for the financial year ended 31 October 2023

General Information

Structure

Aegon Asset Management Investment Company (Ireland) Plc (the “Company”) is structured as an umbrella type open-ended investment company with variable capital consisting of a number of different sub-funds (“Funds”), incorporated on 25 June 2007 under the Companies Act 2014 (as amended) and is authorised in Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (“the UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”). Accordingly, the Company is supervised by the Central Bank of Ireland (the “Central Bank”).

Shares representing interests in different Funds may be issued from time to time by the Directors. Shares of more than one class may be issued in relation to a Fund. All shares of each class will rank pari passu save as provided for in the relevant Supplement. A separate portfolio of assets will be maintained for each Fund (and accordingly not for each class of shares) and will be invested in accordance with the investment objective and policies applicable to such Fund.

The Company has segregated liability between its Funds and accordingly any liability incurred on behalf of or attributable to any Fund shall be discharged solely out of the assets of that Fund.

As at 31 October 2023, the Company has eleven active Funds in existence, all of which are open to new subscriptions:

- Aegon Strategic Global Bond Fund
- Aegon Investment Grade Global Bond Fund
- Aegon High Yield Global Bond Fund
- Aegon Absolute Return Bond Fund
- Aegon Global Equity Income Fund
- Aegon Global Diversified Income Fund
- Aegon Global Sustainable Equity Fund
- Aegon Global Sustainable Diversified Growth Fund
- Aegon Global Equity Market Neutral Fund
- Aegon Short Dated High Yield Global Bond Fund
- Aegon Global Short Dated Climate Transition Fund

General Information (continued)

Investment Objectives and Policies of the Funds

Aegon Strategic Global Bond Fund

The investment objective of the Aegon Strategic Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least two thirds of its net assets in global debt instruments in any currency, ranging from AAA Government Bonds through to High Yield and Emerging Market Bonds. The Investment Grade and AAA Government Bond sector includes all fixed income securities available globally.

The Fund may invest in government and corporate bonds which may be at a fixed or floating rate, rated or unrated.

Aegon Investment Grade Global Bond Fund

The investment objective of the Aegon Investment Grade Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing primarily in Investment Grade Government and Corporate bonds in any currency which may be at a fixed or floating rate, rated or unrated (deemed to have an equivalent rating by the Investment Manager). The Fund may also hold selected High Yield bonds and cash.

Aegon High Yield Global Bond Fund

The investment objective of the Aegon High Yield Global Bond Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least two thirds of its net assets in High Yield bonds (i.e. securities having a rating of Ba1 by Moody's or below or BB+ by Standard and Poor's or below, or other debt instruments deemed by the Investment Manager to be of similar credit quality) in any currency, which may be government or corporate, and which may be at a fixed or floating rate, rated or unrated. The Fund may also hold selected investment grade bonds and cash.

The Fund will invest primarily in High Yield bonds whose credit rating is rated below investment grade.

Aegon Absolute Return Bond Fund

The investment objective of the Aegon Absolute Return Bond Fund is to generate positive absolute returns for investors over a rolling 3 year period irrespective of market conditions.

The Fund will seek to achieve its investment objective by investing in global debt instruments in any currency, ranging from AAA Government Bonds through to High Yield and Emerging Market Bonds. The Fund may invest in all types of fixed and floating rate fixed income securities.

Aegon Global Equity Income Fund

The investment objective of the Aegon Global Equity Income Fund is to provide income and capital growth over the longer term by investing in the global equities market. The Fund will aim to deliver a yield higher than that generally available from investment in global equities.

In seeking to achieve its investment objective the Fund intends to invest primarily in a portfolio of global equity securities providing an above average yield (i.e. a higher yield than the yield of the overall global equity market). The Fund may also invest to a limited extent, in other securities and instruments.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

General Information (continued)

Aegon Global Diversified Income Fund

The investment objective of the Aegon Global Diversified Income Fund is to provide income with the potential for capital growth over the medium term.

The Fund will seek to achieve its investment objective by investing predominantly in a diversified portfolio of equities and bonds denominated in any currency. The Fund's exposure to the equities and bonds may be obtained through direct investment or through the Financial Derivative Instruments.

Aegon Global Sustainable Equity Fund

The investment objective of the Aegon Global Sustainable Equity Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing directly in a diversified portfolio of global equity securities which meet the Fund's predefined sustainability criteria. The Fund is not constrained by any index weightings and will not concentrate on any particular sector. There are no currency or geographical limitations on the Fund's investments.

Aegon Global Sustainable Diversified Growth Fund

The investment objective of the Aegon Global Sustainable Diversified Growth Fund is to maximise total return (income plus capital) over the medium term at a lower risk than global equity markets by investing in a diversified portfolio of global assets.

The Fund will seek to achieve its investment objective by investing predominantly in a diversified portfolio of equities and bonds denominated in any currency. The Fund's exposure to the equities and bonds may be obtained through direct investment or through the Financial Derivative Instruments.

Aegon Global Equity Market Neutral Fund

The investment objective of the Aegon Global Equity Market Neutral Fund is to generate positive absolute returns over a rolling 3 year period irrespective of market conditions by investing in the global equities market.

The Fund will seek to achieve its investment objective by investing in companies listed or traded on a recognised market. The Fund will invest in these companies or equity indices primarily using Financial Derivative Instruments such as swaps and contracts for difference but may also invest directly in equities.

Aegon Short Dated High Yield Global Bond Fund

The investment objective of the Fund is to maximise total return (income plus capital).

The Fund will seek to achieve its investment objective by investing at least two thirds of its net assets in High Yield bonds in any currency, which may be government or corporate, and which may be at a fixed or floating rate, rated or unrated. The Fund's exposure to bonds may be obtained through direct investment or through the Financial Derivative Instruments. The Fund may also hold selected Investment Grade bonds and cash.

Aegon Global Short Dated Climate Transition Fund

The investment objective of the Aegon Global Short Dated Climate Transition Fund is to provide a return (income plus capital).

The Fund seeks to achieve its investment objective by investing primarily in global Investment Grade Bonds, including government and corporate bonds denominated in any currency and which might be fixed or floating rate and rated or unrated, which meet the Fund's predefined sustainable criteria.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Directors' Report

The Directors present their annual report and audited financial statements for the financial year ended 31 October 2023.

Statement of Directors' Responsibilities in respect of the Financial Statements

The Directors are responsible for preparing the Annual Report and financial statements in accordance with applicable law and regulations. Under that law the Directors have prepared the financial statements in accordance with Irish Generally Accepted Accounting Practice (accounting standards issued by the UK Financial Reporting Council, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland and Irish law) and European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) ("the UCITS Regulations").

Irish company law requires the Directors to prepare financial statements for each financial year, which give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year.

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year. In preparing those financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business; and
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The Directors are responsible for keeping adequate accounting records which correctly explain and record the transactions of the Company, enable at any time the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy, enable them to ensure that the financial statements and Directors' report comply with the Companies Act 2014 (as amended), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended) ("the Central Bank UCITS Regulations") and enable the financial statements to be audited. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Under the UCITS Regulations, the Directors are required to entrust the assets of the Company to a Depositary for safekeeping. In carrying out this duty, the Directors have delegated custody of the Company's assets to Citi Depositary Services Ireland DAC.

Statement on relevant audit information

The Directors confirm so far as they are aware that there is no relevant audit information of which the Company's statutory auditors are unaware. The Directors have taken all the steps that they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Directors' Report (continued)

General Principles

The Board of Directors voluntarily complies with the Corporate Governance Code for Collective Investment Schemes and Management Companies as published by the Irish Funds Industry Association (the "IF Code") in December 2011, as the Company's corporate governance code and which can be obtained at <http://www.irishfunds.ie/regulatory-technical/corporate-governance>. The Board of Directors has assessed the measures included in the IF Code as being consistent with its corporate governance practices and procedures for the financial year.

Directors' Compliance Statement

It is the policy of the Company to comply with its relevant obligations (as defined in the Companies Act 2014). As required by Section 225(2) of the Companies Act 2014, the Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Company's relevant obligations. The Directors have performed a review, during the financial year, of the arrangements and structures in place to ensure material compliance with the Company's relevant obligations.

Principal Activities

Please refer to General Information, for a summary of the Company's principal activities.

Review of the Business and Future Developments

The Directors have entrusted the management of the Funds to the Management Company, the Management Company has delegated certain duties to the Investment Manager and the Administrator. The investment management activities and the details of the performance of the Funds over the last financial year are reviewed in detail in the Investment Manager's Report.

The Directors of the Company do not anticipate any change in the structure or investment objectives of the Funds.

Risk management objectives and policies

The Company has been approved by the Central Bank as an Undertakings for Collective Investments in Transferable Securities ("UCITS") Fund. It is an umbrella Fund which at the date of this report consisted of eleven active Funds. All Funds were operational during the financial year under review.

The main risks arising from the Company's financial instruments are market risk (including market price risk, interest rate risk and currency risk), liquidity risk and credit risk. A detailed review of the principal risks and the management of those risks are included in Note 12 to the Financial Statements. The Directors also consider the macroeconomic risks. These include risks arising from uncertainties relating to global events such as the Ukraine/Russian crisis as outlined in Significant Events During the Financial Year and Significant Subsequent Events.

The prospectus of the Company sets out a comprehensive disclosure of the risk inherent in investing in the Funds.

Results

The financial position and results for the financial year are set out in Statement of Financial Position and the Statement of Comprehensive Income.

Detailed distributions are disclosed in Note 9 of the notes to the financial statements.

The Increase in net assets attributable to the shareholders of the Company for the financial year amounted to USD 99,133,876 (2022: decrease of USD (646,380,987)).

Directors' Report (continued)

Events after the Statement of Financial Position date (continued)

On 28 December 2023, there were over 90% redemption on the Global Sustainable Diversified Growth Fund.

On 29 February 2024, the Global Sustainable Diversified Growth Fund and the Global Equity Market Neutral Fund are to be closed.

There have been no other significant events since the financial year end.

Directors

The Directors of the Company during the financial year were:

Mr. Mike Kirby
Ms. Bronwyn Wright
Mr. Stuart Donald

Directors' and Secretary's Interests

None of the Directors and Secretary held any interests in the Company as at 31 October 2023 or at any point during the financial year (31 October 2022: None).

Mike Kirby is a director of the Waystone Group of which Waystone Management Company (IE) Limited ("WMC") is a member firm, a firm which provides consultancy, VAT reporting and money laundering reporting officer services to the Company. Please refer to Note 14 for details of fees paid to WMC.

Stuart Donald is an employee of Aegon Asset Management UK Plc, the Investment Manager. Please refer to Note 11 for details of fees paid to the Investment Manager.

Details on Directors fees are included in Note 11 and Note 14.

Connected Persons

Regulation 43 of the Central Bank UCITS Regulations 'Restrictions of transactions with connected persons' states that 'A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unit holders of the UCITS'.

As required under Central Bank UCITS Regulation, the Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected parties that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Audit Committee (Section 167 of Companies Act 2014)

The Directors believe that there is no requirement to form an audit committee as the Board has only non-executive Directors and one independent Director and the Company complies with the provisions of the Irish Funds' Corporate Governance Code. The Directors have delegated the day to day investment management and administration of the Company to the Investment Manager and to the Administrator respectively. The Directors have also appointed Citi Depository Services Ireland Designated Activity Company as depository of the assets of the Company.

Accounting Records

To ensure that adequate accounting records are kept in accordance with Sections 281 to 285 of the Companies Act 2014, the Directors of the Company have employed a service organisation, Citibank Europe Plc (the "Administrator"). The accounting records are kept at the offices of the Administrator at 1 North Wall Quay, Dublin 1, Ireland.

Auditors

The auditors, PricewaterhouseCoopers, Chartered Accountants, will resign after this audit cycle and will be replaced by Ernst & Young Chartered Accountants.

On behalf of the Board

for the financial year ended 31 October 2023

Investment Manager's Report

Aegon Strategic Global Bond Fund

The Aegon Strategic Global Bond Fund returned 2.20% (net of fees) over the period, compared to the peer group median return of 2.85%.¹

Fixed income markets were volatile over the 12-month period, with core government bonds coming under significant pressure. Investment grade bonds struggled initially although they rallied as we moved into 2023 and outperformed their government counterparts. High yield bonds, however, were the strongest performers, buoyed mainly by robust corporate earnings.

The main drivers of the volatile conditions were the persistence of inflation - with central banks raising rates as a consequence - and fears over the extent of a consumer-led slowdown. Political volatility was also to the fore, particularly in the UK where the short-lived Truss-led government announced unfunded tax cuts at the start of the period. This move led to concerns over the UK government's fiscal credibility and caused borrowing costs to move higher, leading to a sharp sell-off in gilts and a wave of forced selling in UK corporate bonds. However, the subsequent reversal of the government's expansionary fiscal policy - and confirmation of the new administration's commitment to a more conservative budget - bolstered confidence in gilts.

As we moved into 2023, most markets were generally more positive in terms of inflation expectations, given a decline in energy prices and weaker economic data. At the same time, fears over stresses in the banking system, which ultimately led to the demise of Credit Suisse, proved to be short-lived with no signs of wider contagion.

Given the more positive backdrop, any signs of a peak in inflation data were greeted by a rally in markets. Central banks, however, were careful to highlight that the battle to control inflation was far from over. This was particularly the case towards the end of the period, where the US Fed, the ECB and the Bank of England all raised rates, with the latter reacting to stronger than expected inflation data.

Throughout the 12-month period we were very active in managing the fund's duration level (a measure of interest rate risk). Initially, we reduced UK duration following the sharp rise in gilt yields due to the emergence of political and fiscal risks. With initially approximately 1.5-years duration in the UK, in the aftermath of the fiscal announcement, the allocation there was reduced to close to 0.5-years in the face of the aggressive sell-off in UK gilts. Nonetheless, the magnitude of the sell-off hurt performance.

We subsequently added UK duration as the political risk premium subsided and sold some US duration to take advantage of the relative value opportunity. These moves contributed positively to the fund as UK gilts benefited from the more positive environment as we moved into October. We then reduced our exposure to UK interest rate risk once again and, instead, rotated back into the US and also into some additional European interest rate risk. This left the fund with a relative long duration position, which added value up to the end of the 2022.

We retained our bias to be on the longer side of interest rate risk as we moved into 2023. This was predicated on our view that global inflationary pressures, while still some way off the targets set by central banks, were poised to make a move down in 2023 from very elevated levels. This in turn made us adopt a more holistic duration management approach, where the fund's duration positioning strategically was set to fluctuate between a relatively 'neutral' to 'long' position.

Within that, we still saw plenty of room for dispersion across the major government bond markets. We adopted a strong overweight position in US government bonds, which we maintained throughout the first half of the year. This decision was informed on the back of our view that on one hand, inflation rates in the US would fall further and sooner than those in the UK and Europe, and on another, stemming from the fact that the Federal Reserve was much further ahead in its inflation fighting mandate versus its counterparts in Europe and the UK.

However, over the summer period - in the wake of the surprisingly strong growth revisions and the rapid commodity price increase - government bonds performed very poorly. This was a significant drag on the fund's performance, given our above average duration positioning. At the same time our US steepening bias detracted as the curve inverted further; the more aggressive approach from the US Federal Reserve challenged short-dated bonds, while official rates at a higher terminal rate for a longer period of time stood to benefit longer-dated bonds. We subsequently moderated our positioning.

Corporate bond markets were not immune to the volatility witnessed in their government bond counterparts, and as a result our exposure to both investment grade and high yield bonds struggled at the beginning of the period. We subsequently took advantage of this weakness to increase our exposure to these assets as we believed much of the potential downside was already reflected in the price. We therefore benefited for the majority of the period from the subsequent recovery seen in both yields and credit, with financial debt and the high yield market leading the rally.

Outlook

The switch from fears over rate hikes giving way to expectations of rate cuts has helped improve investor sentiment, and the drop in rates market volatility has also helped to encourage demand for fixed income assets. As we look forward into 2024, we expect these themes to continue as we move into the next phase of the economic and interest rate cycle. This backdrop is expected to support strong returns from fixed income assets.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Investment Manager's Report (continued)

Aegon Investment Grade Global Bond Fund

The Aegon Investment Grade Global Bond Fund returned 5.89% (net of fees) over the 12-month period to 31 October 2023, outperforming the benchmark index return of 4.13%.¹

Fixed income markets were volatile over the 12-month period, with core government bonds coming under significant pressure. Investment grade bonds struggled initially although they rallied as we moved into 2023 and outperformed their government counterparts. The main drivers of the volatile conditions were the persistence of inflation - with central banks raising rates as a consequence - and fears over the extent of a consumer-led slowdown. Political stresses were also to the fore, not least in the UK with the ill-fated fiscal largesse of the Truss government leading to a sharp sell-off in UK government and corporate bonds.

As we moved into 2023, most markets were generally more positive in terms of inflation expectations, seeing a decline in energy prices and weaker economic data. Given the more positive backdrop, any signs of a peak in inflation data were greeted by a rally in markets. Central banks, however, were careful to highlight that the battle to control inflation was far from over. This was particularly the case towards the end of the period, where the US Fed, the ECB and the Bank of England all raised rates, with central banks reacting to employment and other data which continued to be robust. Given the extent to which interest rates had already risen it was almost inevitable that some stresses would emerge at some point. These stresses duly arrived in March, when economic fundamentals gave way to fears over the health of the banking system, first in the regional US banking sector, but latterly in Europe where Credit Suisse was "rescued" by UBS, with a little help from the Swiss National Bank. While this had a negative impact on credit markets initially – and led to a 'flight-to-safety' trade that benefitted government bonds - the quick reaction of central banks to alleviate the pressure on the sector helped to calm markets and avoid further contagion. Risk assets were buoyed by corporate earnings, which showed limited signs of slowdown (of any significance) as we moved through the year. This was a support, particularly for names towards the lower end of the credit rating spectrum.

Strategy

The fund began the period with an elevated level of duration of 7.6 years against the index duration of 6.3 years. This was tactically managed as the period progressed; however we held a preference for being long interest rate risk against the benchmark, and this was a recurrent feature of our positioning throughout the year. We end the year with a duration of 6.3 years, approximately half a year longer than the index.

At the beginning of the period, spreads were at levels not seen in years, with the euro and sterling markets seeing the most spread volatility. We added credit risk in the euro market, and some in sterling, but the dollar market was less favoured. We saw a rapid recovery from these wider spread levels, however, it became clear in early 2023 that the financial market was showing some signs of stress resulting from the higher rate environment. Having become increasingly wary of how far valuations had travelled, we reduced our overall risk in the fund, through cash bond sales, but also through taking a protective position in a credit derivative index which was beneficial as spreads widened in February. We were able to re-risk the fund in quarter one - post the spread widening - by removing the credit derivative protection and by adding, primarily through the new issue market (against an increase in supply), attractive cash bonds. The absence of wider banking sector contagion meant that spreads, despite the backup, were relatively well behaved in the first half of the year, with corporate bonds outperforming their government counterparts.

In the middle of the period, credit spreads tightened, and the fund was geared towards benefitting from such a scenario. We again reduced credit risk in the fund against that rally through quarter two/quarter three, feeling it was prudent to reduce risk against an expected uptick in supply in quarter three. When the supply materialised, the fund was in a strong position to exploit these opportunities. In terms of the balance of aggregate portfolio risk, we held a preference in the early part of the year for credit risk over interest rate risk, with the picture becoming more balanced as the year progressed.

Over the year we saw periods of heightened volatility have an impact on certain portfolio holdings. Whilst the fund had zero exposure to both Credit Suisse and SVB paper, during the crisis in March it was negatively impacted by the broader weakness in (subordinated) financial paper that we saw in response to the heightened market anxiety. Holdings in ING and Commerzbank all came under pressure as a result of those concerns.

The absence of contagion saw a strong recovery and indeed selected financial bonds were among our stronger contributors to fund return on the year as a whole. Legacy instruments from Aviva and HSBC were notable performers, Aviva saw a particularly generous payment to holders in order to amend the language on the bonds (to fulfil regulatory requirements). We also saw strong performance from selected long dated dollar utility bonds from Eon and Iberdrola, as well as a partial rehabilitation of both subordinated banking issuance (including the AT1 market following Credit Suisse), and of the REITs sector (as evolving interest rate expectations met with self-help measures including equity raises and asset sales). However, among our poorer performers were holdings in the property / REITs sector, with poorly performing hybrid instruments from Heimstaden and a holding in Medical Properties sold during the period, the latter on difficult fundamental performance.

Outlook

The switch from fears over rate hikes giving way to expectations of rate cuts has helped improve investor sentiment, and the drop in rates market volatility has also helped to encourage demand for fixed income assets. As we look forward into 2024, we expect these themes to continue as we move into the next phase of the economic and interest rate cycle. This backdrop is expected to support strong returns from fixed income assets.

Aegon High Yield Global Bond Fund

The Aegon High Yield Global Bond Fund returned 10.70% (net of fees) over the 12-month period to 31 October 2023, outperforming the peer group median return of 6.16%.¹

Macro uncertainty and rates volatility persisted throughout most of the period as investors recalibrated their expectations on monetary policy and recession risk. Despite market volatility, the high yield market posted solid gains during the one-year period and outperformed many other fixed income assets.

During the fourth quarter of 2022, equity and credit markets were choppy as investors balanced the positives and negatives. Relentlessly hawkish central bank commentary continued to stoke recession concerns, while moderating inflation and better-than-feared corporate earnings offset some of these concerns. In the first quarter of 2023, volatility resurfaced as tightening financial conditions and banking sector turmoil rattled markets. As US regional banks and European banks came under pressure, spreads widened, and rates volatility ensued. However, once the banking sector contagion appeared to be contained, the high yield market regained its footing and markets stabilized in the second quarter. The third quarter was a tale of two halves as high yield initially rallied until rates volatility resurfaced in September.

