BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Global Short-Dated High Yield Bond Fund

STERLING Z (ACC.) (HEDGED) (ISIN: IE00BJ4KW573)

a sub-fund of BNY Mellon Global Funds, plc. This Fund is managed by BNY Mellon Fund Management (Luxembourg) S.A.

Objectives and Investment Policy

OBJECTIVE

To deliver positive returns greater than the Cash Benchmark SOFR (90-day compounded) on a 3 year rolling basis.

POLICY

The Fund will:

- invest the majority (over 50%) of its Net Asset Value (NAV) in a portfolio of high yielding bonds that are short dated (mature or are expected to mature within approximately 3 years) with no geographical, industry or sector focus;
- invest in debt and debt related securities which may be investment grade quality, sub investment grade quality (lower than BBB- at the date of purchase as rated by Standard & Poor's or equivalent rating agencies) or unrated;
- invest on a long and short basis;
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income;
- promote environmental and social characteristics pursuant to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"); and
- invest at least 5% of its Net Asset Value (NAV) in issuers that meet the definition of sustainable investment under SFDR and exclude issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental and/or social perspective. All corporate issuers in which investments are made follow good governance practices.

The Fund may:

- invest more than 20% of its Net Asset Value (NAV) in emerging markets;
- invest without limitation in sub-investment grade or unrated securities;

- invest up to 10% of its Net Asset Value (NAV) in other collective investment schemes;
- invest up to 10% of its Net Asset Value (NAV) in unsecured loan participations and/or loan assignments;
- invest up to 10% of its Net Asset Value (NAV) in aggregate in transferable securities or money market instruments which are not admitted to or dealt in on an Eligible Market, in accordance with the UCITS Regulations; and
- invest a majority of its Net Asset Value (NAV) in cash, liquid or near cash assets in order to protect the value of the Fund.

Benchmark: The Fund will measure its performance against SOFR (90-day compounded) (the "Cash Benchmark"). SOFR (the Secured Overnight Financing Rate) is a broad measure of the cost of borrowing cash overnight collateralised by U.S. Treasuries and is administered by the New York Federal Reserve. The Cash Benchmark is used as a target against which to measure its performance on a rolling annualised 3-year basis, before fees. The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies disclosed in the Prospectus.

OTHER INFORMATION

Share Class Hedging: The Fund's base currency is USD whereas this share class currency is GBP. In order to reduce the risk of exchange rate movements between the share class currency and the base currency, a hedging strategy is used, although its outcome is not guaranteed.

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (Irish time) on each business day in Ireland. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 200,000,000.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. As this Fund has less than 5 years performance data available, it is based on simulated volatility. It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 4 because its simulated historical value has shown moderate volatility. With a Fund rating of 4, you have a moderate risk of losing money but your chance for gains is also moderate.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

China Interbank Bond Market and Bond Connect risk: The Fund may invest in China interbank bond market through connection between the related Mainland and Hong Kong financial infrastructure institutions. These may be subject to regulatory changes, settlement risk and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

Geographic Concentration Risk: Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Changes in Interest Rates & Inflation Risk: Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.

Credit Ratings and Unrated Securities Risk: Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.

Credit Risk: The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.

Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.

Liquidity Risk: The Fund may not always find another party willing to purchase an asset that the Fund wants to sell which could impact the Fund's ability to sell the asset or to sell the asset at its current value.

Share Class Hedging Risk: The hedging strategy is used to reduce the impact of exchange rate movements between the share class currency and the base currency. It may not completely achieve this due to factors such as interest rate differentials.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

Environmental, Social and Governance (ESG) Investment Approach Risk: The Fund follows an ESG investment approach. This means factors other than financial performance are considered as part of the investment process. This carries the risk that the Fund's performance may be negatively impacted due to restrictions placed on its exposure to certain sectors or types of investments. The approach taken may not

reflect the opinions of any particular investor. In addition, in following an ESG investment approach, the Fund is dependent upon information and data from third parties (which may include providers for research reports, screenings, ratings and/or analysis such as index providers

and consultants). Such information or data may be incomplete, inaccurate or inconsistent.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
