
Non-current	18,926	-	944	-
Current	<u>2,781</u>	<u>-</u>	<u>204</u>	<u>-</u>
	<u>21,707</u>	<u>-</u>	<u>1,148</u>	<u>-</u>

The maturity of financial instruments was as follows:

	3 months to 1 year £ 000	1 to 5 years £ 000	More than 5 years £ 000	Total £ 000
2022				
Notional principal	32,801	145,179	-	177,980
Cash flow hedge	<u>2,781</u>	<u>18,926</u>	<u>-</u>	<u>21,707</u>
	<u>35,582</u>	<u>164,105</u>	<u>-</u>	<u>199,687</u>
2021				
Notional principal	31,006	143,394	-	174,400
Cash flow hedge	<u>204</u>	<u>944</u>	<u>-</u>	<u>1,148</u>
	<u>31,210</u>	<u>144,338</u>	<u>-</u>	<u>175,548</u>

All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges to reduce the Group's cash flow exposure resulting from variable interest rate borrowings. The interest rate swaps and interest payments on the underlying loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest payments on debt affect profit or loss.

The interest rate swaps are settled on a quarterly basis and are based on receiving a floating rate of interest based on SONIA and paying a fixed rate of 0.8955% on the amortising long-term loans and 0.8505% on the capital expenditure facility loans. The Group will settle the difference between the fixed and floating interest rate on a net basis.

Effectiveness testing

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

30 Derivatives held for risk management and hedge accounting (continued)

The Group is using regression analysis to assess the effectiveness of the interest rate swap on a retrospective and prospective basis throughout the term of the hedging relationship. The dollar offset method was also performed at inception, showing zero ineffectiveness.

Nature of the risk being hedged

The Group is hedging the risk of variability in cash flows indexed to SONIA. Further details of the Group's risk management is available in the strategic report, pages 16 to 21, and in financial risk review, Note 29.

31 Related party transactions

Directors' advances, credits and guarantees

During the year, 3 directors (2021: 2) and 3 key personnel (2021: 3) utilised the services provided by Northern Transport Finance Limited. The amounts included in finance lease receivables owed by these directors and key personnel were £90,000 (2021: £89,000).

Lloyds Court, 78 Grey Street, Newcastle upon Tyne, Tyne and Wear, NE1 6AF

33 Other reserves

At the Company's Annual General Meeting in August 1994, the shareholders gave approval to on-market purchases of up to 10% of its shares and this was given effect on 21 September 1994 when 12,370,400 shares were purchased. This transaction resulted in the creation of a capital redemption reserve of £6.2m. Under section 831(4) of the Companies Act 2006 this reserve is treated as an un-distributable reserve.

34 Notice of annual general meeting

Notice is hereby given that the Annual General Meeting of Northern Electric plc will be held by WebEx on Wednesday 21 June 2023 at 11.00 am.

WebEx joining instructions

For shareholders wishing to join the Annual General Meeting of Northern Electric plc please visit <https://www.webex.com/login/attend-a-meeting> and when prompted, enter 'the meeting information': 2614 803 6565.

The following resolutions will be proposed as ordinary resolutions:

Annual Report and Accounts

1 To receive and consider the strategic, directors' and auditor's reports and the Group accounts for the year ended 31 December 2022.

Dividend

2 To declare that no final dividend be paid for the year ended 31 December 2022.

Re-election of Directors

3 To re-elect Mr A P Jones as a director.

4 To re-elect Mr S J Lockwood as a director.

The Auditors

5 To re-appoint Deloitte LLP as the Company's auditor until the conclusion of the next general meeting at which accounts are laid and to authorise the directors to determine their remuneration.