As the year progressed, the US economy remained surprisingly resilient with solid economic data releases. With recession risk continuing to be pushed out, macro fears subsided, and a risk-on tone persisted. Inflation continued to trend in the right direction, albeit at a slower pace than anticipated. Although macro uncertainty remains, the high yield market shrugged off future concerns and spreads tightened throughout most of the period. Beyond the macro headlines, high yield issuers generally reported better-than-expected results. Against this backdrop, the global high yield market posted strong performance with lower-quality credit leading the risk-on rally.

The primary driver of fund outperformance during the period was strong selection as our high-conviction ideas added value. By ratings, selection decisions across all high yield categories contributed positively. We held a bias towards B-rated bonds which benefitted performance and was the largest source of positive contribution from a relative ratings perspective. Throughout the period we pursued an up-in-quality positioning strategy. As a result, the fund was modestly underweight CCCs and below by the end of the period, which slightly detracted from relative performance.

In sector terms, the exposure in retail contributed the most to excess returns. We maintained the view that certain retailers would continue to benefit from pent-up demand and a stronger-than-expected consumer. Our overweight to leisure also provided strong returns, particularly in the second half of the period. Financials and banking were also positive as we capitalised on opportunities to add exposure at discounted levels following the banking crisis in March. In contrast, telecommunications struggled over the period as the sector came under pressure given broader secular changes and was the largest source of negative contribution within sectors.

On a single name basis, retail name Kirk Beauty was the top positive contributor, with fellow retail names Lycra (Eagle Intermediate) and B&M also finding themselves among the top holdings. Our holding of Credit Suisse senior non-preferred bonds did well as these rallied significantly on news of the UBS deal in March. The top detractor was media name Diamond Sports, which succumbed to the secular challenges in the communications sector. Other relative detractors were names we did not hold exposure due to unattractive risk-reward, such as energy name Petroleos Mexicanos, leisure name Carnival, and Chinese real estate name Country Garden Holdings.

Outlook

The switch from fears over rate hikes giving way to expectations of rate cuts has helped improve investor sentiment, and the drop in rates market volatility has also helped to encourage demand for fixed income assets. As we look forward into 2024, we expect these themes to continue as we move into the next phase of the economic and interest rate cycle. This backdrop is expected to support strong returns from fixed income assets.

Aegon Absolute Return Bond Fund

The Aegon Absolute Return Bond Fund returned 4.98% (net of fees) over the 12-month period, compared to 3.87% for the SONIA 3-month cash benchmark.¹

Fixed income markets were volatile over the 12-month period, with core government bonds coming under significant pressure. Investment grade bonds struggled initially although they rallied as we moved into 2023 and outperformed their government counterparts. High yield bonds, however, were the strongest performers, buoyed mainly by robust corporate earnings.

The main drivers of the volatile conditions were the persistence of inflation - with central banks raising rates as a consequence - and fears over the extent of a consumer-led slowdown. Political volatility was also to the fore, particularly in the UK where the short-lived Truss-led government announced unfunded tax cuts at the start of the period. This move led to concerns over the UK government's fiscal credibility and caused borrowing costs to move higher, leading to a sharp sell-off in gilts and a wave of forced selling in UK corporate bonds. However, the subsequent reversal of the government's expansionary fiscal policy – and confirmation of the new administration's commitment to a more conservative budget – bolstered confidence in gilts.

As we moved into 2023, most markets were generally more positive in terms of inflation expectations, given a decline in energy prices and weaker economic data. At the same time, fears over stresses in the banking system, which ultimately led to the demise of Credit Suisse, proved to be short-lived with no signs of wider contagion.

Given the more positive backdrop, any signs of a peak in inflation data were greeted by a rally in markets. Central banks, however, were careful to highlight that the battle to control inflation was far from over. This was particularly the case towards the end of the period, where the US Fed, the ECB and the Bank of England all raised rates, with the latter reacting to stronger than expected inflation data.

The fund performed well in the challenging conditions with the Credit and Carry modules helping the fund to outperform its cash benchmark. The Rates module, however, detracted.

Within the Credit module a key driver of returns came from our collection of hedged corporate bonds; where we invest in a diversified range of predominately short dated corporate bonds and hold credit and duration risk hedges against them. The generally supportive tone for credit risk – despite the impact of the banking crisis in March - was beneficial as the collection of bonds we held outperformed the market hedges held against them. At times when the market faced rising underlying yields our positions tended to hold-in well due to careful security selection and the attractive "cushion" offered by the elevated credit spread attached to the bonds.

With regards to credit protection, this was typically expressed via iTraxx Main and iTraxx Xover. Given the initial rally we witnessed in credit risk was more pronounced in Europe, we benefited from our long-risk iTraxx Main (EUR IG) versus short-risk CDX IG (USD IG). As we entered 2023 we decided to take profits on the position and subsequently rotated it into a long-risk iTraxx Main versus short-risk iTraxx Senior Financial position following the compression between the two contracts. This new position contributed positively particularly in March when the stresses in the banking sector saw a sharp decompression of the spread and allowed us to book a profit on the position.

As the period progressed, we increased the amount of credit protection (reduced the degree of credit market risk faced) via 5-year iTraxx Xover, and also increased the amount of duration risk via the purchase of 5-year German bond futures. Given the elevated level of government bond yields and the decline in credit spreads, these actions were aimed at offering downside protection against a macro slowdown that would impact credit fundamentals. Towards the end of the summer period, this positioning helped the fund to a degree, given the strain in the market due to renewed inflationary concerns.

Finally, our basis trades – while volatile - also added value with the bonds held outperforming the CDS contracts in their own names, that we held against them.

The Rates module was volatile over the period and ultimately detracted from performance.

Overall, while they added some value initially, our cross-market long positions in UK gilts generally suffered as the UK market underperformed. The firmer than expected inflation data we saw as the period progressed led to the gilt market lagging both the US and European rates moves as further rate hikes were priced in. As we entered the summer period of 2023, we began to view the gilt market as looking attractive, with a number of hikes priced in over the next 12 months, while in the US the market was pricing cuts over the same period. The combination of a subsequent downside surprise in UK inflation and an upside surprise in US GDP saw the spread differential narrow meaningfully. As a result, our long 10-year UK versus short 10-year US position performed very well, although this was not enough to offset what was a difficult period for the fund's positioning.

Investment Manager's Report (continued)

Aegon Absolute Return Bond Fund (continued)

Over the first half of the period, two yield curve positions within the fund also detracted. Our US curve steepening trade – long 5-year versus short 30-year – moved against us as longer-dated bonds performed well. This trade was in place from the beginning of the period but as the market priced-in an ever-higher peak in rates, the curve continued to flatten and we opted to close it down around March/April. Early in 2023, we also opened a Japanese curve trade – we were long 30-year JGBs and short 10-year Japanese bond futures. While this position initially added some value, the risk-off environment became more supportive for 10-year bonds and futures, given the liquidity they offer, and therefore the position detracted from performance overall.

In contrast, our cross-market trades involving German government bonds generally performed well, as did our trades involving Australian bonds. For example, early in the period our long 10-year Germany versus short 10-year Italy position added value. Italian bonds had recovered sharply from their spread wises versus Germany but they subsequently looked vulnerable to anything that would imply a continued hawkish stance from the ECB. With further rate hikes expected, Italian bonds underperformed towards the end of 2022, which benefited our trade.

We entered 2023 with a long 10-year Australia versus short 5-year Germany position. After underperforming at the end of 2022, we saw a meaningful recovery in Australian bonds as the government pushed back the restart of its bond supply program until February. This helped support 10-year bonds and longer. To take advantage of the flatness of the curve, we booked profits on this position and switched to being long 3-year Australian futures versus 5-year Germany, which also subsequently added value.

Our positions involving the Australian bond market continued to contribute positively to performance up to the end of the period. We benefited, for example, from the Reserve Bank of Australia's policy decisions, which saw the Bank move from pausing its hiking cycle in April, to hiking again in May and June. With the balance of risks rising that the RBA would have to hike more aggressively, we opened a short 3-year versus long 10-year flattening position to capture this. The curve subsequently flattened sharply, and at the same time 10-year bonds underperformed on a cross-market basis against other core markets. We therefore took the opportunity to take profits on the curve trade and open a long 10-year Australia versus short 10-year US, which also performed well.

Later in the period, our long 10-year Australia versus short 10-year US position also added value. While the US market initially came under pressure from better economic data, the economic data in Australia was helping support the view that the RBA was at the peak in its hiking cycle. The Bank subsequently moved back to an 'on hold' policy stance, and with the Australian bond market trading well relative to other core markets we decided to take profits on our position.

The Carry module performed well over the six months. The module invests exclusively in investment-grade-rated bonds with less than two years to final legal maturity. While credit spreads came under some pressure at various points during the period, the high quality and short-dated nature of our holdings meant that any spread widening was more than offset by the fall in underlying yields.

Outlook

The switch from fears over rate hikes giving way to expectations of rate cuts has helped improve investor sentiment, and the drop in rates market volatility has also helped to encourage demand for fixed income assets. As we look forward into 2024, we expect these themes to continue as we move into the next phase of the economic and interest rate cycle. This backdrop is expected to support strong returns from fixed income assets.

Investment Manager's Report (continued)

Aegon Global Equity Income Fund

The Aegon Global Equity Income Fund returned 12.63% (net of fees) over the 12-month period to 31 October 2023, outperforming the benchmark index return of 11.06% (dollar terms).¹

Global equity markets performed well over the period with all of the major regions climbing. The period was marked, however, by volatility stemming from interest rates moves and inflation. Overall, headline inflation fell across the globe but markets continued to swing this way and that based on each change in expectations regarding the path of interest rates. Markets climbed over the early part of the period, as investors looked through the fact Central Banks were still hiking and started to anticipate the end of the hiking cycle was near. However, this narrative was shaken in late summer 2023, when the US Federal Reserve's latest projections suggested rates would stay higher for longer than the market was anticipating. This sparked something of a correction in the Autumn and saw global indices give back some of their earlier gains. Another notable feature of equity markets over the period was very narrow leadership, with the majority of gains in developed markets coming from a handful of US mega-cap, technology related names.

At the sector level, there was a reversal from the previous period, as tech and communication services bounced back from a poor 2022 to finish as the top performers. This was predominantly driven by the excitement around generative Artificial Intelligence ('AI'), which caused the surge in mega-cap US tech names noted above. In contrast, defensive sectors such as healthcare, utilities, consumer staples and energy all underperformed. Energy had a brief rally after Saudi Arabia and Russia took action to limit supplies of oil and gas but it wasn't enough to offset previous declines.

The fund's outperformance against the index was due to strong, disciplined stock selection, while sector allocation was more volatile. A common theme across the portfolio was a range of companies being rewarded by the market for delivering better-than-expected earnings results, which in turn led to many of these names increasing their dividend over the period.

One area that provide a significant positive contribution to fund performance was our overweight exposure to the technology sector. Many of the large technology names do not pay any dividends so are not investable for our strategy, but our stock selection within the sector performed very well. For example, two of the best performers over the period were our AI-related holdings semiconductor experts Broadcom and Tokyo electron, and software and cloud guru Microsoft. Elsewhere, our exposure to US Industrials Eaton Corp., Schneider Electric and Watsco also performed well as their operations continue to take advantage of a relatively robust domestic economy, and of the opportunities available from the strong secular energy transition trend.

The areas of the market that struggled over the period tended to be defensive in natures, and sectors that sensitive to the 'higher for longer' interest rate narrative. Our holding in Pfizer was the largest detractor. The pharma major was negatively impacted by underwhelming trading results during the period, although the stock's defensive credentials clearly exaggerated underperformance given the market backdrop. Green energy giant NextEra Energy also fell back on general investor concerns that many renewables projects are struggling to make the expected returns with funding costs currently moving ever higher. Lithium producer, Albemarle, also struggled and was affected by looming supply issues in the lithium industry during the period.

Outlook

The economic backdrop remains imperfect and we think it makes sense to focus higher up the quality spectrum, in companies that can combine top-line growth with solid profitability, free cash flow and an ability to self-fund.

Aegon Global Diversified Income Fund

The Aegon Global Diversified Income Fund returned 4.76% (net of fees) for the 12 months to 31 October 2023.¹

Fixed income markets were volatile over the 12-month period, with core government bonds coming under significant pressure. Investment grade bonds struggled initially although they rallied as we moved into 2023 and outperformed their government counterparts. High yield bonds, however, were the strongest performers, buoyed mainly by robust corporate earnings.

Global equity markets performed well over the period with all of the major regions climbing. At the sector level, there was a reversal from the previous period, as tech and communication services bounced back from a poor 2022 to finish as the top performers. This was predominantly driven by the excitement around generative Artificial Intelligence ('AI'), which caused the surge in mega cap US tech names noted above. In contrast, defensive sectors such as healthcare, utilities, consumer staples and energy all underperformed. Energy had a brief rally after Saudi Arabia and Russia took action to limit supplies of oil and gas but it wasn't enough to offset previous declines.

In sector terms, the outperformers were technology and, the technology driven, telecommunications by a large margin. In contrast, defensive sectors health care, utilities, consumer staples, and energy all underperformed. Energy had a brief rally after Saudi Arabia and Russia took action to limit supplies of oil and gas, but it wasn't enough to offset overall losses. The theme of artificial intelligence was a headline success story over the year, helping support technology stocks, and in particular large-cap technology stocks.

The main drivers of market conditions were the persistence of inflation - with central banks raising rates as a consequence - and fears over the extent of a consumer-led slowdown. As we moved into 2023, most markets were generally more positive in terms of inflation expectations, given a decline in energy prices and weaker economic data. At the same time, fears over stresses in the banking system, which ultimately led to the demise of Credit Suisse, proved to be short-lived with no signs of wider contagion. Given the more positive backdrop, any signs of a peak in inflation data were greeted by a rally in markets. Central banks, however, were careful to highlight that the battle to control inflation was far from over. This was particularly the case towards the end of the period, where the US Fed, the ECB and the Bank of England all raised rates, with the latter reacting to stronger than expected inflation data.

Our equities component enjoyed a strong period for the most part, although by the end of the 12-months they came under pressure after bond yields jumped higher. The technology sector was the main success story of the period, and it is no surprise that a handful are among the top contributors list, including Broadcom, Taiwan Semiconductor, Microsoft and Simple Technology. A few of these names, including Microsoft and Broadcom did come under pressure in quarter three 2023, but still managed to comfortably finish in the green. In contrast, Pfizer was consistently weak, and was the largest detractor on a single name basis. The company experienced an earnings boost after its Covid-19 vaccine, however since then, the future earnings are expected to fall significantly, causing uncertainty and thus weakness in the share price.

Despite rising bond yields, the fixed income components had a good period overall with high yield being the main contributor throughout. Investment grade and government bonds were also positive, but still lagged high yield. Bank credit came under pressure due to the crisis surrounding Silicon Valley Bank in March, but despite this setback, overall, it still performed well. We retained a meaningful allocation to European banks and despite some short terms concerns in the second half of the period, they are financially stronger and more closely regulated than in the past. Fund duration was kept low at around 2-years, a position which helped as the shift higher in yield curves was well managed and had limited impact on investment returns.

Our real assets component began the period strong, but generally had a mixed period. Listed infrastructure was positive overall, but listed real estate and renewable energy were negative. Listed infrastructure name Enel performed well however and finished in the top overall contributors. In contrast, renewables names Greencoat and Renewables Infrastructure Group were amongst the top overall worst performers, alongside listed infrastructure name Cordiant Digital.

Outlook

Attractive and dependable levels of income remain highly sought after. We believe that a diverse multiasset portfolio can deliver our income target, capital growth and risk management through dynamic asset allocation and high conviction stock selection.

Investment Manager's Report (continued)

Aegon Global Sustainable Equity Fund

The Aegon Global Sustainable Equity Fund returned -9.73% (net of fees) over the 12 months to 31 October 2023, underperforming the benchmark index return of 3.84% .¹

Global equity markets performed well over the period with all of the major regions climbing. The period was marked, however, by volatility stemming from interest rates moves and inflation. Overall, headline inflation fell across the globe but markets continued to swing this way and that based on each change in expectations regarding the path of interest rates. Markets climbed over the early part of the period, as investors looked through the fact Central Banks were still hiking and started to anticipate the end of the hiking cycle was near. However, this narrative was shaken in late summer 2023, when the US Federal Reserve's latest projections suggested rates would stay higher for longer than the market was anticipating. This sparked something of a correction in the Autumn and saw global indices give back some of their earlier gains. Another notable feature of equity markets over the period was very narrow leadership, with the majority of gains in developed markets coming from a handful of US mega-cap, technology related names.

At the sector level, there was a reversal from the previous period, as tech and communication services bounced back from a poor 2022 to finish as the top performers. This was predominantly driven by the excitement around generative Artificial Intelligence ('AI'), which caused the surge in mega-cap US tech names noted above. In contrast, defensive sectors such as healthcare, utilities, consumer staples and energy all underperformed. Energy had a brief rally after Saudi Arabia and Russia took action to limit supplies of oil and gas but it wasn't enough to offset previous declines.

The fund's style continued to constitute a material headwind to performance. Growth rebounded over the period, but this was very much focused in the large-cap end of the market, while small and mid-caps continued to struggle on a relative basis. Thus, the fund's tilt towards small and mid-caps was unhelpful. There were also some stock specific issues affecting the portfolio, as a number of holdings were impacted by short-term disruptions to prominent sustainable themes. Examples included supply chain dislocations in solar components and the EV supply chain, as well as funding challenges in the biotech industry.

At the stock level, the largest detractor was industrials name Alfen. In quarter three, inventory de-stocking in EV chargers caused the company cut revenue guidance and put the brakes on what had previously been an exponentially growing sector. Whilst sales of battery EVs in Europe rose 45% year-on-year in the first half of 2023, this failed to boost Alfen's fortunes, as its customers worked through high levels of EV charging inventory they had previously amassed when lead times were more extensive.

Kornit Digital and Energy Recovery were two other industrials holdings that detracted over the period. The former was weighed down by soft end-market demand in e-commerce, something that was flagged by a number of companies in the space and was not unique to Kornit. The latter also sold-off on disappointing results and guidance, although its exposure to large projects means results can often be lumpy from one quarter to the next. Healthcare name Insulet was another significant detractor as it suffered from advances in potential rival alternative solutions to its diabetes treatment product range. TransUnion fell sharply on poor quarterly results, which saw momentum deteriorating across the consumer credit segments it serves but perhaps even more disappointing was the full year guide, which was cut to reflect the challenging backdrop.

On a more positive note, the top contributor was NVIDIA, which has been at the centre of the AI revolution and has seen demand for its advanced chips increase substantially. Few, if any, companies have the potential to dominate the AI ecosystem and monetise it in the way NVIDIA can. OLED specialist Universal Display Corp was a top contributor and climbed sharply towards the end of the period after revenue and earnings comfortably beat expectations, and full-year guidance was narrowed towards the top end of the range. Developmental sales of its new blue emitter were promising, and management reiterated that it expects to reach commercial volumes for this in the next financial year – something that could be a significant catalyst for the shares. Taiwan Semiconductor Manufacturing Company and Dynatrace were other tech-related names to feature among the fund's top performers. Our holding in US healthcare company Abiomed, also made a strong contribution after the maker of the world's smallest heart pump was acquired by Johnson & Johnson in a \$17 billion deal. This worked out as a 50% premium to the share price immediately before the announcement and demonstrated that the valuation of many exciting mid-cap stocks had fallen well below their intrinsic value, making them attractive acquisition targets for larger listed companies and private equity.

Outlook

The economic backdrop remains imperfect and we think it makes sense to focus higher up the quality spectrum, in companies that can combine top-line growth with solid profitability, free cash flow and an ability to self-fund.

Investment Manager's Report (continued)

Aegon Global Sustainable Diversified Growth Fund

The Aegon Global Sustainable Diversified Growth Fund returned -9.36% (net of fees) over the period, underperforming the benchmark return of 4.34%.¹

Global equities markets performed well overall, with the MSCI World Index returning 11.06% in dollar terms (5.37% in sterling) over the 12-months. Regionally, most core markets increased with the US and Europe generally outperforming the UK, although the latter also climbed over the period. Fixed income markets were volatile, with core government bonds coming under significant pressure. Investment grade bonds struggled initially although they rallied as we moved into 2023 and outperformed their government counterparts. High yield bonds, however, were the strongest performers, buoyed mainly by robust corporate earnings.

The main drivers of the positive, but volatile, conditions, were mainly the persistence of inflation - with central banks raising rates as a consequence - and subsequent fears over the extent of a consumer-led slowdown. As the period progressed, however, the rate of interest rate hikes began to slow before eventually plateauing. This backdrop supported equities and corporate bonds for the majority of the period, although Central Banks were careful to point out that rates would remain elevated for some time to come. Government bonds remained under pressure as a result, as did other assets such as alternatives.

While returns within equity markets were generally positive across the board, there was a notable size difference, with mid-cap stocks underperforming both small and large-cap stocks. In fact, mid-cap stocks in the UK (as measured by the FTSE 250 index) fell in value. In sector terms, the outperformers were technology and telecommunications. In contrast, defensive sectors such health care, utilities and consumer staples underperformed, as did energy. The theme of artificial intelligence was a success story over the year, which boosted technology stocks and, in particular, large-cap technology names.

The fund's allocation to corporate bonds added value over the period, while our exposure to government bonds was relatively flat. Within our corporate bond exposure, our weighting to high yield was a strong contributor, buoyed mainly by robust corporate earnings. Within our investment grade holdings, our exposure to bank debt also performed well, as did our weighting in longer-dated holdings.

