2. Significant accounting policies

Basis of preparation

These condensed interim financial statements for the financial period ended 31 December 2023 have been prepared in accordance with IAS 34 'Interim Financial Reporting' issued by the Financial Reporting Council and the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations, 2019 (as amended). As a result, these condensed interim financial statements should be read in conjunction with the annual report and audited financial statements for the financial year ended 30 June 2023, which were prepared in accordance with International Financial Reporting Standards ("IFRS") and interpretations adopted by the International Accounting Standards Board ("IASB"), the Irish Companies Act, 2014 and the UCITS Regulations together with the listing rules of the ISE as applicable to companies reporting under IFRS. The accounting policies and methods of calculation applied in these condensed interim financial statements are consistent with those applied in the annual audited financial statements for the financial year ended 30 June 2023.

The condensed interim financial statements as at 31 December 2023 are unaudited. We note that the statutory auditor's report in the audited year end financial statements as at 30 June 2023 was unqualified.

These condensed interim financial statements are not the statutory financial statements of the Company and are prepared in order to meet regulatory requirements. The statutory financial statements of the Company are those for the annual period ending 30 June of each year. The financial statements of the Sub-Funds are presented in their base currency, the U.S. Dollar and Euro (the "presentation currency") rounded to the nearest U.S. Dollar and Euro. The combined totals shown in the financial statements are presented in U.S. Dollar.

The accounting policies have been applied consistently by the Company throughout the financial period.

New standards, amendments and interpretations issued and effective for the financial period beginning on or after 1 July 2023

- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).

2. Significant accounting policies (continued)

- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).
- International tax reform – Pillar II Model rules (amendments to IAS 12).

The new standards are not expected to impact the financial statements.

There are no other new standards, amendments or interpretations issued and effective for the financial period beginning 1 July 2023 that have a significant impact on the Company's financial position, performance or disclosures in its financial statements.

New standards, amendments and interpretations issued but not effective for the financial period beginning 1 July 2023 and not early adopted

The following new amended standards and interpretations are not expected to have a significant impact on the Company's financial statements.

- Classification of Liabilities as Current or Non-Current (Amendments to IAS 1).
- IFRS S1 - General Requirements for Disclosure of Sustainability-related Financial Information.

There are no other new standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the Company.

3. Derivatives

The Company may employ techniques and instruments including but not limited to futures, options, forward contracts, contracts for difference and swaps (described below) relating to transferable securities and/or other financial instruments in which it invests for efficient portfolio management purposes and for investment purposes.

(i) Forward foreign exchange contracts

Forward foreign exchange contracts are recognised at fair value on the date on which a forward foreign exchange contract is entered into and are subsequently re-measured at their fair value. The fair value of open forward foreign exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. All forward foreign exchange contracts are carried as assets when fair value is positive and as liabilities when fair value is negative.

The best evidence of fair value of a forward foreign exchange contract at initial recognition is the transaction price. Subsequent changes in the fair value of any forward foreign exchange contract are recognised immediately in the Statement of Comprehensive Income, if any.

(ii) Swap contracts

The fair value of swaps is the estimated amount that would be received or paid to terminate the swap at the financial year end date, taking into account current interest rates and the current creditworthiness of the swap counterparties. Gain and loss on swap contracts are recognised in the Statement of Comprehensive Income. Certain Sub-Funds may enter into interest rate, total return, credit default and currency swap contracts.

Interest rate swap contracts involve the exchange by a Sub-Fund with another party of their respective commitments to pay or receive interest, e.g. an exchange of floating rate payments for fixed rate payments with respect to a notional amount of principal.

Total return swap contracts involve a commitment by one party in the contracts to pay interest in exchange for a market-linked return, both based on notional amounts. To the extent that the total return of the security or index underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the relevant Sub-Fund will receive a payment from or make a payment to the counterparty, respectively.

