  - Implementation of processes for subscribing and holding or acting as Depositary Bank for shares;
  - Storage and distribution of marketing and legal documents;

On request, beneficiaries provide information on the amounts actually received for the distribution of collective investment schemes to investors.

2. The Management Company and its representatives may pay rebates directly to investors, upon request, under the scope of distribution in Switzerland or from Switzerland. - they are paid from the fees of the Management Company and are therefore not deducted from the assets of the SICAV;
  - they are granted on the basis of objective criteria;
  - they are granted with the same timing conditions and to the same extent to all investors fulfilling the objective criteria and requesting rebates.

Rebates are granted by the Management Company on the basis of one or more of the following objective criteria:

- Applicable regulatory requirements;
- The investment volume for a share class, in a fund or in a product range of the Pictet group;
- The percentage that the investment volume represents with respect to the size of the SICAV or the share class in question;
- The amount of fees incurred;
- The investment date and/or the expected investment horizon;
- Support in the SICAV launch phase.

The quantitative criteria may be considered to be met by the total investments held by investors using the same investment adviser.

The Management Company provides information related to rebates free of charge on request from the investor.

All the shares representing the assets of a sub-fund form a class of shares. Where classes of shares are issued, their specificities are detailed in the annexes of the prospectus of the SICAV.

The Board of Directors of the SICAV may decide to create several share classes for each sub-fund, whose assets will be invested according to the specific investment policy of the relevant sub-fund, but where the share classes may differ by specific subscription and/or redemption fee structures, currency risk hedging policies, distribution policies and/or management or investment advisory fees or by any other particularities applicable to each class. Where applicable, this information is provided in the current prospectus of the SICAV.

### Pooling

The SICAV makes use of pooling for technical reasons linked to the accounting of the performance fees and the hedging of the exchange risk for its hedged share classes denominated in currencies other than the reference currency of the sub-funds. Such pooling is set-up as a "pool feeder" structure.

Technical pooling (performance fees and hedged share classes)

The investments, other net assets and operations (such as dividends, interest, realised results on investments, ...) common to all share classes are held in the sub-fund via the investments in the pool of investments, while items specific to each share class (such as depositary, service, management fees and performance fees) and items specific to hedged share classes (such as forward foreign exchange contracts and other contractual fees linked to the hedging) are recorded in dedicated "feeder" accounts.

Each "feeder" is allocated a portion of the pool (percentage participation) according to its initial contribution. Subsequently, the portion of the percentage participation of each feeder is determined on each NAV calculation based on the size of each feeder as converted in the reference currency of the pool at the exchange rate applicable on the NAV calculation date.

Presentation and impact of Pooling in the financial statements

The data recorded in the statement of operations and changes in net assets under "Net realised gain/loss on pool - pooling effect" represent:

- the currency effect due to differences between the exchange rates used as at the closing date and those used at each NAV calculation.

During the period and as at period-end, investments held at the level of a specific pool are fully allocated to a specific sub-fund.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

### General

The financial statements are prepared in accordance with generally accepted accounting principles and with the legal reporting requirements applicable in Luxembourg relating to undertakings for collective investment ("UCI").

### Formation expenses

Formation expenses have been amortised over a maximum period of five years.

### Conversion of foreign currencies for each sub-fund

Cash at banks, other net assets and the market value of the investment portfolio expressed in currencies other than the base currency of the sub-fund are converted into the base currency of the sub-fund at the exchange rate prevailing at the closing date.

Income and expenses expressed in currencies other than the base currency of the sub-fund are converted into the base currency of the sub-fund at the exchange rate applicable on the transaction date.

Resulting foreign exchange gains and losses are recorded in the statement of operations and changes in net assets.

## Combined financial statements of the SICAV

The combined financial statements of the SICAV are expressed in Euro and correspond to the sum of items in the financial statements of each sub-fund, converted into Euro at the exchange rate prevailing at the closing date.