Within equities, our allocation to global equity income was a strong contributor to performance, while the allocation healthcare stocks also added value. In contrast, our exposure to sustainable equity growth detracted. Growth rebounded over the period, but this was very much focused in the large-cap end of the market, while small and mid-caps continued to struggle on a relative basis. Thus, the fund's tilt towards small and mid-cap growth names was unhelpful. There were also some stock specific issues affecting the portfolio, as a number of holdings were impacted by short-term disruptions to prominent sustainable themes. The positioning within currency was relatively flat.

Over the first half of the period, with our exposure to US Treasuries and UK index-linked bonds performing well. However, global government bond yields were volatile overall and as we moved through 2023 yields began to rise, particularly from April onwards. In the UK, disappointing inflation data caused gilt yields to rise by more than in other major markets. Meanwhile, US Treasury yields increased due to rising investor concerns about higher bond issuance, and growing expectations that interest rates would remain higher for longer than previously anticipated.

Our weighting in alternatives was the main detractor over the 12-month period. Both infrastructure and renewable energy investments struggled, as did our exposure to property but to a lesser extent. In most cases, the declines in the names we held were in response to the upward move in interest rates and government bond yields. We believed the moves in many of these names were overdone; the vast majority of our renewable energy exposure, for example, is to operational investments (i.e. wind or solar farms that have already been constructed and are generating electricity) rather than development projects.

With risks to the economic outlook skewed to the downside, we view higher quality fixed income as an attractive asset class. As global economic concerns shift from too much inflation to too little growth/recession then government and other high-quality bonds should be better placed to deliver positive returns and provide attractive diversification benefits in a risk-off environment.

Outlook

The switch from fears over rate hikes giving way to expectations of rate cuts has helped improve investor sentiment and the drop in rates market volatility has also helped to encourage demand for fixed income assets. As we look forward into 2024, we expect these themes to continue as we move into the next phase of the economic and interest rate cycle. This backdrop is expected to support strong returns from fixed income assets. Within equities, we are focusing on companies that can combine top-line growth with solid profitability, free cash flow and an ability to self-fund.

Aegon Asset Management UK plc

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Investment Manager's Report (continued)

Aegon Global Equity Market Neutral Fund

The Aegon Global Equity Market Neutral Fund returned -0.04% (net of fees) over the period, underperforming the SONIA 1-month return of 4.13%.¹

Equities performed well overall, with the MSCI World Index returning 11.06% in dollar terms (5.37% in sterling) over the 12-months. Regionally, most core markets increased with the US and Europe generally outperforming the UK, although the latter also climbed over the period.

Despite the robust returns seen in equity markets it was a volatile period overall, due mainly to the persistence of inflation - with central banks raising rates as a consequence - and subsequent fears over the extent of a consumer-led slowdown. As the period progressed, however, the rate of interest rate hikes began to slow before eventually plateauing, first in the US and the UK in September, and then eventually in the EU in October 2023. This backdrop supported equities for the majority of the period, although Central Banks were careful to point out that rates would remain elevated for some time to come. This corrected the upward course equities had been following for the first half of the year, and the last few months up to the end of October saw equities return some of their gains.

While returns were generally positive across the board, there was a notable size difference with mid-cap stocks underperforming both small and large-cap stocks. In fact, mid-cap stocks in the UK (as measured by the FTSE 250 index) fell in value. In sector terms, the outperformers were technology and telecommunications. In contrast, defensive sectors such as health care, utilities and consumer staples underperformed, as did energy. Energy had a brief rally after Saudi Arabia and Russia took action to limit supplies of oil and gas but it wasn't enough to offset the overall decline in the sector. The theme of artificial intelligence was a success story over the year, helping support technology stocks, and in particular large-cap technology names.

NVIDIA was the leading contributor in the fund's long book. The company delivered excellent results in the second half of the period, as well as an optimistic outlook based around its data centre and gaming platforms. The company was also a beneficiary of the focus on the rapidly developing AI environment, a space in which it has a substantial competitive position.

Nemetschek (construction software) was another strong contributor. The stock benefited from excellent, consensus beating results. The stock's performance has been underpinned by strong growth in the company's design segment, whilst effective cost control across operations have boosted margins too. Management also shared a very encouraging medium-term outlook for the business during the period, with the company forecasting double digit revenue growth in FY 2024 and FY 2025, exceeding analyst expectations.

The long book's performance was hampered by some sustainability themed holdings at various points during the period. Stocks exposed to the theme of clean energy and environmental solutions were weak across the board in 2023, with our holding in AES Corporation among the stocks impacted.

Our holding in First Republic Bank also detracted. The bank was caught up in the fallout from the Silicon Valley Bank failure as investors quickly drew parallels between the two banks given the similarities in regional focus, high net worth client base and risk of deposit flight. Whilst there were key differences between the two banks, we acted decisively to exit our position immediately after the news broke. This was not enough to prevent an impact on performance, but our swift action ensured it was not more severe, as Silicon Valley Bank's shares then went on to register precipitous further falls following our sale.

Kornit Digital (digital textile printing) also fell over the period, with the company's somewhat underwhelming fiscal third-quarter 2022 results contributing to a lukewarm reaction from the market. 2022 was a difficult year for the company, as its previously high level of growth was halted by the slowing environment for e-commerce related businesses. That said, there was stabilisation in trends which provided optimism that the company may be able to resume its growth path, albeit from a rebased level.

Moving to the short book, we saw good returns from our shorts in an egg production business, where a broker downgrade contributed to a fall in the share price. Our short position in a Japanese home entertainment products manufacturer also contributed positively, given the company suffered from a weak quarterly update and lower forward guidance. Towards the end of the period, the fund's shorts in a UK investment company, a US-based digital consultancy business and a digital payments business all added value. The respective shares experienced significant de-ratings on the back of weak trading results.

In contrast, a number of short positions worked against the fund, with better-than-expected trading updates boosting short-term sentiment for some companies. For example, a multi-national auto maker was among the largest detractors in the short book, after rallying on the back of better-than-expected quarterly results.

Outlook

With regards to portfolio activity, positioning and trading has remained focused on keeping beta and net exposure close to zero in order to ensure the fund's return profile remains uncorrelated to broad equity markets.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Investment Manager's Report (continued)

Aegon Short Dated High Yield Global Bond Fund

The Aegon Short Dated High Yield Bond Fund returned 8.69% (net of fees) over the 12-month period to 31 October 2023.¹

Macro uncertainty and rates volatility persisted throughout most of the period as investors recalibrated their expectations on monetary policy and recession risk. Despite market volatility, the high yield market posted solid gains during the one-year period and outperformed many other fixed income assets.

During the fourth quarter of 2022, equity and credit markets were choppy as investors balanced the positives and negatives. Relentlessly hawkish central bank commentary continued to stoke recession concerns, while moderating inflation and better-than-feared corporate earnings offset some of these concerns. In the first quarter of 2023, volatility resurfaced as tightening financial conditions and banking sector turmoil rattled markets. As US regional banks and European banks came under pressure, spreads widened, and rates volatility ensued. However, once the banking sector contagion appeared to be contained, the high yield market regained its footing and markets stabilized in the second quarter. The third quarter was a tale of two halves as high yield initially rallied until rates volatility resurfaced in September.

As the year progressed, the US economy remained surprisingly resilient with solid economic data releases. With recession risk continuing to be pushed out, macro fears subsided, and a risk-on tone persisted. Inflation continued to trend in the right direction, albeit at a slower pace than anticipated. Although macro uncertainty remains, the high yield market shrugged off future concerns and spreads tightened throughout most of the period. Beyond the macro headlines, high yield issuers generally reported better-than-expected results. Against this backdrop, the global high yield market posted strong performance with lower-quality credit leading the risk-on rally.

Throughout the period, we continued to focus on bottom-up issue selection and lending to credits which have strong balance sheets, plenty of liquidity, high barriers to entry and strong, free cash generation. The fund's remit of lending to companies for short periods of time helped to limit volatility, protect on the downside and provide attractive carry, with the additional benefit of the 'pull-to-par' as bonds approached their maturity date. Our disciplined approach to implementing this strategy was beneficial over a period when high yield assets rallied significantly, but also helped to protect the fund during those periods when markets came under pressure.

In terms of allocation, we limited our exposure to short-dated CCC-rated assets and focused our attention mainly on short-dated single-B and BB-rated bonds. As we moved through 2023, we progressively increased the credit quality in the fund as yields rose. This move, which was mainly achieved by increasing our weighting to BB and BBB-rated bonds, added some defensiveness to the portfolio as macro headwinds persisted and lower-quality companies faced increasing pressure. In general, our positioning contributed positively. Disciplined, high conviction stock selection, however, was the main driver of the fund's positive returns.

On a single name basis, the top positive contributors included consumer cyclical names NH Hotel (a Spanish multinational hotel group), Douglas (a German multinational perfumery and cosmetics chain), and IHS Holding (one of the largest telecommunications infrastructure companies in Africa, Latin America and the Middle East). In keeping with the sectoral theme, the top detractors were a made up mostly of names we did not hold including Jaguar, MGM China, Melco Resorts and Wynn Macau (hotel).

Outlook

The switch from fears over rate hikes giving way to expectations of rate cuts has helped improve investor sentiment, and the drop in rates market volatility has also helped to encourage demand for fixed income assets. As we look forward into 2024, we expect these themes to continue as we move into the next phase of the economic and interest rate cycle. This backdrop is expected to support strong returns from fixed income assets.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Investment Manager's Report (continued)

Aegon Global Short Dated Climate Transition Fund

The Aegon Global Short-Dated Climate Transition Fund returned 4.24% (net of fees) over the six-month period, compared to a benchmark return of 4.33%.¹

Fixed income markets were volatile over the 12-month period, with core government bonds coming under significant pressure. Investment grade bonds struggled initially although they rallied as we moved into 2023 and outperformed their government counterparts. High yield bonds, however, were the strongest performers, buoyed mainly by robust corporate earnings.

The main drivers of the volatile conditions were the persistence of inflation - with central banks raising rates as a consequence - and fears over the extent of a consumer-led slowdown. Political volatility was also to the fore, particularly in the UK where the short-lived Truss-led government announced unfunded tax cuts at the start of the period. This move led to concerns over the UK government's fiscal credibility and caused borrowing costs to move higher, leading to a sharp sell-off in gilts and a wave of forced selling in UK corporate bonds. However, the subsequent reversal of the government's expansionary fiscal policy - and confirmation of the new administration's commitment to a more conservative budget - bolstered confidence in gilts.

As we moved into 2023, most markets were generally more positive in terms of inflation expectations, given a decline in energy prices and weaker economic data. At the same time, fears over stresses in the banking system, which ultimately led to the demise of Credit Suisse, proved to be short-lived with no signs of wider contagion.

Given the more positive backdrop, any signs of a peak in inflation data were greeted by a rally in markets. Central banks, however, were careful to highlight that the battle to control inflation was far from over. This was particularly the case towards the end of the period, where the US Fed, the ECB and the Bank of England all raised rates, with the latter reacting to stronger than expected inflation data.

Throughout the period we continued to focus on our strategy of avoiding default risk and favouring companies with clearly visible credit profiles over the short-to-medium term. A major consideration, in terms of the companies we chose to invest in, was their ability to refinance upcoming maturities. This strategy worked well for the fund, with discipline stock selection the key driver of the fund's relative outperformance.

Prior to the start of the period, we increased the fund's duration level to around 2.1 years, which we held in place up to the end of 2022. We did this through adding duration in the US dollar market, where we believed pricing levels reflected the US being very close to the top of its interest rate cycle. Yields on short-dated investment grade bonds subsequently moved lower over the remainder of 2022, driven by falling government bond yields (especially in the US) and by tightening credit spreads.

We continued to increase duration in the second half of the period, reaching approximately 2.9 years by the end of October. While inflation remained well above target, we expected it to start to decline as we moved through 2023. In particular, we regarded interest rate risk as more attractive in Europe and the UK versus the US. We therefore added duration primarily through the European interest rate market, where we thought the market's expectation for rate rises over the summer might be too aggressive. Overall, our duration position, while volatile, added value over the period.

Over the second half of the period, the fund benefited from its high allocation to euro-denominated assets, with our exposure to senior ranking bonds from European banks performing well, particularly after the rescue of Credit Suisse. In contrast, our exposure to sterling-denominated assets was volatile. In the first half of 2023 our exposure to these assets detracted given the sharp move higher in UK government bond yields. The catalyst for the weaker performance of the UK, was a series of higher-than-expected inflation data releases which prompted a sharp rise in short-dated UK bond yields. The Bank of England reacted by increasing the pace of their tightening of interest rates to reflect the stubbornly high inflation backdrop. At the same time, in the US a combination of factors, including strong employment data, "sticky" core inflation, and a fading of concerns on the regional banking sector, led to a re-assessment of the likely future path of US interest rates.

Over the summer period, however, our exposure to both UK and euro-denominated assets performed strongly, supported by falls in short-dated government bond yields in both regions. The rally was in response to falling headline inflation and signs of weakening economic activity, which led to a reduction in market expectations of future rate hikes from the Central Banks.

The Real Estate sector was another notable performer at this time, following a period of significant underperformance due to concerns around the sustainability of balance sheets in a significantly higher rate environment. While challenges persist, more defensive subsectors such as logistics and residential attracted new buyers and spreads compressed.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Investment Manager's Report (continued)

Aegon Global Short Dated Climate Transition Fund (continued)

In terms of stock selection, the fund's exposure to financial bonds performed well. Early in the period we took advantage of a rare opportunity to participate in new, US dollar-denominated senior bond issuance from high quality borrowers such as HSBC and Barclays with very attractive coupons. Positions in bonds from Intesa Sanpaolo, Nationwide Building Society, Zurich Insurance Group, ABN AMRO and Deutsche Bank also all performed well on an absolute and relative basis. Elsewhere, our exposure to IBM and Dell also contributed positively.

Late in the period, the fund's holdings in Ford and Canary Wharf also added value. Ford benefited from an upgrade to investment grade status by S&P, while Canary Wharf bonds benefited from news of a fresh equity injection from shareholders. There were only very limited pockets of weakness, most notably in the real estate sector where the small holding in bonds from Aroundtown performed poorly following the company's decision not to redeem one of its hybrid bonds at the first opportunity.

Outlook

The switch from fears over rate hikes giving way to expectations of rate cuts has helped improve investor sentiment, and the drop in rates market volatility has also helped to encourage demand for fixed income assets. As we look forward into 2024, we expect these themes to continue as we move into the next phase of the economic and interest rate cycle. This backdrop is expected to support strong returns from fixed income assets.

Aegon Asset Management UK plc
December 2023

Aegon Asset Management Investment Company (Ireland) plc

Report of the Depositary to the Shareholders

We have enquired into the conduct of Aegon Asset Management Investment Company (Ireland) Plc ('the Company') for the year ended 31 October 2023, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with the UCITS Regulations, as amended, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in the Central Bank of Ireland's UCITS Regulations, Part 12. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations, as amended. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in UCITS Regulations, Part 12 and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and by the UCITS Regulations, as amended, ('the Regulations'); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Regulations.

Citi Depositary Services Ireland Designated Activity Company is regulated by the Central Bank of Ireland under the Investment Intermediaries Act, 1995

Independent auditors' report to the members of Aegon Asset Management Investment Company (Ireland) Plc

Report on the audit of the financial statements

Opinion

In our opinion, Aegon Asset Management Investment Company (Ireland) Plc's financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 31 October 2023 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 October 2023;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the year then ended;
- the Portfolio of Investments for each of the Funds as at 31 October 2023; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 1b) to the financial statements which describes the reasons why the financial statements of Aegon Global Sustainable Diversified Growth Fund and Aegon Global Equity Market Neutral Fund have been prepared on a basis other than going concern.

Conclusions relating to going concern

With the exception of Aegon Global Sustainable Diversified Growth Fund and Aegon Global Equity Market Neutral Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's and Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of Aegon Global Sustainable Diversified Growth Fund and Aegon Global Equity Market Neutral Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 31 October 2023 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities in respect of the Financial Statements set out on page 6, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In

other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Notes to the Financial Statements

1. Significant Accounting Policies

a) Statement of Compliance

The financial statements are prepared in accordance with FRS 102 Financial Reporting Standard applicable in the UK and Republic of Ireland ("FRS 102") issued by the Financial Reporting Council ("FRC") and in accordance with Irish statute comprising the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, (the "Central Bank UCITS Regulations"). The financial statements have been prepared on a historical cost basis, except for financial instruments classified at fair value through profit or loss that have been measured at fair value.

The Company has applied the same accounting policies and methods of computation in this annual report and financial statements as in its annual financial statements for the financial year ended 31 October 2022, except for the adoption of any new accounting standards.

The format and certain wordings of the financial statements have been adapted from those contained in the FRS 102 and the Companies Act 2014 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund.

The Company has availed of the exemption available to open-ended investment Funds under FRS 102 (Section 7.1A(c)) not to present a cash flow statement.

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

b) Basis of Accounting and Presentation of Financial Statements

The financial statements are measured and presented in the currency of the primary economic environment in which each Fund operates. These are the United States Dollar ("USD"), Euro ("EUR") and Pound Sterling ("GBP") reflecting the fact that the Funds' operations are conducted in USD, EUR and GBP.

The financial statements are prepared on a fair value basis for the financial assets and financial liabilities through profit or loss. The financial statements have been prepared on a going concern basis for all Funds except Global Sustainable Diversified Growth Fund and Global Equity Market Neutral Fund, which have been prepared on a basis other than going concern as the Funds are to be closed on 29 February 2024. The Directors are of the view that the Company can continue in operational existence for twelve months from the date of approval of these financial statements. The Directors anticipate the financial assets will continue to generate enough cash flows on an ongoing basis to meet the Company's liabilities as they fall due.

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported accounting policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the periods of revision and future periods if the revision affects both current and future periods. Actual results could differ from estimates.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

c) Foreign Currency Translation

Transactions in foreign currencies are translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to USD at the foreign currency exchange rate ruling at the Statement of Financial Position date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income. Foreign exchange gains/losses relating to investments at fair value through profit or loss are included in gains and losses on investments in the Statement of Comprehensive Income.

While the Funds' operations are conducted in USD, EUR and GBP, the functional currency of the Company is USD, (as the Directors have determined that this reflects the Company's primary economic currency). The presentation currency of the Company is also USD.

The Statement of Financial Position is translated using exchange rates at the financial year end and the Statement of Comprehensive Income is translated at an average rate over the financial year. The Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders is translated at an average rate over the financial year for inclusion in the combined financial statements of the Company. The resulting notional currency gain/(loss) and the notional currency gain/(loss) on retranslation of opening net assets is included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. The method of translation has no effect on the value of net assets allocated to the individual Funds.

d) Financial Instruments

(i) Classification

In accordance with FRS 102, the Company has elected to adopt IAS 39 Financial Instruments: Recognition and Measurement. The Company designates all its investments into financial assets and liabilities at fair value through profit or loss in accordance with FRS 102 and IAS 39. The category of financial assets and liabilities at fair value through profit or loss comprises:

Financial instruments held for trading: These include all financial instruments, (as the Company does not designate any derivatives as financial hedges) including futures, swaps, forward contracts, bonds, CFD's and equities.

Financial instruments designated at fair value through profit or loss upon initial recognition: These include financial assets that are not held for trading purposes and which may be sold.

These financial instruments are designated on the basis that their fair value can be reliably measured and their performance has been evaluated on a fair value basis in accordance with the risk management and/or investment strategy as set out in the Company's Prospectus.

Gains and losses arising from changes in the fair value of the financial assets and liabilities at fair value through profit or loss category are included in the Statement of Comprehensive Income in the financial year in which they arise.

(ii) Recognition and Derecognition

All regular way purchases and sales of financial instruments are recognised on the trade date, which is the date that the Company commits to purchase or sell an asset. Regular way purchases or sales are purchases or sales of financial instruments that require delivery of assets within the period generally established by regulation or convention in the market place. Realised gains and losses on disposals of financial instruments, with the exception of futures are calculated using the average cost method. Realised gains and losses on disposals of futures are calculated using the First In First Out (FIFO) method.

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or a financial asset is transferred and the transfer qualifies for derecognition in accordance with FRS 102.

The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

d) Financial Instruments (continued)

(iii) Measurement

Financial instruments are measured initially at fair value (transaction price). Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in fair value recognised in the Statement of Comprehensive Income.

Financial liabilities arising from redeemable shares issued by the Company are carried at redemption amount representing the investors' right to a residual interest in the Company's assets.

(iv) Fair value measurement principles

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from reputable brokers/counterparties or independent market data providers, in the case of non-exchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs. Financial assets and liabilities are priced at their current mid prices.

For all other financial instruments not traded in an active market or where no broker/counterparty quotes can be obtained, the fair value is determined by using appropriate valuation techniques, which include using arm's length transactions; reference to the current market value of another instrument that is substantially the same; discounted cash flow analysis and option pricing models making as much use of available and supportable market data as possible. There is no financial instruments valued using these valuation technique as at the financial year end (31 December 2022: None).

Subsequent changes in the fair value of financial assets and liabilities at fair value through profit or loss are recognised in the Statement of Comprehensive Income.

The fair value measurements of each Fund's financial assets and liabilities are details in Note 2.

e) Cash and Cash Equivalents, Overdrawn Cash and Cash Equivalents, Collateral Cash and Stock Collateral

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less.

Overdrawn cash and cash equivalents are shown in Current Liabilities in the Statement of Financial Position.

