INVESTMENT POLICY

The Company is a Venture Capital Trust and the investment policy is intended to produce a regular and predictable dividend stream with an appreciation in capital value.

Investment policy

The Company will invest in a broad portfolio of higher growth businesses across a variety of sectors of the UK economy including higher risk technology companies. Allocation of assets will be determined by the investment opportunities which become available but efforts will be made to ensure that the portfolio is diversified both in terms of sector and stage of maturity of company.

Funds held pending investment or for liquidity purposes are held as cash on deposit or similar instruments with banks or other financial institutions with high credit ratings assigned by international credit rating agencies.

Risk diversification and maximum exposures

Risk is spread by investing in a number of different businesses within venture capital trust qualifying industry sectors using a mixture of securities. The maximum amount which the Company will invest in a single portfolio company is 15% of the Company's assets at cost, thus ensuring a spread of investment risk. The value of an individual investment may increase over time as a result of trading progress and it is possible that it may grow in value to a point where it represents a significantly higher proportion of total assets prior to a realisation opportunity being available.

The Company's maximum exposure in relation to gearing is restricted to the amount equal to its adjusted capital and reserves.

INTERIM MANAGEMENT REPORT

Fiona Wollocombe
Chairman

Introduction

In the six months to 30 June 2023, the Company generated a total return of 0.81 pence per share, representing a 3.9% return on opening NAV. During the period, the Company continued to face a difficult macroeconomic and geopolitical backdrop, including persistent high levels of inflation, rising interest rates and volatility of quoted technology company valuations. Despite this, the Board is encouraged by the positive total return generated by the Company and optimistic that many of the portfolio companies will continue to grow.

Valuations and results

The total gain on investments for the six-month period was £4.8 million (30 June 2022: gain of £3.5 million). The key movement to the total gain was Quantexa increasing its value by £6.1 million following an externally led \$129 million Series E fundraising, which completed in April 2023. The latest funding round made it the first UK “Unicorn” of 2023 (a private company valuation over \$1 billion) and the Board is excited about its future prospects.

Other gains in the period included Ophelos, Accelex Technology and Proveca, which resulted in a combined uplift of £1.2 million to the portfolio. These gains were partially offset by write downs in Black Swan Data, which decreased by £1.1 million, Neurofenix by £0.3 million and Locum’s Nest by £0.2 million.

The NAV per share has increased to 21.28 pence per share (30 June 2022: 23.07 pence per share; 31 December 2022: 20.95 pence per share).

Our top 3 portfolio companies, being Quantexa, Proveca and Egress Software Technologies, now account for 28.7% of the Company’s NAV (30 June 2022: 22.5%; 31 December 2022: 24.2%).

Further details of the portfolio of investments and investment realisations can be found on pages 12 to 14.

Dividends and results

In line with our dividend policy targeting around 5% of NAV per annum the Company paid a first dividend of 0.52 pence per share during the period to 30 June 2023 (30 June 2022: 0.58 pence per share). The Company will pay a second dividend for the financial year ending 31 December 2023 of 0.53 pence per share on 31 October 2023 to shareholders on the register on 6 October 2023, being 2.5% of the 30 June 2023 NAV.

This will bring the total regular dividends paid for the year ending 31 December 2023 to 1.05 pence per share, which equates to a 5.0% yield on the opening NAV of 20.95 pence per share, in line with the Board’s dividend target.

Investment activity

Given the economic uncertainty of high inflation and rising interest rates, in addition to the 15 new investments the Company made in 2022, the first half of 2023 has been more subdued in terms of new investment activity. During the period the Company has invested £0.9 million in existing portfolio companies, the largest being £0.5 million into Proveca, which specialises in the reformulation of medicines for children, £0.2 million into Seldon Technologies, which enables enterprises to deploy Machine Learning models in production, and £0.2 million into Symetrica, a designer and manufacturer of radiation detection equipment.

Investment activity has started to increase after the period end, with £1.8 million invested into new and follow-on investments since 30 June 2023.

Portfolio sector allocation

The following pie chart outlines the different sectors in which the Company's assets, at carrying value, were invested at 30 June 2023.

