Schroder Global Sustainable Value Equity Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited
Class Z Income GBP (GB00BJRSVL75)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth in excess of the MSCI World (Net Total Return) Index (after fees have been deducted) over a three to five year period by investing in equity and equity related securities of companies worldwide which meet the investment manager's sustainability criteria.

Investment policy

The fund is actively managed and invests at least 80% of its assets in a concentrated range of equity and equity related securities of companies worldwide which meet the investment manager's sustainability criteria (please see the fund Characteristics section of the prospectus relating to the fund). The fund typically holds 30 to 70 companies.

The fund focuses on companies that have certain "Value" characteristics. Value is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the manager believes have been undervalued by the market.

The fund maintains a higher overall sustainability score than the MSCI World (Net Total Return) index, based on the investment manager's rating system. More details on the investment process used to achieve this can be found in the fund Characteristics section.

The fund does not directly invest in certain activities, industries or groups of issuers above certain limits listed under "Sustainability Information" on the fund's webpage, accessed via

www.schroders.com/en/uk/private-investor/gfc.

The fund invests in companies that have good governance practices, as determined by the investment manager's rating criteria (please see the fund Characteristics section of the prospectus relating to the fund).

The fund may invest in companies that the investment manager believes will improve their sustainability practices within a reasonable timeframe, typically up to three years.

The investment manager may also engage with companies held by the fund to challenge identified areas of weakness on sustainability issues. More details on the investment manager's approach to sustainability and its engagement with companies are available on the website.

<https://www.schroders.com/en/uk/private-investor/strategic-capabilities/sustainability/>

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently (for more information please refer to section 6 of Appendix I of the prospectus).

Benchmark

The fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net Total Return) Index, and compared against the MSCI World Value (Net Total Return) Index and the Investment Association Global sector average return.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Potentially lower reward

Higher risk

Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions.

This may result in large changes in the value of the fund, both up or down.

Sustainable Investing Risk: The fund applies sustainability criteria in its selection of investments. This investment focus may limit the fund's exposure to companies, industries or sectors and the fund may forego investment opportunities that do not align with its sustainability criteria chosen by the investment manager. As investors may differ in their views of what constitutes sustainability, the fund may invest in companies that do not reflect the beliefs or values of any particular investor.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.
