Such authorisation does not imply official recommendation of the SFC. None of the sub-funds of New Capital UCITS Fund plc, other than the Authorised sub-funds, are authorised for sale in Hong Kong nor are they available to the Hong Kong investing public.

The financial statements of the individual sub-funds are prepared in the functional currency of the respective sub-funds. The functional currency of the Company is US dollar as this reflects the global exposure of the sub-funds, their shareholders and the markets in which the sub-funds are available.

2. Basis of Preparation

The semi-annual report has been prepared in accordance with Financial Reporting Standards 104 Interim Financial Reporting Standards ("FRS 104") issued by the Financial Reporting Council and Promulgated by the International Accounting Standards Board ("IASB") in IAS 34 Interim Financial Reporting, Irish Statute comprising the Companies Act, 2014 (as amended) (the "Act") and the UCITS Regulations.

The accounting policies used in the preparation of these financial statements are in accordance with FRS 104 which is similar with Company's most recent annual financial statements for the year ended 30 June 2023 which adopted FRS 102. However, the format of these financial statements differs in some respects from that of the most recent annual financial statements, in that the notes to the financial statements are presented in summary form.

The Directors have availed of the exemption available not to prepare a statement of cash flows.

The financial statements are prepared in US dollar under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss and in accordance with the provisions of the Act and the UCITS Regulations.

The format and certain wording of the financial statements have been adapted from that contained in the Act and FRS 3 "Reporting Financial Performance" so that, in the opinion of the Directors, they more appropriately reflect the Company's business as an investment fund. The Profit and Loss Account is referred to as the Statement of Operations and the Balance Sheet is referred to as the Statement of Net Assets.

The information required by FRS 3, "Reporting Financial Performance", to be included in a Statement of Total Recognised Gains and Losses and a Reconciliation of Movements in Shareholders' Funds is, in the opinion of the Directors, contained in the Statement of Operations and the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders on pages 174 to 183.

Notes to the Semi-Annual Report (continued)

3. Principal Accounting Policies

The following is a summary of the significant accounting policies adopted by the Company.

(a) Investments at fair value

The Company has classified its investments as financial assets or financial liabilities at fair value through profit or loss under IAS 39: "Financial Instruments: Recognition and measurement". This category has two sub-categories: financial assets and liabilities held for trading, and those designated by management at fair value through profit or loss at inception. Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading, if the Company does not designate any derivatives as hedges in a hedging relationship.

Normal purchases and sales of investments are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are initially recognised at fair value, and transaction costs for all financial assets carried at fair value through profit or loss are expensed as incurred. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Gains and losses arising from changes in the fair value of the financial assets and liabilities at fair value through profit or loss category are included in the Statement of Operations in the period in which they arise.

Measurement

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Company is the current mid-market price. When the Company holds derivatives with offsetting market risks it uses bid and ask prices as a basis for establishing fair values for the offsetting risk positions and applies the mid price to the net open position, as appropriate.

If an active quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Shares or units in any collective investment scheme which provides for shares or units to be redeemed at the option of their holder out of the assets of the undertaking shall be valued at the last published unaudited net asset value per share.

The fair value of investments made by the Company in investment funds is based on the unaudited net asset value per share or unit quoted by the administrator of the collective investment scheme in question as at the close of business on the valuation day, or the last quoted unaudited net asset value available in the preceding month. The net asset values are determined by the management of the investment funds and their respective administrators and may be unaudited at the period end. The Directors consider the net asset value of underlying funds to be representative of fair value as they can be traded at this value.

In determining fair value, the Directors take into consideration, where applicable, the impact of suspensions, redemptions, liquidation proceedings, investments in side pockets and other significant factors. Actual results may differ from these estimates.

Futures contracts

A futures contract obligates the Company to receive or deliver a specific instrument at a specified price on an agreed future date. Initial margin deposits made with respect to futures contracts are recognised as assets due from the Company's broker (the Company's agent in acquiring the futures position). Futures contracts are recorded on the trade date and are valued at the applicable last traded price on the last business day of the period.

