Chairman and Chief Executive's Statement

Introduction and Technology

Bioventix creates, manufactures and supplies high affinity sheep monoclonal antibodies (SMAs) for use in diagnostic applications. Bioventix antibodies are preferred for use when they confer an improved test performance compared to other available antibodies.

Most of our antibodies are used on blood-testing machines installed in hospitals and other laboratories around the world. Bioventix makes antibodies using our SMA technology for supply to diagnostic companies for subsequent manufacture into reagent packs used on blood-testing machines. These blood-testing machines are supplied by large multinational in vitro diagnostics (IVD) companies such as Roche Diagnostics, Siemens Healthineers, Abbott Diagnostics and Beckman Coulter. Antibody-based blood tests are used to help diagnose many different conditions including, amongst others, heart disease, thyroid function, fertility, infectious disease and cancer.

The blood test for testosterone is an example of where a Bioventix SMA has facilitated an improved test. In 2003, it became clear that testosterone tests performed on automated IVD platforms were deficient. Whilst the higher levels of testosterone in healthy adult males were accurately reported, the lower levels of testosterone in pre-pubescent boys and women were inaccurately reported. In 2005, Bioventix created an antibody called testo3.6A3 which was evaluated by customers during 2006. Evaluations were successful and following the necessary regulatory approvals, the first testosterone assays based on testo3.6A3 were launched in 2009. A number of IVD companies now use this antibody for revised tests that more accurately measure lower levels of testosterone.

Over the past 18 years, we have created and supplied approximately 20 different SMAs that are used by IVD companies around the world. We currently sell a total of 15–20 grams of purified physical antibody per year, the vast majority of which is exported. In addition to

revenues from physical antibody supplies, the sale by our customers of diagnostic products (based on our antibodies) to their downstream end-users attracts a modest percentage royalty payable to Bioventix. These downstream royalties currently account for approximately 70% of our annual revenue.

Bioventix adopts one of two commercial approaches when creating new antibodies. The first is own-risk antibody creation projects; this approach gives Bioventix the complete freedom to commercialise the antibodies produced. The second is contract antibody creation projects, in partnership with customers who supply materials, know-how and funding; this approach creates antibodies that can only be commercialised with the partner company. In both cases, after initiation of a new project, it takes around a year for our scientists to create a panel of purified antibodies for evaluation by our customers.

The evaluation process at customers' laboratories generally requires the fabrication of prototype

reagent packs which can be compared to other tests, for example the customer's existing commercial test or perhaps another "gold standard" method, on the assay machine platform being considered. The process of subsequent development thereafter by our customers can take many years before registration or approval from the relevant authority, for example the US Food and Drug Administration (FDA) or EU authorities, is obtained and products can be sold to the benefit of the customers, and of course Bioventix, through the agreed sales royalty. This does mean that there is a lead time of 4–10 years between our own research work and the receipt by Bioventix of royalty revenue from product sales. However, because of the resource required to gain such approvals, after having achieved approval for an accurate diagnostic test using a Bioventix antibody, there is a natural incentive for continued antibody use. This results in a barrier to entry for potential replacement antibodies which would require at least partial repetition of the approval process arising on a change from one antibody to another. This barrier

to antibody replacement arises from a combination of factors driven by the clinical criticality of the test and the potential consequences of making such a change which include the time and cost to register any changes required to validate the performance of the replacement antibody.

Another consequence of the lengthy approval process is that the revenue for the current accounting period is derived from antibodies created many years ago. Indeed, revenue growth over the next few years from, for example the troponin antibodies, will come from research work already carried out more than ten years ago. By the same dynamics, the current research work active at our laboratories now is more likely to generate sales in the period 2028–2038.

Over the past 18 years, we have created and supplied approximately 20 different SMAs that are used by IVD companies around the world.

Antibodies and Blood Testing

Bioventix creates and manufactures sheep monoclonal antibodies (SMAs). Customers incorporate these antibodies in reagent packs for use on automated blood-testing machines. Superior antibodies can facilitate improved tests. Bioventix sells liquid “physical” SMAs and derives royalties from their downstream use.

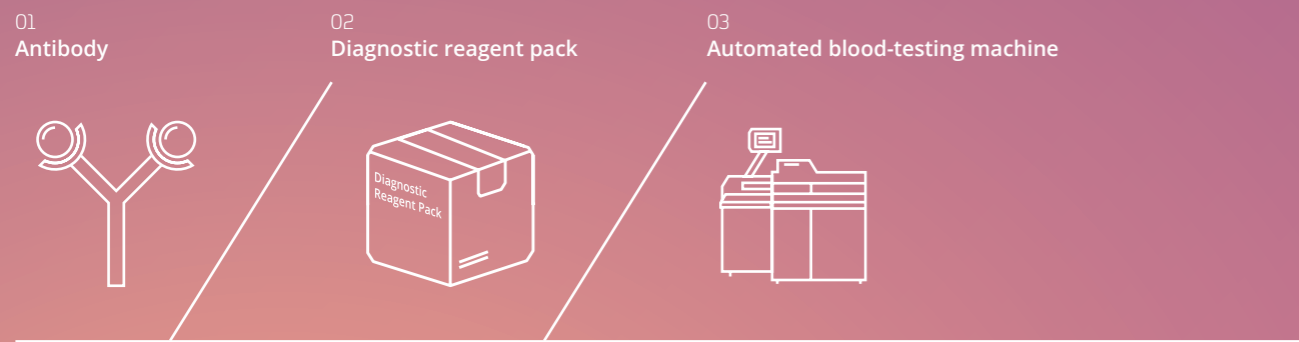

Antibodies and Business Dynamics

Projects can be internally driven or sponsored by customers. Bioventix takes about one year to create new antibodies. Even for established diagnostics, customers take two to four years to prototype tests, conduct field trials, submit regulatory data and obtain marketing approval. This imposes a gap between research and revenue growth but introduces a barrier that delivers continuity of longer-term recurring revenues.

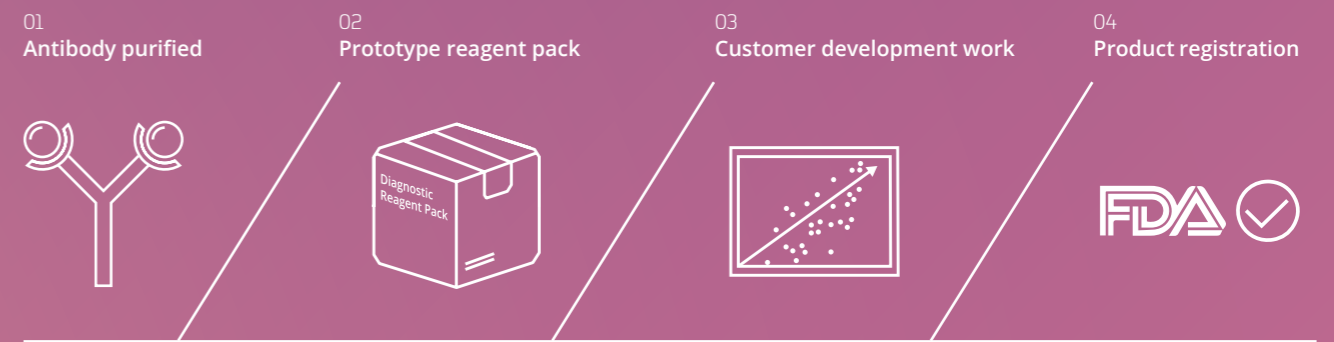

Blood Testing

+ 1 Year

4-10 Years

2022/23 Financial Results

We are pleased to report our results for the financial year ended 30 June 2023. Revenues for the year increased by 9% to £12.8 million (2021/22: £11.7 million). Profits before tax for the year also increased by 9% to £10.1 million (2021/22: £9.3 million). Cash balances at the year-end were £5.7 million (30 June 2022: £6.1 million).

Our most significant revenue stream continues to come from the vitamin D antibody called vitD3.5H10. This antibody is used by a number of small, medium and large diagnostic companies around the world for use in vitamin D deficiency testing. Sales of vitD3.5H10 increased by 7% to £5.8 million which reflects analysts' expectation for a relatively mature global IVD market.

Sales of our other core historic antibodies are featured below with the respective percentage increase/decrease from 2021/22:

- T3 (tri-iodothyronine): £1.14 million (+23%)
- biotins and biotin blockers: £0.85 million (-5%)
- progesterone: £0.75 million (+21%)
- estradiol: £0.56 million (-6%)
- testosterone: £0.46 million (-3%)
- drug-testing antibodies: £0.40 million (+6%)

Troponin is the preferred biomarker to help diagnose heart attacks. Under an antibody creation contract previously undertaken with a company subsequently acquired by Siemens, SMAs were created that facilitated an improved troponin test that was launched by Siemens in 2017. Total troponin antibody sales from Siemens Healthineers and another separate technology sub-license increased by 30% during the year to £1.61 million (2021/22: £1.23 million). Whilst the percentage growth is less than last year, we have no reason to doubt that prospective troponin sales in 2024 and beyond will increase in line with analysts' forecast until June 2032 when contractual payments from our contract with Siemens will cease.

Our shipments of physical antibody to China continued to increase. Some sales are made directly but the majority are made through five appointed distributors. Regulatory approvals for domestic Chinese customers have considerable lead times but we continue to see modest increases in royalty payments flowing from these customers. The prospects for further growth in China are good although we detect pressure on downstream final assay prices that has resulted from aggressive purchasing on the part of centralised procurement organisations. This could exert pressure on Bioventix as we supply relatively high-cost reagents. We also recognise that continued antibody technology development in China and elsewhere constitutes a longer-term threat. In addition, relative global geopolitical stability will be important for the continued trade in technology products such as our antibodies.

We estimate that between 50% and 60% of our total revenue is either directly linked to US Dollars via physical product pricing in Dollars or indirectly linked to US Dollars via royalties based on downstream Dollar sales. The remainder of the currency split is dominated by Euros and important Asian currencies. In the past year, exchange rates have been relatively stable compared to the previous 12 months. Our view continues to be that hedging mechanisms would not, in the longer term, add value and may have the potential to add risk to our business. Consequently, future movements in exchange rates may affect our Sterling revenues.

Cash Flows and Dividends

As reported above, the performance of the business during the year generated cash balances at the year-end of £5.7 million and royalties received during quarter 3 of 2023 have added to this balance.

The Board has determined that is appropriate to maintain the established dividend policy in the immediate future. For the current year, the Board is pleased to announce a second interim dividend of 90 pence per share which, when added to the first interim dividend of 62 pence per share makes a total of 152 pence per share for the current year.

Our view continues to be that maintaining a cash balance of approximately £5 million is sufficient to facilitate operational and strategic agility both with respect to possible corporate or technological opportunities that might arise in the foreseeable future. We have therefore decided to distribute

surplus cash in our second interim dividend thereby maintaining our total distribution to shareholders at 152 pence per share, the same value as that paid for the previous financial year

Accordingly, dividends totalling 90 pence per share will be paid in November 2023. The shares will be marked ex-dividend on 9 November 2023 and the dividend will be paid on 24 November 2023 to shareholders on the register at close of business on 10 November 2023.

Changes in the rate of Corporation Tax came into effect from 1 April 2023 increasing the rate of tax from 19% to 25%. This affected the business for the last quarter of 2022/23 and will reduce full year cashflows in 2023/24.

Research and Future Developments

Over the next few years, the continued commercial development of the new troponin assays and their roll-out by our customers will have the most significant influence on Bioventix sales.