### Valuation of assets of each sub-fund

1. Securities listed on an official stock exchange or another regulated market are valued at the last known price or snap shot and fair value price, provided this price is representative.
2. Securities not listed on such stock exchange or regulated market and listed securities for which the last known price is not representative are valued with prudence and in good faith by the Board of Directors of the SICAV on the basis of their foreseeable sale prices.
3. The value of companies not listed on a stock exchange or regulated market may be determined on the basis of a valuation method put forward with prudence and in good faith by the Board of Directors of the SICAV based on the last audited annual financial statements available, and/or based on recent events that could have an impact on the value of the security in question and/or on any other valuation available. The choice of method and means used for the valuation depends on the estimated relevance of the data available. The value may be corrected on the basis of any unaudited interim financial statements available. If the Board of Directors of the SICAV considers that the price thus obtained does not reflect the probable sale price of such a security, it shall then estimate the value of the security with prudence and in good faith on the basis of its probable selling price.
4. The value of futures contracts and options contracts traded on a stock exchange or another regulated market shall be based on the closing price or settlement price published by the stock exchange or by the other regulated market that as a general rule serves as the principal trading place for these contracts. Futures contracts and options contracts not traded on a stock exchange or another regulated market are valued at their liquidation value determined in accordance with the rules established with prudence and in good faith by the Board of Directors of the SICAV, in keeping with uniform criteria set out for each type of contract.
5. Units/shares issued by open-ended undertakings for collective investment are valued:
  - on the basis of the most recent NAV available to the Central Administration Agent, or;
  - on the basis of the estimated NAV on the date closest to the sub-fund's valuation day.
6. Money market instruments are valued according to the amortised cost method, at their nominal value plus any accrued interest, or using the "mark-to-market" method.
7. Contracts For Difference ("CFD") are valued on the basis of the difference between the price of their underlying on the valuation date and on the acquisition date.
8. The unrealised gains or losses resulting from outstanding forward foreign exchange contracts are determined on the valuation day on the basis of the forward foreign exchange prices applicable on this date and are recorded in the statement of net assets.
9. For the Interest Rate Swaps ("IRS"), expected future cash flows receivable and payable on swap contracts are valued at their present value.
10. Credit Default Swaps ("CDS") are revalued on the basis of replacement spreads provided by Bloomberg Valuation Services.
11. Total Return Swaps ("TRS") are valued on the basis of the difference between the price of their underlying on the valuation date and on the acquisition date.
12. The value of cash in hand or at bank, notes and bills payable at sight and accounts receivable, prepaid expenses, dividends and interest declared or due but not yet received, consists of the nominal value of these assets, unless it appears unlikely that this value will be received; in the latter case, the value is determined by deducting an amount the Board of Directors of the SICAV deems appropriate to reflect the real value of those assets.

If the Board of Directors of the SICAV considers it necessary, it may employ a valuation committee which will be entrusted with estimating the value of certain securities with prudence and in good faith.

The Board of Directors of the SICAV is authorised to apply any other suitable valuation principles to a sub-fund's assets where it would be impossible or inappropriate to use the above criteria.

### **The specific valuation of securities in certain sub-funds**

For the Short-Term Money Market (CHF, EUR, GBP, JPY and USD) and Sovereign Short-Term Money Market (EUR and USD) sub-funds, unlisted securities are valued using the "Marked-to-Model" method, taking into account the issuer spread and the risk-free rates. Securities for which a market quotation exists are valued using a "Mark to Market" method.

### **Valuation of non-listed investments**

Such securities are entered into the portfolio at acquisition cost. The valuation frequency depends on the occurrence of significant events affecting the security. In the absence of a significant event, valuations should be carried out at least twice per year. Examples of significant events triggering a valuation process include:

- Substantially higher/lower-than-expected profits;
- A new round of financing initiated by the company;
- A new transaction (initiated by a third party investor);
- Restructuring operations.

### **Recognition of futures contracts, options on futures contracts and CFD**

At the time of each NAV calculation, the margin call on futures contracts, options on futures contracts and CFD is recorded directly in the realised capital gains and losses accounts relating to forward contracts.

### **Accounting of futures contracts, options on futures contracts and CFD**

Unrealised appreciations and depreciations on futures contracts, options on futures contracts and CFD are settled daily through the reception/payment of a cash amount corresponding to the daily increase/decrease of the market value of each opened future, option on future contract or CFD. Such cash amount is recorded under the caption "Cash at banks" in the statement of net assets and the corresponding amount is recorded under the caption "net realised gain and loss on forward contracts" in the statement of operations and changes in net assets.