In a credit default swap contract, one party makes payments to another party in exchange for the right to receive a specified return (or to put a security) if a credit event (e.g. default or a similar event) occurs with respect to a reference entity or entities. Certain Sub-Funds may use credit default swap contracts to provide a measure of protection against defaults of sovereign or corporate issuers (i.e. to reduce risk where the Sub-Fund owns or has exposure to the issuer) or to take an active long or short position with respect to the likelihood of a particular issuer's default. The maximum exposure the Company has in selling credit protection is equal to the notional amount of such credit default swap contracts.

For credit default swap contracts on asset-backed securities, a credit event may be triggered by various occurrences, which may include an issuer's failure to pay principal, maturity extension, rating downgrade or write-down. For credit default swap contracts on corporate or sovereign issuers, a credit event may be triggered by occurrences such as an issuer's bankruptcy, failure to pay interest or principal, repudiation/moratorium and/or restructuring. The gains or losses are recognised in the Statement of Comprehensive Income, if any.

A currency swap is an interest rate swap in which the cash flows are in different currencies. Upon initiation of a currency swap, the counterparties make an initial exchange of notional principals in the two currencies. During the life of the swap, each party pays interest (in the currency of the principal received) to the other. At the maturity of the swap, the parties make a final exchange of the initial principal amounts, reversing the initial exchange at the same spot rate.

(iii) Options

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid from the purchase of options which expire unexercised are treated as realised loss.

The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is included in determining initial fair value of securities or foreign currencies purchased. Premiums received from written options which expire unexercised are treated as realised gain.

**Notes to the Condensed Financial Statements
for the financial period ended 31 December 2023 (continued)**

3. Derivatives (continued)

(iii) Options (continued)

Options that traded on a recognised market are valued at the last traded price on that market on the valuation date. For options that are not traded on a recognised market, the value is determined by reference to a price from a counterparty or broker on a given valuation date.

(iv) Swaptions

A swaption is an option that grants the right, with no obligation, to enter into an underlying swap on pre-agreed terms. A payer swaption gives the owner of the swaption the right to enter into a swap where they pay the fixed leg and receive the floating leg. A receiver swaption gives the owner of the swaption the right to enter into a swap where they pay the floating leg and receive the fixed leg.

Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been 'swapped'.

When a swaption is written, an amount equal to the premium received by the relevant Sub-Fund is recorded as a liability and is subsequently adjusted to the current market value of the swaption written. Premiums received from written swaptions that expire unexercised are treated by the relevant Sub-Fund on the expiration date as realised gains. If a written swaption is exercised, the premium is added to the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss.

(v) Futures contracts

A futures contract is an agreement between two parties to buy and sell a security or currency at a specific price or rate at a future date. The daily change in contract value is recorded as an unrealised gain or loss and is recognised as a realised gain or loss when the contract is closed. Gain and loss on futures contracts are recognised in the Statement of Comprehensive Income.

Futures contracts are generally valued at the settlement price established at the close of business each day by the board of trade or exchange on which they are traded.

(vi) Exchange traded investments

Equity securities, including common stocks, listed preferred stock, exchange-traded funds, and financial derivative instruments such as futures contracts and option contracts, that are traded on a regulated market are valued at the last reported sales price and official settlement price, as applicable. To the extent these securities and financial derivative instruments are actively traded they are categorised as Level 1 within the fair value hierarchy.

(vii) Time deposits

Time deposits with maturity dates of three months or less are disclosed in the Statement of Financial Position as deposits with credit institutions.

(viii) Money Market Instruments

The Sub-Funds may invest in short-term investments, including money market funds and overnight deposits, for which maturities are typically three days or less. As at 31 December 2023 money market instruments are only held on PGIM Wadhvani Keynes Systematic Absolute Return Fund which launched on 24 September 2019.