We have undertaken a range of new research projects in recent years and the table below illustrates our current view of their potential value and probability of success:

Increasing potential value ↑	High	Secretoneurin (CardiNor) Amyloid (Pre-Diagnostics)	Tau (Alzheimer's, own-risk)	
	Medium			
	Low		Industrial biomonitoring (benzene, isocyanates)	Pyrene biomonitoring
			Low	Medium
	Increasing probability of success →			

Whilst antibodies in the future pipeline are at stages of testing and development that do not allow us to make any prediction about their definitive value and influence on future revenues, there has still been encouraging progress.

Over the last few years, a considerable amount of lab resource has been allocated to the tau project and Alzheimer's disease (AD) diagnostics. AD is a complex disease that manifests itself differently across the

patient population. At a cellular level, nerve cells (neurons) become associated with amyloid (A) plaques that build up outside the neurons. This is followed by the build-up of tau (T) tangles inside the neurons. These pathological processes then result in neuronal cell death and the symptoms of neurodegeneration (N) that accompany this. This "ATN" framework is used by neurologists to define the disease pathway that progresses for many years before patient symptoms become obvious.

Recent clinical trials of AD therapeutics have produced remarkable results and there are now two therapeutic agents (Lecanemab from Eisai Pharma and Donenamab from Eli Lilly) that whilst not a cure, have been demonstrated to slow the disease process. Patients presenting early in the ATN pathway appear to benefit most from therapy and ATN assessments can therefore be used to screen for patients suitable for therapy and also for monitoring patients whilst on therapy.

The ATN status of patients can be defined with the use of PET scans using appropriate amyloid and/or tau contrast agents together with other assays for biomarkers in cerebral spinal fluid. It would be desirable if such diagnostic procedures could be replaced or augmented with cheaper convenient blood tests.

Bioventix has been working with the University of Gothenburg since early 2020 to create new antibodies to tau and to develop prototype assays for use in AD.

A leading blood biomarker for "A" is a phosphorylated form of tau called pTau217. A prototype assay from Gothenburg using an SMA has now been established which has performed well with frozen patient samples from a number of different cohorts.

The "effect size" (AD patients relative to controls) has been x2-4 which is similar to other leading groups and likely to be clinically useful. The percentage of false positives and false negatives is also relatively modest, confirming potential clinical utility.

For more scientific detail, see:

"A novel ultrasensitive assay for plasma p-tau217: performance in individuals with subjective cognitive decline and early Alzheimer's disease", Fernando Gonzalez-Ortiz, Journal of the Alzheimer's Association, accepted for publication October 2023.

A novel blood-based prototype assay for neurodegeneration (N) using another Tau SMA has also been developed in Gothenburg. This work clearly supports the potential utility of this blood test and further work is ongoing in Gothenburg with further publications planned.

For more detailed scientific information, see:

"Brain-derived tau: a novel blood-based biomarker for Alzheimer's disease-type neurodegeneration", Fernando Gonzalez-Ortiz, BRAIN 2022: 00, and: "Levels of plasma brain-derived tau and p-tau181 in Alzheimer's disease and rapidly progressive dementias", Fernando Gonzalez-Ortiz, Journal of the Alzheimer's Association, accepted for publication October 2023.

Precisely how Alzheimer's therapies will be adopted and how blood tests will be used to support these therapies will become clearer over the coming years. It is quite likely that large IVD companies will be part of this development and we have already sent sample SMAs to some interested parties, accepting that other tau antibodies and assays already exist. Expert neurology centres are likely to adopt "research use only" tests in advance of the availability of other tests through hospital-orientated IVD companies. The prototype Gothenburg tests are run on Quanterix (Billerica, MA) machines and so a partnership with Quanterix would be desirable in this research use field.

Pre-Diagnostics (in Oslo) and their clinical collaborators have two amyloid beta assays based on Bioventix antibodies available for research use. A current focus for Pre-Diagnostics is ARIA (amyloid related imaging abnormality) which is an important side-effect of new anti-amyloid drugs for Alzheimer's. Pre-Diagnostics assays relate to amyloid metabolism and could help screen for ARIA vulnerable patients, before or during treatment.

Our partners at CardiNor (also in Oslo) have continued with their work to try and identify the possible utility of secretoneurin in heart failure patients and in particular those patients who might be candidates for implantable cardiac devices (ICDs).

Our pyrene lateral flow system for industrial pollution biomonitoring completed a second field trial at a UK industrial site during quarter 2 of 2023. This went well and we plan to conduct additional site studies during 2024. The progress of the pyrene project has encouraged us to develop additional assays for benzene and isocyanates, also in the field of industrial health and safety. Benzene exposure is of relevance to the petroleum industry and isocyanates are hazardous chemicals used in the manufacture of polyurethane paints and plastics. This work will continue into 2024 and 2025.

Future Strategy

We have previously identified diagnostic biomarkers that we believe suit our antibody technology and have found academic collaborators who have seen merit in working with Bioventix. The tau project and our collaboration with the University of Gothenburg is an excellent example of this strategy and we will seek additional such opportunities in the future.

We will continue to rely on our core SMA antibody creation technology which consistently helps us to create superior antibodies for our research projects. We are also incorporating additional newer technologies where such technologies are helpful to us. We have successfully created “sandwich” assay formats for pyrene and THC/cannabis using a combination of primary SMA technology and a secondary synthetic “anti-complex” antibody created using the “antibody library” technology of a third party. The synergy of the two technologies provided unique solutions to pyrene and THC/cannabis and we will seek more such opportunities in the field of small molecule detection.

The Bioventix Team and Facility

The composition of the Bioventix team of 12 full-time equivalents has remained stable over the year, facilitating excellent performance and know-how retention. The past few years have been a challenging period for everyone and we are very grateful to the team at Bioventix for their dedication over this period. This has allowed us to adapt and modify our business to cope with changing circumstances and to maintain our progress.

Supply chain issues relating to plastics and chemical reagents have eased considerably since the pandemic, but price increases have been imposed by most suppliers. This has added further incentive to increase the productivity of our manufacturing processes.

“

We are also incorporating additional newer technologies where such technologies are helpful to us.

Conclusion and Outlook

We are pleased with our financial results for the year which we believe reflect steady growth in the use of our established products and the continued roll-out of the high sensitivity troponin assays.

Excellent technical progress has been made with our research projects and we anticipate that our pipeline of opportunities will create additional shareholder value in the later 2020s and 2030s. We look forward to further progress in the years ahead.

Strategic Report

Business Review

Please refer to the full business review which is covered in the Chairman and Chief Executive's statement on pages 01 to 15 and forms an integral part of the Strategic Report.

Principal Risks and Uncertainties

Investment in AIM securities

Investment in shares traded on AIM is perceived to involve a higher degree of risk than investment in a company whose shares are listed on the Official List. An investment in the Ordinary Shares may be difficult to realise. Prospective investors should be aware that the value of the Ordinary Shares may go down as well as up and that the market price of the Ordinary Shares may not reflect the underlying value of the Company. Investors may therefore realise less than, or lose all of, their investment.

Volatility of share price

The trading price of the Ordinary Shares may be subject to wide fluctuations in response to a number of events and factors, such as variations in operating results, announcements of innovations or new services by the Company or its competitors, changes in financial estimates and recommendations by securities analysts, the share price performance of other companies that investors may deem comparable to the Company and news reports relating to trends in the Company's markets. These fluctuations may adversely affect the trading price of the Ordinary Shares, regardless of the Company's performance.

Dependence on key employees

The Company's future success is substantially dependent on the continued services and performance of its senior management and other key personnel in the various areas of the Company's business. The loss of the services of certain key employees or the inability to recruit personnel of the appropriate calibre could have a significant adverse effect of the business of the Company.

Technology

For SMAs that are in the research and development phase at Bioventix's customers, there is a risk of technical failure. This can occur as assays fail to perform with the desired precision. Failure can also arise when external "field trials" at hospitals using prototype assays identify patient samples that give erroneous results.

For projects at the early phase of Bioventix's pipeline and others that may feature in the medium to long term, there is a risk that new antibody technologies available to third party companies eclipse Bioventix's SMA technology and these new technologies produce superior antibodies. An example of such technologies includes monoclonal antibodies from rabbits.

The Company may come to face competition from other businesses that possess skills and technologies that are not known or available at present. Such competition could prevent the Company from achieving sales. Further, competitors may develop products or technologies that make Bioventix's technology obsolete.

The Company may also face claims that its use of its technology infringes the intellectual property rights of others and may become involved in legal proceedings in connection with such claims. The Company may also generally face legal proceedings in the course of its business. The Company cannot preclude the possibility that litigation may be brought against it from time to time. Any such claims, legal proceedings and litigation may have a material adverse effect on the financial performance and/or the business of the Company. The Company's insurance may not cover all or any part of any claims which customers or third parties may bring against the Company or may not be sufficient to protect the Company against any liability that may be imposed on it.

Regulatory environment

The medical diagnostics field in which the Company operates is highly regulated. Whilst the Company's antibodies are not themselves regulated, the tests in which they are used by the Company's customers must be approved by regulatory bodies such as the US Food and Drug Administration before they can be commercialised. Achieving and maintaining such approval by Bioventix's customers is therefore necessary to the continued success of the Company.

Distribution risk

Bioventix's antibodies are derived from sheep and therefore might be regarded as a sheep-derived product. Any future restriction on the distribution, import/export and use of sheep products or sheep-derived products that might be imposed by government or other authorities for whatever reason could materially affect Bioventix's business.

Market risk

There has been a process of merger and acquisition within the blood-testing machine companies who are Bioventix's customers. Such activity can result in the rationalisation of individual machines. Therefore, machines that feature Bioventix antibodies could be replaced by machines that do not. Even in the absence of such mergers and acquisitions, machines can be developed within a company such that assays featuring Bioventix antibodies are withdrawn or replaced.

Competition

Whilst the Company does not operate under granted patents, the Directors believe that the Company has a significant set of know-how and skills that are unique. The Company may face competition from companies in business at present or not yet established that are or will be better funded, staffed or equipped than the Company. There is also a risk that the Company's principal target customers (blood-testing manufacturers) may choose to use alternative antibodies. Competition from any source could adversely affect the Company's ability to generate income.

Financial Risk Management

Foreign exchange risk

The majority of the Company's revenues are denominated in either US Dollars or Euros whilst the majority of its operating costs are in Sterling. The Company is therefore exposed to significant foreign currency risk due to fluctuations in exchange rates. This may result in gains or losses with respect to movements in exchange rates which may be material and may also cause fluctuations in reported financial information that are not necessarily related to the Company's operating results.

Taxation

Any change in the Company's tax status or in taxation legislation could affect the Company's ability to provide returns to shareholders. Statements in this document concerning the taxation of investors in Ordinary Shares are based on current UK tax law and practice which is subject to change. The taxation of an investment in the Company depends on the individual circumstances of investors.

Credit risk

The main credit risk of the Company is attributable to its trade debtors. The amounts presented in the Balance Sheet are net of any bad debt provision.

Interest rate risk

Due to the lack of borrowing within the Company the interest rate risk is deemed to be low, and there are no specific policies in place to review this.

Price risk

The key income stream is that of royalties and these prices are set at the start of the royalty agreement, thus limiting the exposure to sales price risk. The key cost to the Company is that of its staff and this is a manageable cost price risk.

Liquidity risk

The Company maintains a strong cash balance, and always looks to manage risks to ensure sufficient liquidity is available to meet foreseeable needs and that cash is invested safely and profitably. Short-term flexibility is achieved by the use of money markets to deposit excess cash which is not required in the short term. The directors prepare rolling cashflow forecasts.