Investment portfolio by sector

- Cash and other net assets 26% (26%)
- Healthcare (including digital healthcare) 21% (22%)
- Renewable energy 10% (10%)
- FinTech 18% (14%)
- Software & technology 24% (27%)
- Business services and other 1% (1%)

Board composition and succession planning

As part of the Board's succession planning, we are pleased to welcome Simon Thorpe as a Director with effect from 1 September 2023. Simon is a qualified Chartered Accountant and former chairman, and current Director, of Cambridge Angels with extensive experience of analysing and investing in early-stage public and private companies in the technology and technology enabled healthcare sectors. His previous roles include him working as the Chief Operating Officer for European Equity Research and UBS Global Equity Research.

The Nomination Committee continually monitors and reviews the membership of the Board based on the spread of skills and contributions of its members, as well as looking at succession planning requirements of the Company.

Share buy-backs

It remains the Board's primary objective to maintain sufficient resources for investment in new and existing portfolio companies and for the continued payment of dividends to shareholders. The Board's policy is to buy-back shares in the market, subject to the overall constraint that such purchases are in the Company's interest. It is the Board's intention for such buy-backs to be in the region of a 5% discount to net asset value, so far as market conditions and liquidity permit. The Board continues to review the use of buy-backs and is satisfied that it is an important means of providing market liquidity for shareholders.

Transactions with the Manager

Details of transactions with the Manager for the reporting period can be found in note 4. Details of related party transactions can be found in note 10.

Risks and uncertainties

The Company faces a number of significant risks including rising interest rates, persistent high levels of inflation, geopolitical tensions, and an expected period of economic stagnation, or even recession, in the UK.

Our investment portfolio, while concentrated mainly in the technology and healthcare sectors, remains diversified in terms of both sub-sector and stage of maturity.

In accordance with Disclosure Guidance and Transparency Rule (DTR) 4.2.7, the Board confirms that the principal risks and uncertainties facing the Company have not materially changed from those identified in the Annual Report and Financial Statements for the year ended 31 December 2022. The current high levels of inflation and geopolitical tensions have created heightened uncertainty, but has not changed the nature of the principal risks. The Board considers that the present processes for mitigating those risks remain appropriate.

The principal risks faced by the Company are:

- Investment, performance, technology and valuation risk;
- VCT approval risk;
- Regulatory and compliance risk;
- Operational and internal control risk;
- Cyber and data security risk;
- Economic, political and social risk;
- Environmental, social and governance ("ESG") risk; and
- Liquidity risk.

A detailed explanation of the principal risks facing the Company can be found in the Annual Report and Financial Statements for the year ended 31 December 2022 on pages 23 to 26, copies of which are available on the Company's webpage on the Manager's website at www.albion.capital/funds/KAY under the 'Financial Reports and Circulars' section.

Albion VCTs Top Up Offer

As announced in the Annual Report and Financial Statements for the year ended 31 December 2022, the Board was pleased the 2022/23 Offer was fully subscribed and closed, having raised £8 million.

The proceeds are being used to provide support to our existing portfolio companies and to enable us to take advantage of new and exciting investment opportunities as they arise. Details on the share allotments during the period can be found in note 7.

Shareholder seminar

The Board is pleased to report that the next Shareholder Seminar will be held in person at the Royal College of Surgeons, Lincoln's Inn Field, London on 15 November 2023 and the Board will be delighted to see as many shareholders as possible at the event. The Board and Manager are keen to interact with shareholders and look forward to sharing with you further portfolio updates, as well as answering any questions. Places are limited and to reserve a place please email info@albion.capital with subject heading "Shareholder Seminar" and include your full name. You will receive an email confirmation of your place, subject to availability.

Move to electronic communications

The Board wishes to minimise the environmental impact of how the Company communicates with its shareholders. With this in mind, those shareholders that continue to receive physical copies of the Annual Report and other documentation, will receive a letter alongside this half-yearly financial report explaining the forthcoming move to electronic communications.

Prospects

The Board is cautious of the risks and uncertainties referred to above, but are assured that the portfolio remains well diversified, with companies at different stages of maturity and targeted at sectors such as healthcare, mission critical software and a minimal exposure to consumer expenditure. We believe that these sectors can continue to provide opportunities for resilient growth, yielding positive results for the Company and its shareholders in the longer-term.

*These reserves include an amount of £23,428,000 (30 June 2022: £32,896,000; 31 December 2022: £22,036,000) which is considered distributable. Over the next three years an additional £25,029,000 will become distributable. This is due to the HMRC requirement that the Company cannot use capital raised in the past three years to make a payment or distribution to shareholders.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

1. Accounting policies

Basis of preparation

The condensed Financial Statements have been prepared in accordance with applicable United Kingdom law and accounting standards, including Financial Reporting Standard 102 (“FRS 102”), Financial Reporting Standard 104 – Interim Financial Reporting (“FRS 104”), and with the Statement of Recommended Practice “Financial Statements of Investment Trust Companies and Venture Capital Trusts” (“SORP”) issued by The Association of Investment Companies (“AIC”). The Financial Statements have been prepared on a going concern basis.

