Performance is represented by the Fiera Atlas Global Companies Composite comprising of fee-paying discretionary portfolios with a remit to invest principally in global markets. Fiera purchased the Atlas Global Companies Strategy, past performance and associated Investment Management team as per the announcement on 8 March 2021. The MSCI ACWI Index is a stock market index made up of approximately 2,500 global stocks. It is often used as a common benchmark for 'world' or 'global' stock funds. The index includes stocks from 23 developed market and 23 emerging market countries and covers approximately 85% of the global investable equity opportunity set, as defined by MSCI. Performance is given gross, in USD and is annualized for periods in excess of one year. The actual management fee and expenses paid by an account may be higher or lower. Total returns are calculated using the net asset value per unit for the relevant month end. Performance as stated includes the reinvestment of all dividends and capital gains. Past performance should not be seen as an indication of future performance. Inherent in any investment is the risk of loss. It is not possible to invest directly in an index. Investors pursuing a strategy similar to an index may experience higher or lower returns and will bear the cost of fees and expenses that will reduce returns.