Broker cash received as collateral is recorded as an asset on the Statement of Financial Position as 'Collateral cash' and a related liability to repay the collateral is disclosed within Current Liabilities as 'Collateral payable to broker'. This cash received from brokers as collateral is not ringfenced or segregated from other cash and cash equivalents, and can be invested and used in daily operations.

Cash collateral provided by the Funds to a counterparty in relation to Futures and CFDs contracts are identified in the Statement of Financial Position as 'Margin owed from broker'. Cash collateral which is due by the Funds to a counterparty in relation to Futures and CFDs contracts are identified in the Statement of Financial Position as 'Margin due to broker'. Collateral cash receivable from broker is cash pledged as collateral for financial derivative instrument transactions. It is not included as a component of cash and cash equivalents in the Statement of Financial Position and is not available to the Funds on demand. Margin owed from broker/Collateral cash is valued at amortised cost plus accrued interest which approximates fair value. Further details of collateral cash received or pledged on derivative instruments are disclosed in Note 17.

Term Deposits are disclosed within Cash and Cash Equivalents and Collateral Cash in the Statement of Financial Position.

Stock collateral of EUR 54,000 (31 October 2022: none) was received from JP Morgan on the Aegon Absolute Return Bond Fund at the financial year end.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

f) Operating Expenses

Operating expenses of the Company are accounted for on an accruals basis and expensed in the period to which they relate.

g) Interest, Dividend Income and Withholding Tax

Bond interest income is recognised in the Statement of Comprehensive Income. Bond interest is recognised as income on an effective yield basis using the original effective interest rate of the instrument calculated at the acquisition or origination date. Bond interest income includes amortisation of any discount or premium, transaction costs or other differences between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest rate basis. Accrued interest payable or receivable is shown in the Statement of Financial Position and represent interest payable or receivable that has been accrued for but not yet paid or received on the Statement of Financial Position date. Dividends are recognised in the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Withholding tax is presented gross in the Statement of Comprehensive Income.

h) Swap Income and Expense

Swap income and expense are included in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

i) Net Asset Value Per Share

The Net Asset Value per share for each share class within each Fund is calculated by dividing the total Net Asset Value of each share class within each Fund by the total number of shares outstanding for that particular share class within each Fund.

j) Distributions

Distributions to holders of Redeemable Participating Shares are recorded in the Statement of Comprehensive Income as Finance Costs.

k) Redeemable Participating Shares

All Redeemable Participating Shares issued by the Funds provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the Funds' net assets at the redemption date. In accordance with FRS 102 such instruments give rise to a financial liability for the present value of the redemption amount. The redemption price for each redeemable share is equal to the Net Asset Value per redeemable shares on the dealing day.

l) Dilution Adjustment

Aegon Asset Management believes that it is of utmost importance to protect investors in our mutual funds from performance dilution due to subscriptions and redemptions. Consequently, Aegon Asset Management has an Anti-Dilution adjustment (swing) for its Ireland fund range. Swing or the equivalent swing pricing has become the market standard to protect investors from the dilution impact of trading costs. Aegon Asset Management favours partial swing. Having a threshold recognises that smaller transactions can frequently be managed within the existing cash position of the fund and consequently do not lead to transaction costs. In addition, it reduces the impact that the swing has on the volatility of the price, as due to the threshold swing is not applied on each trading day. Aegon Asset Management has applied partial SWING for the Irish UCITS fund. Aegon Asset Management does not communicate the threshold levels in order to prevent arbitrage. The thresholds are represented as a percentage of NAV. As transaction costs, strategic cash position and volume differ by strategy, this is a case by case effort. Typically thresholds are in the range of 1%-5%. The threshold level for each fund is set by the Pricing Basis Oversight Group in consultation with representative Fund Managers and re-evaluated at least once a year.

The dilution adjustment may apply to redemptions or to subscriptions and if charged, the value of the dilution adjustment will be paid into the Fund and will become part of the property attributed to the relevant Fund. Dilution adjustments are disclosed in Statement of Changes in the Net Assets Attributable to Redeemable Participating Shareholders.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

1. Significant Accounting Policies (continued)

m) Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss.

Transaction costs on the purchase and sale of bonds, forwards, CFDs and swaps are included in the purchase and sale price of the investment. During this financial year, they cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed. Transaction costs on purchases and sales of equities and futures are disclosed in Note 11.

n) Due to/from Redeemable Participating Shareholders

Amounts due to or from Redeemable Participating Shareholders represent redemptions or subscriptions where the shares have been redeemed or subscribed by the Redeemable Participating Shareholder, but as at Statement of Financial Position date the cash has not been paid/received.

o) Receivable/Payable for Sale/Purchase of Securities

Amounts Receivable or Payable for securities represent sales or purchases where the proceeds or payments have not been received or paid as at Statement of Financial Position date. Non base currency transactions are converted at the prevailing rate on a daily basis until settlement.

p) Fund Assets Cash Balances, Outstanding Fund Assets Cash Balances, Fund Assets Receivables, Fund Assets Payable

Fund asset cash and receivable balances, including an appropriate equal and opposing liability, are reflected at a Fund level on the Statement of Financial Position. They represent umbrella cash collection account balances attributable to the individual Funds of the Company. These amounts relate to subscription and redemption monies, including dividend money, that are due to an individual Fund, as Fund assets, and which are held in an umbrella cash collection account in the name of the Company.

q) Equalisation

All Funds operating an income or distributing share class intend to operate income equalisation. Income equalisation prevents the dilution of current shareholders' earnings by applying a portion of the proceeds from Redeemable Participating Shares issued or redeemed to undistributed income. When Redeemable Participating Shares are purchased or redeemed the price may include an element of income. Equalisation is this element of income paid out to shareholders who have purchased or redeemed during this financial year and it is disclosed in the Statement of Comprehensive Income.

r) Interest Expense

The Funds may incur interest expense and earn dividend income on long CFD positions. CFD Interest is calculated daily based on the value of the open positions. Such CFD interest expense is included in Net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income. Interest Expense in the Statement of Comprehensive Income includes shareclass hedging interest.

s) Other Assets

Other assets on the Statement of Financial Position include dividend receivable, tax reclaimable dividends and preliminary expenses where applicable.

t) Other Liabilities

Other liabilities on the Statement of Financial Position include payable amounts for shareclass hedging, tax services, legal fees, director fees, advisory, tax services, regulatory, company secretarial, transaction fees and other miscellaneous expenses.

u) Other Income

Other income on the Statement of Comprehensive Income include interest income on deposits, interest income on cash accounts, stock lending income, interest income on collateral and interest income on derivative instruments i.e. futures, etc. where applicable.

Notes to the Financial Statements (continued)

2. Fair Value Estimation

The Company under FRS 102 is required to classify fair value measurements for Funds using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

FRS 102 requires the Funds to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 - The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- Level 3 - Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement and consideration of factors specific to the asset or liability.

The following tables present the fair value hierarchy of each Fund's financial assets and liabilities measured at 31 October 2023 and 31 October 2022:

Aegon Strategic Global Bond Fund	Level 1	Level 2	Level 3
31 October 2023

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

3. Derivative Contracts and Efficient Portfolio Management

Typically, derivative contracts serve as components of the Company's investment strategy and are utilised primarily to structure and economically hedge investments to enhance performance and reduce risk to the Company (the Company does not designate any derivatives as hedges for hedge accounting purposes as described under IAS 39).

The Company may also enter into derivative contracts for the purposes of efficient portfolio management. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Funds with an appropriate level of risk, taking into account the risk profile of the Funds. Permitted efficient portfolio management transactions are transactions in derivative contracts dealt in or traded on regulated markets operating regularly or over-the-counter arrangements with highly rated financial institutions specializing in this type of transactions.

During the financial year contracts for difference ("CFD"), forward currency contracts, futures and swap contracts were entered into for the purpose of efficient portfolio management in order to hedge currency and market exposure and/or for investment purposes. Details of all open transactions and counterparties to these derivative positions at the financial period end are disclosed in the Portfolio of Investments. Please refer to Note 17 for details of collateral received by the Company to reduce the counterparty exposure. Any gains or losses arising from efficient portfolio management techniques and investments are recognised in the Statement of Comprehensive Income. Please refer to Global Exposure in Note 13 for details of global exposure related to efficient portfolio management techniques.

A UCITS is required to disclose the revenues arising from efficient portfolio management techniques and instruments for the entire reporting year together with the direct and indirect operational costs and fees incurred. Please refer to note 18 for details of fees incurred during the year.

Contracts for difference ("CFD")

CFD involve a contract between two counterparties ("buyer" and "seller") which requires that the seller will pay to the buyer the difference between the current value of an asset and its value at a particular contract time. (If the difference is negative, then the buyer pays instead to the seller.) CFD allow traders to take advantage of prices moving up or prices moving down on underlying financial instruments and are often used to speculate on markets. CFD are typically traded "over-the-counter", which means that they are traded "off-exchange". CFD are traded on margin, and the leveraging effect of this increases the risk significantly. The Company will invest in CFD to gain exposure to equity investments and equity market.

The difference between the initial recognition amount and the market value of the open contract is recorded as unrealised gains or losses in the Statement of Financial Position. Realised gains or losses are recognised on the closing or trade date of the contract and are recorded as net gain/(loss) on financial assets and liabilities on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

Forward Currency Contracts

A forward currency contract involves an obligation to purchase or sell a specific currency at a future date, at a price set at the time the contract is made. Forward currency contracts are valued by reference to a forward price at which a new forward contract of the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward contracts is calculated as the difference between the contract rate and this forward price and is taken to the Statement of Comprehensive Income.

Futures Contracts

A futures contract is an agreement between two parties to buy and sell a security, index or currency at a specific price or rate at a future date. Upon entering into a futures contract, the Company is required to deposit with a broker an amount of cash or cash equivalents equal to a certain percentage of the contract amount. This is known as 'initial cash margin'. Subsequent payments ('variation margin') are made or received by the Funds each day, depending upon the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealised gains or losses and the Funds recognise a realised gain or loss when the contract is closed. Unrealised and realised gains and losses on futures contracts are recognised in the Statement of Comprehensive Income.

Swaps

A standard swap is an agreement between two counterparties in which the cash flows from two assets are exchanged as they are received for a fixed time period, with the terms initially set so that the present value of the swap is zero. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to make or receive interest payments (e.g. an exchange of fixed rate payments for floating rate payments). On each payment date under an interest rate swap, the net payments owed by each party, and only the net amount, is paid by one party to the other.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency. These agreements are used to transform the currency denomination of assets and liabilities.

Credit default swaps are transactions under which the parties' obligations depend on whether a credit event has occurred in relation to the reference asset. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. On settlement, credit default products may be cash settled or involve the physical delivery of an obligation of the reference entity following a default. The buyer in a credit default swap contract is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference asset has occurred. If a credit event occurs, the seller must pay the buyer the full notional value of the reference asset that may have little or no value.

Inflation-linked swaps are agreements between two parties whereby one party pays a fixed rate on a notional principal amount, while the other party pays a floating rate linked to prevailing inflation measurement indices such as Retail Price Index (RPI).

The Swaps are valued through the calculation of the present value of future cash flows.

Unrealised and realised gains and losses on swap contracts are recognised in the Statement of Comprehensive Income. Any swap related income/expenses are recognised in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income.

4. Share Capital

The authorised share capital of the Company is 1,000,000,000,000 shares of no par value initially designated as unclassified shares; the issued share capital of the Company is €2 represented by 2 shares (the 'subscriber shares') issued for the purposes of the incorporation of the Company at an issue price of €1 per share which are fully paid up and which are held by Aegon Asset Management UK Plc and Aegon Asset Management UK Limited. The unclassified shares are available for issue as Redeemable Participating Shares.

Voting Rights

Subject to any rights or restrictions for the time being attached to any class or classes of Redeemable Participating Shares, on a show of hands every holder who is present in person or by proxy shall have one vote and the holder(s) of subscriber shares present in person or by proxy shall have one vote in respect of all the subscriber shares in issue and on a poll, every holder present in person or by proxy shall have one vote for every Redeemable Participating Share of which he is the holder and every holder of a subscriber share present in person or by proxy shall have one vote in respect of his holding of subscriber shares. Holders who hold a fraction of a Redeemable Participating Share may not exercise any voting rights, whether on a show of hands or on a poll, in respect of such fraction of a Redeemable Participating Share.

Redeemable Participating Shares

The net assets attributable to holders of Redeemable Participating Shares are at all times equal to the Net Asset Value of the Company. The participating shares which comprise the equity capital of the Company are in substance a liability of the Company to shareholders under the terms of FRS 102 as they can be redeemed at the option of the shareholder.

Participating shares may be redeemed on each dealing date or such other date or dates as the Board of Directors shall from time to time determine (Valuation Day) at the Net Asset Value per share.

4. Share Capital (continued)

Equalisation

The Company will operate grouping for equalisation with respect to Income shares (shares which are entitled to a portion of the Funds ordinary income). Each income class of each Fund will operate its own equalisation account. Shares purchased during a distribution period are called Group 2 Shares. Shares purchased during any previous distribution period are called Group 1 Shares. Group 2 Shares contain in their purchase price an amount called equalisation which represents a proportion of the net income of the Fund that has accrued up to the date of purchase. The amount of equalisation is averaged across all the Shareholders of Group 2 Shares and is refunded to them as part of their first distribution.

The movement in the number of participating shares per share class during the financial year ended 31 October 2023 is as follows:

5. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended (the "TCA"). On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax can arise on the happening of a "chargeable event" in the Company. A chargeable event includes any distribution payments to Shareholders or any encashment, redemption, cancellation, transfer or deemed disposal of Shares for Irish tax purposes, arising as a result of holding shares in the Company for a period of eight years or more, or the appropriation or cancellation of Shares of a Shareholder by the Company for the purposes of meeting the amount of tax payable on a gain arising on a transfer.

No Irish tax will arise in respect of chargeable events in respect of a Shareholder who is an Exempt Irish Investor (as defined in Section 739D TCA) or in respect of a Shareholder who is neither Irish resident nor ordinarily resident in Ireland at the time of the chargeable event provided that a relevant declaration is in place (in accordance with Schedule 2B of the TCA) and the Company is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct. Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders.

6. Commitments and Contingent Liabilities

There are no commitments or contingent liabilities as at 31 October 2023 (31 October 2022: None).

7. Soft Commission Arrangements

There were no soft commission arrangements in place during the financial year (31 October 2022: Nil).

9. Distribution Policy

It is the current intention of the Directors to declare dividends for the Income Share Classes on the Strategic Global Bond Fund, the Investment Grade Global Bond Fund, the High Yield Global Bond Fund, the Absolute Return Bond Fund, the Global Equity Income Fund, the Global Sustainable Equity Fund, the Global Sustainable Diversified Growth Fund, Short Dated High Yield Global Bond Fund and Global Short Dated Climate Transition Fund and on a quarterly basis on the last Business Days of July, October, January and April.

It is the current intention of the Directors to declare dividends for the Income Share Classes on the Global Diversified Income Fund on a monthly basis on the last Business Day of each month. Dividends will be declared out of the accumulated revenue (consisting of all revenue accrued including interest and dividends) less any applicable expenses.

The Fund previously had the flexibility to withhold a proportion of its income each month to provide a smoother profile of distributions to investors. Each monthly distribution from November 2022 will pay out 100% of the Fund's available income.

During the financial year to 31 October 2023 dividends declared were as follows:

	Aegon Strategic Global Bond Fund USD	Aegon Investment Grade Global Bond Fund USD	Aegon High Yield Global Bond Fund USD	Aegon Absolute Return Bond Fund GBP	Aegon Global Equity Income Fund USD
Distribution

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements

for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

11. Fees

The Company may pay out of the assets of each Fund the fees and expenses payable to the Manager (which includes the fees and expenses payable to the Investment Manager), the Depositary, the Administrator and the Distributor, the fees and expenses of sub-depositaries which will be at normal commercial rates, the fees and expenses of the Directors, any other miscellaneous fees such as, all taxes, company secretarial fees, any costs incurred in respect of meetings of Shareholders and marketing and distribution costs.

Such fees, duties and charges will be charged to each Fund in respect of which they were incurred or, where an expense is not considered by the Directors to be attributable to any one Fund, the expense will be allocated by the Directors with the approval of the Depositary, in such manner and on such basis as the Directors in their discretion deem fair and equitable.

In the case of any fees or expenses of a regular or recurring nature, such as audit fees, the Directors may calculate such fees and expenses on an estimated figure for yearly or other periods in advance and accrue the same in equal proportions over any period.

Administration Fee

The Investment Manager pays Administration fees on behalf of the Funds. These fees are paid directly by the Investment Manager to the Administrator, Citibank Europe Plc. The Investment Manager is invoiced directly and pays these fees out of the Investment Management fee. The fee payable to the Administrator for the services provided shall not exceed 1% per annum (plus VAT, if any) of the net asset value of the Fund. During the financial year ended 31 October 2023 the fees incurred amounted to USD 1,203,656 (31 October 2022: USD 1,401,648), this amount is included in the Operating Expenses figure in the Statement of Comprehensive Income. At the financial year end USD 98,356 was payable (31 October 2022: USD 101,793), this amount is included in the Investment Management fee payable figure on the Statement of Financial Position.

Transfer Agency Fee

The fee payable to the Administrator for registration services provided to the Company will not exceed 0.5% per annum (plus VAT, if any) of the net asset value of the Fund. Such fee shall be accrued daily and payable monthly in arrears.

Management Fee

The fee payable to the Manager (excluding the Performance Fee) will be no more than 1% per annum of the Net Asset Value of the Aegon Strategic Global Bond Fund, the Aegon Investment Grade Global Bond Fund, the Aegon High Yield Global Bond Fund, the Aegon Absolute Return Bond Fund, the Aegon Global Equity Income Fund, the Aegon Short Dated High Yield Global Bond Fund and the Aegon Global Short Dated Climate Transition Fund including both Income shares and Accumulation shares. The fee payable to the Manager (excluding the Performance Fee) will be no more than 1.5% per annum of the Net Asset Value of the Aegon Global Sustainable Equity Fund and the Aegon Global Equity Market Neutral Fund including both Income shares and Accumulation shares. The fee payable to the Manager (excluding the Performance Fee) will be no more than 2% per annum of the Net Asset Value of the Global Diversified Income Fund and the Aegon Global Sustainable Diversified Growth Fund including both Income shares and Accumulation shares.

Such fees shall be calculated daily and payable monthly in arrears. The Manager shall also be entitled to be reimbursed out of the assets of each Fund for reasonable out-of pocket expenses incurred by the Manager and Investment Manager in the performance of its duties.

The Manager shall be responsible for discharging from the above, the fees of the Investment Manager.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

11. Fees (continued)

Management Fee (continued)

The Management Fees payable are presented in the Statement of Financial Position. The fees incurred are included in the Operating Expenses figure in the Statement of Comprehensive Income.

The following are the Management Fees for the financial year ended 31 October 2023 and 31 October 2022:

		<u>31 October 2023</u>	<u>31 October 2022</u>
	CCY		
Aegon Strategic Global Bond Fund	USD	1,154,797	1,547,626
Aegon Investment Grade Global Bond Fund	USD	747,390	925,132
Aegon High Yield Global Bond Fund	USD	1,162,099	1,077,313

Depositary and Trustee Fees

The fee payable to the Depositary, for custodial services provided to the Company, will not exceed 0.5% per annum of the Net Asset Value of each Fund. The Depositary will also be entitled to receive any out-of-pocket expenses incurred (including any transaction charges or sub-Depositary fees at normal commercial rates).

The Trustee Fees include safekeeping fees which are transaction based and are payable to the Depositary. For all Funds the Depositary will be entitled to a minimum fee of £3,000 per annum.

The Depositary and Trustee Fees payable are presented in the Statement of Financial Position. The fees incurred are included in the Operating Expenses figure in the Statement of Comprehensive Income.

The following are the Depositary and Trustee Fees for the financial year ended 31 October 2023 and 31 October 2022:

11. Fees (continued)

Distributor Fee

In addition to the preliminary charge that may be paid to the Distributor, the fee payable to the Distributor for its services in the distribution of shares of the Fund shall not exceed 1% per annum of the Net Asset Value attributable to the Class A Shares. The Distributor may, at its sole discretion and in accordance with applicable laws and regulations, (i) pay commission to financial intermediaries including but not limited to sub-distributors, intermediaries and advisers who refer and/or advise prospective investors out of the Distributor's fee as set out above and/or (ii) waive the Distributor Fee for certain prospective investors based on factors deemed appropriate by the Distributor.

The Distributor Fee payable is presented in the Statement of Financial Position. The fees incurred are included in the Operating Expenses figure in the Statement of Comprehensive Income.

The following are the Distributor Fees for the financial year ended 31 October 2023 and 31 October 2022:

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments

Risk is inherent in the activities of each Fund but it is managed through a process of ongoing identification, measurement and monitoring, subject to risks limits and other controls. The Funds are exposed to market risk (which includes currency risk, interest rate risk and market price risk), credit risk and liquidity risk arising from the financial instruments it holds.

The main risks arising from financial instruments and the policies for managing these risks are stated below. These policies have been applied throughout the period under review.

Market Price Risk

The main risk arising from each Fund's financial instruments is market price. Market price risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in market price caused by factors other than interest rate or foreign currency movements. Market price risk arises mainly from uncertainty about future prices of financial instruments that the Fund might hold. It represents the potential loss the Funds might suffer through holding market positions in the face of price movements. The Funds' investment portfolios are exposed to market price fluctuations, which are monitored by the Investment Manager in pursuance of the stated investment objectives, and policies as set out in the Prospectus. In addition, the Funds are also exposed to unfavourable market price changes of the underlying financial instruments in case of contracts for difference. The Funds may incur a significant loss if the value of the underlying instruments falls below the value of a particular contract.