COVID-19

The global implications of the COVID-19 pandemic may affect the Company's revenue and profitability. COVID-19 has adversely affected some routine diagnostic pathways and the willingness of patients with concerning symptoms to present to healthcare professionals. Any delays in diagnosis and treatment that arise may defer revenue from both the supply of antibodies and also the royalty revenue arising from their use in testing.

Brexit

There is still uncertainty surrounding the future trading relationship between the United Kingdom and member states within the European Union. In the event of new regulations being adopted these could add complexity and delays to the Company's operations; however, there is currently no indication that any renegotiation of or change in the United Kingdom's trading relationship with member states within the European Union will affect the regulations that are relevant to Bioventix plc.

Ability to pay future dividends

The Company's ability to pay dividends in the future is dependent upon the extent to which it has distributable reserves and cash available for this purpose. The Company can give no assurance to shareholders that it will, or will not be able to, pay dividends in the future.

Financial Instruments

The Company's principal financial instruments comprise bank balances, trade creditors and trade debtors. The main purpose of these instruments is to finance the Company's operations.

Due to the nature of the financial instruments used by the Company there is exposure to exchange rate fluctuations, but no other significant price risk. The Company's approach to managing other risks applicable to the financial instruments concerned is shown below.

In respect of bank balances, the liquidity risks are managed conservatively by maintaining deposits

of short to medium duration in High Street Banks, thereby reducing the risk of financial default.

Trade debtors are managed in respect of credit by maintaining a regular dialogue with customers, the majority of whom are multinational diagnostics companies.

Risks in relation to exchange rate fluctuations are discussed on page 76.

Key Financials

£12.816

million turnover

£10.134

million profit before tax

2023

Year

2022

Year

£11.719

million turnover

Financial Key Performance Indicators

Financial Key Performance Indicators

	2023 £	2022 £
Turnover	12,816,225	11,719,271
Profit before tax	10,134,443	9,278,025
Cash balances	5,715,819	6,126,650

Revenues for the year of £12.82m (2022: £11.72m) were 9.36% up on the previous year. Profits before tax have increased by 9.14% year on year.

Cash balances at 30 June 2023 of £5.72m (2022: £6.13m) have decreased in the year.

The Company monitors various financial key performance indicators as part of its accounting and management reporting process.

The directors do not anticipate any material change in the nature of the Company's operations in the foreseeable future.

Other Key Performance Indicators

The future growth of the Company relies on its research and development activities creating and being able to manufacture unique antibodies, that are required by our customers. The directors review and discuss the strategy and performance of our research and development, regularly throughout the year.

The Company seeks to ensure that responsible business practice is fully integrated into the management of all its operations and into the culture of all parts of its business. It believes that the consistent adoption of responsible business practice is essential for operational excellence, which in turn is expected to ensure the delivery of its core objectives of sustained real growth in future profitability.

In a company this size the directors consider there are collectively numerous non-financial performance indicators but none individually are key.

• Directors' statement of compliance with duty to promote the success of the Company

The Directors are clear on their duty under Section 172 of the Companies Act 2006 to act in the way which they consider, in good faith, would be most likely to promote the success of Bioventix plc ("the Company") for the benefit of its members as a whole and, in doing so, to have regard (amongst other matters) to:

- the likely consequences of any decision in the long term;
- the interests of the Company's employees;
- the need to foster the Company's business relationships with suppliers, customers and others;
- the impact of the Company's operations on the community and the environment;
- the desirability of the Company maintaining a reputation for high standards of business conduct; and
- the need to act fairly between members of the Company.

The Directors are committed to effective and meaningful engagement with our key stakeholders. The directors seek to actively identify and positively engage with key stakeholders in open and constructive dialogues. We believe that such engagement is critical to the long-term success of the Company and, by canvassing and understanding the perspectives of our stakeholders and building good relationships, the Board is able to take their views into account in discussions and decision-making.

Further details are contained in the Sustainability Report and Governance Report on pages 32 to 51.

This report was approved by the Board and signed on its behalf.

Directors' Report

Directors' Report

The directors present their report and the financial statements for the year ended 30 June 2023.

Director's responsibilities statement

The directors are responsible for preparing the strategic report, the directors' report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice), including Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland'. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies for the Company's financial statements and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and

explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Principal activity

The principal activity of the company during the year was that of the development and supply of antibodies.

Business review

This company is required to produce a business review complying with the requirements of the Companies Act 2006. This can be found in the Chairman and Chief Executive's statement on pages 01 to 15. In addition to this, information on the principal risks and uncertainties and key performance indicators can be found in the strategic report within pages 16 to 25.

Research and development

During the year research and development costs were incurred of £1,201k (2022: £975k).

Dividends

The profit for the year, after taxation, amounted to £8,372,241 (2022: £7,674,151).

A dividend of 100p per share was paid in November 2022 from the profits generated in the previous financial year. This equated to £5,209,333 (November 2021: £5,209,333).

The Board have declared and paid an interim dividend of 62p per share in April 2023. This equated to £3,233,725 (April 2022: £2,708,853).

Following the end of the year, a dividend of 90p per share has been declared.

Substantial shareholdings

Shareholdings in the Company of greater than 3%, excluding Directors' shareholdings which are disclosed on pages 55 and 56, as advised at 27 October 2023 are as follows:

Holder	%
Sanford DeLand	14.5
Liontrust	11.0
Gresham House	8.9
Hargreaves Lansdown Stockbrokers	6.6
Rathbones Investment Management	6.2

Directors

The directors who served during the year were:
Peter Harrison
Ian Nicholson
Nick McCooke
Bruce Hiscock
Joanne Pisani (appointed 30 May 2023)

Directors' third party indemnity provisions

During the year the Company had in place Directors and Officers Insurance.

Disclosure of information to auditors

Each of the persons who are directors at the time when this Directors' report is approved has confirmed that:

- so far as the director is aware, there is no relevant audit information of which the Company's auditors are unaware, and
- the director has taken all the steps that ought to have been taken as a director in order to be aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

Auditors

The auditors, Kreston Reeves, will be proposed for reappointment in accordance with section 489 of the Companies Act 2006.

This report was approved by the Board on 27 October 2023 and signed on its behalf.

Ian Nicholson

Our purpose at Bioventix is to create, manufacture and supply high affinity sheep monoclonal antibodies for use in diagnostic applications.

Sustainability Report

Our purpose at Bioventix is to create, manufacture and supply high affinity sheep monoclonal antibodies for use in diagnostic applications. The use of our products in IVD tests allows clinicians to accurately and economically diagnose and then appropriately treat life-changing diseases and conditions, thereby improving outcomes and the lives of populations across the world.

Bioventix is a small organisation; however, we consider a commitment to sustainability a core component of our culture, along with our responsibility to act with the highest standards in all of our business dealings and interactions with stakeholders.

We therefore always aim to:

- respect, protect and keep safe members of staff, customers, collaborators, partners, stakeholders and shareholders;
- protect the environment; and
- enhance the reputation of Bioventix in the markets where our products are used and in the communities in which we are present.

The application of these guiding values helps us to ensure that we provide a safe and fulfilling work environment with a strong culture of ownership and belonging, create a business with which other like-minded businesses and individuals will wish to collaborate and trade, make a positive, sustainable, enduring, well-founded and demonstrable contribution to the communities in which we work and build value for our shareholders.

This Sustainability Report is divided into the three key areas of Environmental, Social and Business Governance. This report is then followed by the Governance Report.

Environmental

Although our products are used all around the world, Bioventix is a small organisation with laboratory and administration facilities in one location in the UK occupying circa 600 square metres. We employ 17 people, many on a part-time basis. Our environmental impact is therefore relatively small.

We do however recognise that making improvements in our work to further reduce our environmental impact is important and can have a cumulative effect. We aim to reduce our use of consumables to a minimum without compromising quality or safety.

Measuring and then improving the efficiency of our energy usage and reducing the energy we consume matters to us. In 2023/24 we have started to collate greater detail on the energy we use, when we use it and how we use it. This information will allow us to identify further areas of improvement and to set some meaningful targets to reduce energy consumption at our laboratory in Farnham.

We adhere strictly to the specified maintenance schedules for laboratory and other equipment and continue to ensure that any replacement equipment we require is selected not just on cost or operational performance but also takes into account our commitment to improve our water usage and energy efficiency. At our laboratory in Farnham the energy we use is sourced from our electricity supplier. We maintain a UPS backup diesel generator which provides for, and mitigates the risk of, any power outages and which, apart from our regular testing, was not used in 2022/23. We encourage all staff to reduce wastage, not to print unnecessarily, to optimise the use of lighting and heating and cooling units and switch off any electrical equipment when not in use.

ESG

The travel restrictions in place during the COVID-19 pandemic led to the greater adoption of technology to facilitate meeting business partners based around the world. However, we consider that face-to-face interaction with customers and physical presence at industry conferences and events has significant benefits that cannot be replicated by technology. During the year our CEO therefore conducted a limited amount of business travel both in the UK and internationally including, in July, attending the Association for Diagnostics and Laboratory Medicine conference in Anaheim, California. This trip also combined visits with some of our largest customers elsewhere in the USA. There is little option other than air travel between cities to manage such a schedule; however, all our CEO's car hire requirements were covered by electric vehicles.

We will continue to adopt technology to facilitate virtual meetings wherever suitable and will always recognise the impact that business travel may have on the environment.

“

We consider a commitment to sustainability a core component of our culture.”

Social

We maintain regular communication and dialogue with our stakeholders to better understand their needs and to factor these into our decision-making and activities.

Our people

Bioventix is a small organisation with 17 employees. We are solely based in the UK and apply fair employment practices and comply with all legislation and requirements regarding employment, pay, working hours and annual and statutory leave. We invest in healthy and safe workplaces and our employee policies, amongst others, include Equal Opportunities, Anti-harassment and Bullying, Health and Safety, GDPR, Flexible Working, and policies for Parental, Compassionate and Dependant Care Leave.

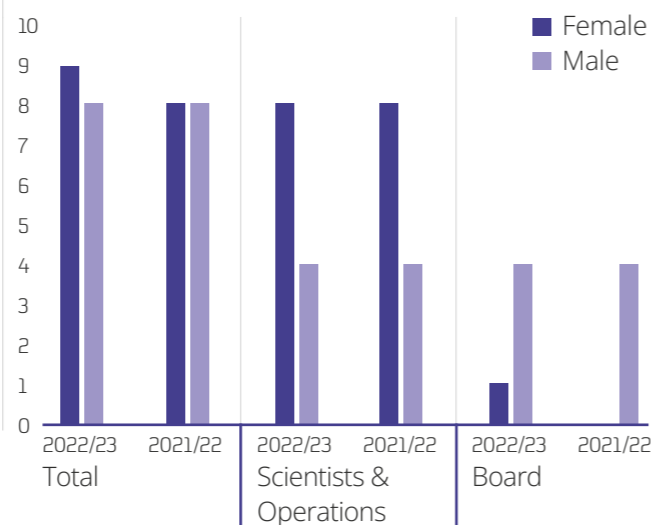

A safe and clean work environment is fundamental to our creation and manufacture of SMAs. By promoting a culture of safe operations, we aim to secure the wellbeing and efficiency of our team and establish a supportive and inclusive environment. During 2022/23, two members of our team underwent mental health first aid training, following which we created our Mental Health and Wellbeing policy which was approved and introduced in May 2023.

We also have well established policies that provide guidance on ethical work practices; these include Anti-corruption and Bribery, Whistleblowing and the Company's Modern Slavery Act Statement.

