

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Legal & General Global Robotics and Automation Index Fund Unit Class C GBP Accumulation - ISIN: GB00BK6L1Y79

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

### OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the ROBO Global® Robotics and Automation UCITS Index, the "Benchmark Index" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Benchmark Index is comprised of shares in companies from across the world in accordance with the index provider's methodology. Such shares in companies are involved in the robotics and automation industry, as defined by ROBO Global LLC (the "Index Provider").
- The Index Provider deems the robotics and automation industry to be comprised of two subsectors: (1) Technology, which includes sensing, processing, computing and artificial intelligence, actuation and integration; (2) Applications, which include manufacturing and industrial automation, 3D printing, logistics automation, food and agriculture, surveillance and security, energy, healthcare and consumer products. A company is only eligible for inclusion in the Benchmark Index if it is of a sufficient size (determined by reference to the total market value of its shares) and it is sufficiently "liquid" (a measure of how actively its shares are traded on a daily basis).
- Within the Benchmark Index, a 40% aggregate weight is given to companies that derive most of their revenues from robotics and automation and a 60% aggregate weight is given to companies that derive only a distinct proportion of their revenues from robotics and automation, as defined by the Index Provider.
- The Fund seeks to replicate as closely as possible the constituents of the Benchmark Index. The Fund will have at least 90% exposure (directly or through depository receipts (a certificate issued by a bank representing shares in a foreign company such as American depository receipts and global depository receipts)) to assets that make up the Benchmark Index.
- The Fund may also invest in shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are

an alternative to a constituent of the Benchmark Index, money market instruments (including treasury bills), depository receipts, cash, deposits, and collective investment schemes including those managed or operated by the Manager or an associate of the Manager.

- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
  - reduce risk or cost; or
  - generate additional capital or income with no, or an acceptably low, level of risk.
- An overview of the Benchmark Index is available on the Index Provider's website: <https://www.roboglobal.com/robo-global-indices/robo-index/>

#### Other information:

- The Fund is passively managed as it tracks the Benchmark Index.
- Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in GBP.
- This Fund is designed for investors looking for exposure to companies involved in the robotics and automation industry as represented by the Benchmark Index.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

### RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at [www.legalandgeneral.com/reports](http://www.legalandgeneral.com/reports).

The risk and reward indicator may not take account of the following risks of

investing in the Fund:

- The Fund invests directly or indirectly in smaller companies. Investments in smaller companies tend to be riskier than investments in larger companies because they can: (i) be harder to buy and sell; or (ii) go up and down in value more often and by larger amounts, especially in the short-term. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for the Fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the Fund trustee or depository.
- The Fund is subject to the risks associated with technology-focused companies which are subject to absence or loss of intellectual property protections, rapid changes in technology, government regulations and competition that could negatively affect their value.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

## CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over each year	
Ongoing charge	0.49%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2023. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the Income of the Fund.

### Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.14% for purchases and 0.14% for sales at 31 December 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at [www.legalandgeneral.com/chargesandfees](http://www.legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2020.
- This unit class launched in 2020.

## PRACTICAL INFORMATION

- The trustee and depository is Northern Trust Investor Services Limited.