### **Net realised gains or losses on sales of investments**

Net realised gain or loss on sales of investments is calculated on the basis of the weighted average cost of the investment sold.

### **Acquisition cost of investment securities**

Cost of investment securities denominated in currencies other than the base currency of the sub-fund is converted into the base currency of the sub-fund at the exchange rate applicable on the acquisition date.

### **Income**

Dividends are recorded net of withholding tax at the ex-date. Interest is recorded on an accrual basis.

## Dividend distribution

The Board of Directors of the SICAV reserves the right to introduce a distribution policy that may vary between sub-funds and sub-classes of shares in issue. In addition to the aforementioned distributions, the SICAV may decide to distribute interim dividends. The SICAV may distribute the net investment revenue, realised capital gains, unrealised capital gains and capital. Investors should thus be aware that distributions may effectively reduce the net value of the SICAV. No income is distributed if the SICAV's net assets after distribution fall below EUR 1,250,000. The SICAV may distribute free bonus shares within the same limits. Dividends and allotments not claimed within five years of their payment date lapse and revert to the sub-funds or to the relevant sub-class of shares in the sub-funds of the SICAV.

### 3. "TAXE D'ABONNEMENT"

### Belgian annual tax

The SICAV is registered with the Belgium Financial Services and Markets Authority in accordance with the Article 154 of the Act of August 3, 2012 relating to financials markets. Funds registered for public distribution in Belgium are subject to an annual tax of 0.0925% on the NAV of share distributed in Belgium via Belgian intermediaries as at December 31 of the previous year.

This tax is recorded in the caption "Professional fees, audit fees and other expenses" of the statement of operations and other changes in net assets.

## 4. MANAGEMENT FEES, SERVICE FEES AND DEPOSITARY FEES

The SICAV has entrusted the management function to the Management Company, which has delegated it to one or more Investment Managers for each sub-fund.

Subject to prior approval by the Management Company, the Investment Managers may appoint one or more investment sub-managers, which may or may not be part of the Pictet Group, to provide all or part of the management of certain sub-funds, as specified in the annexes of the current prospectus of the SICAV.

The Management Company may be assisted by one or more Investment Advisors internal or external of the Pictet Group for the purpose of advising the Management Company on investment opportunities for the SICAV.

The Management Company receives management fees from the sub-funds for the purpose of remunerating the Investment Managers, the Investment Sub-Managers, the Investment Advisors and the Distributors, where applicable. ## 6. OTHER FEES PAYABLE

As at March 31, 2024, other fees payable mainly include service, depositary and sundry fees.

## 7. SUBSCRIPTION, REDEMPTION AND/OR CONVERSION PRICE

The issue price for shares in each sub-fund (or sub class of shares) is equal to the NAV of each share (or each sub-class of shares) in the sub-fund in question, calculated on a forward pricing basis as at the relevant valuation day. This price may be increased by fees paid to financial intermediaries, which will not exceed up to 5% of the NAV per share for the sub-fund in question and will be paid to financial intermediaries and/or distributors (excluding the Management Company) involved in the distribution of the SICAV's shares. Front- and back-end load for intermediaries will vary according to the sub-class of share. This issue price will be increased to cover any duties, taxes and stamp duties due.

The redemption price for shares (or sub-class of shares) of each sub-fund is equal to the NAV of each share (or each sub-class of shares) in the sub-fund in question, calculated on a forward pricing basis as of the applicable valuation day. A commission paid to financial intermediaries and/or distributors may be deducted from this amount, representing up to 1% of the NAV per share, may be deducted from this amount and paid to financial intermediaries and/or distributors (excluding the Management Company). Front- and back-end load for intermediaries will vary according to the sub-class of share. The redemption price will be reduced to cover any duties, taxes and stamp duties to be paid.

In certain exceptional circumstances such as, for example:

- significant trading volumes,
- and/or market disturbances,
- and in any other cases when the Board of Directors of the SICAV deems, at its sole discretion, that the interest of the existing shareholders (concerning issues/switches) or of the remaining shareholders (concerning redemptions/switches) might be negatively affected.