Adherence to the investment guidelines and to investment and borrowing powers set out in the instrument of incorporation, the Prospectus and UCITS regulations issued by the Central Bank mitigates the risk of excessive exposure per industry to any particular type of security or issuer.

The following tables show the market price exposure per industry for the relevant Funds:

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments (continued)

Foreign Currency Risk

Foreign currency risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in foreign currency exchange rates.

For the Funds where an element of the investment portfolio is denominated in currencies other than the base currency of the Fund, the Statement of Financial Position can be affected by movements in exchange rates. The Investment Manager may seek to manage exposure to currency movements by using forward foreign currency contracts or by hedging the Fund currency value of investments that are priced in other currencies. Income received in other currencies is converted to Fund currency on or near the date of receipt.

The gross foreign currency exposure for the relevant Funds is shown in the following tables:

Annual Report and Audited Financial Statements

for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments (continued)

Interest Rate Risk

Interest rate risk is the risk that the value of the Funds' investments will fluctuate as a result of changes in interest rates.

All of the Funds, except the Aegon Global Sustainable Equity Fund, the Aegon Global Equity Income Fund and the Aegon Global Equity Market Neutral Fund invest in fixed interest securities. The income from these Funds may be affected by changes to interest rates relevant to particular securities or as a result of the Directors being unable to secure similar returns on the expiry of contracts or sale of securities. The value of fixed interest securities may be affected by such movements in the future. Interest receivable on bank deposits and payable on bank overdrafts will be affected by fluctuations in interest rates, as will Floating Rate Bonds. All other assets and liabilities of the Funds are non-interest bearing.

The Funds will adjust their exposure to interest rate risk according to their views on how rates will move in the future. This may mean that at times the Funds may take on more or less risk depending on the view of the Investment Manager.

The interest rate profile for the relevant Funds is as follows:

Aegon Strategic Global Bond Fund

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements

for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments (continued)

Liquidity Risk

Liquidity risk is defined as the risk that the Company may not be able to settle or meet its obligations on time or at a reasonable price. The Company is exposed to daily cash redemptions of Redeemable Participating Shares. Redeemable Participating Shares are redeemed on demand at the holder's option based on the Company's net assets value per share at the time of redemption. The Redeemable Participating Shares are carried at the redemption amount that is payable at the reporting date if the holder exercises the right to put the share back to the Company. The assets of the Company are considered to be readily realisable. Assets from a Fund may need to be sold if insufficient cash is available to finance redemptions.

The Company manages its liquidity risk by investing primarily in marketable securities.

The Company may repurchase some proportion or all shares held by a shareholder at the Repurchase Price on the relevant Dealing Day, subject to the following exceptions:

(a) Where the total of repurchase requests on any Dealing Day exceeds 10% of the Net Asset Value of shares of any Fund in issue at the Valuation Point, the Company may scale down pro rata the number of shares to be repurchased in response to each request to ensure that the 10% limit is not exceeded. Any unfulfilled balance of repurchase requests will be carried forward to the next Dealing Day and so on thereafter until each request has been dealt with in full. Requests for repurchase that have been carried forward from an earlier Dealing Day will be dealt with in priority to later requests.

(b) If in respect of any single repurchase, monies amount to more than 5% of the Net Asset Value of the Fund at the Valuation Point for the Dealing Day, the Company has the power to divide in specie all or any part of the Assets of the relevant Fund, and has the right to elect by notice in writing to the investor to appropriate and transfer Assets to him in full or part satisfaction of the Repurchase Price.

The table below analyses each of the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

Credit Risk

Certain transactions in securities that the Funds enter into expose them to the risk that the counterparty will not deliver the investment for a purchase, or cash for a sale after the Funds have fulfilled their responsibility. The Funds only buy and sell investments through brokers, which have been approved by the Directors as an acceptable counterparty. In addition, limits are set to the exposure to any individual broker that may exist at any time and changes to brokers' financial ratings are reviewed.

The table below shows the credit ratings of the portfolios (bonds and cash and cash equivalents) held by the Funds.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements

for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

12. Risks Associated with Financial Instruments (continued)

Credit Risk (continued)

The Company has granted the Depository a specific lien, and the right to grant such lien, to Citibank N.A., London Branch on particular securities, which, in accordance with the Company's specific instructions, have been purchased or sold for the account of the Company. The lien enables the Depository to pay any obligations arising from purchases or sales until all obligations have been completed. The Depository or Citibank N.A., London Branch has, in its absolute discretion, extended or granted financial accommodation, or otherwise advanced moneys to the Company for the purposes of such purchase or sale, until satisfaction or discharge of all liabilities of the Company to the Depository, including any fees, expenses or credit exposures incurred in connection with the such purchase or sale.

Substantially all of the assets of the Funds are held by the Depository in segregated accounts in each Fund's name. Bankruptcy or insolvency of the Depository may cause a Fund's rights with respect to securities held by the Depository to be delayed. The Investment Managers monitor this risk by monitoring the credit quality and financial positions of the Depository that the Fund/Company uses.

Cash is held with Citibank, N.A. London (credit rating: A+) as Depository with the exception of margin cash which is held with Deutsche Bank AG (credit rating: A-), Goldman Sachs (credit rating: A+), Merrill Lynch (credit rating: AA) and UBS Limited (credit rating: A+).

The Funds also pledge and receive collateral. Details of Counterparties to these derivative positions are disclosed in the Portfolio of Investments for the Funds, respectively.

The Aegon Absolute Return Bond Fund holds Credit Default Swaps as at 31 October 2023. For Credit Default Swaps in which the Company is selling protection the total credit exposure of Credit Default Swaps (protection sold) is EUR 15,100,000 (31 October 2022: EUR 26,500,000) and USD 3,800,000 (31 October 2022: USD NIL) as at 31 October 2023. The percentage of these securities' market values over the net asset of each relevant Fund is disclosed in the Portfolio of Investments.

In prior year the Aegon Composite Rating used ratings from Moody's and Fitch. If there is no rating from any of the agencies, the IBOXX rating is used as the Aegon Composite rating. A score is assigned to each rating based on an IBOXX static table and the average score is calculated and translated to a rating based on the same IBOXX static table.

In the current year period ratings from Moody's, Fitch and Standard & Poor's ("S&P") were used.

The IBOXX rating was not used as at 31 October 2023 and 31 October 2022.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements

for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

13. Global Exposure

The Investment Manager has assessed the risk profiles of the Funds on the basis of the Investment policy, strategy and the use of Financial Instruments. Based on the risk profile, the Investment Manager has determined that the method for the calculation of the global exposure to financial instruments for all Funds will be the Value-at-Risk ("VaR") approach with the exception of the Aegon Global Sustainable Equity Fund which changed to the commitment approach at the start of 2023. In the prior year all funds used the VaR approach.

Value at Risk (VaR), as a figure, is the maximum loss not exceeded with a given probability defined as the confidence level, over a given period of time. VaR is widely applied in finance for quantitative risk management for many types of risk. As the VaR analysis is presented in the 2023 financial statements along with the 2022 comparatives, sensitivity analysis on interest rate risk, market price risk and currency risk is only required for the Aegon Global Sustainable Equity Fund.

The Investment Manager reviews the levels of investment risk on a no less than monthly basis, using a range of metrics including VaR and leverage, where the latter exists. The Aegon Strategic Global Bond Fund, the Aegon Investment Grade Global Bond Fund, the Aegon High Yield Global Bond Fund, the Aegon Absolute Return Bond Fund, the Aegon Global Equity Income Fund, the Aegon Global Diversified Income Fund, the Aegon Global Sustainable Equity Fund, the Aegon Global Sustainable Diversified Growth Fund, the Aegon Global Equity Market Neutral Fund, the Aegon Short Dated High Yield Global Bond Fund and the Aegon Global Short Dated Climate Transition Fund use the absolute VaR approach. The Aegon Global Equity Income Fund uses the relative VaR Approach (effective December 2023, the Aegon Global Equity Income Fund switched to use the commitment approach so as to align with the Aegon Global Sustainable Equity Fund).

To assess the performance of the VaR model used to monitor global exposure, Funds are back-tested on a monthly basis. Back-testing compares realised returns with predicted losses - days with losses beyond that predicted by the model are deemed an overshoot. The number of overshoots "expected" in a given year correspond to the confidence interval used by the model.

During the financial year the exceptional market volatility resulted in a higher number of overshoots than expected for the Funds. This makes sense given the longer term calibration of the model utilised, but prompted us to review the performance of shorter term calibrations and ultimately select new settings for use in future. This review coincided with implementation of a new model provider – Aladdin – and the decision to switch to a 99% confidence interval (the latter change so as to better align with wider market practice). The full scope of changes have gone through the process of internal governance and were signed off by the Regulator / went live as at end of 2023.

The Fund applies a back-testing methodology to regularly assess the performance of the VaR model. During the first quarter, periods of exceptional market volatility resulted in a higher than normal number of model exceptions. We believe our VaR model remains a reasonable basis for assessing market risk within the Fund but we will continue to assess its performance and make adjustments when necessary.

VaR has three parameters:

- The time horizon (period) of the VaR. The maximum loss is considered over this period. Typical periods using VaR are 1 day, 10 days, or 1 month.
- The confidence level is the interval estimate in which the VaR would not be expected to exceed the maximum loss. Commonly used confidence levels are 99% and 95%. (Confidence levels are not indications of probabilities.) Here a 95% confidence interval is used (31 October 2022: 95%).
- Calculation methods used are parametrical (variance-covariance approach), historical or Monte Carlo. In this case the Investment Manager has utilised the historical approach.

Limitations

Whilst VaR is a good general risk measure it is acknowledged it does have certain limitations, including:

- The measure is a point-in-time calculation, reflecting positions as recorded at that date, which do not necessarily reflect the risk positions held at any other time.
- VaR is a statistical estimation and therefore it is possible that there could be, in any period, a greater number of days in which losses could exceed the calculated VaR than implied by the confidence level.
- Although losses are not expected to exceed the calculated VaR on 95% of occasions, on the other 5% of occasions losses will be greater and might be substantially greater than the calculated VaR.
- The period over which positions are expected to be held may differ and so will the modelled losses incurred.
- A look back period of 5 financial years means that any return that has not been evidenced in this time period will not be present in the distribution.

Aegon Global Equity Income Fund uses a Relative VaR approach.

Relative VaR (VaR of the Fund divided by the VaR of the Benchmark*) is as follows:

31 October 2023	VaR Level	Confidence Interval (%)	Holding Period	VaR (%)	VaR Amount**
31 October 2023	2 * Bmrk VAR	95%	1 Month	0.87	-
31 October 2022	2 * Bmrk VAR	95%	1 Month	0.85	37,496,794

*The benchmark is the MSCI World AC Index.

**Due to changes in process, the monetary values are no longer disclosed.

Aegon Global Sustainable Equity Fund uses the commitments approach method and no longer has a VaR limit.

Derivatives

Some of the Funds may also enter into derivative transactions in the form of contracts for difference, forward foreign currency contracts, swaps, futures. Forward foreign currency contracts are used to manage currency risk arising from holdings of overseas securities, contracts for difference, swaps (including Credit Default Swaps) and future contracts are used to manage market risks arising from the Funds investment activities.

The Aegon Strategic Global Bond Fund, Aegon Investment Grade Global Bond Fund, Aegon Global Diversified Income Fund, Aegon Global Sustainable Diversified Growth Fund, Aegon Absolute Return Bond Fund and Aegon Global Short Dated Climate Transition Fund enter into financial derivative instruments (including forward foreign currency contracts, futures, and swaps) for investment purposes.

14. Related Parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions or if one party is a member of the key management personnel of the other party.

The following are related parties under FRS102:

- * Directors of the Company as listed in the Directory and their close family members.
- * The Investment Manager, Distributor & Promoter, Aegon Asset Management UK Plc.
- * Partially delegated Investment Manager and Management Company, Aegon Investment Management B.V.
- * Stuart Donald, a senior employee of the Investment Manager.
- * Mike Kirby is a director of the Waystone Group of which WMC is a member firm, which provides consultancy, VAT reporting and money laundering reporting officer services to the Company.
- * Scottish Equitable and Aegon Asset Management UK Plc. Both entities have the same ultimate parent in the Aegon group. The Investment Manager is under common control with both entities, and both have invested in one or more of the Funds.
- * Aegon Asset Management UK Limited, who hold subscriber shares as detailed in Note 4.

Investment Manager Fees, Performance Fee, Directors' Fees, Management Fees, Depositary Fees and Other Charges are disclosed in Note 11.

The Investment Manager pays the Shareclass Hedging Fees for the C classes on behalf of Global Equity Market Neutral Fund and Short Dated High Yield Global Bond Fund, which are disclosed in Note 11.

The fees paid by the Company for the financial year ended 31 October 2023 to WMC for consultancy, VAT reporting and money laundering reporting officer services amounted to USD 77,926 (31 October 2022: USD 84,306). Fees Payable as at 31 October 2023 are USD 19,741 (31 October 2022: USD NIL).

During the financial year Scottish Equitable had subscriptions of USD 10,814,700 (31 October 2022: USD 43,598,246) and redemptions of USD 45,428,334 (31 October 2022: USD 23,361,051) in Aegon Absolute Return Bond Fund, Aegon Global Equity Income Fund, Aegon Global Equity Market Neutral Fund, Aegon Investment Grade Global Bond Fund, Aegon Short Dated High Yield Global Bond Fund, Aegon Global Short Dated Climate Transition Fund and Aegon Global Sustainable Equity Fund. Aegon Asset Management UK Plc had subscriptions of USD 55,771 (31 October 2022: USD 102,711) and redemptions of USD Nil (31 October 2022: USD 117,593) in Aegon Strategic Global Bond Fund, Aegon Absolute Return Bond Fund, Aegon High Yield Global Bond Fund, Aegon Global Equity Income Fund, Aegon Global Equity Market Neutral Fund, Aegon Investment Grade Global Bond Fund, Aegon Short Dated High Yield Global Bond Fund, Aegon Global Short Dated Climate Transition Fund, Aegon Global Diversified Income Fund, Aegon Global Sustainable Diversified Growth Fund and Aegon Global Sustainable Equity Fund.

As at 31 October 2023, Scottish Equitable held total shares of 33,010,927 (31 October 2022: 34,020,941) with a value of USD 603,505,341 (31 October 2022: USD 571,619,481) in Aegon Absolute Return Bond Fund, Aegon Global Equity Income Fund, Aegon Global Equity Market Neutral Fund, Aegon Investment Grade Global Bond Fund, Aegon Short Dated High Yield Global Bond Fund, Aegon Global Short Dated Climate Transition Fund and Aegon Global Sustainable Equity Fund. Further, Aegon Asset Management UK Plc held total shares of 86,816 (31 October 2022: 81,600) with a value of USD 856,015 (31 October 2022: USD 784,997) in Aegon Strategic Global Bond Fund, Aegon Absolute Return Bond Fund, Aegon High Yield Global Bond Fund, Aegon Global Equity Income Fund, Aegon Global Equity Market Neutral Fund, Aegon Investment Grade Global Bond Fund, Aegon Short Dated High Yield Global Bond Fund, Aegon Global Short Dated Climate Transition Fund, Aegon Global Diversified Income Fund, Aegon Global Sustainable Diversified Growth Fund and Aegon Global Sustainable Equity Fund.

The following lists the number of shareholders that as at 31 October 2023 and 31 October 2022 hold more than 20% of shares in each Fund based on the relevant Fund's share value compared to the total Net Asset Value of each Fund:

Number of shareholders	31 October 2023	31 October 2022

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements

for the financial year ended 31 October 2023

Notes to the Financial Statements (continued)

18. Efficient Portfolio Management

Utilisation of Financial Derivative Instruments (FDI)

Subject to the Regulations and the Central Bank UCITS Regulations and within the limits prescribed by, the Central Bank, each Fund may utilise Financial Derivative Instruments dealt on a regulated market and/or OTC derivatives for investment purposes, details of which shall be set out in the Supplement of the relevant Fund, where applicable.

All the financial derivative instruments held by the Funds were entered into for the purpose of Efficient Portfolio Management in order to hedge currency and market exposure as well as increase capital and income returns. These financial derivatives are Forward Currency Contracts, Futures Contracts, Swaps Contracts and Options all of which are listed, with their counterparty, in the Schedule of Investments. Any gains or losses arising from efficient portfolio management techniques and investments are recognised in the Statement of Comprehensive Income. Please refer to Note 17 Derivative Exposure for details of exposure related to efficient portfolio management techniques.

Securities Financing Transactions: Stock lending

Subject to the investment policies and restrictions for a Fund set out in the Supplement in respect of a Fund, a Fund may enter into stock lending transactions (Securities Financing Transactions) in respect of any Fund for Efficient Portfolio Management purposes and this fact will be set out in the relevant Supplement, where applicable. The use of such transactions or agreements is subject to the conditions and limits set out in the Central Bank UCITS Regulations.

Under the Global Stock Lending Agency Agreement entered into between the Company, the Depositary and Citibank N.A., the plc pays Citibank N.A. 18% of fees received from the borrower with respect to each loan of securities to that borrower.

If a Fund chooses to engage in Securities Financing Transactions, this will be detailed in the relevant Supplement. Unless otherwise specified in the Supplement for a Fund, the proportion of assets under management subject to Securities Financing Transactions is expected to vary between 0% and 30% of the Net Asset Value of the relevant Fund and will be subject to a maximum of 100% of the Net Asset Value of the relevant Fund. Such variations may be dependent on, but are not limited to, factors such as total Fund size, borrower demand to borrow stocks from the underlying market and seasonal trends in the underlying markets.

The Company engaged in efficient portfolio management techniques of stock lending arrangements during the financial year ended 31 October 2023.

The following table shows the stock lending income per Fund for the financial year ended 31 October 2023:

Fund	Gross Stock Lending Income	Citi Fees	Aegon Deduction	Net Stock Lending Income
	USD	USD	USD	USD

Securities Financial Transactions Regulations (Unaudited)

The following disclosure follows the requirements of EU Securities Financing Transactions Regulation (“SFTR”) which came into effect on 13 January 2017.

A Securities Financing Transaction (“SFT”) is defined as per Article 3(11) of the SFTR as:

- A repurchase transaction;
- Securities or commodities lending and securities or commodities borrowing;
- A buy-sell back transaction or sell-buy back transaction; or
- A margin lending transaction.

Five Funds were engaged in securities lending transactions during the financial year ended 31 October 2023 (31 October 2022: None). In addition, no SFTs that meet above definition were held by any of the Funds as at 31 October 2023 (31 October 2022: None).

GLOBAL DATA:

Fund Name	Securities on Loan	% of Lendable Assets	% of AUM
Aegon Strategic Global Bond Fund	9,339,202	6.24%	7.10%
Aegon Investment Grade Global Bond Fund	918,957	0.44%	0.43%

Supplementary Information (Unaudited)

Cybersecurity Risk

Cybersecurity breaches may occur allowing an unauthorized party to gain access to assets of the Funds, Shareholder data, or proprietary information, or may cause the Platform, the Investment Manager, the Distributor, the Administrator or the Depositary to suffer data corruption or lose operational functionality.

The Funds may be affected by intentional cybersecurity breaches which include unauthorized access to systems, networks, or devices (such as through "hacking" activity); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws).

A cybersecurity breach could result in the loss or theft of Shareholder data or funds, the inability to access electronic systems, loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs.

Such incidents could cause the Company, the Investment Manager, the Distributor, the Administrator, the Depositary, or other service providers to incur regulatory penalties, reputational damage, additional compliance costs, or financial loss. Consequently, Shareholders may lose some or all of their invested capital. In addition, such incidents could affect issuers in which the Funds invests, and thereby cause a Fund's investments to lose value, as a result of which investors, including the relevant Funds and its Shareholders, could potentially lose all or a portion of their investment with that issuer.

CRS Data Protection Information Notice

The Funds hereby provides the following data protection information notice to all shareholders in the Funds either as at 31 December 2015 or at any point of time since this date.

For the avoidance of doubt, this notice applies equally to any shareholders that have ceased to hold shares in the Funds since January 1, 2016. Furthermore, it should be noted that this notice may be applicable to Controlling Persons of certain shareholders.

The Funds hereby confirm that they intend to take such steps as may be required to satisfy any obligations imposed by (i) the OECD's Standard for Automatic Exchange of Financial Account Information in Tax Matters ("the Standard"), which therein contains the Common Reporting Standard ("CRS"), as applied in Ireland by means of the relevant international legal framework and Irish tax legislation and (ii) EU Council Directive 2014/107/EU, amending Directive 2011/16/EU as regards mandatory automatic exchange information in the field of taxation ("DAC2"), as applied in Ireland by means of the relevant Irish tax legislation, so as to ensure compliance or deemed compliance (as the case may be) with the Standard/CRS and the DAC2 from 1 January 2016.

In this regard, the Manager on behalf of the Funds is obliged under Section 891F and Section 891G of the Irish Taxes Consolidation Act, 1997 (as amended) and regulations made pursuant to those sections to collect certain information about each shareholder's tax arrangements (and also collect information in relation to relevant Controlling Persons of specific shareholders).

In certain circumstances, the Manager on behalf of the Funds may be legally obliged to share this information and other financial information with respect to a shareholder's interests in the Funds with the Irish Revenue Commissioners (and, in particular situations, also share information in relation to relevant Controlling Persons of specific shareholders). In turn, and to the extent the account has been identified as a Reportable Account, the Irish Revenue Commissioners will exchange this information with the country of residence of the Reportable Person(s) in respect of that Reportable Account.

