

### Objective

To generate income and some growth over the long term (5 years or more) by investing in UK commercial property. It is intended that the sub-fund will be a PAIF at all times and, as such, its investment objective is to carry on property investment business and to manage cash raised for investment in the property investment business.

**Performance Target:** To exceed the return of the IA UK Direct Property Sector Average return (after charges) over rolling three year periods. The Performance Target is the level of performance that the management team hopes to achieve for the sub-fund. There is however no certainty or promise that they will achieve the Performance Target. The ACD believes this is an appropriate target for the sub-fund based on the investment policy of the sub-fund and the constituents of the sector.

### Portfolio securities

- The sub-fund will invest at least 70% in a diversified portfolio of UK freehold and leasehold commercial property selected from across the retail, office, industrial and other sectors.
- The sub-fund may also invest indirectly in commercial property through investment vehicles such as quoted and unquoted property companies or funds (including those managed by abrdn).
- The fund may also invest in short term government bonds such as gilts, money-market instruments and cash.

### Discrete annual returns (%) - year ended 31/07

	2020	2021	2022	2023	2024
Fund Retail Acc shareclass	-6.28	4.84	11.81	-13.34	-5.41

<sup>B</sup> The Ongoing Charge Figure (OCF) is an estimate as at April 2022 and may vary from year to year. It excludes the cost of buying and selling assets for the fund. An estimate is used in order to provide the figure that will most likely be charged. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charge Figure can help you compare the annual operating expenses of different funds.

<sup>C</sup> MSCI UK Daily Traded APUTs and PAIFs in the UK Quarterly Universe Property Index (unfrozen) from 01/01/2019. Prior MSCI UK Quarterly Balanced Monthly Index Funds Quarterly Property Index (Unfrozen)

<sup>D</sup> Historic Distribution Yield - this represents the income generated by the assets in which the fund has been invested over the last twelve months, expressed as a % of the fund's value for Institutional Acc Shareclass. Please note that this income stream may be subject to taxes and charges.

<sup>E</sup> The Average Lease Length is the weighted average (by estimated rental value, "ERV") of all contracted income within the fund. ERV refers to the rent that a particular asset would be expected to achieve if it were to be re-let in current market conditions. Benchmark is MSCI UK Daily Traded APUTs and PAIFs Quarterly Property Index.

<sup>F</sup> The vacancy rate represents the sum of all assets within the fund's portfolio which do not generate rental income. It is expressed as a percentage of the total portfolio estimated rental value, ERV, which is the sum of rental income that the portfolio would be expected to achieve if all assets were to be re-let in current market conditions. Benchmark is MSCI UK Daily Traded APUTs and PAIFs Quarterly Property Index.

## Management process

- The management team use market research and their discretion (active management) to identify investments that are expected to benefit from changes in property prices and property improvements. They will maintain a diverse asset mix at sector level.

- In seeking to achieve the Performance Target, the MSCI UK Daily Traded APUTs and PAIFs in the UK Quarterly Universe Property Index is used as a reference point for portfolio construction and as a basis for setting risk constraints. Due to the fund's risk constraints, the intention is that the fund's performance profile will not deviate significantly from that of the MSCI UK Daily Traded APUTs and PAIFs in the UK Quarterly Universe Property Index over the longer term.

- Please note: Selling property can be a lengthy process so investors in the sub-fund should be aware that, in certain circumstances, they may not be able to sell their investment when they want to.

## Market review

According to the MSCI UK Monthly Index for July, all property total return slowed to 0.4% from 0.7% in June 2024, resulting in a 3-month total return of 1.6%. Annual all property returns increased to 1.4% in July, up from 1.0% in the previous month.

Capital growth for all property was flat over the month with the industrial sector the only sector to see an improvement in values at 0.2%, with rest of UK industrial seeing a larger rise in capital values than South East industrial at 0.3% and 0.2%, respectively. Retail capital growth fell from 0.6% in June 2024 to -0.1% in July 2024 driven by retail warehouses seeing capital growth slow from 1.0% in the previous month to 0.1% in July. The office sector continues to record the largest capital declines at -0.5% over the month with rest of UK offices seeing the weakest capital growth in the index at -1.0%.

## Fund performance

The Institutional Acc shares returned investors -0.65% over the month. Over the past 3 years the Fund has returned -2.47%, 1.43% behind the IA UK Direct Property benchmark.

## Fund management activity

The Fund sold its hotel asset, Motel One, Minorities, London, for £56m during the month. Recent asset management activity includes a lease renewal with Poundland at Bishop Auckland Shopping Park, securing an additional 5 years of term at a rent of £103,690 per annum.

## Outlook and Fund positioning

UK real estate seems to be pointing in a much more positive direction than this time last year. More economic and political certainty has filtered into the market, resulting in slowing declines in capital values. We have seen investors hold back over the first half of 2024. This is expected to shift into a more positive light as the rate-cutting cycle takes hold and as real estate returns look more attractive on a risk-adjusted basis.

From a risk perspective, a change in the UK's government doesn't seem to have much of an impact on investor intentions. The living sector may be under more scrutiny, given potential policy changes, but the probability of any radical shifts from Labour is low. A greater level of uncertainty comes from the BoE's actions on rates. A cumulative reduction of 75 basis points is expected over the second half of 2024, though worries surrounding services inflation and wage growth persist.

Still, given our current assumptions, we expect UK real estate to perform well over the forecast period, although bifurcation within sectors will remain a factor. We expect the industrial and living sectors to outperform all property, particularly over the next year. In a notable shift over recent months, offices are now projected to stay in positive territory, owing to strong rental growth. In fact, rental growth will remain a central growth story across real estate sectors, especially given the low levels of construction projected over the forecast period. Although construction prices have moderated from their peaks, restrictive financing costs will make development difficult in the near term.

Certain lenders are acknowledging the upside potential here, as we are seeing increased activity by UK clearing banks for all asset classes outside of offices. As the rate-cutting cycle bites, margins are expected to become more competitive among non-bank lenders. This should provide a much-needed boost to liquidity.

The over-arching Fund strategy remains focused on reducing risk within the property portfolio, whilst also retaining an enhanced exposure to liquid assets. We continue to favour sectors with thematic aligned to our House View.

## Important Information

The following risk factors should be carefully considered before making an investment decision:

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- The abrdn UK Real Estate Fund invests in assets that may at times be hard to sell. This means that there may be occasions when you experience a delay or receive less than you might otherwise expect when selling your investment. For more information on risks, see the prospectus and key investor information document.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses. The fund does not make extensive use of derivatives.
- Commercial property is less liquid than other asset classes such as bonds or equities. Selling property can be a lengthy process so investors in the fund should be aware that they may not be able to sell their investment when they want to.
- Commercial property transaction charges are higher than those which apply in other asset classes. Investors should be aware that a high volume of transactions would have a material impact on fund returns.
- Property valuation is a matter of judgment by an independent valuer and is therefore a matter of the valuer's opinion rather than fact.
- The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. Due to the high transaction charges associated with the fund's assets, a change in the pricing basis will result in a significant movement in the fund's published price.