The Board of Directors of the SICAV will be authorised to charge a "Dilution Levy" for a maximum of 2% of the value of the NAV.

The Board of Directors of the SICAV will be authorised to apply corrections to the NAV as described in the section "How to calculate NAV" of the current Prospectus.

## 8. SWING PRICING

A swing pricing mechanism has been put in place in order to protect the existing shareholders, at the time of subscriptions and/or redemptions received for a given valuation day. As a general principle, investors entering or shareholders exiting generally bear the costs incurred by trading activity. These costs estimated at a flat rate or effective value may be invoiced separately or by adjusting the net asset value of a concerned sub-fund or class of shares either down or up.

The swing pricing mechanism may be applied across all sub-funds with the exception of certain share classes of the indexed funds. The extent of the price adjustment is set by the Board of Directors of the SICAV. The amount of the adjustment may vary from sub-fund to sub-fund and will not exceed 2% as general principal of the original NAV per share. Exceptions, if any, are disclosed in the sub-fund annexes.

For each sub-fund with a swing pricing mechanism, a pre-defined swing threshold has been defined set as a percentage of the sub-fund's net asset value ("NAV"). This pre-defined swing threshold might be equal to 0% (the terminology "full swing" is then used) or different to 0% (the terminology "partial swing" is then used).

If for a given valuation day:

- the net inflow into a sub-fund exceeds the pre-defined threshold, then the NAV per share will be swung up. The shareholders subscribing into the sub-fund will thus bear the costs incurred by the trading activities triggered by their subscriptions by paying a higher NAV.
- the net outflow into a sub-fund exceeds the pre-defined threshold, then the NAV per share will be swung down. The redeeming shareholders of the sub-fund will thus bear the costs incurred by the trading activities triggered by their redemptions by receiving a lower NAV.

The Board of Directors of the SICAV may decide to increase the maximum adjustment limit (invoiced separately or charged by adjusting the net asset value) stated in the Prospectus in exceptional circumstances and on a temporary basis, to protect Shareholders' interests.

The following sub-funds used the swing pricing mechanism during the period ended March 31, 2024:

## 9. PERFORMANCE FEES

Within the SICAV, performance fees have been implemented for two sub-funds and are intended to remunerate the investment managers of these sub-funds.

The performance fee is calculated as follows:

The investment manager receives a performance fee for all shares of the sub-fund, except for "X" shares, accrued for every valuation day and paid annually, based on the NAV, equivalent to the rate mentioned in the below table of the performance of the NAV per share (measured against the high water mark) versus the index shown in the table below for each class of shares since the last payment of the performance fee.

	PICTET - MULTI ASSET GLOBAL OPPORTUNITIES	PICTET - GLOBAL FIXED INCOME OPPORTUNITIES
Performance fee rate	10.00%	10.00%
<b>TYPE OF SHARE</b>

Hedged share classes denominated in GBP	Sterling Overnight Interbank Average Rate (SONIA) + 3%	Sterling Overnight Interbank Average Rate (SONIA) + 1.5%

The performance fee is calculated on the basis of the NAV per Share after deduction of all expenses, liabilities, and management fees (but not performance fee), and is adjusted to take account of all subscriptions and redemptions.

Any first calculation period (a period is at least 12 months) shall start on the launch date of the relevant Class and terminate as at the last Valuation Day of the current fiscal year. The subsequent calculation periods shall start as at the last Valuation Day at the end of the previous calculation period and terminate as at the last Valuation Day of each following fiscal year.

The crystallisation frequency is yearly.

The performance fee is calculated by reference to the outperformance of the NAV per share, adjusted for subscriptions into and redemptions out of the relevant classes during the calculation period. No performance fee is due if the NAV per share before the performance fee turns out to be below the high water mark for the calculation period in question.

For the above sub-funds, the high water mark is defined as the greater of the following two values:

- The last highest NAV per share for which a performance fee was paid; and
- The initial NAV per share.

The dividends paid to shareholders are deducted from the high water mark.

The reference period corresponds to the SICAV's financial year.

A detail of the performance fee calculation appears in the current prospectus.