The difference between the original contract amount and the fair value of the open futures position is reflected as financial assets or financial liabilities measured at fair value in the Statement of Net Assets and as net gains/(losses) on investments and foreign currency in the Statement of Operations. Subsequent changes in the daily valuation of open contracts are recognised as unrealised gains or losses and are included in financial assets or financial liabilities measured at fair value in the Statement of Net Assets. Variation margin payments are made or received on traded futures as daily appreciation or depreciation occurs. Realised fair value gains and losses are recorded when a contract is closed.

Realised and change in unrealised fair value gains and losses are included in the Statement of Operations.

Forward foreign exchange currency contracts

A forward contract obligates the Company to receive or deliver a fixed quantity of foreign currency at a specified price on an agreed future date. These contracts are valued at the forward rate and the Company's equity therein, representing unrealised gains or losses on the contracts, is included in financial assets or financial liabilities measured at fair value in the Statement of Net Assets. Realised and change in unrealised fair value gains and losses are included in the Statement of Operations. The Company enters into forward foreign exchange contracts in order to hedge against currency exchange rate risk of the non-base currency classes. Forward foreign exchange contracts may also be entered into in order to further the Company's objective in terms of capital appreciation.

Equity participation notes

The Company purchases equity participation notes from reputable brokers in order to gain exposure to investments that otherwise it would be unable to invest in due to various restrictions imposed by local regulators. When the Company makes an agreement to purchase equity participation notes, fair value is determined by the value of the investments that the note has exposure to be multiplied by the number of shares specified within the note agreement. The change in fair value, if any, is recorded as an unrealised gain or loss in the Statement of Operations. Realised and unrealised gains or losses on equity participation notes are shown in the Statement of Operations.

Equity index warrants

Equity index warrants are recorded as an asset or liability measured at fair value on the Statement of Net Assets. Fair value as determined by the Administrator is the quoted market price as provided by electronic feed from one or more reputable price vendors. The change in fair value, if any, is recorded as an unrealised gain or loss in the Statement of Operations. Realised gains or losses on warrants are shown in the Statement of Operations. On the expiry of a warrant the amount previously recognised in the Statement of Net Assets is recognised in the Statement of Operations as a realised gain or loss.

Notes to the Semi-Annual Report (continued)

3. Principal Accounting Policies, continued

Options

An option is a contractual agreement under which the seller (writer) grants the purchaser (seller) the right, but not the obligation, to either buy (a call option) or sell (a put option) at or by a set date or during a set period, a specific amount of securities or a financial instrument at a predetermined price. The seller receives a premium from the purchaser in consideration for the assumption of future securities price. Options held by the Company can be exchange-traded or privately negotiated over-the-counter ("OTC"). The Company is exposed to credit risk on purchased options only to the extent of their amount, which is their fair value. The change in fair value, if any, is recorded as an unrealised gain or loss in the Statement of Operations. Realised and unrealised gains or losses on options are shown in the Statement of Operations.

(b) Realised Gains and Losses on Sales of Investments

The computation of realised gains and losses on sales of financial assets at fair value through profit or loss is made on the basis of average cost and accounted for in the Statement of Operations.

(c) Interest Income and Dividend Income

Income on investments at fair value is recognised when earned using the coupon rate applicable on the effective interest basis to the debt instruments held. Bonds are priced clean and do not include accrued interest.

Premiums and discounts on investments using effective interest are amortised over the life of fixed income securities.

For New Capital Global Convertible Bond Fund coupon interest and amortisation is included in net gains/(losses) on investments and foreign currency as the debt instruments held are convertible bonds.

Dividend income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Operations and net of any tax credits and is recognised on the date when the relevant investment is first listed ex dividend.

(d) Interest expense

Interest expenses are recognised in the Statement of Operations using the effective interest method. Bank overdraft interest and deposit interests that is related to futures are recognised as interest expenses in the Statement of Operations.

(e) Bank interest income

Bank interest is accounted for on an effective interest basis and is recognised when earned using the effective rate of interest.

(f) FRS 102 Section 30 "Foreign currency translation"

The Company has adopted the US dollar as its functional currency under FRS 102 Section 30 The Effects of Change in Foreign Exchange Rates as it most appropriately reflects the economic environment in which the Company operates. For the purposes of producing the combined financial statements, amounts in overseas currencies are translated as follows:

(i) Using average (as an approximation of actual) exchange rates for the Statement of Operations.