Authority to allot shares

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

34 Notice of annual general meeting (continued)

6 That:

- a) the Directors be authorised to allot shares in the Company or grant rights to subscribe for, or convert any security into, shares in the Company up to a maximum nominal amount of £27,827,000;
- b) this authority shall expire at close of business on 21 June 2028 or, if earlier, on the conclusion of the Company's annual general meeting in 2028, unless previously revoked or varied by the Company;
- c) the Company may before such expiry make offers and agreements which would or might require shares to be allotted or rights to subscribe for, or convert securities into, shares to be granted after the expiry of this authority and the directors may allot shares or grant rights to subscribe for, or convert securities into, shares under any such offer or agreement as if the authority conferred hereby had not expired;
- d) subject to paragraph (e), all existing authorities given to the directors pursuant to Section 551 of the Act shall be revoked by this resolution; and
- e) That paragraph (d) shall be without prejudice to the continuing authority of the directors to allot shares, or grant rights to subscribe for or convert any security into shares, pursuant to an offer or agreement made by the Company before the expiry of the authority pursuant to which such offer or agreement was made.

The following resolutions will be proposed as special resolution:

Authority to dis-apply pre-emption rights

- 7 That, subject to the passing of and pursuant to the general authority conferred by resolution 5 in the notice convening this meeting and in place of all existing powers, the directors be and are hereby generally empowered pursuant to Section 570 of Act to allot equity securities (as defined in Section 560 of the Act) for cash, pursuant to the authority so conferred as if Section 561 of the Act did not apply to any such allotment. This power shall expire (unless previously renewed, varied or revoked by the Company in general meeting) at the close of business on 20 June 2023 or, if earlier, on the conclusion of the Company's annual general meeting in 2028, but the Company may make an offers or and agreements which would or might require equity securities to be allotted after expiry of this power and the directors may allot equity securities in pursuance of that offer or agreement as if this power had not expired.

By order of the board

J C Riley
Company Secretary
28 April 2023

Registered office:

Lloyds Court, 78 Grey Street,
Newcastle upon Tyne, NE1 6AF
Registered in England No 2366942

Notes:

- 1 All the issued ordinary shares in the Company are held by or on behalf of Northern Powergrid Limited.
- 2 Holders of preference shares have the right to receive notice of, attend and speak at the Annual General Meeting but are only entitled to vote if, at the date of the notice of the meeting, payment of the dividend to which they are entitled is six months or more in arrears, or if a resolution is to be considered at the meeting for the winding up of the Company or abrogating, varying or modifying any of the special rights attaching to the preference shares. As none of these circumstances apply to this Annual General Meeting, preference shareholders should note that they do not have the right to vote on any of the business to be considered.
- 3 Members are entitled to appoint a proxy to exercise all or any of their rights on their behalf at the meeting. A shareholder may appoint more than one proxy in relation to the Annual General Meeting provided that each proxy is appointed to exercise the rights attached to a different share or shares held by the shareholder. A proxy need not be a shareholder of the Company.

Northern Electric plc
Notes to the Financial Statements for the Year Ended 31 December 2022 (continued)

34 Notice of annual general meeting (continued)

- 4 Any person to whom this notice is sent who is a person nominated under Section 146 of the Companies Act 2006 to enjoy information rights (a "Nominated Person") may, under an agreement between him/her and the shareholder by whom he/she was nominated, have a right to be appointed (or to have someone else appointed) as a proxy for the Annual General Meeting. If a Nominated person does not have such a right or does not wish to exercise it, he/she may have a right under such an agreement to give instructions to the member as to the exercise of voting rights.
- 5 Any corporation which is a member can appoint one or more corporate representatives who may exercise on its behalf all of its powers as a member provided that they do not do so in relation to the same shares.
- 6 The current price of the Company's preference shares can be obtained from the website of the London Stock Exchange at www.londonstockexchange.com.
- 7 Resolution 5. The CA06 provides that directors may only allot shares if authorised to do so by the Company's articles of association or by the shareholders in general meeting. This resolution replaces the resolution passed by the shareholders on 20 June 2018.
- 8 Special Resolution 6. This special resolution empowers the directors for the duration of the authority conferred by Resolution 6 to allot equity shares for cash without regard to the pre-emption provisions to which the ordinary shareholders would otherwise be entitled under Section 561 of the CA06.
