

This is a marketing communication. This is not a contractually binding document. Please refer to the prospectus of the UCITS and to the KIID before making any final investment decisions.

Fund Description

Lazard's Developing Markets Fund seeks to generate strong relative returns over a full market cycle by investing in companies with sustainable earnings growth at attractive valuations. The Fund typically invests in securities of companies domiciled in countries included in the MSCI Emerging Markets Index with over \$300 million in market cap, and which are of sufficient liquidity.

Base Fund Currency	£79.76m

Risk Rating

Key Risks Related to the Fund

There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.

This Fund may invest in the securities of developing markets. These markets may be less developed than others and so there is a greater risk that the Fund may experience greater volatility, delays in buying, selling and claiming ownership of its investments. Developing markets may also have less developed political, economic and legal systems and there is a higher risk that the Fund may not get back its money.

The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.

Key Risks Related to the Share Class

The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.

See "Risk Factors" in the UCITS' Prospectus for more information about risks.

*Source: Morningstar, NAV to NAV basis, Net Income Reinvested, Net of Fees. *Performance data for periods less than 1 year is illustrated on a cumulative growth basis. The Fund's performance is measured against the performance of the MSCI Emerging Markets Index (the "Benchmark") which the manager of the Fund has assessed to be the most appropriate Benchmark for comparison. The Benchmark is not a target for the Fund, nor is the Fund constrained by the Benchmark as the Fund has flexibility to invest in securities and asset classes not included in the Benchmark. The Fund will only invest in securities and asset classes that are stated in the Fund Prospectus or Fund Supplement. IA Sector performance data are post-tax returns that take into account the taxes a hypothetical investor pays on fund distributions and capital gains. The returns from your investment may be affected by changes in the exchange rate.

Glossary

Active Share measured as a percentage, active share is the degree of deviation in holdings between a portfolio and its benchmark. Active share of a portfolio is calculated as half the sum of the absolute active weights of all securities in a portfolio and its benchmark. For portfolios without shorts, the statistic ranges from 0% (index tracker) to 100% (no overlap with index). The higher the number, the more "active" the manager is.

Alpha represents the return of a portfolio that is attributable to the manager's investment decisions.

Beta measures a fund's sensitivity to movements in the overall market.

EPS represents the fiscal period earnings per share (EPS) for the period.

Information ratio represents the value added by the manager (excess return) divided by the tracking error.

The **Ongoing Charges** represent the ongoing costs to the fund from one year to the next which includes but is not limited to the fund's annual management fees, professional fees, audit fees, custody fees and custody transaction fees. It

does not include any performance fee or portfolio transaction costs incurred buying or selling assets for the fund. The Ongoing charges may vary from year to year.

P/E Ratio/ Earnings Per Share (EPS).

Price to Book Value / Book Value per Share.

Return on Equity (ROE) calculated by taking earnings per share of the company and dividing it by the stock's book value.

The **Risk Rating** is calculated in line with Undertakings for Collective Investment in Transferable Securities Regulations 2011 (the "UCITS Regulations").

Sharpe ratio measures return in excess of the risk free rate for every unit of risk taken.

Tracking error measures the volatility of the difference between a portfolio's performance and the benchmark.

Volatility is a measure of the fund's returns in relation to its historic average.