Throughout the COVID-19 pandemic, the Company carried out full detailed risk assessments, monitored and where necessary adapted working practices to ensure compliance with UK Government requirements and restrictions and to ensure a safe and secure work environment. In addition, whenever necessary and appropriate, the Company has supported staff working from home. Whilst many of the more serious impacts of the pandemic have abated, the Company retains the flexibility to add, adapt or adopt working practices to reapply any necessary additional safety and security measures in our working environment should it be required.

Bioventix has a very flat management structure. Interaction between the Executive Directors and staff is a daily event and very much part of the culture of the Company. In addition, to ensure that all staff are aware of the Company's strategy and performance, all staff are notified when interim and full-year Annual Reports are published and the Chief Executive conducts a briefing to which all staff are invited where full information is provided and discussed in an open and inclusive environment.

Diversity Headcount

Women represent 53% of the total Bioventix workforce.

We have twice as many women as men in our scientist and support teams at Bioventix and hourly pay rates for female employees in these teams are 101% of those of male employees. This reflects the longevity of the team of female scientists who on average have circa two years more service than our male scientists.

Internally at Bioventix, we place great value on our team and wherever it is practicable we seek ways to help them as their lives change. We are very supportive of new parents and their desire to continue to work in our business and we have four employees who work on a part-time basis having

returned to Bioventix after parental leave. In addition, for those long-serving employees who wish to address their work-life balance and seek to reduce their time commitment to work, we have made adjustments to help them transition to a less than full-time role whilst still retaining valuable experience, knowledge and skill in the business

The Board of Bioventix plc now has one female director, 20% of our Board. Jo Pisani joined our Board in July 2023 bringing wide and different experience of developing strategy and managing change in life science and biotech businesses.

Diversity recognises similarities and differences, it is defined more broadly than race, religion, gender and ethnicity and, as a small operation, we also address it through a diversity of thinking, background, skill set and age. Our processes and communications are open and all-inclusive and we positively encourage all of our team to bring new ideas, critically challenge and add their knowledge and experience to improving the operation and performance of our business.

We recently celebrated the 20th birthday of Bioventix plc and several of our team have been with the business throughout its life. Across the Company the average length of service at 30 September 2023 was 10 years 11 months, an increase of 5 months since 30 September 2022; our scientists have all been with the business for more than 5 years and our overall retention rate has been unchanged at 100% in each of the last 2 years.

Our shareholders

Bioventix communicates regularly with shareholders through the Annual Report and Accounts, Interim Statements, RNS announcements, our AGM and other investor meetings and presentations. All published information is available to all stakeholders on the Bioventix website (www.Bioventix.com).

Customers, research and academic partners

Our products are used by large multinational in vitro diagnostic companies across the world. Whilst Bioventix does not have any contact with patients

whose conditions may be diagnosed using our products, we recognise the vital needs our customers meet and the impact our technology can have in improving outcomes for those patients.

Bioventix is a research-driven organisation which seeks to develop novel approaches in the diagnostics field. As such, the Company engages and collaborates on a number of projects with a variety of other companies and research institutions. The purpose of these relationships is to access relevant technologies and programmes to add value to the Company's research portfolio. However, often the exchange of knowledge and views, whilst building relationships that may be important in future, contributes to the wider research community, thereby potentially adding value to the solution of problems unrelated to our technology.

The wider community

Bioventix, like all businesses, has responsibilities to the wider communities in which we operate. We operate a Quality Management System based on the principles of ISO 9001:2015 (Quality Management System Requirements) and ISO 13485:2016 (Medical Devices – Quality Management Systems – Requirements for Regulatory Purposes). Our processes, procedures and operations are subject to regular internal audit by our Quality Management Team and to external audit by our customers who have the right to inspect our operations under the terms of our contracts with them. During 2023 the team considered, reviewed and selected a cloud-based solution to automate the recording, management and communication of quality, production, research and development and operational processes replacing previously manual and spreadsheet-based documentation.

Our research and our strategy seek to apply our antibody technology to appropriate problems facing our customers, partners and, potentially, the wider community.

Ageing populations and the growth in the number of patients suffering with dementia-related conditions are significant challenges facing developed societies.

Our work with researchers in this field to develop antibodies for diagnostic tests for the earlier identification of such conditions is not only an activity closely related to the Company's historic product set but also allows us to contribute to addressing a growing challenge.

The provision of pollution-free, safe environments is a core responsibility for governments and many commercial and non-governmental organisations. Our work to develop simple tests with accessible and timely analysis and results has been expanded to cover other pollutants and industries, adding to the range of solutions addressed by our products.

All of our projects and research are undertaken with commercial objectives; however, we are acutely aware that our contribution to developing any solutions to these challenges will benefit the wider community and the environment that we serve.

Business Governance

Bioventix is committed to conducting our business in an ethical and responsible manner and to complying with all applicable laws and regulations. We require all our employees and all third parties acting on our behalf to behave honestly and to operate with integrity.

We have a comprehensive suite of policies covering the conduct and ethics of all aspects of our business including anti-bribery, modern slavery, and safeguarding. Our employee induction process includes sessions on HR, health and safety, bribery, modern slavery, whistleblowing, and data protection to ensure all new employees understand our ways of working and our expectations of them. Our recruitment, development and review programmes safeguard our commitment to equity, diversity and inclusion throughout our Company.

The detail of our commitment and approach to governance is explained in the Governance Report that follows.

Governance Report

The Board of Directors

The Board comprises, in addition to the Chairman and Independent Non-Executive Director, two further Independent Non-Executive Directors and two Executive Directors.

Chairman's Introduction to the Governance Report

As Chairman of Bioventix plc (“Bioventix” or “the Company”) it is my responsibility to ensure that the Board is performing its role effectively and has the capacity, ability, structure and support to enable it to continue to do so. We believe that a sound and well understood governance structure is essential to maintain the integrity of the Company in all its actions, to enhance performance and to impact positively on our shareholders, staff, customers, suppliers and other stakeholders.

Bioventix is a small organisation with fewer than 20 employees; however, we aim to continually update and improve our approach to corporate governance. Shareholders will therefore once again see developments in this year's Annual Report in our Sustainability Report, on page 32 to 37, adding detail to our approach to our responsibility for Environmental, Social and Governance (ESG).

The Company's shares are traded on the Alternative Investment Market (“AIM”) on the London Stock Exchange and as such the Company is subject to the ongoing requirements of the AIM rules for companies. The Board has adopted the QCA Corporate Governance Code (“the Code”) which continues to be the most appropriate benchmark for the Company in measuring our application of good governance principles. These 10 principles provide us with a clear basis for assessing our performance as a Board and as a company.

In the sections that follow we set out our governance structures along with an overview of how Bioventix applies the Principles of the Code and reports from the Board Committees. Compliance with the Code and corporate governance requirements generally are reviewed on an ongoing basis by the Board and form part of the annual Board Performance Review process.

Ian Nicholson
Chairman and Independent
Non-Executive Director

Ian was appointed as Non-Executive Chairman of Bioventix in November 2004. Ian is also an Operating Partner at Advent Life Sciences LLP and a Trustee of LifeArc, a leading UK medical charity. From 2013 to 2021 Ian was Chief Executive Officer of F2G Ltd, an antifungal drug development company and from 2004 to 2012 Ian was Chief Executive of Chroma Therapeutics Limited, a drug discovery and development company. He previously held the position of Senior Vice President, Business Development at Celltech Group plc, then the UK's largest biotechnology company. He has extensive experience in licensing, mergers and acquisitions, and market development in the UK, Europe and the US. Ian is a member of the Audit Committee, the Nomination Committee and the Remuneration Committee.

Nicholas McCooke
Independent Non-Executive
Director

Nick was appointed as Non-Executive Director of Bioventix in 2014 when the Company was admitted to AIM. Nick has worked in the biotech industry for over 30 years and is now an independent consultant providing operational, strategic and commercial advice and hands-on support to biotech companies. He has led several successful companies. He was the founding CEO of Solexa, the Cambridge University spin-out where he built the team that invented and developed Next Generation DNA sequencing. Subsequently he was CEO of Belgian company Pronota, which translated novel protein biomarkers into diagnostics, and where he gained much knowledge and expertise in the diagnostic development and market access process. Most recently he was CEO of DNA sequencing technology company Longas pty Ltd. He has an MBA from the London Business School. Nick is Chairman of the Remuneration Committee and Nomination Committee and is a member of the Audit Committee.

Joanne Pisani
Independent Non-
Executive Director

Jo was appointed as a Non-Executive Director of Bioventix in May 2023. She is a Chartered Engineer with a distinguished background in the Pharmaceutical, Life Sciences and Biotech sectors. She held roles for both GSK and BP in strategy, commercial and operational functions before working in strategic consultancy, latterly leading PwC's UK Pharmaceutical and Life Sciences practice assisting clients with developing strategy, designing and implementing transformational change and completing M&A transactions. Jo is a passionate supporter of critical public health issues, such as tackling dementia, rare diseases and anti-microbial resistance. She focuses on supporting charities, universities and business start-ups. She is chair of Birmingham's Precision Health Technology Accelerator and chairs the Advisory Board for London's MedCity. Jo also serves on the boards of the UK Dementia Research Institute, LifeArc, The RSA Group, London and Partners and Beacon. She is also a Non-Executive Director and strategic advisor to biotech companies in the UK, Finland and Spain. Jo is Chair of the Bioventix plc Audit Committee, and she is also a member of both the Remuneration and Nomination Committees.

Peter Harrison
Chief Executive
Officer

Peter has worked in the field of antibody technology since 1986 and has extensive experience of the development and commercialisation of antibody technologies. He graduated in Natural Sciences from Clare College Cambridge in 1980 and joined the graduate training scheme at Shell Chemicals UK Ltd. In 1986 he joined Celltech Ltd to manage their contract antibody production business and in 1991 he joined KS Biomedix Ltd and helped to establish sheep monoclonal antibody technology at their Farnham research laboratory. Following the acquisition of KS Biomedix Limited by Xenova plc in 2003, he led a management buy-out that resulted in the formation of Bioventix and he has led the subsequent commercial development of the Company.

The Independent Non-Executive Directors, Ian Nicholson, Nick McCooke and Jo Pisani, are all considered as independent by the Board.

Ian Nicholson and Nick McCooke were awarded share options under the Company's Share Option Plan in 2017, which were exercised during the year, and in 2020. The Board recognises that Non-Executive Directors should not normally participate in performance-related remuneration schemes or have a significant interest in a company share option scheme. However, the QCA Code acknowledges that where performance-related remuneration is under consideration, it should be proportionate, shareholders must be consulted and their support must be obtained. Prior to the issue of share option awards to Ian Nicholson and Nick McCooke, in 2017 and in 2020, the Board consulted with all material shareholders and there were no dissenting views. The Board believes that the participation, by the Non-Executive Directors, in the Company's share option scheme has not and does not impair their ability to act as Independent Non-Executive Directors. During the year the share options issued to Ian Nicholson and Nick McCooke in 2017 were exercised in full, and currently it is not the Board's intention to make further share option awards to the Non-Executive Directors.

Bruce Hiscock
Chief Financial
Officer

Bruce was appointed to the Board in 2020. He is a member of the Institute of Chartered Accountants of Scotland (ICAS) and was previously CEO and CFO of everyLIFE Technologies, a technology business delivering digital care planning solutions to social care providers. Prior to this he was the Managing Director of MITIE Security Systems, the CEO of Protec plc, an AIM-listed security and technology services business, and, over a 30-year career, has held several CFO roles at fast-growing listed and private companies.