Management Company

The Management Company was authorised by the Central Bank of Ireland on 14 December 2022 pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended as a UCITS management company. Effective 16 December 2022, it was appointed by the Company as its UCITS management company. The Management Company is a wholly owned subsidiary of PGIM Financial Limited and of its indirect ultimate parent, Prudential Financial Inc.

Prior to the appointment of the Management Company, investment management fees were paid directly to the Investment Manager by the Company. From the date of the appointment of the Management Company to 30th November 2023, the Company paid a single fee to the Management Company (the "Management Fee") which in turn paid the Investment Manager its fees. From 1st December 2023 onwards, the Management Fee is allocated between the Management Company and the Investment Manager as agreed between these parties from time to time, and payment is made directly from the Company to the relevant parties together with any reasonable out-of-pocket expenses thereon.

The total Management Company fee for the financial period ended 31 December 2023 was US\$17,803,089 (31 December 2022: US\$974,847) of which US\$3,039,580 (30 June 2023: US\$2,681,717) was payable at the financial period end.

Connected Persons

Regulation 43 of the Central Bank UCITS Regulations states that "a responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the Shareholders of the UCITS".

As required under Regulation 42 of the Central Bank UCITS Regulations, the Directors are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

5. Fair value hierarchy

The Company measures fair values using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1	Quoted market price in an active market for an identical instrument.
Level 2	Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
Level 3	Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market. Vendor quotes are classified as Level 2 holdings because the inputs into the price supplied by the vendors are observable for example, rate, yield, industry classification and credit rating. The Investment Manager reviews the prices independently recorded as vendor quotes and ensures that they are in line with expectations.

PGIM Funds Plc

Notes to the Condensed Financial Statements for the financial period ended 31 December 2023 (continued)

5. Fair value hierarchy (continued)

For each class of assets and liabilities not measured at fair value in the Statement of Financial Position but for which fair value is disclosed, the Company discloses the Level within the fair value hierarchy which the fair value measurement would be categorised and a description of the valuation technique and inputs used in the technique.

Assets and liabilities not carried at fair value are carried at amortised cost, their carrying values being reasonable approximations of fair value.

Cash and cash equivalents and cash held at broker include deposits held with banks and other short-term investments in an active market and are categorised as Level 1.

Receivable for investments sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Sub-Funds. Payable for investments sold and other payables represent the contractual amounts and obligations due by the Sub-Funds for settlement of trades and other obligations due by the Sub-Funds for settlement of trades and expenses. All of the receivable and payable balances are categorised as Level 2.

Transfers between levels in the fair value hierarchy are deemed to have occurred if the pricing source has changed at the financial period end. Transfers to and out of Level 3 that occurred in the financial period ended 31 December 2023 and financial year ended 30 June 2023 are detailed under the below tables.

The financial instruments held as at 31 December 2023 are classified into the following Levels:

8. Efficient portfolio management

The Investment Manager or relevant Sub-Investment Manager may, on behalf of the Company and subject to the conditions and limits set out in the UCITS Regulations, employ techniques and instruments relating to transferable securities for hedging purposes (to protect an asset of a Sub-Fund against, or minimise liability from, fluctuations in market value or foreign currency exposures) or for efficient portfolio management purposes (with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns to the Sub-Fund provided such transactions are not speculative in nature). Investment in FDI which give exposure to foreign exchange will only be used for hedging purposes. Such techniques and instruments may include investments in exchange-traded or over-the-counter ("OTC") FDI, such as futures and currency forwards (which may be used to manage market and currency risk respectively), options (including call and put options which may be used to achieve cost efficiencies) and swaps, including credit default swaps (which may be used to manage interest rate and credit risk respectively). A Sub-Fund may also invest in the FDI as part of its investment strategy where such intention is disclosed in the Sub-Fund's investment policy and provided that the counterparties to such transactions are institutions subject to prudential supervision and, in relation to OTC transactions, belong to categories approved by the Central Bank.

