CT STERLING SHORT-TERM MONEY MARKET FUND (THE "FUND")

Class 1 Income Shares (GBP) GB00B2NBDK41, a sub-fund of Columbia Threadneedle Investment Funds (UK) ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

- The Fund aims to provide income and preserve the original value of your investment, however, this is not guaranteed.
- The Fund is actively managed, and looks to provide income returns broadly in line with the 1-month compounded SONIA (Sterling Overnight Index Average) rate, before charges are deducted.
- The Fund invests in short-term assets of high credit quality from issuers that have received a favourable assessment in accordance with credit quality assessment procedures adopted by the Fund. These investments may include UK Government securities (including Treasury bills) with a maturity of 184 days or less, sterling-denominated cash deposits and certificates of deposit. In addition, up to 50% of the Fund may be invested in sterling-denominated commercial paper, also with a maturity of 184 days, or less. Investment in other short-term money market funds is permitted, but limited in total to 10% of the Fund's value.
- The Fund is a variable net asset value short term money market fund.
- The 1-month compounded SONIA rate is considered a suitable interest rate benchmark against which the Fund's performance can be measured and evaluated over time. The benchmark reflects the rate of interest paid on unsecured short-term transactions in the British sterling market, and represents a similar return profile to assets held in the Fund.
- Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.
- You can buy or sell shares in the Fund on any day that is a business day in London. You can find more detail on the investment objective and policy of the Fund in the Prospectus. For more information on investment terms used in this document, please see the Glossary available at columbiathreadneedle.com.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards Higher Risk, Typically higher rewards

- The Fund is rated 1 because historically it has shown a low level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Positive returns are not guaranteed and no form of capital protection applies.
- The Fund may enter into financial transactions with selected counterparties. Any financial difficulties arising at these counterparties could significantly affect the availability and the value of Fund assets.
- The Fund may invest in derivatives (complex instruments linked to the rise and fall of the value of other assets) with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the Prospectus.