In particular, information that may be reported in respect of a shareholders (and relevant Controlling Persons, if applicable) includes name, address, date of birth, place of birth, account number, account balance or value at year end (or, if the account was closed during such year, the balance or value at the date of closure of the account), any payments (including redemption and dividend/interest payments) made with respect to the account during the calendar year, tax residency(ies) and tax identification number(s).

Supplementary Information (Unaudited) (continued)

Custody and Title Risk Statement

The Depositary is under a duty to hold in custody all financial instruments that may be registered in a financial instruments account opened in the depositary's books and all financial instruments that can be physically delivered to the depositary. The Depositary is required to ensure that all financial instruments that can be registered in a financial instruments account opened in the depositary's books are registered in the depositary's books within segregated accounts. For other assets, the Depositary shall verify the Company's ownership of such assets. The Depositary will maintain a record of the financial instruments entrusted to it and those assets for which it is satisfied that the Company holds the ownership. When the Depositary employs a sub-custodian the Depositary retains responsibility for the assets of the Fund.

However, it should be noted that not all jurisdictions have the same rules and regulations as Ireland regarding the custody of assets and the recognition of the interests of a beneficial owner such as a Fund. Therefore, in such jurisdictions, there is a risk that if a sub-custodian becomes bankrupt or insolvent, the Fund's beneficial ownership of the assets held by such sub-custodian may not be recognised and consequently the creditors of the sub-custodian may seek to have recourse to the assets of the Fund. In those jurisdictions where the Fund's beneficial ownership of its assets is ultimately recognised, the Fund may suffer delay and cost in recovering those assets.

The Fund may invest in markets where custodial and/or settlement systems are not fully developed, therefore the assets of a Fund which are traded in such markets and which have been entrusted to subcustodians, in circumstances where the use of such sub-custodians is necessary, may be exposed to risk. The Depositary monitors its delegates on an ongoing basis and shall exercise all due skill, care and diligence to ensure that entrusting financial instruments to its sub custodian (appointed pursuant to Article 22 a (2) of Directive 2009/65/EC provides an adequate standard of protection in accordance with Article 15 UCITS delegated regulation 2018/149 amending regulation 2016/438.

Aegon Asset Management Investment Company (Ireland) Plc, is an umbrella type open-ended investment company with variable capital registered in the Republic of Ireland (Company Number 442106), registered office at 25-28 North Wall Quay, International Financial Services Centre, Dublin 1. Board of Directors: Stuart Donald (UK), Mike Kirby (Ireland) and Bronwyn Wright (Ireland). Aegon Asset Management Investment Company (Ireland) Plc is regulated by the Central Bank of Ireland.

Aegon Asset Management UK plc (Company No. SC113505) and Aegon Asset Management UK Limited (Company No. SC212159) are registered in Scotland at Aegon House, 3 Lochside Crescent, Edinburgh EH12 9SA. Aegon Asset Management UK plc is authorised and regulated by the Financial Conduct Authority. Aegon Asset Management UK Limited is an appointed representative of Scottish Equitable plc which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited)

Article 6

Sustainable Finance Disclosure Regulation (article 6 in table below)

This Fund integrates sustainability risks but does not promote ESG characteristics or has a sustainable investment objective according to the Sustainable Finance Disclosure Regulation (SFDR).

EU Taxonomy (in general part)

Investors should note, with respect to each Fund other than those Funds categorised as falling within the scope of Article 8 of SFDR, that the investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Article 8

Sustainable Finance Disclosure Regulation (article 8 in table below)

This Fund promotes ESG characteristics as stated in the Sustainable Finance Disclosure Regulation (SFDR). The Manager can confirm that the environmental and social characteristics as stated in the fund documentation have been implemented and have been complied with.

EU Taxonomy Regulation (in general part)

The Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. As at the date hereof, the only such objectives are climate change mitigation and adaptation (the "Climate Objectives").

The Taxonomy Regulation also requires disclosure regarding how and to what extent the investments of each Fund are in economic activities that qualify as environmentally sustainable pursuant to those criteria (i.e., Taxonomy-aligned investments).

Funds subject to the disclosure requirements of Article 8 of the SFDR.

For each of the Funds categorised as falling within the scope of Article 8 of SFDR, the investment policy, as set out in the relevant Supplement, describes how the relevant Fund promotes ESG characteristics through, amongst other things, consideration of a wide range of environmental characteristics, including the Climate Objectives.

In order for an investment to qualify as environmentally sustainable as at the date hereof, it must meet a number of different criteria, including that it contributes substantially to a Climate Objective, as measured according to the technical screening criteria set out in the Taxonomy Regulation, and that it must not significantly harm any of the environmental objectives set out in the Taxonomy Regulation.

The relevant Funds seek to promote environmental characteristics, however do not make any assessment of whether its investments are Taxonomy-aligned; as such, the relevant Funds will invest 0% of their respective Net Asset Value in Taxonomy-aligned investments, unless otherwise disclosed in the relevant Supplement.

The "do no significant harm" principle referred to above applies only to those investments underlying the relevant Fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the Relevant Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Manager is keeping this situation under active review and where sufficient reliable, timely and verifiable data on the investment becomes available, it will re-evaluate its approach to the EU Taxonomy Regulation and relevant documentation will be updated.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons, or whose activities as regards climate change, tobacco, or human rights potentially create an adverse impact on sustainability factors. The criteria included thresholds that determined if an issuer was excluded from the portfolio. The strategy also excludes a number of securities issued by entities identified according to a set of ESG watch list criteria (as detailed in the Fund's investment strategy). The key sustainability indicators to measure the attainment of the ESG characteristics this strategy promotes is the share of investments in companies and government-issued debt from countries identified to be engaging in the excluded activities.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In addition, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which are used as ESG indicators. The proprietary methodology seeks to identify and assess ESG factors that are relevant to the issuers and the industries in which they operate. Those ESG factors were incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities were assigned an ESG category, with 1 representing the lowest ESG risk category, and 5 representing the highest risk. In accordance with these ESG indicators, the Fund invested at least 80% of the assets in companies with better or improving ESG profiles, which are companies with better or improving ESG profiles, which are companies with an ESG risk category 1, 2 or 3.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments that derive 5% or more of their revenues from thermal coal exploration, mining or refining.	(% involved)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their revenues from thermal coal-fired electricity generation	(% involved)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity are also excluded, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their total oil equivalent production from oil sands	(% involved)	0
Share of investments that derive 5% or more of their revenue from oil and gas exploration and production in offshore Arctic regions	(% involved)	0
Share of investments in pipeline operators and which are significantly involved in oil sands transportation	(% involved)	0
Share of investments in companies that derive 5% or more of their revenues from palm oil production and/or distribution	(% involved)	0
Share of investments in companies managing forests with 75% or lower FSC certification coverage	(% involved)	0
Share of investment companies that derive 5% or more of their revenues from tobacco production.	(% involved)	0
Share of investments in government-issued debt (e.g., government bonds) from countries that systematically breach human rights or from a country whose government is subject to an arms embargo by the United Nations Security Council, the United States, the European Union or another relevant multilateral arms embargo is in place.	(% involved)	0

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Strategic Global Bond Fund (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the research reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, the Investment Manager does not commit to treating PAIs as any more significant per se than other factors in the investment selection process, such that PAIs may not be determinative in deciding to include or exclude any particular investment in the portfolio.

National Bank Of Greece, 8.000%, 03/01/2034	Financial	1.64%	Greece
Alpha Services and Holdings, 11.875%, 08/08/2171	Financial	1.63%	Greece
Logicor Financing, 3.250%, 13/11/2028	Financial	1.60%	Luxembourg

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2022 to 31/10/2023

What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

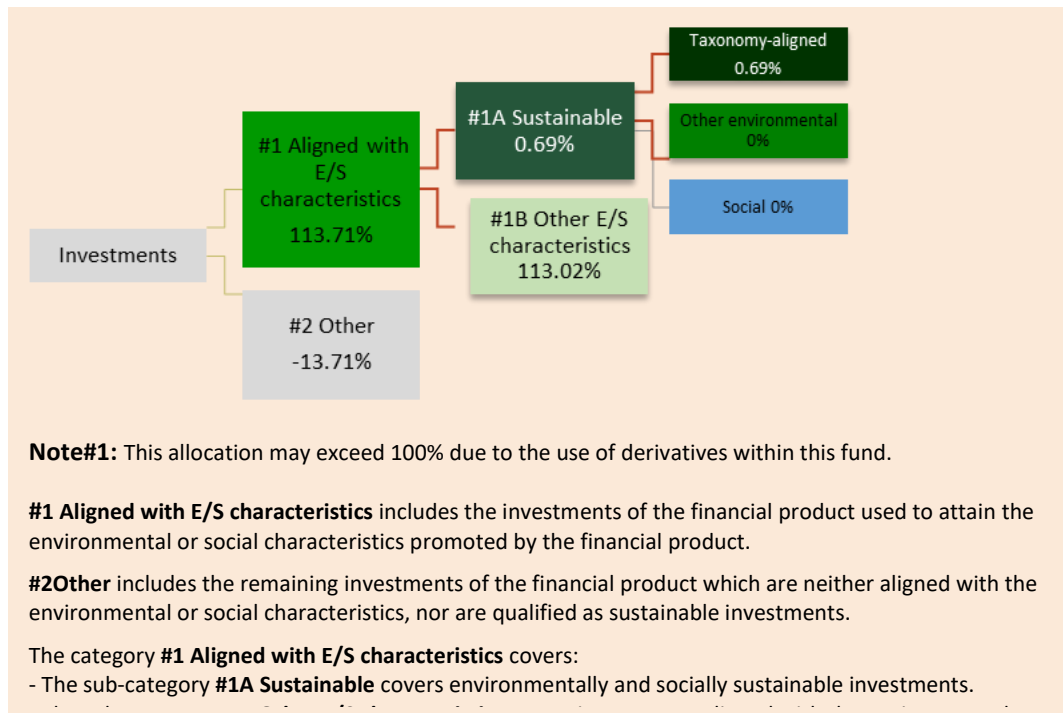

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Strategic Global Bond Fund (continued)

What was the asset allocation?

In which economic sectors were the investments made?

Sector	% Assets
Basic Materials	2.47
Communications	3.45
Consumer, Cyclical	8.06
Consumer, Non-Cyclical	7.57
Diversified	1.66
Energy	3.50
Financial	47.11
Government	12.96
Industrial	3.76
Technology	1.78
Utilities	1.08

The sector allocation may not add up to 100% as there may be investments that cannot be allocated to a sector (e.g. cash, derivatives). This allocation may exceed 100% due to the use of derivatives within this fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Strategic Global Bond Fund (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

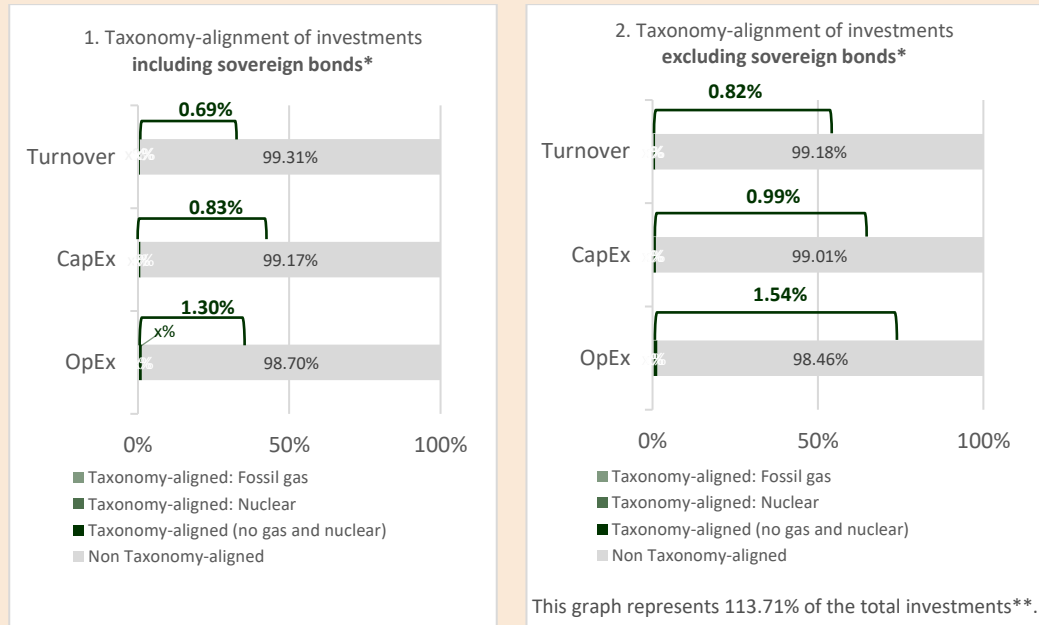

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

** This allocation may exceed 100% due to the use of derivatives within this fund.

What was the share of investments made in transitional and enabling activities?

Turnover	Transition	0.00%
Turnover	Enabling	0.08%
CapEx	Transition	0.10%
CapEx	Enabling	0.21%
OpEx	Transition	0.00%
OpEx	Enabling	0.15%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable – First reporting period for this fund

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Strategic Global Bond Fund (continued)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund's adherence with the determined exclusion criteria and the ESG indicators were reviewed on a regular basis. Credit analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Portfolio Managers took the exclusion criteria and ESG indicators into account in their investment decisions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund

Product name: Aegon High Yield Global Bond Fund
Legal entity identifier: 2138007WMFCYEPTEX33

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> <input checked="" type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons, or whose activities as regards climate change, tobacco, or human rights potentially create an adverse impact on sustainability factors. The criteria included thresholds that determined if an issuer was excluded from the portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2022 to 31/10/2023

<u>Largest Investments</u>	<u>Sector</u>	<u>% Net Assets</u>	<u>Country</u>
Level 3 Financing, 10.500%, 15/05/2030	Communications	2.21%	United States
Pinnacle Bidco, 10.000%, 11/10/2028	Consumer, Cyclical	2.07%	United Kingdom
Vallourec, 8.500%, 30/06/2026	Industrial	2.01%	France
Royal Caribbean Cruises, 8.250%, 15/01/2029	Consumer, Cyclical	1.89%	Liberia
GTCR W-2 Merger Sub, 8.500%, 15/01/2031	Consumer, Non-	1.74%	Netherlands
HTA Group, 7.000%, 18/12/2025	Industrial	1.71%	Mauritius
CPUK Finance, 6.500%, 28/08/2026	Consumer, Cyclical	1.67%	Jersey
Ithaca Energy North Sea, 9.000%, 15/07/2026	Energy	1.67%	United Kingdom
CT Investment, 5.500%, 15/04/2026	Consumer, Cyclical	1.66%	Germany
Tendam Brands SAU, 11.448%, 31/03/2028	Consumer, Cyclical	1.61%	Spain

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

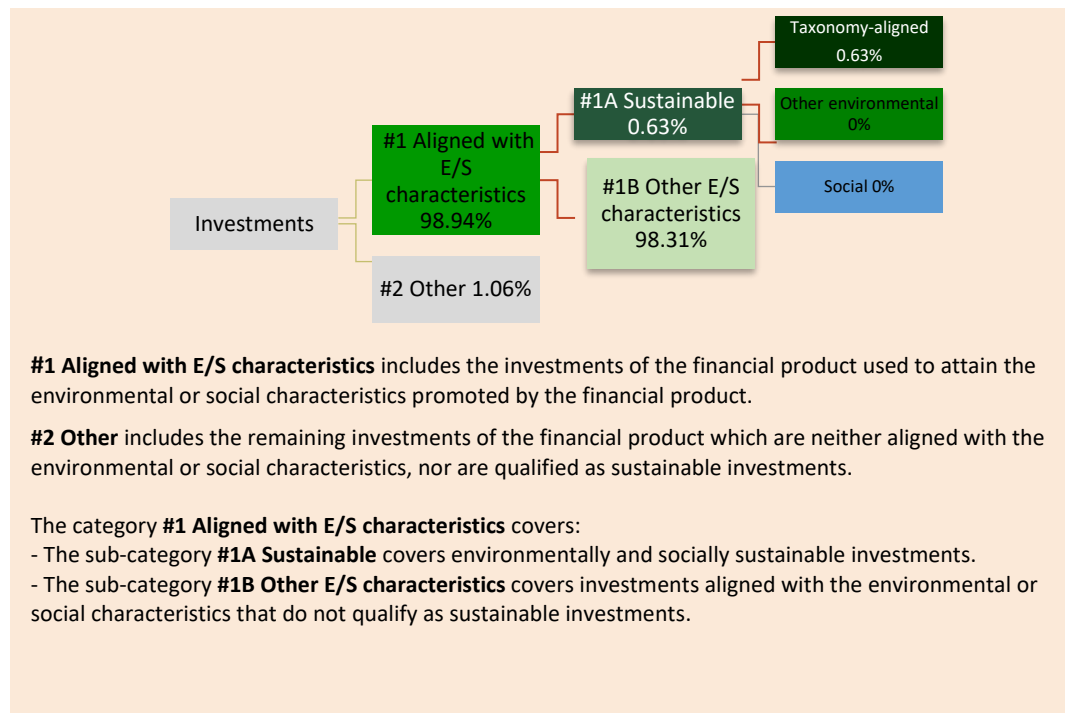

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon High Yield Global Bond Fund (continued)

● What was the asset allocation?

● In which economic sectors were the investments made?

Sector	% Assets
Basic Materials	2.67%
Communications	5.47%
Consumer, Cyclical	25.19%
Consumer, Non-Cyclical	11.96%
Diversified	1.16%
Energy	7.53%
Financial	24.15%
Industrial	18.27%
Technology	1.7%
Utilities	0.84%

The sector allocation may not add up to 100% as there may be investments that cannot be allocated to a sector (e.g. cash, derivatives).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon High Yield Global Bond Fund (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy²?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon High Yield Global Bond Fund (continued)

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.00%
Turnover	Enabling	0.12%
CapEx	Transition	0.05%
CapEx	Enabling	0.26%
OpEx	Transition	0.00%
OpEx	Enabling	0.21%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable. First reporting period for this fund.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon High Yield Global Bond Fund (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund's adherence with the determined exclusion criteria and the ESG indicators were reviewed on a regular basis. Credit Analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Portfolio Managers took the exclusion criteria and ESG indicators into account in their investment decisions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aegon Global Equity Income Fund
Legal entity identifier: 213800YFLYDSICZVTE09

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means **Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained. r
 Social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund complied with its exclusion policy over the period by not investing in companies listed on either the Aegon AM Exclusion List or Watch List. By doing so, it avoided companies identified as engaging in activities related to the production, maintenance, or use of controversial weapons (as defined by Aegon AM), or whose activities as regards climate change, tobacco or human rights potentially create an adverse impact on sustainability factors.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Equity Income Fund (continued)

The fund also comfortably exceeded its target of the portfolio having at least 1.2 times (20% higher exposure than) the MSCI All Countries World Index in securities ranked either AAA or AA (the two highest ratings) for ESG by MSCI.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Companies involved in development, production, maintenance and trade of anti-personnel mines, biological or chemical weapons, cluster munitions and ammunitions containing depleted uranium	% exposure	0%
Companies involved in the production and maintenance of nuclear weapons for any country other than those allowed to possess nuclear weapons based on international agreements	% exposure	0%
Companies that produce or develop key and dedicated components for controversial weapons, as listed above, or offer essential services for their use	% exposure	0%
Companies involved in controversial arms trade to countries where a United Nations Security Council, European Union, United States or other relevant multilateral arms embargo is in place	% exposure	0%
Companies that hold a stake of 20% or more in, or are currently 50% or more owned by, a company that is involved in controversial weapons based on the above criteria	% exposure	0%
Investments in any form of government-issued debt from countries that are under an arms embargo of the United Nations, the European Union, or the United States.	% exposure	0%
Companies that currently derive 30% or more of their revenue from the exploration, mining or refining of thermal coal	% exposure	0%
Companies that produce more than 20 million tons of thermal coal annually and are actively expanding exploration, mining or refining operations	% exposure	0%
Companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity	% exposure	0%
Companies that derive 30% or more of their total oil equivalent production from oil sands;	% exposure	0%
Companies building or operating pipelines that significantly facilitate export of oil extracted from oil sands	% exposure	0%
Investments in any form of government-issued debt (e.g. government bonds) from countries whose governments systematically breach human rights.	% exposure	0%
Companies that derive 5% or more of their revenues from tobacco production.	% exposure	0%

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Equity Income Fund (continued)

As at 30 September 2023, 66% of the fund was held in stocks rated AAA or AA for ESG by MSCI, compared to 43% of the index. This constitutes a premium of 53.5%, well in excess of the Fund's 20% target.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **...and compared to previous periods?**

Not Applicable – First Reporting period

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable. The Fund promotes environmental and social characteristics but does not commit to making sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable. The Fund promotes environmental and social characteristics but does not commit to making sustainable investments.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not Applicable

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not Applicable

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Equity Income Fund (continued)

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the research reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, the Investment Manager does not commit to treating PAIs as any more significant per se than other factors in the investment selection process, such that PAIs may not be determinative in deciding to include or exclude any particular investment in the portfolio.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2022 to 31/10/2023

What were the top investments of this financial product?

<u>Largest Investments</u>	<u>Sector</u>	<u>% Net Assets</u>	<u>Country</u>
Microsoft	Technology	8.19%	United States
BROADCOM	Technology	5.33%	United States
PepsiCo	Consumer, Non-cyclical	3.42%	United States
Eaton	Industrial	3.37%	Ireland
Schneider Electric	Industrial	3.32%	France
Zurich Insurance	Financial	3.27%	Switzerland
Nestle	Consumer, Non-cyclical	3.23%	Switzerland
Watsco	Consumer, Cyclical	3.08%	United States
DBS	Financial	3.02%	Singapore
AstraZeneca	Consumer, Non-cyclical	3.00%	United Kingdom

What was the proportion of sustainability-related investments?

