M&G Gilt & Fixed Interest Income Fund

a sub-fund of M&G Investment Funds (2)

Sterling Class I – Income shares ISIN no. GB00B7454D07

Managed by M&G Securities Limited

Objective and investment policy

Objective: The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, higher than that of the FTSE Actuaries UK Conventional Gilts All Stocks Index over any five-year period.

Core investment: At least 70% of the fund is invested, directly or through derivatives, in investment grade short, medium and long-dated bonds. These bonds are issued or guaranteed by the UK government, and denominated in sterling.

Other investments: The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: For investment purposes and to reduce risk and cost.

Strategy in brief: The fund manager selects investments in UK government bonds, based on those which offer the "best value", while also assessing macroeconomic, asset, sector and stock-level factors.

Benchmark: FTSE Actuaries UK Conventional Gilts All Stocks Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

The benchmark is shown in the share class currency.

Additional information can be found on the M&G website, including:

- a [glossary](#) providing an explanation of some terms used in this document.
- the Prospectus including the fund's objective and investment policy.

Other information

The fund may invest more than 35% in securities issued or guaranteed by the UK government. The investment may be combined with the use of derivatives in pursuit of the fund's investment objective.

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund may be paid out to you quarterly.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These may have a material impact on your returns.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 4 because its Net Asset Value has shown medium rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.
- The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.
- The fund invests mainly in one type of asset. This type of fund can experience larger-than-average price changes when compared to a fund which invests in a broader range of assets.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.25%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 31 May 2023. This figure may change from year to year. It excludes portfolio transaction costs. This figure includes extraordinary expenses and underlying charges for closed-ended-funds, such as investment trusts and Real Estate investment trusts.

For Income shares, the ongoing charge is taken from investments held in the fund's portfolio and not from the income these investments produce. The deduction of this charge will reduce the potential growth of your investment.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.co.uk/literature

Past performance

- Past performance is not a guide to future performance.
- Performance calculation excludes UK taxes from 01 December 2016. It does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the charges section.
- The fund launched on 09 December 1980 and the Sterling Class I Income share class launched on 03 August 2012.
- Performance is calculated using Sterling Class I Income shares.
- Benchmark performance has been calculated in GBP.
