ARK GENOMIC REVOLUTION UCITS ETF

FUND DESCRIPTION

The ARK Genomic Revolution ETF (“ARKG”) seeks to invest in companies that are substantially focused on or benefit from extending and enhancing quality of life by incorporating technological developments and scientific advancements in genomics into their business. They offer new products or services that rely on genomic sequencing, analysis, synthesis or instrumentation. These companies span sectors, from healthcare to IT and beyond. They may also develop, produce, manufacture or rely on or enable bionic devices, bio-inspired computing, bioinformatics, molecular medicine and agricultural biotechnology.

WHY INVEST IN ARKG?

Exposure to Innovation: Aims for thematic multi-cap exposure to innovative elements including gene therapy bio-informatics, bio-inspired computing, molecular medicine, and pharmaceutical innovations. ARK believes the securities held in ARKG present the best risk-reward opportunities from ARK’s Genomic Revolution theme.

Growth Potential: Aims to capture long-term growth with low correlation to relative returns to traditional growth strategies and negative correlation to value strategies.

Tool for Diversification: Offers a tool for diversification due to little overlap with traditional indices. It can be a complement to traditional value/growth strategies.

Grounded in Research: Combines top-down and bottom-up research in its portfolio management to identify innovative companies and convergence across markets.

Cost Effective: Provides a lower cost alternative to mutual funds with true active management in an Exchange Traded Fund (ETF) that invests in rapidly moving themes.

SUSTAINABILITY PROFILE

As of 28 June, 2024

MSCI ESG Rating **BBB**

In both its “top down” and “bottom up” investment approaches, the Investment Manager evaluates environmental, social and governance (“ESG”) considerations.

The “top down” approach explicitly selects for technologies that the Investment Manager anticipates will have high degrees of impact on the UN SDGs. For a company to be eligible for selection, it must be involved in a technology platform that makes a “meaningful” contribution to at least two UN SDGs, as determined by the Investment Manager.

The following ESG considerations are also integrated into the “bottom up” approach:

- Business Involvement Screens (Controversial Weapons, Thermal Coal, Oil & Gas, Gambling, Adult Entertainment, Tobacco, Alcohol)
- Violations of International Norms and Standards
- Controversies
- Poor Governance

The Fund is also supported by the Investment Manager’s Engagement and Voting programmes.

INVESTMENT TEAM

ARK Investment Management LLC is the investment manager for the ARK Genomic Revolution UCITS ETF and is responsible for the day-to-day investment management decisions. The team is highly experienced in all aspects relating to the management of a fund portfolio, including the execution of equities, foreign exchange and cash management. The firm's investment process begins with top-down research to identify truly disruptive innovation and sizing the opportunity. This is followed by meticulous bottom-up research and analysis, leading to the selection of portfolio companies. ARK emphasises sizing the opportunity, stock selection, valuation and risk management, ensuring a dynamic approach to capturing technologically-enabled growth whilst navigating market volatility.

RISK FACTORS

- All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.
- The Fund is subject to the risks associated with technology-focused companies (including biotechnology and pharmaceutical companies) including the risk of: (1) failure of new technologies and solutions to replace existing ones or to be approved by governments/regulators or to achieve their aim; (2) the failure of individual companies to successfully capitalise on such new technologies and reach profitability; (3) competition, including rapid developments in competitive technologies (which may leave a company's products out-of-date); (4) government intervention or excessive regulation, delays to approvals or lack of financial support; and (5) legal attacks from competitors.
- Other: (1) The Fund also invests in small publicly-traded companies which may be less mature and more vulnerable to adverse business or economic events and greater share price changes than larger companies, the wider technology sector or stock market. (2) The Fund invests in global equity securities and there is a risk of loss arising from exchange rate fluctuations or exchange control regulations. (3) The ICAV's depositary or other service providers may go bankrupt and fail to return money or property belonging to the Fund. (4) It may not always be possible to buy and sell the Fund's shares on a stock exchange or at prices closely reflecting the Fund's Net Asset Value. (5) There is no capital guarantee or protection on the value of the Fund and investors can lose all the capital invested in the Fund.