For the period ended March 31, 2024, the performance fees amounted to:

A CDS is a bilateral financial agreement whereby a counterparty (the protection buyer) pays a premium for the commitment of the protection seller to pay a certain amount if the reference issuer experiences a credit event as provided for by the agreement.

The protection buyer acquires the right to sell a specific bond issued by the reference issuer at its nominal value (or at another reference value or execution price) when a credit risk arises. Credit event generally includes bankruptcy, insolvency, judicial settlement/compulsory liquidation, deferral, or non-payment of outstanding debts.

The sub-funds receive a remuneration on these lending transactions. This remuneration is presented in the statement of operations and changes in net assets in the section entitled "Interest on securities lending". A fee amounting to a maximum of 20% of the interest received is perceived by the Depositary Bank, Bank Pictet & Cie (Europe) AG, *succursale de Luxembourg*, for the services that it provides to the SICAV in the framework of securities lending contracts.

**21. RUSSIA UKRAINE CONFLICT**

The onset of the conflict between Russia and Ukraine in February 2022 has impacted financial markets performance, further compounded by sanctions, dislocated markets and poor liquidity particularly around Russian and Ukrainian securities making it impossible to trade or value the majority of Russian securities (onshore securities i.e., in RUB, UAH) or repatriate any proceeds of sales into hard currency from any S-account.

As reference to the context described above:

- The Russian securities in local and hard currency have been valued at zero by the Board of Directors of the SICAV.
- The RUB cash account and deposits have been valued at zero by the Board of Directors.

This may be subject to change because of the evolution of the situation.

The Management Company continues to monitor existing exposures to Russia and Ukraine and the effects of the Ukraine / Russia conflict. In the context of the regular Valuation Committee and Risk Committee meetings in particular, decisions are made considering the current situation and its evolution. These decisions are subject to regular review. Key considerations include, but are not limited to:

- Direct and indirect exposures, and spill-over effects likely to have a negative impact on sub-funds.
- Markets, and asset valuation.
- Portfolio Compliance considering capital restrictions and sanctions imposed as an outcome of the Russia / Ukraine conflict.

The Board of Directors of the SICAV is confident that the SICAV operations will continue as a going concern and is care-fully following the current crisis.

### Specific to Pictet - Russian Equities

In the context described above, The Board of Directors of the SICAV decided to suspend the calculation of the net asset value, the subscriptions, the redemptions of shares of the sub-fund Pictet Russian Equities as of February 28, 2022 (as mentioned in the Shareholder notice dated February 25, 2022) and to waive the management fees until further notice.

The Board of Directors of the SICAV will regularly review the suspension and all reasonable steps will be taken to bring the Suspension Period to an end as soon as possible, having regard to the best interest of shareholders.

Under the current situation, it is not possible to determine for how long the suspension of official NAV calculation (including issue, redemption, and conversion of shares) will last. The accounting information and net asset value related to the sub-fund, presented in the current financial statements, have been established and calculated according to the accounting principles described in note 2. This net asset value is a technical and unpublished one.

Any subsequent decision that changes this status will be communicated to the investors as and when required.

### Other sub-funds impacted

With the exception of Pictet - Russian Equities, the following sub-funds' exposure to Russia has been calculated based on a theoretical market price (non-tradable market prices) to Russian securities and to the exposition on the RUB as of March 31, 2024, in percentage of the sub-fund's NAV, is as follows. This for indicative purposes only.

- Pictet - Emerging Market Index: 2.64%;
- Pictet - Global Multi Asset Themes: 10.16%;
- Pictet - Emerging Markets Multi Asset<sup>1</sup>: 2.85%.

## 22. EVENTS AFTER THE PERIOD-END

No significant event occurred after period-end.

<sup>1</sup> Which includes the last official NAV of Pictet Russian Equities HZ EUR.

Pursuant to the "Guidelines on the calculation and disclosure of the total expense ratio ("TER") of collective investment schemes" of May 16, 2008 (version of August 5, 2021) of the Asset Management Association Switzerland ("AMAS"), the SICAV is obliged to publish a TER for the latest 12-month period ("AMAS TER").