The preparation of the Financial Statements requires management to make judgements and estimates that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The most critical estimates and judgements relate to the determination of carrying value of investments at fair value through profit and loss (“FVTPL”) in accordance with FRS 102 sections 11 and 12. The Company values investments by following the International Private Equity and Venture Capital Valuation (“IPEV”) Guidelines as updated in 2022 and further detail on the valuation techniques used are outlined below.

Company information can be found on page 4.

Fixed asset investments

The Company’s business is investing in financial assets with a view to profiting from their total return in the form of income and capital growth. This portfolio of financial assets is managed and its performance evaluated on a fair value basis, in accordance with a documented investment policy, and information about the portfolio is provided internally on that basis to the Board.

In accordance with the requirements of FRS 102, those undertakings in which the Company holds more than 20% of the equity as part of an investment portfolio are not accounted for using the equity method. In these circumstances the investment is measured at FVTPL.

Upon initial recognition (using trade date accounting) investments, including loan stock, are designated by the Company as FVTPL and are included at their initial fair value, which is cost (excluding expenses incidental to the acquisition which are written off to the Income statement).

Subsequently, the investments are valued at ‘fair value’, which is measured as follows:

- Investments listed on recognised exchanges are valued at their bid prices at the end of the accounting period or otherwise at fair value based on published price quotations.
- Unquoted investments, where there is not an active market, are valued using an appropriate valuation technique in accordance with the IPEV Guidelines. Indicators of fair value are derived using established methodologies including earnings multiples, revenue multiples, the level of third party offers received, cost or price of recent investment rounds, net assets and industry valuation benchmarks. Where price of recent investment is used as a starting point for estimating fair value at subsequent measurement dates, this has been benchmarked using an appropriate valuation technique permitted by the IPEV guidelines.
- In situations where cost or price of recent investment is used, consideration is given to the circumstances of the portfolio company since that date in determining fair value. This includes consideration of whether there is any evidence of deterioration or strong definable evidence of an increase in value. In the absence of these indicators,

other valuation techniques are employed to conclude on the fair value as at the measurement date. Examples of events or changes that could indicate a diminution include:

- the performance and/or prospects of the underlying business are significantly below the expectations on which the investment was based;
- a significant adverse change either in the portfolio company's business or in the technological, market, economic, legal or regulatory environment in which the business operates; or
- market conditions have deteriorated, which may be indicated by a fall in the share prices of quoted businesses operating in the same or related sectors.

Investments are recognised as financial assets on legal completion of the investment contract and are de-recognised on legal completion of the sale of an investment.

Dividend income is not recognised as part of the fair value movement of an investment, but is recognised separately as investment income through the Income statement when a share becomes ex-dividend.

Current assets and payables

Receivables (including debtors due after more than one year), payables and cash are carried at amortised cost, in accordance with FRS 102. Deferred consideration meets the definition of a financing transaction held at amortised cost, and interest will be recognised through capital over the credit period using the effective interest method. There are no financial liabilities other than payables.

Investment income

Dividend income

Dividend income is included in revenue when the investment is quoted ex-dividend.

Unquoted loan stock income

Fixed returns on non-equity shares and debt securities are recognised when the Company's right to receive payment and expect settlement is established. Where interest is rolled up and/or payable at redemption then it is recognised as income unless there is reasonable doubt as to its receipt.

Fixed term funds income

Funds income is recognised on an accruals basis using the agreed rate of interest.

Bank deposit income

Interest income is recognised on an accruals basis using the rate of interest agreed with the bank.

Investment management fee, performance incentive fee and other expenses

All expenses have been accounted for on an accruals basis. Expenses are charged through the other distributable reserve except the following which are charged through the realised capital reserve:

- 90% of management fees and 100% of performance incentive fees if any, are allocated to the realised capital reserve; and
- expenses which are incidental to the purchase or disposal of an investment are charged through the realised capital reserve.

Taxation

Taxation is applied on a current basis in accordance with FRS 102. Current tax is tax payable (refundable) in respect of the taxable profit (tax loss) for the current period or past reporting periods using the tax rates and laws that have been enacted or substantively enacted at the financial reporting date. Taxation associated with capital expenses is applied in accordance with the SORP.