Corporate Governance statement and compliance with the principles of the QCA Code

The Company's shares are traded on the Alternative Investment Market ("AIM") on the London Stock Exchange and as such Bioventix is subject to the ongoing requirements of the AIM rules for Companies. As stated in the Chairman's introduction, the Board has adopted the QCA Code, and the following table summarises how the 10 principles of the QCA Code are applied by the Board. The Board has undertaken an annual review of the corporate governance framework that Bioventix operates and considers it to be effective and proportional to the size, risks, complexity and operations of Bioventix and reflective of the Company's culture and values.

01

Establish a strategy and business model which promotes long-term value for shareholders

The Company's strategy and business model is described in the Company's Annual Report. The Company generates long-term value for shareholders and achieves sustainable shareholder returns by delivering its strategy through the implementation of its business model. Key requirements of both are:

- i. The Company's understanding of and supply to the global markets for diagnostic antibodies;
- ii. The Company's research activities and the identification of suitable opportunities within those markets for the Company to target allied to the subsequent development and manufacture of applicable and commercially viable products;
- iii. The employment and subsequent training and development of expert individuals; and
- iv. The development of business and research relationships with customers, academics, partners and suppliers.

The Annual Report contains details of a number of risks and uncertainties that may represent challenges to the execution of the Company's strategy and business model, and how such risks and uncertainties are managed by the Company.

02

Seek to understand and meet shareholder needs and expectations

The Company recognises the importance and the benefit of engaging with its shareholders.

Bioventix has an established programme of engaging openly with shareholders and communicates on an ongoing basis on via its website, on publication of its full-year and half-year results and at the AGM.

Trading updates and other announcements are made on RNS.

The Board also engages with shareholders to understand their needs and expectations primarily through meetings with Executive Directors

when presenting financial results but as required at other times (this applies in the main to institutional investors or those with significant shareholdings) including at the AGM to which all shareholders are welcome and encouraged to ask questions of the Board. Formal feedback from shareholder meetings is provided by the Company's broker and discussion of this feedback is a standard item on the Board's agenda.

The Non-Executive Directors may be contacted by shareholders who wish to raise matters and also attend many of the investor meetings at both the full-year and half-year results.

The Company's website contains information on the Bioventix business, corporate information and specific disclosures required under AIM rules and the QCA Code.

03

Take into account stakeholder and social responsibilities and their implications for long-term success

The Board recognises that it is responsible not only to the Company's shareholders and employees but also to a wider group of stakeholders including customers, suppliers, research partners and the communities in which Bioventix operates. Whilst Bioventix does not have any contact with patients whose conditions are diagnosed using tests incorporating its products, the Company aims, through its technology, to improve outcomes for those patients.

Sound ethical values and behaviours are crucial foundations for the Company; for the successful achievement of corporate objectives; and for meeting the needs of a sophisticated client base.

Bioventix aims to follow best practice by:

- treating all stakeholders fairly;
- communicating openly and honestly in all shareholder and stakeholder information;
- providing safe, secure and healthy working conditions for all employees;
- promoting equity, diversity and inclusion, judging neither by race, nationality, religion, age, gender, sexual orientation, disability or political opinion and treating everyone with respect;
- observing and complying with the laws and regulations in each country in which it conducts business; and
- promoting Bioventix's success for the benefit of all stakeholders – shareholders, employees, partners, customers, suppliers and the local community.

04

Embed effective risk management, considering both opportunities and threats, throughout the organisation

The Company opposes modern slavery in all its forms and will try to prevent it by any means that it can. It is expected that anyone who has any suspicions of modern slavery within the business or the supply chain will raise their concerns without delay. In light of the Modern Slavery Act 2015, the Board carries out annual reviews of internal measures to ensure the Company is doing what it can to prevent slavery and human trafficking.

The Board is responsible for the Company's system of internal controls and for reviewing its effectiveness. The system is designed to manage, rather than eliminate, the risk of failure to achieve the execution of the Company's strategic objectives and business model.

The principal elements of the Company's internal control system include:

- Close management of the day-to-day activities of the Company by the Executive Directors;
- Defined lines of responsibility and delegated authorities;
- The preparation of revenue, cost and capital forecasts which are reviewed regularly during the year; regular monitoring of management information and financial data; reporting to and monitoring by the Board including comparison with financial forecasts;
- Implementation and use of standard, approved accounting software to account for and report financial transactions and to analyse and report Company performance;
- Audit Committee review of audit plans, published financial information and reports from the Company's external auditor;
- Quality management systems, maintained in house and audited where required by customers.

Each year on behalf of the Board, the Audit Committee reviews the effectiveness of these systems. This is achieved primarily by a comprehensive review of risks which cover both financial and non-financial issues potentially affecting the Company and from discussions with the external auditor. Details of these risks, and their management, are contained in the Company's Annual Report.

The Board is not aware, to the best of its knowledge, of any significant failings or weaknesses in the system of internal control. On the recommendation of the Audit Committee, the Board has determined that the Company does not require an internal audit function due to the small size of the administrative function and the high level of Executive Director involvement in the day-to-day management of the business and the review and authorisation of activity, commitments and transactions.

05

Maintain the board as a well-functioning, balanced team led by the Chairman

Where the management of operational risk requires outside advice, this is sought from expert parties, and the Company has put measures in place to protect itself against supply failures including insurance and contingent stock.

The purpose of the Board is to ensure that the business is managed for the long-term benefit of all shareholders, whilst at the same time having regard for employees, customers, suppliers and our impact on the environment and the communities in which Bioventix operates. The full Board is responsible and accountable to the shareholders for the management and success of Bioventix and to provide effective controls to assess and manage risks in the Company.

There is a formal schedule of matters specifically reserved for the Board that includes matters relating to strategy and management; structure and capital; financial reporting and controls; internal controls; contracts; communications; board membership and other appointments; delegation of authorities and corporate governance.

The Company has three Non-Executive Directors, each considered to be independent by the Board. Ian Nicholson, who was appointed as Non-Executive Chairman of the Company in 2007, is considered by the Board to remain independent of the management and free to exercise independence of judgement. The other Non-Executive Directors are Nick McCooke, who was appointed in 2014, and Jo Pisani, who was appointed in 2023.

The Board meets on a minimum of four occasions spread across each year timed to align with the Company's financial reporting and trading calendars. This frequency is considered appropriate to the size and complexity of the Company and additional meetings are held as required.

The Board is supported by an Audit Committee, a Remuneration Committee and a Nominations Committee, each with delegated duties and responsibilities. The Board and its Committees receive appropriate and timely information prior to each meeting. A formal agenda is produced for each meeting and Board Committee papers are distributed several days before meetings take place. Any director can challenge proposals with decisions being taken after discussion. Any director can ask for a concern to be noted in the minutes of the meeting which are circulated to all directors. Specific actions arising from meetings are agreed by the Board or relevant committee and then followed up by management.

06

Ensure that between them the directors have the necessary up-to-date experience, skills and capabilities

All relevant directors attended all Board and Board Committee meetings during the year with no absences. All directors spend such time as is necessary to effectively carry out their roles and directors have access to all and any advice or services needed to enable them to carry out their roles and duties.

The Nomination Committee is responsible for identifying and assessing the suitability of candidates to fill any vacancies on the Board, as well as assessing the appropriateness of the size and composition of the Board as Bioventix grows and develops.

The directors of the Company are:

- Ian Nicholson, Non-Executive Chairman
- Peter Harrison, Chief Executive Officer
- Bruce Hiscock, Chief Financial Officer
- Nicholas McCooke, Non-Executive Director
- Joanne Pisani, Non-Executive Director

The skills and experience of the Board are set out in their biographical details included above on pages 42-43 and are considered by the Board as representing an appropriate range of capabilities needed to deliver the strategy of the Company for the benefit of its shareholders over the medium to long term. The experience and knowledge of each of the directors gives them the ability to constructively challenge strategy and to scrutinise performance. All directors are able to take independent professional advice in the furtherance of their duties, if necessary. In addition, the Board is assisted by Ian Farrelly, the Company Secretary, whose services are retained through a contract with Cargil Management Services Limited, a professional company secretarial services provider. The directors have direct access to the advice and services of the Company Secretary and of course the Chief Financial Officer if required.

At each Annual General Meeting ("AGM") one third of the directors are subject to re-appointment by rotation under the Company's Articles of Association, as are directors who have been appointed during the year. However, in line with best governance practice, all directors, being eligible, will be seeking re-appointment by shareholders at the Company's forthcoming AGM.

07

Evaluate board performance based on clear and relevant objectives, seeking continuous improvement

The Board is mindful that it needs continually to monitor and identify ways in which it might improve performance and that the assessment of board performance through adoption of a formal process is a useful tool for enhancing board effectiveness.

The collective performance of the Board is reflected in the overall success of the business. Evaluation of the performance of the Board, its Committees and individual members is made annually utilising a formal board evaluation process led by the Chairman, assisted by the Company Secretary.

A Board Performance Review was held during the year by the Board; it was determined that the Board, its Committees and individual directors were working well and certain enhancements were agreed in relation to the operation of the Board.

Alongside this annual formal evaluation the Chairman routinely assesses the performance of the Board and its members and discusses any issues with the relevant directors.

Succession planning is recognised as a material topic for the Company and is the responsibility of the Nomination Committee that makes recommendations to the Board concerning Board appointments.

08

Promote a corporate culture that is based on ethical values and behaviours

The Board recognises that its decisions will inform the corporate culture of the Company and this in turn will affect the performance of the business. The Board is also conscious that the tone and culture that it sets will greatly impact all aspects of the Company and the way employees behave and operate. The importance of sound ethical values and behaviours is crucial to the ability of the Company to successfully achieve its corporate objectives whilst, in particular, meeting the exacting demands of a sophisticated customer base. The Company's culture and ethical approach to business is reflected in the way the Company has been able to develop long-term and fruitful relationships with its clients and in the longevity of the employment of many members of staff.

The Company seeks to ensure that responsible business practice is fully integrated into the management of all its operations and into the culture of all parts of its business. It believes that the consistent adoption of responsible business practice is essential for operational excellence, which in turn is expected to ensure the delivery of its core objectives of sustained real growth in future profitability.

09

Maintain governance structures and processes that are fit for purpose and support good decision-making by the board

The Company maintains appropriate governance structures and processes according to its size and complexity.

There is a clear division of responsibility between the Non-Executive Chairman and the Chief Executive. The Chairman is responsible for running the business of the Board and for ensuring appropriate strategic focus and direction. The Chief Executive is responsible for proposing the strategic focus to the Board, implementing it once it has been approved and overseeing the management of the Company.

The role of the Independent Non-Executive Directors includes questioning and challenging the Executive Directors and assisting where possible in developing strategic proposals, reviewing and commenting on the integrity of the Company's financial reporting systems and the information they provide; recommending appropriate standards of corporate governance; reviewing internal control systems; ensuring that risk management systems are robust and reviewing corporate performance and ensuring that such performance is reported consistently, accurately and promptly to shareholders. The roles of the Board and its Committees are described in section 5 above.

Compliance with the Code and corporate governance requirements generally are reviewed on an ongoing basis by the Board and within the annual Board Performance Review process.

10

Communicate how the Company is governed and is performing by maintaining a dialogue with shareholders and other relevant stakeholders

Bioventix recognises that meaningful engagement with its shareholders is integral to the continued success of the Company. Throughout the year the Company actively engages and maintains a healthy dialogue with institutional and significant shareholders through meetings, presentations and roadshows. Smaller private investors are encouraged to attend the AGM, when permitted, at which the Company's activities are considered and there is an opportunity for shareholders to meet, discuss the Company's business and governance and for questions to be answered. General information is available on the Company's website and the Board believes that the Annual Report and the Interim Report published at the half-year play an important part in presenting all shareholders with a timely assessment of the Company's position and prospects. All RNS press releases are published on the Company's website.

