M&G Better Health Solutions Fund

a sub-fund of M&G Investment Funds (10)

Sterling Class I – Accumulation shares ISIN no. GB00BKVD2P62

Managed by M&G Securities Limited

Objective and investment policy

Objective:

The fund aims to:

- provide a combination of capital growth and income to deliver a return net of the Ongoing Charges Figure that is higher than the MSCI World Index over any five year period; and
- invest in companies that deliver solutions to the challenge of better health and well-being.

Core investment: At least 80% of the fund is invested in the shares of companies, across any sector and of any size, that are based, or do most of their business, in developed markets. The fund may also invest in the shares of emerging market companies. The fund is concentrated and usually holds shares in fewer than 40 companies.

The fund invests in securities that meet the ESG Criteria and Impact Criteria. Norms, sector and/or values-based exclusions apply to investments.

Other investments: The fund may also invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: To reduce risk and costs.

Strategy in brief: The fund invests over the long term in companies delivering solutions to better health and well-being based on M&G's proprietary impact assessment methodology alongside a financial return. ESG and impact considerations are fundamental in the stock selection process.

The fund uses the UN Sustainable Development Goals framework, investing in companies focused on areas including health and well-being; zero hunger; clean water and sanitation; sustainable cities and communities; responsible consumption and production.

Benchmark: MSCI World Index

The benchmark is the target against which the fund's financial performance can be measured. The index has been chosen as benchmark as it best reflects the fund's financial objective. The benchmark does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents, and as a result the fund's performance may deviate materially from the benchmark.

For unhedged and currency hedged share classes, the benchmark is shown in the share class currency.

Risk and reward profile

■ The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its simulated Net Asset Value has shown high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- The fund holds a small number of investments, and therefore a fall in the value of a single investment may have a greater impact than if it held a larger number of investments.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.
- ESG information from third-party data providers may be incomplete, inaccurate or unavailable. There is a risk that the investment manager may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the portfolio of the fund.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.co.uk/literature
