iShares Copper Miners UCITS ETF

A sub-fund of iShares IV plc

USD (Acc) Share Class

ISIN: IE00063FT9K6

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of the Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the STOXX Global Copper Miners Index, the Fund's benchmark index ("Index").
- ▶ The Share Class, via the Fund is passively managed, and aims to invest in the equity securities that make up the Index.
- ▶ The Index reflects the performance of a sub-set of equity securities of eligible developed and emerging market countries within the STOXX Global Copper Universe Index with a significant exposure to the copper mining industry either through revenue percentage or market share, as determined by the index provider.
- ▶ Companies included in the Index must (i) have a free-float market capitalization greater than USD \$100 million; (ii) have a 3-month average daily traded volume equal to or greater than USD \$1 million; (iii) (a) be categorized as a copper ore mining company; or (b) generate revenue from copper ore mining (the "Revenue Filter"); or (c) hold a significant market share of the copper ore mining industry; (iv) be domiciled in an eligible country determined by the index provider.
- ▶ The Index is market capitalisation weighted and rebalances on an annual basis. Index constituents are subject to an 8% cap for each issuer.
- ▶ At each rebalance, the Index aims to have a minimum of 50 constituents categorized as copper ore mining companies. If there are fewer than 50 constituents in the Index categorized as such, then the Revenue Filter is lowered until the number of constituents in the Index is equal to 50.
- ▶ The Fund intends to replicate the Index by holding the equity securities which make up the Index, in similar proportions to it.
- ▶ The investment manager may use financial derivative instruments (FDIs) for direct investment purposes to produce a similar return to its Index.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
 - ▶ The risk category shown is not guaranteed and may change over time.
 - ▶ The lowest category does not mean risk free.
 - ▶ The Share Class is rated seven due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - The prices of commodities tend to experience greater variations than other asset classes (e.g. equities or fixed income securities). Investments in commodities are therefore potentially riskier than other types of investments.
- ▶ Particular risks not adequately captured by the risk indicator include:
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
