

MULTI ASSET BLENDED INTERMEDIATE FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Multi Asset Blended Intermediate Fund is a sub-fund of the Liontrust Multi-Asset Investments ICVC II and categorised as a UCITS scheme. This document is based upon the S Acc class (ISIN: GB00BCZW5K96). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund seeks to achieve capital growth and income with a median level of volatility (risk), having a risk profile of 4, in a range from 1 to 7 where 1 is the lowest risk and 7 is the highest.

Policy

- The Fund is an actively managed fund of funds.
- The Fund invests at least 70% of its assets in other funds (underlying funds), including funds which are traded on stock exchanges (investment trusts and exchange traded funds), other closed-ended funds and funds managed by the ACD or its associates.
- The underlying funds will invest globally (including in emerging markets) in a range of asset classes and financial instruments including shares, debt instruments (bonds) including those which can easily be converted into cash (money market instruments), freely transferable rights to buy other investments at a future date (warrants), financial contracts that derive their values from those of other investment instruments or indices (derivatives) and deposits.
- The underlying funds will be a blend of 'active' funds, whose managers aim to beat the performance of a benchmark, and 'passive' funds, which aim to track the performance of an index. Active funds will be selected over passive funds where the ACD believes the potential returns from active funds outweigh any additional cost.
- The Fund may also invest directly in the above asset classes and financial instruments when there are specific benefits in doing so.
- Further, the Fund may also obtain indirect exposure to property through investment in Real Estate Investment Trusts (REITs) and shares in property investment companies.
- When required to manage liquidity, or the Fund's risk, the Fund may hold its assets in cash or deposits and money market instruments.
- The Fund may use derivatives to help achieve the investment objective (investment purposes) as well as to reduce risk or to manage the Fund more efficiently (often referred to as "efficient portfolio management").
- The Fund aims to take a median level of risk in achieving its investment objective. The Fund has a risk profile of 4, which means it will typically have a balanced exposure to higher risk assets and lower risk assets than other funds in the range which have a higher or lower risk profile.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 12:00 noon for execution at 8:00am valuation on the following day. Further details can be found at www.liontrust.co.uk.

Investment process

- The Strategic Asset Allocation (SAA) is essentially the default asset allocation should the fund managers have no views about the relative attractiveness of different asset classes. In determining the SAA, historical returns and volatilities of a range of asset classes, as well as their correlations with each other, and other market dynamics are collated and studied. The SAA is updated annually and has a long-term (15 years) time horizon.
- The Tactical Asset Allocation (TAA) is the process through which the Multi-Asset team has an overweight or underweight exposure to an asset class or subasset class when compared to the SAA. The TAA may increase or decrease overall strategy risk depending on the Liontrust Multi-Asset team's view of the stage of the market cycle. Even if the Multi-Asset team decides to adopt a neutral risk position, it is still possible to express a view between asset classes and sub-asset classes without meaningfully altering the overall portfolio risk from neutral to the SAA. The Multi-Asset team refers to this as an Efficient Allocation (EA). The TAA is reviewed and updated quarterly.
- The purpose of the portfolio construction is to take a fairly abstract concept in the form of a TAA and to express it in an investable form for each strategy that the Multi-Asset team manages. The portfolio construction takes account of the output from the TAA as well as the input from the manager selection process. The portfolio construction consists of four steps: factor selection, active and passive, set targets, and risk checks.
- Manager selection consist of universe filtering, quantitative and qualitative research, operational due diligence, and security set up.
- The implementation seeks to ensure the Multi-Asset team implements in a manner that treats customers fairly, finds an optimal balance between trading and portfolio turnover, and ensures the implemented holdings reflect the Liontrust Multi-Asset team's views generated through the investment process. While the Liontrust Multi-Asset team takes its fiduciary duty to investors extremely seriously, they also ensure there are effective checks and balances internally.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is an actively managed fund of funds and invests globally (including in emerging markets) in a range of asset classes and financial instruments including shares, debt instruments (bonds) including those which can easily be converted into cash (money market instruments), REITs, freely transferable rights to buy other investments at a future date (warrants), financial contracts that derive their values from those of other investment instruments, alternatives or indices (derivatives) and deposits.
- The underlying funds will be a blend of 'active' funds, whose managers aim to beat the performance of a benchmark, and 'passive' funds, which aim to track the performance of an index. Active funds will be selected over passive funds where Liontrust believes the potential returns from active funds outweigh any additional cost.
- The Fund's investment objective is to target capital growth for investors. Growth funds tend to pay out lower levels of dividend resulting in lower income yields and may produce more volatile returns than the market as a whole.
- The risk profile used by Liontrust to produce the long term asset allocation and Prospectus Objective differs from the SRRI shown below, so the two rankings may not be the same.
- The Fund is categorised 4 primarily for its balanced exposure to higher and lower risk assets.
- The SRRI may not fully take into account the following risks:
 - Credit Risk: There is a risk that an investment will fail to make required payments and this may reduce the income paid to the fund, or its capital value;
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss;
 - Liquidity Risk: If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected;

MULTI ASSET BLENDED INTERMEDIATE FUND

- Interest Rate Risk: Fluctuations in interest rates may affect the value of the Fund and your investment;
- Derivatives Risk: Some of the underlying funds may invest in derivatives, which can, in some circumstances, create wider fluctuations in their prices over time;
- Emerging Markets: The Fund may invest in less economically developed markets (emerging markets) which can involve greater risks than well developed economies;
- Currency Risk: The Fund invests in overseas markets and the value of the Fund may fall or rise as a result of changes in exchange rates.
- Index Tracking Risk: The performance of any passive funds used may not exactly track that of their Indices

■ For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Charges for this fund

■ The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

■ This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year	
Ongoing charges	0.72%

Charges taken from the Fund under certain specific circumstances	
Performance fee	None

■ **The entry and exit charges** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.

■ **The ongoing charges** figure is based on expenses as at 31 December 2023. This figure may vary from year to year. It excludes:

- performance fees;
- portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.

■ For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk or visit the costs and charges page on our website at www.liontrust.co.uk/cost-and-charges.

Past performance

■ **Past performance does not predict future returns.** It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.

■ The Fund launch date is 11 November 2001.

■ The S Acc share class launch date is 03 December 2013. Performance shown before this date relates to the R Net Acc share class.

■ The base currency of the Fund is pounds sterling.