Board Committees

The Board is supported by three committees; an Audit Committee, a Remuneration Committee and a Nomination Committee, each with delegated duties and responsibilities. Each committee is comprised of the three Non-Executive Directors, one of whom is the Chair of that committee, and has access to all information, resources and advice, at the Company's cost, that the committee Chair deems necessary to discharge its duties.

The Audit Committee, with Jo Pisani as Chair, determines and examines any matters relating to the financial affairs of the Company including the terms of engagement of the Company's auditors and, in consultation with the auditors, the scope of the audit. In addition, it considers the financial performance, position and prospects of the Company and ensures they are properly monitored and reported on. The Audit Committee can request attendance at committee meetings by, amongst others, the Chief Executive and the Chief Financial Officer. The formal terms of reference for the Audit Committee are published on the Company's website.

The Remuneration Committee, with Nick McCooke as Chair, reviews the performance of the Executive Directors and sets their remuneration, determines the payment of bonuses to the Executive Directors and considers the Company's bonus and option schemes. The Remuneration Committee can request attendance at committee meetings by, amongst others, the Chief Executive and the Chief Financial Officer. The formal terms of reference for the Remuneration Committee are published on the Company's website.

The Nomination Committee, with Nick McCooke as Chair, reviews the structure, size and composition (including the skills, knowledge, experience and diversity) of the Board and makes recommendations to the Board with regard to any changes; gives consideration to succession planning for directors and other senior executives and evaluates the balance of skills, knowledge, experience and diversity on the Board. The formal terms of reference for the Nomination Committee are published on the Company's website.

Audit Committee

This report has been produced by the Audit Committee and approved by the Board.

The Audit Committee is responsible for ensuring that Bioventix plc operates and maintains a strong control environment. It provides effective governance over the Company's financial reporting, including oversight and review of the systems of internal control and risk management and the performance of the external audit functions.

The Committee's formal terms of reference, which are reviewed and approved annually, set out the duties delegated to the Committee by the Board and are published on the Company's website. The Audit Committee has determined that an Internal Audit function is not an appropriate mechanism for Bioventix plc due to the Company's small size, the level of complexity of its operations and the close day-to-day involvement of the Executive Directors.

The Audit Committee is comprised of the three Independent Non-Executive Directors, with the Executive Directors only attending by invitation; the Committee invites the external auditor to attend certain meetings. The Committee is authorised by the Board, wherever and whenever necessary, to obtain external professional advice at the Company's expense in order to perform its duties which are to:

- make recommendations to the Board on the appointment of the external auditor and the amount of its remuneration;
- discuss and agree the scope of the audit, review the auditor's management letter and the Company's response;
- review half-year and annual financial statements and formal announcements relating to financial performance;
- review the adequacy and effectiveness of the Company's internal financial controls, and internal control and risk management systems;
- consider compliance with relevant laws and regulations; and
- review the Committee's terms of reference and recommend any proposed changes to the Board for approval.

During the year, the Committee met twice to consider standard business relating to the review of half-year and annual financial statements.

Further details of the matters considered or put into effect at the Committee meetings were as follows:

- acceptance of the external auditor's full-year report for the year ended June 30th 2022;
- review of the half-year and full-year financial results, including the assessment of going concern and that the going concern basis is the appropriate basis for the preparation of the Company's accounts;
- review and approval of the external auditor's plan for the 2023 year end; and
- review and approval of the external auditor's fees for the 2023 audit.

Since the year end the Audit Committee has met to consider the integrity of the Company's financial reporting and provided advice to the Board that the 2023 Annual Report and Accounts, taken as a whole, is fair, balanced and understandable and provides the Company's shareholders with the necessary information to assess the Company's position, performance, business model and strategy.

The objective of this report is to explain the work of the Audit Committee and how it contributes to the maintenance of governance standards at Bioventix plc. The activities of the Committee are kept under review in line with regulatory and market developments and current thinking on best practice. The Board welcomes communication from shareholders; should any have suggestions regarding the scope and activity of the Audit Committee they should address them to the Chairman of the Audit Committee at Bioventix plc.

Joanne Pisani
Chair of the
Audit Committee

Remuneration Report

This report has been prepared by the Remuneration Committee and approved by the Board.

The Remuneration Committee is comprised of the three Non-Executive Directors with Nick McCooke as Chair. The committee reviews the performance of the Executive Directors and sets their remuneration, determines the payment of bonuses to the Executive Directors and considers the Company's bonus and option schemes. The Remuneration Committee can request attendance at committee meetings by, amongst others, the Chief Executive and the Chief Financial Officer. The formal terms of reference for the Remuneration Committee are published on the Company's website.

In assessing appropriate remuneration arrangements, the Remuneration Committee takes into account relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit and links a key part of the Executive Director's remuneration to the Company's financial and operational performance.

Remuneration policy

The Committee aims to ensure that total remuneration is set at an appropriate level for the Company and its operations.

The objectives and core principles of the remuneration policy are to ensure:

- remuneration levels that support the Company strategy;
- an appropriate link between performance and reward;
- linking of long-term incentives to shareholder returns; and
- good teamwork by enabling all employees to share in the success of the business.

There are four elements that together can make up the remuneration packages for the Executive Directors:

- basic annual salary or fees;
- benefits in kind;
- discretionary annual bonus; and
- a long-term incentive plan.

Basic salary

The basic salary of each of the Executive Directors is normally determined by the Committee towards the end of each financial year with any changes taking effect from 1 July. Basic salary is reviewed and adjustments made taking into account individual performance, market factors and sector conditions.

Benefits in kind and cash equivalents

Benefits provided to the Chief Executive during the year comprised pension contributions; since the year end pension contributions have also been made for the benefit of the Chief Financial Officer.

Discretionary bonuses

A cash bonus award for performance during the financial year 2021/22 was made to the Chief Executive and most staff in November 2021; bonuses in respect of performance in 2022/23 are forecast to be made in November 2023. Bonus criteria for the Executive Directors are based on performance criteria that are designed to align with shareholder interests and comprise factors relating to shareholder return, earnings per share and performance against agreed long-term corporate and operational milestones.

Share Option Plan

The Company operated two share option schemes in the year; an Approved EMI Share Option Scheme and an Unapproved Share Option Scheme.

Under the terms of the Company's 2013 EMI Share Option Scheme, the Approved Scheme, directors and employees are eligible for awards. Performance conditions do not apply to the awards and upon any change of control, all options vest in full. All options lapse upon the tenth anniversary of grant.

The terms of Unapproved Share Option Scheme mirror those of the EMI Share Option Scheme. It is however a non-tax advantaged scheme and facilitates the award of share options to those key staff and directors who are ineligible for the award of share options under the EMI Share Option Scheme.

Non-Executive Directors' fees

The Non-Executive Directors receive a fee for carrying out their duties and responsibilities. The level of such fees is set and reviewed annually by the Board, excluding the Non-Executive Directors. The Non-Executive Directors do not currently receive additional fees for acting as members of the Board's various committees.

Directors' remuneration

Director	Position	Salary £	Bonus £	Pension £	2023 £	2022 £
Peter Harrison	Chief Executive Officer	195,785	48,958	36,890	281,633	249,889
Nicholas McCooke	Non-Executive Director	29,227	-	-	29,227	27,315
Ian Nicholson	Non-Executive Director	37,097	-	-	37,097	34,670
Bruce Hiscock	Chief Financial Officer	95,991	-	-	95,991	81,004
Joanne Pisani	Non-Executive Director	5,000	-	-	5,000	
Total		363,100	48,958	36,890	448,948	392,878

The Chief Executive's bonus above is determined by the Remuneration Committee according to performance criteria designed to be consistent with companies of a similar profile and relating to EPS and share price parameters, together with a smaller R&D element.

In light of the ongoing COVID-19 pandemic and the ensuing uncertainty, remuneration remained unchanged for 2022/23. During the year the Remuneration Committee conducted a comprehensive review of remuneration, following which adjustments were made to the remuneration of the Chief Executive Officer and Chief Financial Officer effective from 1 July 2023.

Service Contracts

The Executive Directors are subject to service contracts with a notice period of six and three months respectively for the Chief Executive Officer and Chief Financial Officer. Payments on termination for Executive Directors, other than on the grounds of incapacity or circumstances justifying summary termination, are restricted to the value of any unexpired notice period and the cost of providing other contractual benefits during the unexpired notice period.

The Non-Executive Directors are appointed for an initial period of three years and may be terminated by either party giving to the other not less than three months' notice.

*Share Options granted under the Company's Unapproved Share Option Scheme.

Of the share option charge for 2023 of £174,080 (2022: £244,871), the following amounts related to the directors:

Peter Harrison – £28,805 (2022: £34,092)

Ian Nicholson – £6,240 (2022: £35,978)

Nick McCooke – £4,917 (2022: £30,149)

Bruce Hiscock – £2,507 (2022: £Nil)

During the year the share options issued to Ian Nicholson and Nick McCooke in 2017 were exercised in full, and currently it is not the Board's intention to make further share option awards to the Non-Executive Directors.

Shareholder feedback

The objective of this report is to communicate the remuneration of the directors and how this is linked to performance. In this regard the Board is committed to maintaining an open transparent dialogue with shareholders and is always interested to hear their views on remuneration matters.

Nicholas McCooke
Chairman of the
Remuneration Committee

27 October 2023

Nomination Committee Report

This report has been prepared by the Nomination Committee and approved by the Board.

The Nomination Committee, with Nick McCooke as Chair, is comprised of the three Independent Non-Executive Directors with the Executive Directors co-opted as required. The committee reviews the structure, size and composition (including the skills, knowledge, experience and diversity) of the Board and makes recommendations to the Board with regard to any changes.

The main responsibilities of the Committee are as follows:

- regularly reviewing the structure, size and composition of the Board, including assessing the skills, knowledge, experience and diversity of the Board;
- giving full consideration to succession planning for directors and other senior executives and employees;
- keeping under review the leadership needs of the organisation;
- being responsible for identifying and nominating for the approval of the Board, candidates to fill Board vacancies as and when they arise;
- reviewing the results of the Board performance evaluation process that relate to the composition of the Board;
- formulating plans for succession for both Executive and Non-Executive Directors;
- nominating membership of the Audit and Remuneration Committees; and
- any matters relating to the continuation in office of any director at any time including the appointment or removal of any director to Executive or other office.

The Nomination Committee is responsible for the Board's policy on equity, diversity and inclusion ('EDI').

Bioventix plc is a small, niche business and has a very limited number of employees and directors. Unlike large organisations it can therefore be difficult to realistically set and then meet meaningful targets for diversity. The Board recognises the benefits of diversity in its broadest sense and the value it brings to the business and this can be seen at Bioventix plc in the age range of our employees, our 53/47 female to male gender split and the number of returning parents in our team. Further details of the Company's approach to EDI can be found in the Sustainability Report on pages 32 to 37.

The Committee met twice during the year to consider the composition of the Board and to undertake the process of recruiting a candidate for recommendation to the Board as an additional Independent Non-Executive Director to the Board. As well as seeking candidates with relevant industry experience, the selection of suitable candidates included seeking diversity of skills, background knowledge and international experience. Race and gender, amongst many other personal and professional qualities, were also taken into consideration in appointing a new director to the Board. Following meetings and discussions with a number of suitable candidates, the Committee was delighted when Jo Pisani accepted our invitation for her to join the Bioventix Board. As can be seen from Jo's biography elsewhere in this report, she brings a diverse range of knowledge and skill as well as considerable strategic experience which will all add to the expertise on the Board.