Deferred tax is provided in full on all timing differences at the reporting date. Timing differences are differences between taxable profits and total comprehensive income as stated in the financial statements that arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in the financial statements. As a VCT the Company has an exemption from tax on capital gains. The Company intends to continue meeting the conditions required to obtain approval as a VCT in the foreseeable future. The Company therefore, should have no material deferred tax timing differences arising in respect of the revaluation or disposal of investments and the Company has not provided for any deferred tax.

Share capital and reserves

Called-up share capital

This reserve accounts for the nominal value of the shares.

Share premium

This reserve accounts for the difference between the price paid for the Company's shares and the nominal value of those shares, less issue costs.

Capital redemption reserve

This reserve accounts for amounts by which the issued share capital is diminished through the repurchase and cancellation of the Company's own shares.

Unrealised capital reserve

Increases and decreases in the valuation of investments held at the period end against cost are included in this reserve.

Realised capital reserve

The following are disclosed in this reserve:

- gains and losses compared to cost on the realisation of investments or permanent diminution in value (including gains recognised on the realisation of investment where consideration is deferred and not distributable as a matter of law);
- finance income in respect of the unwinding of the discount on deferred consideration that is not distributable as a matter of law;
- expenses, together with the related taxation effect, charged in accordance with the above policies; and
- dividends paid to equity holders where paid out by capital.

Other distributable reserve

The special reserve, treasury share reserve and the revenue reserve were combined in 2012 to form a single reserve named other distributable reserve.

This reserve accounts for movements from the revenue column of the Income statement, the payment of dividends, the buy-back of shares and other non-capital realised movements.

Dividends

Dividends by the Company are accounted for in the period in which the dividend is paid or approved at the Annual General Meeting.

Segmental reporting

The Directors are of the opinion that the Company is engaged in a single operating segment of business, being investment in smaller companies principally based in the UK.

8. Commitments, contingencies and guarantees

As at 30 June 2023, the Company had no financial commitments (30 June 2022: £nil; 31 December 2022: £nil).

There were no contingent liabilities or guarantees given by the Company as at 30 June 2023 (30 June 2022: £nil; 31 December 2022: £nil).

9. Post balance sheet events

Since 30 June 2023, there have not been any material post balance sheet events.

10. Related party disclosures

Other than transactions with the Manager as disclosed in note 4, there are no related party transactions or balances requiring disclosure.

11. Going concern

The Board has conducted a detailed assessment of the Company's ability to meet its liabilities as they fall due. Cash flow forecasts are updated and discussed quarterly at Board level and have been stress tested to allow for the forecasted impact of the current economic climate and increasingly volatile geopolitical backdrop. The Board has revisited and updated their assessment of liquidity risk and concluded that it remains unchanged since the last Annual Report and Financial Statements. Further details can be found on pages 87 and 88 of those accounts.

The portfolio of investments is diversified in terms of sector and the major cash outflows of the Company (namely investments, dividends and share buy-backs) are within the Company's control. Accordingly, after making diligent enquiries, the Directors have a reasonable expectation that the Company has adequate cash and liquid resources to continue in operational existence for the foreseeable future. For this reason, the Directors have adopted the going concern basis in preparing this Half-yearly Financial Report and this is in accordance with the Guidance on Risk Management, Internal Control and Related Financial and Business Reporting issued by the Financial Reporting Council in September 2014, and the subsequent updated Going concern, risk and viability guidance issued by the FRC in 2021.

12. Other information

The information set out in this Half-yearly Financial Report does not constitute the Company's statutory accounts within the terms of section 434 of the Companies Act 2006 for the periods ended 30 June 2023 and 30 June 2022, and is unaudited. The information for the year ended 31 December 2022 does not constitute statutory accounts within the terms of section 434 of the Companies Act 2006 and is derived from the statutory accounts for that financial year, which have been delivered to the Registrar of Companies. The Auditor reported on those accounts; their report was unqualified and did not contain a statement under s498 (2) or (3) of the Companies Act 2006.

13. Publication

This Half-yearly Financial Report is being sent to shareholders and copies will be made available to the public at the registered office of the Company, Companies House, the National Storage Mechanism and also electronically at www.albion.capital/funds/KAY, where the Report can be accessed from the 'Financial Reports and Circulars' section.
