The Fund seeks long-term capital appreciation.

Investment Policy

- The Fund will invest in shares of small companies which are headquartered worldwide, including emerging market countries.
- The Fund will invest in companies that the portfolio managers believe are high quality due to their financial solidity and ability to generate strong business returns.
- The Fund will invest in stocks which the portfolio managers believe are attractively valued.
- The portfolio managers make their investment decisions based on analysis of individual companies rather than wider economic forecasts and maintain investments for the long term. The Fund will invest a maximum of 60% of the fund's net asset value in companies headquartered in the United States. Under normal market circumstances, the fund will invest at least 40% of its net asset value in companies headquartered in at least three different countries outside of the United States. • **Benchmark:** MSCI ACWI Small Cap Index

• **Manager's Discretion:** The Fund is actively managed and the investment manager is not constrained by the benchmark. The Fund uses the benchmark for performance comparison purposes only. While many of the fund's investments will be components of the benchmark, the weightings of the fund's holdings may differ materially from the weightings in the benchmark. The Fund will also invest in securities that are not included in the benchmark. The Fund's percentage exposures to sectors and industries may differ materially from those of the benchmark. There are no risk constraints related to the benchmark that limit the management of the fund.

Share Class Currency: GBP

• **Transaction Costs:** The Fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund invests mainly in shares of small cap US companies from various sectors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investment in smaller company shares: The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.