The proportion of the Fund invested in sustainability-related investments is disclosed in the table below.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

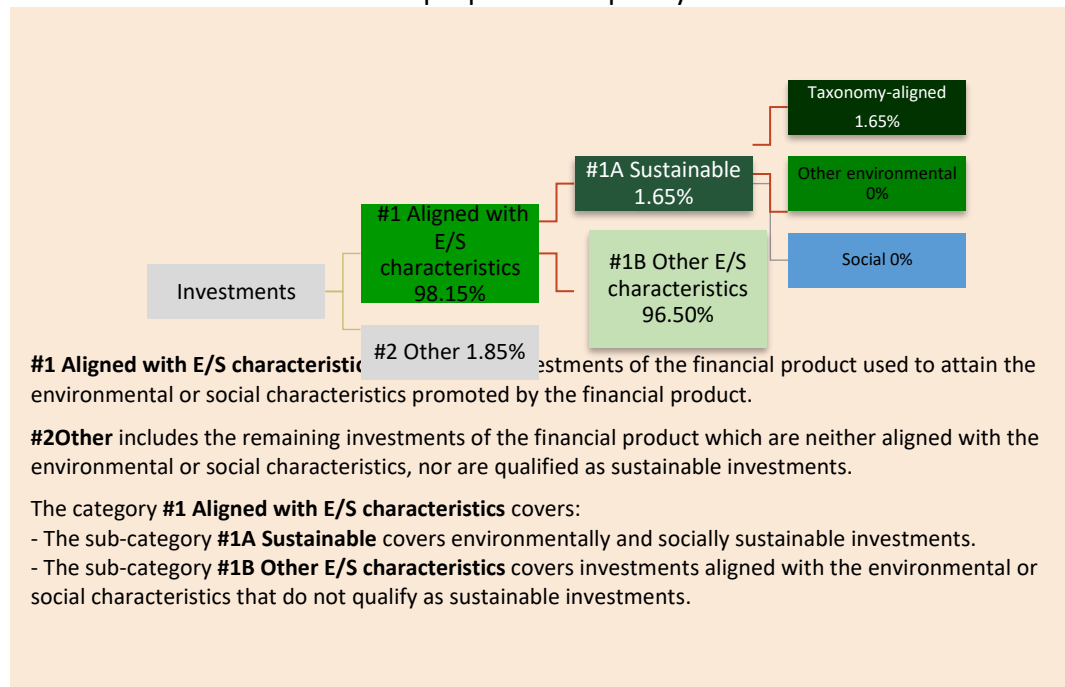

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Equity Income Fund (continued)

● What was the asset allocation?

98.15% of the Fund's assets were aligned with environmental or social characteristics. This was all of the equity securities held in the Fund.

The remainder of assets, categorised as #2 Other consisted of cash and cash-like instruments held for the purposes of liquidity.

● In which economic sectors were the investments made?

Sector	% Assets
Basic Materials	4.29
Communications	1.98
Consumer, Cyclical	10.25
Consumer, Non-cyclical	21.82
Energy	2.42
Financial	22.42
Industrial	10.82
Technology	21.2
Utilities	2.95

The sector allocation may not add up to 100% as there may be investments that cannot be allocated to a sector (e.g. cash, derivatives).

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Equity Income Fund (continued)

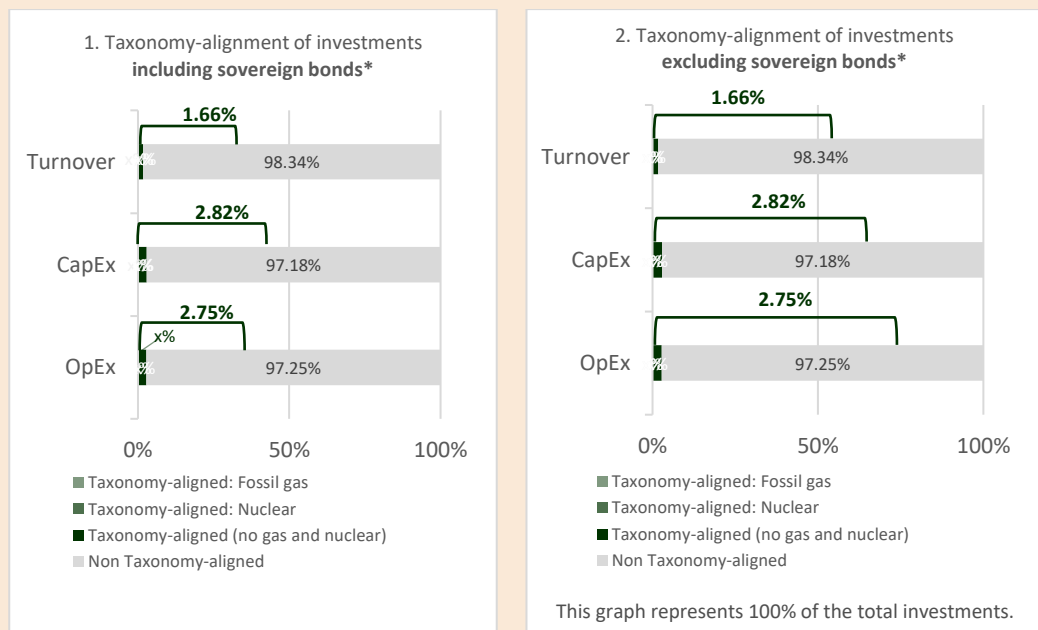

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy³?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Equity Income Fund (continued)

● What was the share of investments made in transitional and enabling activities?

Turnover	Transition	0.00%
Turnover	Enabling	1.30%
CapEx	Transition	0.01%
CapEx	Enabling	1.63%
OpEx	Transition	0.02%
OpEx	Enabling	2.30%

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable – First reporting period

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

Not applicable

What was the share of socially sustainable investments

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments categorised as “other” consisted of cash and cash-like instruments held for the purposes of liquidity.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Equity Income Fund (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager established and maintained controls in its trading and portfolio management systems to prevent any securities featured on the Aegon AM Exclusion List or Watch List from being purchased for the Fund. In addition, the portfolio was checked monthly by the Investment Manager's Portfolio Risk Control team to ensure that no securities featured on either the Exclusion or Watch lists were held within the portfolio.

The Investment Manager also integrated ESG analysis into its investment process, to assess the environmental and social characteristics of securities researched.

Finally, as part of its portfolio construction process, the Investment Manager considered the ESG ratings of securities in the portfolio, in order to continually meet the Fund's target of having a weighting of stocks rated AAA and AA for ESG by MSCI that was 20% higher than the MSCI All Countries World Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Product name: Aegon Global Short Dated Climate Transition Fund

Legal entity identifier: 2138004WJHYVKH4J2H33

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E/S characteristics. First, exclusion criteria was used to identify the engagement in activities related to the production, maintenance, or use of controversial weapons. The criteria included thresholds that determined if an issuer was excluded from the portfolio. Second, the Investment Manager used a proprietary methodology to assign an ESG risk category to each security, which was used as a sustainability indicator. The proprietary methodology sought to identify and assess ESG factors that were relevant to the issuers and the industries in which they operated. Those ESG factors were incorporated and integrated in the credit assessment and portfolio construction process. Based on this analysis, securities were assigned an ESG risk category, with 1 representing the lowest risk ESG category, and 5 representing the highest.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Short Dated Climate Transition Fund (continued)

In accordance with these ESG indicators, the Fund invested at least 90% of the assets in companies with better or improving ESG profiles, which are companies with better or improving ESG profiles, which are companies with an ESG risk category 1, 2 or 3.

Thirdly, holdings were categorized into one of five categories based on their climate related transition readiness and net zero alignment. Issuers were then assigned a climate category ranging from 1 – 5 (Leader, Prepared, Transitioning, Unprepared and Laggard), which were used as sustainability indicators. As a consequence of which, the Fund was expected to have at least 30% lower weighted average carbon intensity compared with the broader universe as defined by BofAML Global Large Cap Corporate 1-5 Year Index. For more details on the indicators and thresholds used, please refer to the description of the Fund's investment strategy.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments that derive 5% or more of their revenues from thermal coal exploration, mining or refining.	(% involved)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their revenues from thermal coal-fired electricity generation	(% involved)	0
Share of investments in companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity are also excluded, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their total oil equivalent production from oil sands	(% involved)	0
Share of investments that derive 5% or more of their revenue from oil and gas exploration and production in offshore Arctic regions	(% involved)	0
Share of investments in pipeline operators and which are significantly involved in oil sands transportation	(% involved)	0
Share of investments in companies that derive 5% or more of their revenues from palm oil production and/or distribution	(% involved)	0
Share of investments in companies managing forests with 75% or lower FSC certification coverage	(% involved)	0
Share of investment companies that derive 5% or more of their revenues from tobacco production.	(% involved)	0

— — — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been determinative in deciding to include or exclude any particular investment in the portfolio. More specifically, the climate transition research framework considered issuers greenhouse gas ("GHG") absolute and intensity based scope 1, 2 and 3 emissions (where deemed to be material), which are a key part of evaluating a company's alignment to long-term climate transition. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy.

*% in brackets represents share of market value.

Adverse sustainability indicator		Metric	Impact [2023]
Climate and other environment-related indicators			
Greenhouse gas emissions 	1. GHG emissions	Scope 1 GHG emissions (tCO ₂ eq)	29,578.27 (92%)
		Scope 2 GHG emissions (tCO ₂ eq)	5,559.09 (92%)
		Scope 3 GHG emissions (tCO ₂ eq)	462,767.02 (92%)
		Total GHG emissions (tCO ₂ eq)	497,904.37 (92%)

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Pfizer Investment Enterprises Pte Ltd, 4.450%, 19/05/2026	Consumer, Non-Cyclical	1.56%	Singapore
Intesa Sanpaolo, 7.00%, 21/11/2025	Financial	1.43%	Italy
American Medical Systems Europe, 0.750%, 08/03/2025	Consumer, Non-Cyclical	1.26%	Netherlands
SSE, 1.250%, 16/04/2025	Utilities	1.22%	United Kingdom
Societe Generale, 4.125%, 02/06/2027	Financial	1.16%	France
EDP Finance, 3.625%, 15/07/2024	Utilities	1.13%	Netherlands
Liberty Living Finance, 2.625%, 28/11/2024	Financial	1.11%	United Kingdom
Sika Capital, 3.750%, 03/11/2026	Industrial	1.08%	Netherlands
ING, 0.125%, 29/11/2025	Financial	1.07%	Netherlands
Medtronic Global, 1.125%, 07/03/2027	Consumer, Non-Cyclical	1.07%	Luxembourg

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2022 to

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

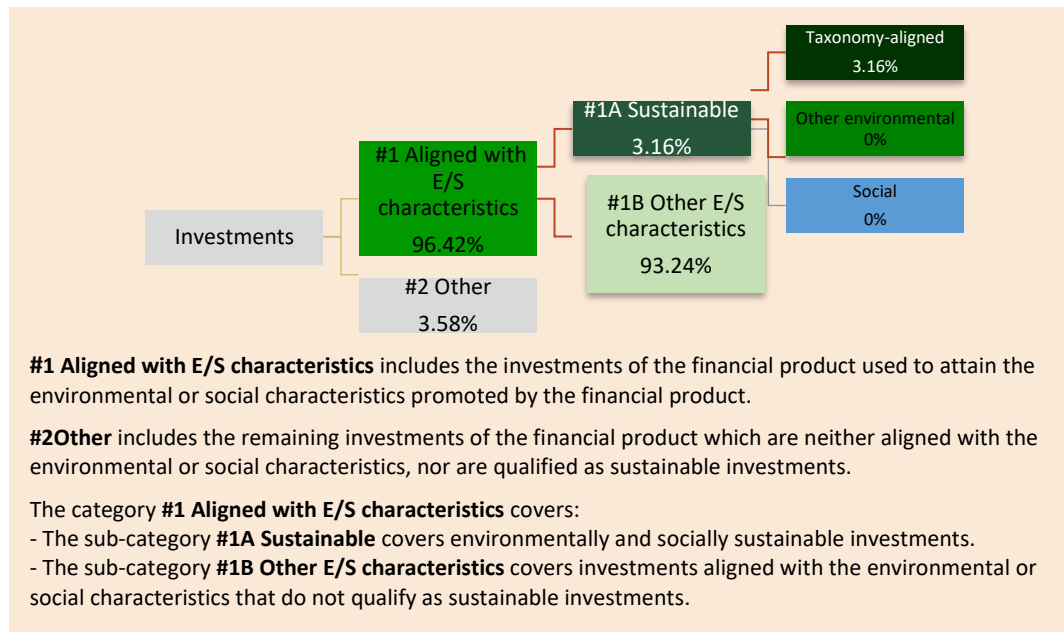

What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

● What was the asset allocation?

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Short Dated Climate Transition Fund (continued)

● **In which economic sectors were the investments made?**

Sector	% Assets
Communications	1.64
Consumer, Cyclical	12.46
Consumer, Non-cyclical	8.11
Financial	55.06
Industrial	6.63
Technology	3.77
Utilities	9.36

Note: It is possible that the sector allocations do not add up to zero due to investments which can not be allocated to a sector (for example cash and derivatives).

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁴?**

Yes:

In fossil gas In nuclear energy

No

⁴ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

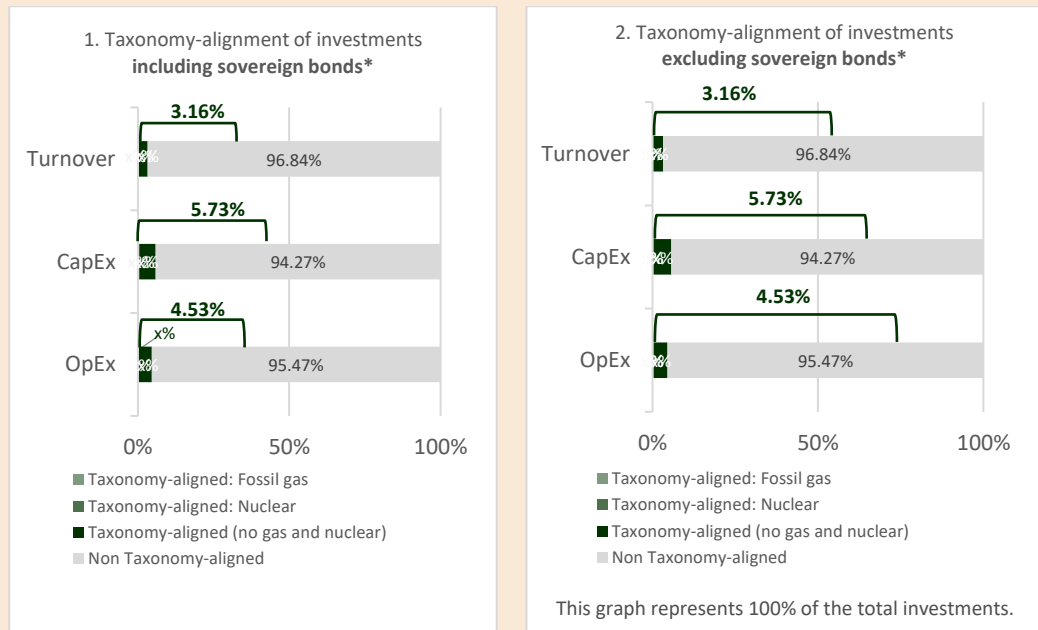

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Short Dated Climate Transition Fund (continued)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Turnover	Transition	0.09%
Turnover	Enabling	0.88%
CapEx	Transition	0.15%
CapEx	Enabling	1.95%
OpEx	Transition	0.00%
OpEx	Enabling	1.51%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Short Dated Climate Transition Fund (continued)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund's ESG, climate transition, and carbon intensity was reviewed on a regular basis. Credit analysts reviewed, maintained and provided updates on their assessment of issuer's proprietary ESG categories. The Responsible Investment team maintained, reviewed and provided updates on climate transition research and issuers' designated categorisations. We regularly monitored the portfolio's carbon intensity vs broad universe. The Portfolio Managers took these ESG and Climate Considerations into account in their investment decisions.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

● **How does the reference benchmark differ from a broad market index?**

Not applicable

Product name: Aegon Global Diversified Income Fund

Legal entity identifier: 213800P4B14T11BZX714

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents sustainable investments]*

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics were achieved through the exclusion of securities whose issuer had been identified as contravening a set of ESG exclusion and watch list criteria (as detailed below). These criteria worked as sustainability indicators. Each indicator had a specific threshold that determined if an issuer was excluded from the portfolio. For more details on the indicators and thresholds used, please refer to the description of the Fund's investment strategy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not Applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not Applicable

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable*

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been determinative in deciding to include or exclude any particular investment in the portfolio. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 11/01/2022 to 31/10/2023

***% in brackets represent share of market value**

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

What were the top investments of this financial product?

Largest investments	Sector	% Net Assets	Country
Legal & General	Financial	1.79%	United Kingdom
BROADCOM	Technology	1.78%	United States
SSE	Utilities	1.75%	United Kingdom
Phoenix	Financial	1.68%	United Kingdom
Koninklijke Ahold Delhaize	Consumer, Non-cyclical	1.62%	Netherlands
U.S. Treasury Note, 3.875%	Government	1.60%	United States
Microsoft	Technology	1.50%	United States
Taiwan Semiconductor	Technology	1.36%	Taiwan
Greencoat UK Wind	Energy	1.22%	United Kingdom
Nestle	Consumer, Non-cyclical	1.17%	Switzerland

The List includes the investments constituting the greatest proportion of investments of the financial product during the reference to 01/11/2022 to 31/10/2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

What was the proportion of sustainability-related investments?

The fund does not commit to a minimum sustainable investments allocation.

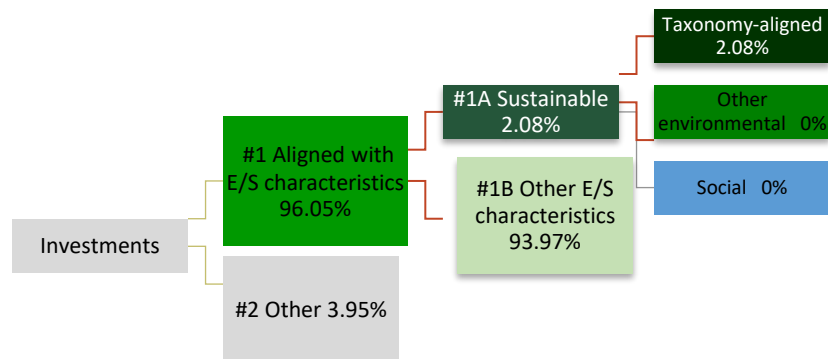

However, below we report the EU taxonomy aligned investments in accordance with the reporting requirements.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

● ***In which economic sectors were the investments made?***

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Sector	% Assets
Basic Materials	2.57
Communications	2.51
Consumer, Cyclical	9.44
Consumer, Non-cyclical	16.86
Financial	35.75
Government	2.45
Industrial	6.44
Technology	8.28
Utilities	5.28
Infrastructure	1.00
Equity Investment Trust	3.22
Energy	2.19

The sector allocation may not add up to 100% as there may be investments that cannot be allocated to a sector (e.g. cash, derivatives).

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁵?