The Investment Manager or relevant Sub-Investment Manager employs a risk management process in respect of a Sub-Fund in accordance with the requirements of the Central Bank to enable it to accurately monitor, measure and manage the global exposure from FDIs ("global exposure") which each Sub-Fund gains. The Investment Manager will use the commitment approach to calculate its global exposure on all Sub-Funds except for the PGIM Absolute Return Fund, PGIM Emerging Market Local Currency Debt Fund, PGIM Emerging Market Blend Debt Fund, PGIM Emerging Market Total Return Bond Fund, PGIM Global Total Return ESG Bond Fund, PGIM Global Total Return Bond Fund, PGIM Multi Asset Credit Fund, PGIM Strategic Income ESG Fund and PGIM Wadhvani Keynes Systematic Absolute Return Fund where it may use Value at Risk ("VAR"). The Company will, on request, provide supplemental information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investment.

In addition to the investments in FDIs noted above, the Company may employ other techniques and instruments relating to transferable securities and money market instruments subject to the conditions imposed by the Central Bank, such as repurchase / reverse repurchase agreements, ("Repo Contracts") and securities lending only for efficient portfolio management. Techniques and instruments which relate to transferable securities or money market instruments and which are used for the purpose of efficient portfolio management, including FDIs which are not used for direct investment purposes, will be understood as a reference to techniques and instruments which fulfil the following criteria:

- (a) they are economically appropriate in that they are realised in a cost-effective way;
- (b) they are entered into for one or more of the following specific aims:
 - reduction of risk;
 - reduction of cost;
 - generation of additional capital or income for the Sub-Fund with a level of risk which is consistent with the risk profile of the Sub-Fund and the risk diversification rules set out in the Notices;
- (c) their risks are adequately captured by the risk management process of the Company (in the case of FDIs only); and
- (d) they cannot result in a change to the Sub-Fund's declared investment objective or add substantial supplementary risks in comparison to the general risk policy as described in the sales documents.

During the financial year, the Company entered into futures contracts and forward foreign exchange contracts for the purpose of hedging currency risk on investment and cash holdings.

11. Significant events during the financial period

Ukrainian-Russian War

The military conflict between Russia and Ukraine has caused significant disruption to global financial systems, trade and transport, among other things. In response, multiple countries and organisations (including the European Union council) have put in place global sanctions and other severe restrictions or prohibitions on the activities of individuals and businesses connected to Russia. This includes the European Union restriction on the sale of shares in collective investment schemes to Russian nationals and Russian entities. Other sanctions imposed have directly targeted transactions in Russian securities, impairing the ability of the Company to buy, sell, receive and deliver such securities.

Any sanctions, the threat of additional sanctions, and other actions that may be taken by any nations or international organisations against Russia and Russian issuers of securities in the future, as well as potential retaliatory actions that could be taken by Russia, may further adversely impact the Russian economy and the pricing and liquidity of Russian securities. In addition, further political or military actions by Russia, such as an increase on the price of government-controlled exports (e.g., natural gas exports), could have an adverse impact on the economies and debt of other emerging market countries as well as on the broader global economy. These events could have a negative effect on the performance of the Company. The ultimate impact of the Russia-Ukraine conflict and its effect on global economic and commercial activity and conditions, and on the operations, financial condition and performance of the Company, and the duration and severity of those effects, remain impossible to predict, but may include reductions in revenue and growth, unexpected operational losses and liabilities and reductions in the availability of capital. The Directors and the Investment Manager monitor for any changes regarding the Russian related sanctions so that the Company's investment portfolio remains adherent. In addition the Investment Manager and Sub-Investment Managers, on behalf of the Directors, continue to monitor the valuation and liquidity of all Russian and Ukrainian securities held. The Administrator monitors the shareholder register and prospective investors in an effort to prevent persons subject to Russian sanctions from investing in the Sub-Funds.

More information on the valuation of Russian and Ukrainian securities held as at 31 December 2023 is available under Note 5 above.