(ii) Using average (as an approximation of actual) rate ruling on the date of the transaction in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the movement due to issue and redemption of shares.

(iii) Using year end exchange rates for the Statement of Net Assets.

The notional currency gain/(loss) on retranslation of opening net assets is included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. The method of translation has no effect on the value of the net assets of each Sub-fund.

(g) Expenses and gains and losses

All fees, duties and charges will be charged to the relevant sub-fund and within such sub-fund to the classes in respect of which they were incurred. All gains and losses are allocated to the relevant sub-fund and within such sub-fund to the classes in respect of the proportion attributable to each class.

(h) Redeemable participating shares

The Company issues redeemable shares, which are redeemable at the holders' option and are classified as financial liabilities. The issued redeemable participating share capital is at all times equal to the net asset value of the Company.

Redeemable shares are issued and redeemed at the holders' option at prices based on the Sub-funds of the Company's net asset value per share at the time of issue or redemption. The Sub-funds of the Company's net asset value per share is calculated by dividing the net assets attributable to the holders of redeemable shares by the total number of outstanding redeemable shares. In accordance with the provisions of the Company's regulations, investment positions are valued based on the mid market price for the purpose of determining the net asset value per share for subscriptions and redemptions.

All issued redeemable shares are fully paid. The Company's capital is represented by these redeemable shares with no par value and with each carrying one vote. They are entitled to dividends and to payment of a proportionate share based on the Company's net asset value per share on the redemption date. The Company's minimum subscription requirements for each Sub-fund is mentioned in the prospectus. The relevant movements are shown on the statement of changes in net assets attributable to redeemable participating shareholders.

(i) Distributions

Dividend distributions to redeemable participating shareholders are accrued in the Statement of Net Assets and classified as finance costs in the Statement of Operations in the period in which they are declared. Where both income shares and accumulation shares in a sub-fund are in issue, all income of a sub-fund after deduction of expenses will be allocated between holders of accumulation shares and holders of income shares in accordance with their respective interests.

(j) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Net Assets when there is a legally enforceable right to set-off recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liability simultaneously.

(k) Transactions and balances

Foreign currency transactions are translated into the functional currency of the individual sub-funds using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Operations within the "Net gains/(losses) on investments and foreign currency".

(l) Cash at bank

Cash at bank is recognised initially at fair value. It is subsequently measured at amortised cost less provision for impairment. Cash at bank comprises cash on hand. Refer to note 14 for further details on cash at bank.

Margin cash is posted by the Sub-funds with the derivative counterparties when the previously held margin falls below the minimum margin requirement. Refer to note 14 for further details on margin cash.

(o) Withholding Tax Expenses

The Company may be liable to taxes (including withholding taxes) in countries other than Ireland on dividend, interest income earned and capital gains arising on its investments. The Company may not be able to benefit from a reduction in the rate of such foreign tax by virtue of the double taxation treaties between Ireland and other countries. The Company may not, therefore, be able to reclaim any foreign withholding tax suffered by it in particular countries. Income that is subject to such tax is recognised gross of the taxes and the corresponding withholding tax is recognised as tax expense.

(q) Equalisation

Equalisation is operated in connection with the issue and redemption of shares. It represents the income element included in the price for the issue and redemption of shares. 5. Fair Value Hierarchy

Investments

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The guidance establishes three levels of the fair value hierarchy as follows:

Level 1: An unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date;

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly;

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The Company uses the “market approach” valuation technique to value its investments. Inputs are determined by observable data such as the prices at which such transactions occur. A financial instrument’s level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

However, the determination of what constitutes “observable” may require significant judgement but can generally be considered as that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorization of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the risk of that instrument.

Investments typically classified within level 1 include active listed equities and exchange traded derivatives. Investments typically classified within level 2 include, investments in corporate bonds, certain Government bonds, certain listed equities and over the counter derivatives. Investment funds are also considered level 2 investments if there is evidence that redemptions occurred during the year and there were no restrictions preventing redemptions at the year end.

As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability. Such adjustments are generally based on available market information.

Investments typically classified within level 3 include certain corporate bonds, private equities and investment funds that have suspended redemptions, created side pocket classes or imposed gates. Within level 3, the use of the market approach generally consists of using comparable market transactions.