Yes:

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

Turnover	Transition	0.00%
Turnover	Enabling	1.08%
CapEx	Transition	0.06%
CapEx	Enabling	1.37%
OpEx	Transition	0.00%
OpEx	Enabling	1.71%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable – First period reporting EU Taxonomy related investments

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, collective investment schemes, index derivatives, cash, bank deposits, short term certificates, commercial paper and treasury bills. These other investments were not subject to the Fund's environmental or social criteria

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We identified issuers by using the sustainability indicators used to measure attainment of the environmental and social characteristics promoted. Issuers identified in connection with these activities were added to the Exclusion List. The Fund may not invest in securities from issuers identified as involved in the activities. The Exclusion List is compiled annually using the broadest available research universe offered by our specialist ESG data providers. Therefore, since it is subject to the availability of appropriate research data, it should not be considered as a fully comprehensive list of issuers involved in excluded activities. Our Exclusion List is not applied to investments in index-based derivatives, such as futures or options, or structured credit. This list is reviewed at least annually.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

● ***How does the reference benchmark differ from a broad market index?***

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

● ***How did this financial product perform compared with the reference benchmark?***

Product name: Aegon Global Sustainable Diversified Growth Fund
Legal entity identifier: 21380097T28R8D6FW710

Environmental and/or social characteristics

DID THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> No
<input type="checkbox"/> IT MADE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE: ___% <input type="checkbox"/> IN ECONOMIC ACTIVITIES THAT QUALIFY AS ENVIRONMENTALLY SUSTAINABLE UNDER THE EU TAXONOMY <input type="checkbox"/> IN ECONOMIC ACTIVITIES THAT DO NOT QUALIFY AS ENVIRONMENTALLY SUSTAINABLE UNDER THE EU TAXONOMY <input type="checkbox"/> IT MADE SUSTAINABLE INVESTMENTS WITH A SOCIAL OBJECTIVE: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of <u>94.89</u> % of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted environmental and social characteristics. First, internal and third-party screening were used to ensure compliance with the exclusions of the Fund. This was monitored by the Investment Manager's Portfolio Risk Control team monthly to ensure that the exclusions were adhered to. Second, the Investment Manager's Responsible Investment team analysed and reviewed every holding at least every 12 months. This was also monitored by Portfolio Risk Control team and it can report that this analysis cycle was adhered to. As described below, this review included the categorisation of companies/issuers according to their ESG performances. The Fund is only allowed to invest in companies categorised as "Improvers" and "Leaders" and sovereign issuers categorised as ""Leaders"", ""Influencers"" and ""Improvers"", as these are the companies/issuers that it

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Diversified Growth Fund (continued)

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Investment Manager assigned each sustainable investment in the portfolio to one of six 'sustainability pillars', which it has defined as the main sustainable themes it can address through public equity investments. There are three environmental pillars (Climate Change, Ecological Solutions, Resource Efficiency) and three social pillars (Inclusion, Health & Wellbeing, Sustainable Growth), which together capture a broad spectrum of sustainability issues. The objectives of the sustainable investments will vary on a case by case basis but each investment must be deemed by the Investment Manager's RI team to be positively contributing to the overall theme through its products and/ or practices. The RI team review the sustainability performance of each investment at least annually to ensure it is contributing to the overall pillar in the expected manner.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

First, the Investment Manager used a mixed quantitative and qualitative approach when analysing the company to assess whether the product or practices would be deemed to be harmful to society or the environment. This was generally captured by the exclusions (as detailed in the description of the Fund's investment strategy), but there may be other companies that the Investment Manager would capture as not being suitable for investment and inclusion in the Fund's portfolio

Secondly, in the course of the Investment Manager's in depth analysis it looked at the controversies the company may have been involved in. Those with Sustainalytics scores of 4 or 5 as per Sustainalytics' methodology or with significant supply chain issues could be considered as doing significant harm.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Aegon Asset Management Investment Company (Ireland) Plc

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been a major determinant in deciding to include or exclude any particular investment in the portfolio. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy and in the Investment Manager's Sustainability Risks and Impacts Policy applicable to this Fund (the "Aegon AM UK Sustainability Risks and Impacts Policy"). PAIs were also considered within the thorough, bottom-up sustainability analysis of companies' products and practices undertaken by the Investment Manager's Responsible Investment team. This process included an in depth analysis of the material (single and double) ESG factors for companies and PAIs were considered as part of this. This process also ensures that companies were doing no significant harm. The Investment Manager took its active ownership responsibilities seriously. Company meetings (AGMs, EGMs, etc.) were individually analysed, and the Investment Manager votes in meetings took due consideration of the governance of each company. The Investment Manager recognizes that good governance is often key to ensuring the good management of environmental and social issues. For sovereign debt issuers, the sustainability research process described above incorporated PAIs relevant to sovereigns when conducting sustainability research to determine the investable universe. The PAIs for sovereigns overlap with the quantitative and qualitative considerations as part of the sustainability process. The process was designed to evaluate the sustainability ambitions of each sovereign including an analysis of greenhouse gas ("GHG") emissions, inequality, human rights, governance and controversies.

Aegon Global Sustainable Diversified Growth Fund (continued)

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Investment Manager ensured that the Sustainable Investments were aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by periodically screening the portfolio holdings using external specialized research, such as controversies, that indicated actual or potential breaches of international norms and standards. Please refer to the Aegon AM UK Sustainability Risks and Impacts Policy for further details of this process. For sovereign debt investment, these international norms are not directly relevant.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes, the Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund’s investment objective. The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs may have been no more significant than other factors in the investment selection process, such that PAIs may not have been determinative in deciding to include or exclude any particular investment in the portfolio. In addition to considering the PAI indicators, certain issuers were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund’s investment strategy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Diversified Growth Fund (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This Fund has avoided investing in companies identified as having significant adverse impact on biodiversity, environment, human rights and health by adhering to the exclusions list in the Aegon AM UK Sustainability Risks and Impacts Policy (by using the broadest available coverage universe from our specialist ESG data vendors).

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁶?

Yes:

In fossil gas

In nuclear energy

No

⁶ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

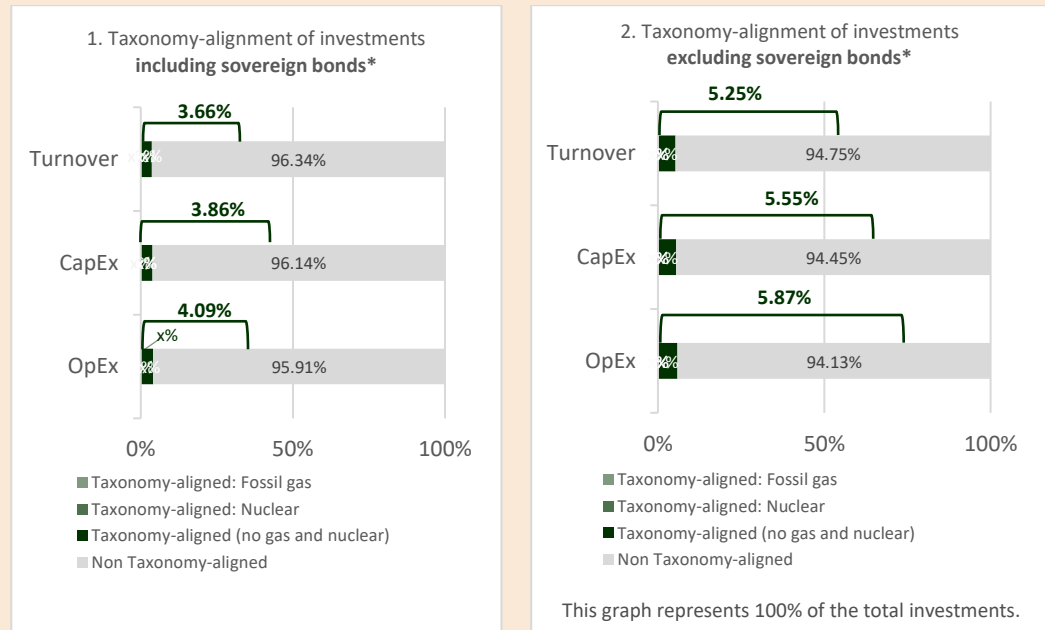

Aegon Asset Management Investment Company (Ireland) Plc

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Diversified Growth Fund (continued)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Turnover	Transition	0.00%
Turnover	Enabling	2.83%
CapEx	Transition	0.00%
CapEx	Enabling	1.48%
OpEx	Transition	0.00%
OpEx	Enabling	1.52%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green

investee companies. - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Diversified Growth Fund (continued)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The fund invested 94.89% in sustainable investments, categorised across the 6 sustainability pillars described above in the case of corporate securities and allocated to countries that were making substantial progress towards achieving the UN SDGs in the case of sovereign securities. This was achieved through the mix of such environmental and / or social sustainable investments and there was no prioritization of one category over the other. The environmental objectives were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments

As mentioned above, the fund invested 94.89% in sustainable investments, categorised across the 6 sustainability pillars described above in the case of corporate securities and allocated to countries that were making substantial progress towards achieving the UN SDGs in the case of sovereign securities. This was achieved through the mix of such environmental and / or social sustainable investments and there was no prioritization of one category over the other.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund could invest in other investments for the purpose of efficient portfolio management, for example, cash, bank deposits, money market instruments, exchanged traded products and FX forward positions. These other investments were not subject to the Fund's environmental or social criteria.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability is incorporated in both an initial exclusionary screen and our detailed fundamental sustainability analysis on each stock considered for the portfolio. Our exclusionary screen covers: Animal welfare, Tobacco, Weapons, Nuclear power, Gambling, Adult entertainment, Genetic modification, Coal, Oil exploration and production. The fundamental analysis stage is a collaborative process between the investment management team and the Aegon AM Responsible Investment (RI) team to assess each idea considered for the strategy from a sustainability perspective. The process is led by the RI team, and companies are assessed based on a unique three-dimensional framework: (1) Sustainable Products; (2) Sustainable Practices; (3) Sustainable Improvement (tracking positive and negative sustainability change).

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Diversified Growth Fund (continued)

The output of this analysis is that the RI team categorise each company as one of the following:

- Sustainability Leader: Excellent performance on practices and strategically well positioned products. Activities that generate clear positive impact are viewed favourably.
- Sustainability Improver: Companies where sustainability issues have been identified and the company is showing clear evidence of addressing these or has meaningful plans in place to do so.
- Sustainability Influencer (Only applies to the Sovereign investments) : Material portion of collateral or organizational mission is linked to sustainable initiatives.
- Sustainability Laggard: Poorly positioned, with unacceptably low standards, negative impacts and/or a lack of evidence of improvement.

There is a slightly different process applied to Sovereign investments:

The Fund seeks to invest in securities issued by countries that are making substantial progress towards achieving the UN's Sustainable Development Goals ("UN SDGs") as a result of good policy and whose government is able to manage risks to sustainable development. There are five sustainable categories for sovereign issuers:

- Sustainability Leader: The country has already achieved critical UN SDGs and is on track to achieve others. Leaders show outstanding commitment to increase or maintain their sustainability performance. Leaders do not have sustainability risk or controversial policies.
- Sustainability Influencer: The country is on track to achieve some UN SDGs and exhibits a clear commitment to sustainability. Influencers have limited sustainability risk and no major controversial policies.
- Sustainability Improver: The country demonstrates an above average performance as compared to its development peers, but still faces significant challenges in terms of UN SDG achievements. Improvers have sustainability risk but continue to deliver a credible promise through policy or other means to tackle its potential controversies.
- Sustainability Neutral: The country is not on track to achieve most UN SDGs, shows no significant improvements in its sustainability performance and seems to have no clear ambition to do so in the future. Neutral's have sustainability risk with controversies that require monitoring.
- Sustainability Detrimental: Country is not on track to achieve the UN SDGs and has no intention of doing so. Detrimentials have the highest sustainability risk, with possible major controversies.

How did this financial product perform compared to the reference benchmark?

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Aegon Global Sustainable Equity Fund
Legal entity identifier: 213800XVAGWUGI2BD256

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _89.55_ % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Several sustainability indicators were used to measure the attainment of the promoted E / S characteristics. First, internal and third-party screening was used to ensure compliance with the exclusions of the Fund. At all times, the portfolio was in compliance with the exclusionary criteria set in the Sustainability Risks and Impact (SRI) policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements

for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Equity Fund (continued)

Second, the Investment manager set certain Key Performance Indicators (KPIs) for each company held in the Fund to measure the attainment of the environmental and social characteristics promoted. These KPIs were specific to each company and were set by the Investment Manager's Responsible Investment team based on the factors considered most material to the holding. The Responsible Investment team was also responsible for monitoring these KPIs. As described below, the Investment Manager categorised companies according to their ESG performances into "Laggards", "Improvers" and "Leaders" and was allowed to invest in companies categorised as "Improvers" and "Leaders" as these were the companies that it believed fulfil the definition of sustainable investments as articulated in the following table. At all times, the portfolio was in compliance with this requirement and no "laggards" were held during the reporting period.

Finally, all equity holdings in the portfolio were assigned to one of the Investment Manager's six sustainability "Pillars" during the reporting period based on their most material sustainability contribution.

Of the six pillars, three are based on environmental characteristics (Climate Change, Ecological Solutions and Resource Efficiency) and three are based on social factors (Inclusion, Health & Wellbeing and Sustainable Growth). Governance is also an underlying pillar that is considered for all holdings. The investment Manager considers all investments that sit within these pillars to be promoting environmental or social characteristics.

● **How did the sustainability indicators perform?**

Sustainability indicator	Metric	Value
Share of investments that derive 5% or more of their revenues from thermal coal exploration, mining or refining.	(% involved)	0
Share of investments in companies that produce more than 20 million tonnes of thermal coal annually and are actively expanding exploration, mining or refining operations, even if this is less than 5% of revenues	(% involved)	0
Share of investments that derive 5% or more of their revenues from thermal coal-fired electricity generation	(% involved)	0

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Investment Manager assigned each sustainable investment in the portfolio to one of six 'sustainability pillars', which it has defined as the main sustainable themes it can address through public equity investments. There are three environmental pillars (Climate Change, Ecological Solutions, Resource Efficiency) and three social pillars (Health & Wellbeing, Inclusion, Sustainable Growth), which together capture a broad spectrum of sustainability issues. The objectives of the sustainable investments will vary on a case by case basis but each investment must be deemed by the Investment Manager's RI team to be positively contributing to the overall theme through its products and/ or practices. The RI team review the

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

sustainability performance of each investment at least annually to ensure it is contributing to the overall pillar in the expected manner.

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Equity Fund (continued)

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

First, the Investment Manager used a mixed quantitative and qualitative approach when analysing the company to assess whether the product or practices would be deemed to be harmful to society or the environment. This was generally captured by the exclusions (as detailed in the description of the Fund's investment strategy), but there may be other companies that the Investment Manager would capture as not being suitable for investment and inclusion in the Fund's portfolio.

Secondly, in the course of the Investment Manager's in depth analysis it looked at the controversies the company may have been involved in. Those with Sustainalytics scores of 4 or 5 as per Sustainalytics' methodology or with significant supply chain issues could be considered as doing significant harm.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund's investment objective.

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs could be no more significant than other factors in the investment selection process, such that PAIs could not be determinative in deciding to include or exclude any particular investment in the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Equity Fund (continued)

In addition to considering the PAI indicators, certain companies were excluded on the basis of their activities and associated adverse impacts. These exclusion criteria are outlined in the description of the Fund's investment strategy and in the Investment Manager's Sustainability Risks and Impacts Policy applicable to this Fund (the "Aegon AM UK Sustainability Risks and Impacts Policy").

PAIs were also considered within the thorough, bottom-up sustainability analysis of companies' products and practices undertaken by the Investment Manager's Responsible Investment team. This process included an in depth analysis of the material (single and double) ESG factors for companies and PAIs were considered as part of this. This process also ensured that companies were doing no significant harm.

The Investment Manager took its active ownership responsibilities seriously. Company meetings (AGMs, EGMs, etc.) were individually analysed, and the Investment Manager voted in meetings taking due consideration of the governance of each company. The Investment Manager recognized that good governance was often key to ensuring the good management of environmental and social issues.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Investment Manager ensured that the sustainable investments were aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights by periodically screening the portfolio holdings using external specialized research, such as controversies, that indicated actual or potential breaches of international norms and standards. Please refer to the Aegon AM UK Sustainability Risks and Impacts Policy for further details of this process.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/11/2022 to 31/10/2023

Aegon Asset Management Investment Company (Ireland) Plc
Annual Report and Audited Financial Statements
for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Equity Fund (continued)

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors. The Investment Manager interpreted consideration to mean awareness of the PAI indicators, where data was available. Certain security types or asset classes may have had limited or no PAI data available. PAIs were taken into account within the context of the Fund’s investment objective.

The Investment Manager considered PAIs, where data was available, alongside other factors in its investment decisions. PAI factors were included in the applicable reports alongside the sustainability risk assessment (ESG integration) for consideration in our investment process. However, PAIs could be no more significant than other factors in the investment selection process, such that PAIs could not be determinative in deciding to include or exclude any particular investment in the portfolio.

What were the top investments of this financial product

Largest investments	Sector	% Net Assets	Country
Relx plc	Consumer, non-cyclical	5.52%	United Kingdom
NVIDIA	Technology	5.21%	United States
Taiwan Semiconductor Manufacturing	Technology	4.37%	Taiwan
Zurich Insurance	Financial	3.81%	Switzerland
ICON	Consumer, non-cyclical	3.80%	Ireland
Tetra Tech	Industrial	3.75%	United States
Terna – Rete Elettrica Nazionale	Utilities	3.73%	Italy
HDFC Bank	Financial	3.54%	India
Keyence	Industrial	3.20%	Japan
AstraZeneca	Consumer, non-cyclical	3.17%	United Kingdom

What was the proportion of sustainability-related investments?

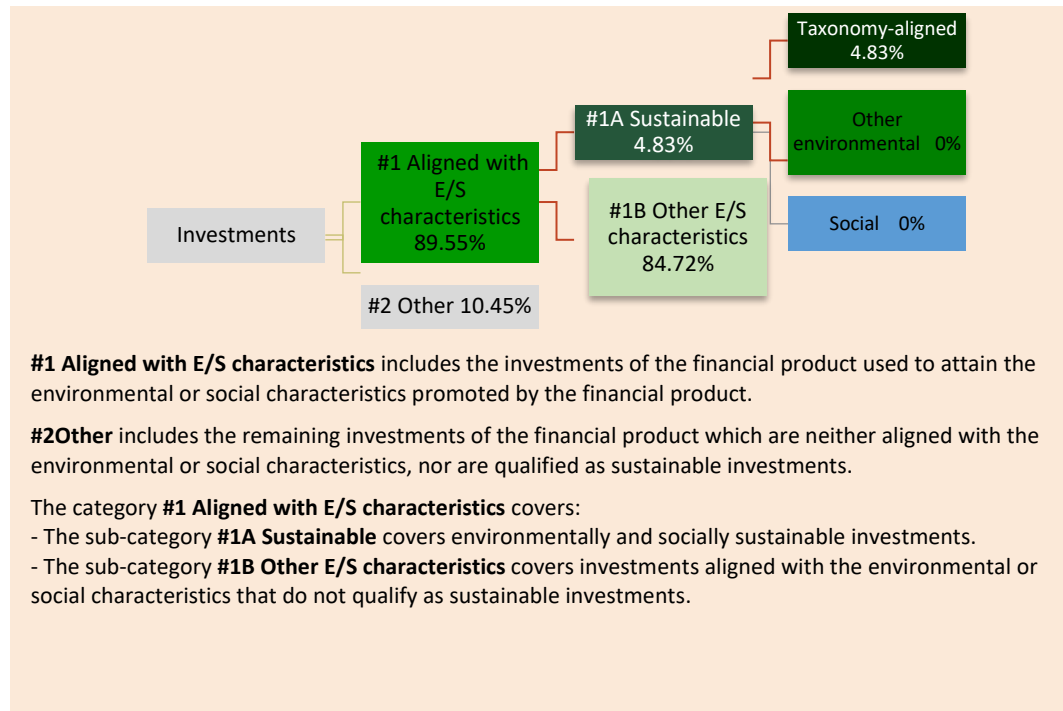

Aegon Asset Management Investment Company (Ireland) Plc

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Equity Fund (continued)

What was the asset allocation?

In which economic sectors were the investments made?

Sector	% Assets
Communications	3.35%
Consumer, Non-Cyclical	32.66%
Financial	9.40%
Industrial	23.34%
Technology	22.05%
Utilities	3.73%

The sector allocation may not add up to 100% as there may be investments that cannot be allocated to a sector (e.g. cash, derivatives).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Equity Fund (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This Fund has avoided investing in companies identified as having significant adverse impact on biodiversity, environment, human rights and health by adhering to the exclusions list in the Aegon AM UK Sustainability Risks and Impacts Policy (by using the broadest available coverage universe from our specialist ESG data vendors).

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁷?

Not Applicable

Yes:

In fossil gas In nuclear energy

No

⁷ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Annual Report and Audited Financial Statements for the financial year ended 31 October 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (Unaudited) (continued)

Aegon Global Sustainable Equity Fund (continued)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of investments made in transitional and enabling activities?

Turnover	Transition	0.00%
Turnover	Enabling	4.83%
CapEx	Transition	0.00%
CapEx	Enabling	5.10%
OpEx	Transition	0.00%
OpEx	Enabling	5.13%

Aegon Global Sustainable Equity Fund (continued)

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable due to unavailability of data in prior year

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The fund invested 89.55% in sustainable investments, categorised across the 6 sustainability pillars described above that cover both environment and social objectives. This percentage was achieved through the mix of such environmental and / or social sustainable investments and there was no prioritization of one category over the other. The environmental objectives were not aligned with the EU Taxonomy.

- **What was the share of socially sustainable investments?**

As mentioned above, the fund invested 89.55% in sustainable investments, categorised across the 6 sustainability pillars described above that cover both environment and social objectives. This percentage was achieved through the mix of such environmental and / or social sustainable investments and there was no prioritization of one category over the other.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The ‘other’ category currently includes only cash and equivalents. The Fund also has the ability to use derivative instruments, which may only be used for efficient portfolio management purposes. These would also be included in this section, although there were no derivatives in the portfolio at the time of reporting.

There were no minimum environmental or social safeguards applied to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability is incorporated in both an initial exclusionary screen and our detailed fundamental sustainability analysis on each stock considered for the portfolio. Our exclusionary screen covers: Animal testing for cosmetic purposes, Tobacco, Weapons, Nuclear power, Gambling, Adult entertainment, Genetic modification, Coal, Oil exploration and production. The fundamental analysis stage is carried out by the the Aegon AM Responsible Investment (RI) team to assess each idea considered for the strategy from a sustainability perspective. Companies are assessed based on a unique three-dimensional framework: (1) Sustainable Products; (2) Sustainable Practices; (3) Sustainable Improvement (tracking positive and negative sustainability change)

The output of this analysis is that the RI team categorise each company as one of the following:

- Sustainability Leader: Excellent performance on practices and strategically well positioned products. Activities that generate clear positive impact are viewed favourably.
- Sustainability Improver: Companies where sustainability issues have been identified and the company is showing clear evidence of addressing these or has meaningful plans in place to do so.
- Sustainability Laggard: Poorly positioned, with unacceptably low standards, negative impacts and/or a lack of evidence of improvement.

Importantly, the fund can only invest in sustainable leaders and improvers - it cannot invest in laggards.

In terms of actions, the sustainability analysis is reviewed at least annually by the RI team, who can upgrade or downgrade a stock's categorisation. Should a stock be downgraded to a laggard, it must be sold from the portfolio (no stocks were downgraded to this level over the period). Additionally, we also reviewed the fund's carbon footprint, carbon intensity and weighted average carbon intensity regularly over the period.