The TER is defined as the ratio between the total operating expenses (Operating charges primarily consist of management and investment advisory fees, depositary fees, bank charges and interest, service fees, performance fees, taxes and duties) and the relevant sub-fund's / share class' average NAV (calculated on the basis of the daily average of the total net assets for the relevant period) expressed in its reference currency.

The SICAV also discloses the Securities Lending TER having the same calculation method as the one used for the AMAS TER, but including the income from interests on securities lending.

Moreover, for the new share classes launched during the period, operating fees were annualised as stated in point 8 of the Guidelines. The amounts were annualised whereas certain fixed costs were not split equally over the period.

As much as the sub-funds invest more than 10% of their assets in other investment funds, a synthetic TER is calculated:

- by adding to the TER the sum of the TER of underlying funds weighted according to their share in the net assets of the related sub-fund at the reference date. If one of the target funds does not publish any TER, no synthetic TER will be calculated for this fraction of investment,
- by subtracting the impact of the retrocession received calculated by dividing the amount of retrocessions by the average assets.

For the period from April 1, 2023 to March 31, 2024, the TER were:

## 1. INDEX-TRACKING UCITS

The SICAV is comprised of the following 7 index sub-funds as at March 31, 2024:

Sub-fund	Benchmark	Currency	Ex post TE	Sub-fund's Performance (1)	Benchmark's Performance (2)
Pictet - Europe Index (3)	MSCI EUROPE	EUR	0.14%	14.48%	14.56%
Pictet - USA Index	S&P 500 Comp	USD	0.04%	23.16%	23.20%
Pictet - Japan Index	MSCI JAPAN	JPY	0.06%	21.20%	21.24%
Pictet - Pacific Ex Japan Index	MSCI PACIFIC EX JAPAN	USD	0.26%	9.38%	9.46%
Pictet - Emerging Markets Index (4)	MSCI EM	USD	0.35%	9.86%	10.12%
Pictet - Euroland Index (5)	MSCI EMU	EUR	0.11%	18.71%	18.80%
Pictet - China Index (6)	MSCI CHINA	USD	0.50%	-6.48%	-6.41%

(1) Ex post tracking error (TE) is reported as a standard deviation percentage difference. This measure reports the difference between the return the investor receives and that of the benchmark.

(2) The performance of the sub-fund is calculated on the basis of a daily frequency and on the basis of a gross return after transactions fees but before other fees.

(3) The positive deviation relative to the benchmark also corresponds to dividends that are less taxed than what is assumed by MSCI in its index calculation. While MSCI applies country specific corporate tax rates these might differ from the actual tax rate of the individual companies.

(4) Since the India introduction of a Capital Gain tax in 2018 (15% over the short term and 10% over the long term applicable on all Indian stocks), Pictet has introduced a daily provision applicable on the NAV of the fund. This provision materialises upon subscriptions and redemptions for entering/exiting investors. Russian securities held in the portfolio (2.2% as at 25.02.2022) have been valued at 0 after 25.02.2022, whereas MSCI removed Russia from its indexes on 09.03.2022.

(5) The positive deviation relative to the benchmark also corresponds to dividends that are less taxed than what is assumed by MSCI in its index calculation. While MSCI applies country specific corporate tax rates these might differ from the actual tax rate of the individual companies.

(6) The relative performance volatility of the Pictet-China index versus its benchmark is due to a currency mismatch in the valuation of Chinese local shares: The fund NAV uses the CNY/USD rate in its calculation while the index provider uses the CNH/USD in that of the benchmark. The largest weight deviations between the fund and the benchmark originates from securities that had been excluded from the investment universe based on internal sustainability criteria.

## 2. ELIGIBLE FOR THE PEA OR PLAN D'ÉPARGNE EN ACTIONS (FRENCH EQUITY SAVINGS PLAN)

French tax resident investors should be aware that the sub-fund listed below is eligible to be held within a "plan d'épargne en actions" ("PEA") in France. The SICAV undertakes that the sub-funds are investing at least 75% of their assets on a permanent basis in securities or rights eligible to the PEA.

As at March 31, 2024, the below sub-fund had the following percentage of their assets invested in eligible PEA assets:

- Pictet - Euroland Index: 96.31%