Nicholas McCooke
Chairman of the
Remuneration Committee

Auditors' Report

Independent Auditors' Report to the Members of Bioventix Plc

Opinion

We have audited the financial statements of Bioventix PLC (the 'company') for the year ended 30 June 2023, which comprises the Statement of comprehensive income, the Statement of financial position, the Statement of changes in equity, the Statement of cash flows, an analysis of net debt, and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation of the financial statements is applicable law and United Kingdom Accounting Standards, including FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 30 June 2023 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the United Kingdom, including the Financial Reporting Council's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast doubt on the Company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

In relation to the entity's reporting on how they have applied the UK Corporate Governance Code, we have nothing material to add or draw attention to in relation to the directors' statement in the financial statements about whether the director's considered it appropriate to adopt the going concern basis of accounting.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

An overview of the scope of our audit

We tailored the scope of our audit to ensure that we performed sufficient work to be able to give an opinion on the financial statements as a whole, considering the company's structure, accounting processes and controls, and the industry in which they operate.

Our scoping considerations for the audit were based both on financial information and risk, and we obtained the level of assurance required in-line with a full statutory audit.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

Revenue recognition

Significance and nature of key risk

The company had two main sources of revenue during the year, being the sales of antibodies and the receipt of royalty income.

We have focused on these income streams due to the potential for material misstatement of revenue whether caused by fraud or error.

How our audit addressed the key risk

We substantively tested the material income streams by agreeing a sample of sales transactions to source documentation and confirmed that they were accurately recorded.

By testing a sample of transactions shortly before and after the year-end date, we ascertained that sales were correctly recorded within the financial period to which they relate.

We assessed the systems and controls in place around the revenue cycle, implemented by the company themselves, to ensure that these are functioning as designed.

Key observations communicated to the Risk and Audit Committee

We have no concerns over the material accuracy of revenue recognised in the financial statements.

Independent Auditors' Report to the Members of Bioventix Plc

Valuation of investments

Significance and nature of key risk

Investments are held in un-listed companies whose valuation is not publicly available. There is a risk that the investments are not held at the correct valuation, leading to a potential requirement to either impair or uplift the value where necessary.

How our audit addressed the key risk

We confirmed that the company owns the investments held and obtained management's assessment of the valuation method historically applied. We reviewed this for reasonableness and whether its use was considered appropriate to continue going forward. We considered possible indicators of impairment and uplift relating to the unlisted entities.

Key observations communicated to the Risk and Audit Committee

We have no concerns over the material accuracy of investment values recognised in the financial statements.

Management override

Significance and nature of key risk

Intrinsically there is always a risk of material misstatement due to fraud because of possible management override.

How our audit addressed the key risk

We assessed significant accounting estimates and considered whether these were accurately calculated, and whether their conclusions were reasonable. Journal entries were reviewed using data analytics in order to assess for any potential fraudulent postings within the year.

Key observations communicated to the Risk and Audit Committee

We found no indications of management override due to fraud or otherwise within the financial statements.

Our application of materiality

	Company financial statements
Materiality	£504,500
Basis for determining materiality	5% of profit before tax
Rationale for benchmark applied	The company's principal activity is that of the supply of antibodies and is quoted on AIM. To this end the business and its stakeholders are focused on trading and generating profits. Therefore, a benchmark for materiality of PBT is considered to be the most appropriate.
Performance materiality	£378,400
Basis for determining performance materiality	75% of materiality
Rationale for performance materiality applied	On the basis of our risk assessments, together with our assessment of the company's overall control environment, our judgement was that performance materiality was 75% of our planning materiality. In assessing the appropriate level, we consider risk exposure, our experience of the company and an assessment of the likelihood of misstatement.
Triviality threshold	£25,200
Basis for determining triviality threshold	5% of materiality

We reported all audit differences found in excess of our triviality threshold of £25,200 to the directors and the management board.

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Independent Auditors' Report to the Members of Bioventix Plc

Other information

The directors are responsible for the other information. The other information comprises the information included in the Annual Report other than the financial statements and our Auditors' Report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Opinion on other matters prescribed by the Companies Act 2006

In our opinion, the part of the directors' remuneration report to be audited has been properly prepared in accordance with the Companies Act 2006.

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the parent company financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic report or the Director's report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements and the part of the directors' remuneration report to be audited are not in agreement with the accounting records and returns; or
- certain disclosures of director's remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the Directors' responsibilities statement on page 28, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Capability of the audit in detecting irregularities, including fraud

Based on our understanding of the company and industry, and through discussion with the directors and other management (as required by auditing standards), we identified that the principal risks of non-compliance with laws and regulations related to health and safety, anti-bribery and employment law. We considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2006 and taxation. We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and

determined that the principal risks were related to posting inappropriate journal entries to increase revenue or reduce expenditure, management bias in accounting estimates and judgemental areas of the financial statements such as the valuation of investments and accrued revenue. Audit procedures performed by the engagement team included:

- Detailed discussions were held with management to identify any known or suspected instances of non-compliance with laws and regulations; and
- Identifying and assessing the design effectiveness of controls that management has in place to prevent and detect fraud; and
- Challenging assumptions and judgements made by management in its significant accounting estimates; and
- Performing analytical procedures to identify any unusual or unexpected relationships, including related party transactions, that may indicate risks of material misstatement due to fraud; and
- Confirmation of related parties with management, and review of transactions throughout the period to identify any previously undisclosed transactions with related parties outside the normal course of business; and
- Performing analytical procedures with automated data analytics tools to identify any unusual or unexpected relationships, including related party transactions, that may indicate risks of material misstatement due to fraud; and
- Reading minutes of meetings of those charged with governance and reviewing correspondence with relevant tax and regulatory authorities; and
- Review of significant and unusual transactions and evaluation of the underlying financial rationale supporting the transactions; and
- Identifying and testing journal entries, in particular any manual entries made at the year-end for financial statement preparation.

Because of the inherent limitations of an audit, there is a risk that we will not detect all irregularities, including those leading to a material misstatement in the financial statements

Independent Auditors' Report to the Members of Bioventix Plc

or non-compliance with regulation. This risk increases the more that compliance with a law or regulation is removed from the events and transactions reflected in the financial statements, as we will be less likely to become aware of instances of non-compliance.

As part of an audit in accordance with ISAs (UK), we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion of the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the director.
- Conclude on the appropriateness of the director's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our Auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of

our Auditors' report. However, future events or conditions may cause the company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Use of our report

This report is made solely to the company's members in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an Auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements

Notes to the financial statements for the year ended 30 June 2023

1. General information

Bioventix Plc (04923945), a company creating and manufacturing sheep monoclonal antibodies, is a public limited company registered in England and Wales. The Registered Office is 27-28 Eastcastle Street, London, W1W 8DH and its principal place of business is 7 Romans Business Park, East Street, Farnham GU9 7SX.

2. Accounting policies

2.1. Basis of preparation of financial statements

The financial statements have been prepared under the historical cost convention unless otherwise specified within these accounting policies and in accordance with Financial Reporting Standard 102, the Financial Reporting Standard applicable in the UK and the Republic of Ireland and the Companies Act 2006.

The preparation of financial statements in compliance with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies (see note 3).

The following principal accounting policies have been applied:

2.2. Revenue

Turnover is recognised for product supplied or services rendered to the extent that it is probable that the economic benefits will flow to the Company and the turnover can be reliably measured. Turnover is measured as the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes. The following criteria determine when turnover will be recognised:

Direct sales

Direct sales are generally recognised at the date of dispatch unless contractual terms with customers state that risk and title pass on delivery of goods, in which case revenue is recognised on delivery.

R&D income

Subcontracted R&D income is recognised based upon the stage of completion at the year-end.

Licence revenue and royalties

Annual licence revenue is recognised, in full, based upon the date of invoice. Royalties are accrued over period to which they relate and revenue is recognised based upon returns and notifications received from customers. In the event that subsequent adjustments to royalties are identified they are recognised in the period in which they are identified.

2.3. Foreign currency translation

Functional and presentation currency

The Company's functional and presentational currency is GBP.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the spot exchange rates at the dates of the transactions.

At each period end foreign currency monetary items are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary items measured at fair value are measured using the exchange rate when fair value was determined.

2.4. Interest income

Interest income is recognised in profit or loss using the effective interest method.

2.5. Finance costs

Finance costs are charged to profit or loss over the term of the debt using the effective interest method so that the amount charged is at a constant rate on the carrying amount. Issue costs are initially recognised as a reduction in the proceeds of the associated capital instrument.

2.6. Pensions

Defined contribution pension plan

The Company operates a defined contribution plan for its employees. A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity. Once the contributions have been paid the Company has no further payment obligations.

The contributions are recognised as an expense in profit or loss when they fall due. Amounts not paid are shown in accruals as a liability in the Statement of financial position. The assets of the plan are held separately from the Company in independently administered funds.

2.7. Current and deferred taxation

Current and deferred tax are recognised as an expense or income in the Statement of Comprehensive Income, except when they relate to items credited or debited directly to equity, in which case the tax is also recognised directly in equity. The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the Company operates and generates income.

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the reporting date, except that:

- the recognition of deferred tax assets is limited to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits; and
- any deferred tax balances are reversed if and when all conditions for retaining associated tax allowances have been met.

Deferred tax balances are not recognised in respect of permanent differences except in respect of business combinations, when deferred tax is recognised on the differences between the fair values

of assets acquired and the future tax deductions available for them and the differences between the fair values of liabilities acquired and the amount that will be assessed for tax. Deferred tax is determined using tax rates and laws that have been enacted or substantively enacted by the reporting date.

2.8. Research and development

Research and development expenditure is written off in the year in which it is incurred.

2.9. Tangible fixed assets

Tangible fixed assets under the cost model are stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Land is not depreciated. Depreciation on other assets is charged so as to allocate the cost of assets less their residual value over their estimated useful life.

Freehold property – 2% straight line
Plant and equipment – 25% straight line
Motor vehicles – 25% straight line
Fixtures & Fittings – 25% straight line
Office Equipment – 25% straight line

2.10. Valuation of investments

Investments in unlisted Company shares, whose market value can be reliably determined, are remeasured to market value at each reporting date. Gains and losses on remeasurement are recognised in the Statement of comprehensive income for the period. Where market value cannot be reliably determined, such investments are stated at historic cost less impairment.

2.11. Stocks

Stocks are stated at the lower of cost and net realisable value, being the estimated selling price less

2.11. Stocks (continued)

costs to complete and sell. Cost includes all direct costs and an appropriate proportion of fixed and variable overheads.

At each balance sheet date, stocks are assessed for impairment. If stock is impaired, the carrying amount is reduced to its selling price less costs to complete and sell. The impairment loss is recognised immediately in profit or loss.

2.12. Debtors

Short-term debtors are measured at transaction price, less any impairment. Loans receivable are measured initially at fair value, net of transaction costs, and are measured subsequently at amortised cost using the effective interest method, less any impairment.

2.13. Cash and cash equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are highly liquid investments that mature in no more than twelve months from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

2.14. Creditors

Short-term creditors are measured at the transaction price. Other financial liabilities, including bank loans, are measured initially at fair value, net of transaction costs, and are measured subsequently at amortised cost using the effective interest method.

2.15. Provisions for liabilities

Provisions are made where an event has taken place that gives the Company a legal or constructive obligation that probably requires settlement by a transfer of economic benefit, and a reliable estimate can be made of the amount of the obligation.

Provisions are charged as an expense to profit or loss in the year that the Company becomes aware of the obligation, and are measured at the best estimate at the reporting date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

When payments are eventually made, they are charged to the provision carried in the Statement of financial position.

2.16. Financial instruments

The Company only enters into basic financial instrument transactions that result in the recognition of financial assets and liabilities like trade and other debtors and creditors, loans from banks and other third parties, loans to related parties and investments in ordinary shares.

2.17. Dividends

Equity dividends are recognised when they become legally payable. Interim equity dividends are recognised when paid. Final equity dividends are recognised when approved by the shareholders at an annual general meeting.

2.18. Employee benefits share based compensation

The Company operates an equity-settled, share-based compensation plan. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense over the vesting period. The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted. At each balance sheet date, the Company will revise its estimates of the number of options are expected to be exercisable. It will recognise the impact of the revision of original estimates, if any, in the profit and loss account, with a corresponding adjustment to equity. The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium when the options are exercised.

3. Judgements in applying accounting policies and key sources of estimation uncertainty

In the application of the Company's accounting policies (as described in note 2), management is required to make judgements, estimates and assumptions. These estimates and underlying assumptions are reviewed on an ongoing basis.

Carrying value of unlisted investments

The Company holds two unlisted investments in companies carrying out research in identifying biomarkers for diagnosing health conditions. The directors have reviewed the progress of this research over the last year. In common with much scientific research there is uncertainty, both in relation to the science and to the commercial outcome, and no information to be able to reliably calculate a fair value for these investments. The carrying value of these investments will continue to be historic cost.

Valuation of share-based payments

The Company operates two share option schemes: an Approved EMI Share Option Scheme and an Unapproved Share Option Scheme. In calculating the charge to profit or loss in respect of options granted to employees under these schemes, the Company has applied the requirements of FRS 102 which includes making estimates for both the expected volatility of the Company's shares and the risk-free interest rate the details of which are shown in Note 21 to the accounts.

	2023 £	2022 £
4. Turnover		
An analysis of turnover by class of business is as follows:		
Product revenue and R&D income	4,232,829	3,592,556
Royalty and licence fee income	8,583,396	8,126,715
	12,816,225	11,719,271
United Kingdom	961,904	787,046
European Union	1,604,187	1,327,360
Rest of the world	10,250,134	9,604,865
	12,816,225	11,719,271

5. Operating profit

The operating profit is stated after charging:

	2023 £	2022 £
Depreciation of tangible fixed assets	129,227	143,392
Fees payable to the Company's auditor and its associates for the audit of the Company's annual financial statements	25,000	22,000
Exchange differences	36,679	(92,856)
Research and development costs	1,201,398	975,317

6. Employees

Staff costs, including directors' remuneration, were as follows:

	2023 £	2022 £
Wages and salaries	1,001,959	876,375
Social security costs	119,075	105,337
Share option charge	174,080	244,871
Cost of defined contribution scheme	71,513	34,563
	1,366,627	1,261,146

The average monthly number of employees, including the directors, during the year was as follows:

	2023 No.	2022 No.
Management and administration	5	5
Scientific	11	11
	16	16

7. Directors' remuneration

	2023 £	2022 £
Directors' emoluments	412,059	368,996
Company contributions to defined contribution pension schemes	36,890	12,578
	448,949	381,574

During the year retirement benefits were accruing to 1 director (2022: 1) in respect of defined contribution pension schemes.

8. Interest receivable

	2023 £	2022 £
Other interest receivable	101,094	4,804
	101,094	4,804

9. Interest payable and similar expenses

	2022 £	2021 £
Other interest payable	-	303
	-	303

10. Taxation

	2023 £	2022 £
Corporation tax		
Current tax on profits for the year	1,788,254	1,637,682
Total current tax	1,788,254	1,637,682
Deferred tax		
Origination and reversal of timing differences	(26,052)	(33,808)
Total deferred tax	(26,052)	(33,808)
Taxation on profit on ordinary activities	1,762,202	1,603,874

Factors affecting tax charge for the year

The tax assessed for the year is lower than (2022: lower than) the standard rate of corporation tax in the UK of 25% (2022: 19%).

The differences are explained below:

	2023 £	2022 £
Profit on ordinary activities before tax	10,134,443	9,278,025
Profit on ordinary activities multiplied by standard rate of corporation tax in the UK of 25% (2022: 19%)	2,533,611	1,762,825
Effects of:		
Expenses not deductible for tax purposes, other than goodwill amortisation and impairment	341	83
Capital allowances for year in excess of depreciation	27,289	27,048
Research and development tax credit	(356,784)	(198,799)
Share-based payments	(23,222)	46,525
Deferred tax movement	(26,052)	(33,808)
Change in tax rate during the year	(392,981)	-
Total tax charge for the year	1,762,202	1,603,874

Factors that may affect future tax charges

The rate of corporation tax increased from 19% to 25% on 1 April 2023. This change will increase the tax charge in future years such that, had the change been effective throughout the current year, it would have increased by £392,980, from £1,762,202 to £2,155,182.

11. Dividends

	2023 £	2022 £
Dividends paid	8,443,058	7,918,186
162 pence per share (2022: 142 pence per share)		
	8,443,058	7,918,186

12. Tangible fixed assets

	Freehold property £	Plant & machinery £	Motor vehicles £	Fixtures & fittings £	Office equipment £	Total £
Cost						
At 1 July 2022	475,000	472,107	13,090	407,115	36,610	1,403,922
Additions	-	7,420	-	-	3,163	10,583
Disposals	-	-	-	-	(248)	(248)
At 30 June 2023	475,000	479,527	13,090	407,115	39,525	1,414,257
Depreciation						
At 1 July 2022	149,625	326,064	4,909	205,457	23,497	709,552
Charge for the year on owned assets	7,125	55,962	3,273	58,137	4,730	129,227
Disposals	-	-	-	-	(248)	(248)
At 30 June 2023	156,750	382,026	8,182	263,594	27,979	838,531
Net book value						
At 30 June 2023	318,250	97,501	4,908	143,521	11,546	575,726
At 30 June 2022	325,375	146,043	8,181	201,658	13,113	694,370

Included within land and buildings is freehold land at cost of £118,750 which is not depreciated. (2022: £118,750).

13. Fixed asset investments

	Unlisted investments
Cost	
At 1 July 2022	610,039
At 30 June 2023	610,039

14. Stocks

	2023 £	2022 £
Finished goods and goods for resale	565,366	461,815
	565,366	461,815

15. Debtors

	2023 £	2022 £
Trade debtors	1,170,512	754,039
Other debtors	501	10,402
Prepayments and accrued income	4,643,748	4,460,276
	5,814,761	5,224,717

16. Cash and cash equivalents

	2023 £	2022 £
Cash at bank and in hand	5,715,819	6,126,650
	5,715,819	6,126,650

Analysis of Net Debt	At 1 July 2022 £	Cash flows £	At 30 June 2023 £
Cash at bank and in hand	6,126,650	(410,831)	5,715,819

17. Creditors: Amounts falling due within one year

	2023 £	2022 £
Trade creditors	77,725	157,280
Corporation tax	709,259	709,098
Other taxation and social security	76,298	22,666
Accruals and deferred income	336,432	363,121
	1,199,714	1,252,165

18. Deferred taxation

	2023 £	2022 £
At beginning of year	(44,276)	(78,084)
Charged to profit or loss	26,052	33,808
At end of year	(18,224)	(44,276)

The provision for deferred taxation is made up as follows:

	2023 £	2022 £
Accelerated capital allowances	(18,224)	(44,276)
	(18,224)	(44,276)

19. Share capital

	2023 £	2022 £
Allotted, called up and fully paid		
5,219,656 (2022: 5,209,333) Ordinary shares of £0.05 each	260,983	260,467

The holders of ordinary shares are entitled to receive dividends as declared and are entitled to one vote per share at meetings of the Company. All ordinary shares rank equally with regard to the Company's residual assets.

10,323 ordinary shares were issued during the year at £13.50 per share.

20. Reserves**Share premium account**

The share premium reserve contains the premium arising on issues of equity shares, net of issue expenses.

Capital redemption reserve

The capital redemption arose on the buy-back of shares by the Company.

Profit and loss account

The profit and loss reserve represents cumulative profits or losses, net of dividends paid and other adjustments.

21. Share-based payments

During the year the Company operated two share option schemes; an Approved EMI Share Option Scheme and an Unapproved Share Option Scheme to incentivise employees.

The Company has applied the requirements of FRS 102 Section 26 Share-based Payment to all the options granted under both schemes. The terms for granting share options under both schemes are the same and provide for an option price equal to the market value of the Company's shares on the date of the grant and for the Approved EMI Share Option Scheme this price is subsequently agreed with HMRC Shares and Assets Valuation Division.

The contractual life of an option under both schemes is 10 years from the date of grant. Options granted become exercisable on the third anniversary of the date of grant. Exercise of an option is normally subject to continued employment, but there are also considerations for good leavers. All share-based remuneration is settled in equity shares.

21. Share-based payments (continued)

	Weighted average exercise price (pence) 2023	Number 2023	<i>Weighted average exercise price (pence) 2022</i>	<i>Number 2022</i>
Outstanding at the beginning of the year	2896	51,996	2942	53,702
Granted during the year	3855	39,708		-
Forfeited during the year	3855	(4,101)	3855	(1,706)
Exercised during the year	1350	(10,323)		-
Outstanding at the end of the year		77,280		51,996
			2023	<i>2022</i>
Option pricing model used		Black Scholes	<i>Black Scholes</i>	
Issue price		£13.50-£38.55	<i>£13.50-£38.55</i>	
Exercise price (pence)		£13.50-£38.55	<i>£13.50-£38.55</i>	
Option life		10 years	<i>10 years</i>	
Expected volatility		7.459%	<i>25.15%</i>	
Fair value at measurement date		£4.66-£26.91	<i>£4.66-£26.91</i>	
Risk-free interest rate		1.5%	<i>1.8%</i>	

The expected volatility for the options issued in the year is based upon the volatility over the past 12 months. For previous years it was based upon the historical volatility over the period since the Company's shares were listed on AIM.

The expense recognised for share-based payments during the year ended 30 June 2023 was £174,080 (2022: £244,871).

The number of staff and officers holding share options at 30 June 2023 was 16 (2022: 13). The share options have been issued to underpin staff service conditions.

22. Earnings per share

The weighted average number of shares in issue for the basic earnings per share calculation is 5,212,220 (2022: 5,209,333) and for the diluted earnings per share, assuming the exercise of all share options is 5,289,501 (2022: 5,259,831).

The calculation of the basic earnings per share is based on the profit for the period of £8,372,241 (2022: £7,674,151) divided by the weighted average number of shares in issue of 5,212,220 (2022: 5,209,333), the basic earnings per share is 160.63p (2022: 147.32p). The diluted earnings per share, assuming the exercise of all of the share options is based on 5,289,501 (2022: 5,259,831) shares and is 158.28p (2022: 145.90).

23. Pension commitments

The Company operates a defined contributions pension scheme. The assets of the scheme are held separately from those of the Company in an independently administered fund. The pension charge represents contributions payable by the Company to the fund and amounted to £71,512 (2022: £34,563). No contributions were owing at the year end (2022: £nil).

24. Related party transactions

During the year a dividend of £775,764 (2022: £633,348) was paid to a director and his wife.

25. Controlling party

During the year there has not been an individual controlling party.
